MOVER:	Christopher Cinella, President
AYES:	Eccles, Garipay, Grigoraitis, Jamaleddine, Karamcheti, MacMaster, Migliorelli, Stewart, Williams, Cinella
ABSENT:	John Obremski

III. PUBLIC COMMENT

Motion: Public Comment

President Cinella moves by unanimous consent to open public comment. No objection.

In Person
Ms. Connors of 49 Court Street, Wakefield, MA speaks regarding LIC 2022-12 and describes business interactions and a MAOM hosted Love for Lou fundraiser event and shares concerns of business practices. Asks that no license is granted.

Ms. Barry of 49 Vine Street, Saugus, MA speaks regarding LIC 2022-12 and the MAOM hosted Love for Lou fundraiser event and donations. She was at the door volunteering at the event and has concerns regarding recordkeeping, disbursement of money.

Ms. Peevy, proprietor of Buckalew's, expresses concern regarding the license process and is hopeful the new business development liaison in the mayor?s office will help businesses. City doesn't address things when they should and then decides to shut a business down. There should be clear process for complaints and a way to address things. How does government get involved in which business should/should not be able to operate?

Ms. Bates, 30-year Melrose homeowner, relays issue with Glitterati prom gowns valued at approximately $2,2K and ensuing dissatisfaction concern regarding garment retrieval or payment process with MAOM, LIC 2022-12.

President Cinella moves by unanimous consent to close public comment. No objection.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

RESULT:	**PASSED [UNANIMOUS]**
MOVER:	Christopher Cinella, President
AYES:	Eccles, Garipay, Grigoraitis, Jamaleddine, Karamcheti, MacMaster, Migliorelli, Obremski, Stewart, Williams, Cinella

IV. PUBLIC HEARINGS

8:00 PM

LIC 2022-11 Article II, section 93-5, Special License to house four (4) dogs at 58 Trenton Street, Melrose

Order 2022-123: Water Enterprise Operating Budget for Fiscal 2023 in the amount of $6,119,429 (Six Million, One Hundred Nineteen Thousand, Four Hundred Twenty-Nine Dollars).

Order 2022-124: Sewer Enterprise Operating Budget for Fiscal 2023 in the amount of $8,793,909 (Eight Million, Seven Hundred Ninety-Three Thousand, Nine Hundred and Nine Dollars).

8:15 PM

Order 2022-119: City of Melrose Operating Budget for Fiscal Year 2023 in the amount of $95,256,080 (Ninety Five Million, Two Hundred Fifty-Six Thousand and Eighty Dollars)

Motion: 8 PM Public Hearing

Motion: Open the 8 PM Public Hearing
By: Councilor MacMaster, Second: Councilor Williams - motion carried.
The Public Hearing commences at 8:00 p.m.

J. Pelrine of Howard St comments on 2022-124 and questions personnel charge-offs to the water line that now appear to be in double digits. How much money does this represent?

RESULT:	**PASSED [UNANIMOUS]**
MOVER:	Shawn M. MacMaster, Ward 5
SECONDER:	Ryan Williams, Ward 7
AYES:	Eccles, Garipay, Grigoraitis, Jamaleddine, Karamcheti, MacMaster, Migliorelli, Obremski, Stewart, Williams, Cinella

Motion: 8:15 PM Public Hearing

8:15 PM

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Order 2022-119: City of Melrose Operating Budget for Fiscal Year 2023 in the amount of $95,256,080 (Ninety Five Million, Two Hundred Fifty-Six Thousand and Eighty Dollars)

Motion: Open the 8:15 PM Public Hearing
By: Councilor Grigoraitis, Second: Councilor Migliorelli- motion carried.

The Public Hearing commences at 8:15 p.m.

Also offers comments on 2022-119 and questions water/sewer line $1.7M transfers to "said accounts" -there is no description of the accounts. Queries how can we have that much money at the end of the year? Are we being overcharged? The funds should go back to rate payers, and we should have no rate hike.

Motion: Close the 8:15 PM Public Hearing
By: Councilor Grigoraitis, Second: Councilor Migliorelli - motion carried.

The Public Hearing closes at 8:19 p.m.

RESULT:	**PASSED [UNANIMOUS]**
MOVER:	Jen Grigoraitis, Ward 6
SECONDER:	Leila Migliorelli, At-Large
AYES:	Eccles, Garipay, Grigoraitis, Jamaleddine, Karamcheti, MacMaster, Migliorelli, Obremski, Stewart, Williams, Cinella

Suspend the Rules

President Cinella moves to suspend the rules of order by unanimous consent. No objection.

1. **LIC-2022-12 :** License: Application for Madison Ave of Melrose (MAOM Holding Company)

Attorney Gill representing the secondhand apparel shop proprietor, Ms. Murphy, provides a statement. He feels the proprietor has been slandered and maligned. States Ms. Wright has been in business since 2017 and he questions the secondhand dealer licensing process. Says issues like these are usually handled in court or resolved by the parties. Business complaints should be resolved in court by evidence and witness cross-examined. He describes meeting with Chief Lyle for more details regarding five complaints and the investigation by Melrose police. Says there was a finding of no criminal involvement. Investigating officer advised complainants they could pursue civil complaints. Says Detective McNamara found no criminal finding and texted Ms. Murphy that no issues were found.

Gill met with Chief Lyle to determine how to resolve the issues and was advised to make complainants whole. Questions if the council was in the business of deciding what a jury or judge should decide - effectively denying a license and thus putting someone out of business? Says the proper forum to adjudicate this matter would be civil court. Says emotions need to be tempered and asks for consideration from the council. Gill agrees the proprietor could improve her business practices, policies and procedures and references a consignment policy in Massachusetts - not in the law - that if unsold goods are not picked up within 90 days, then the goods belong to the store. Indicates contracts aren't required by law. Indicates the prom dresses (referred to by a resident at public comment) were donated to DCF as the proprietor is product of the foster care system with close ties to the DCFS adolescent program. Proprietor has an online business. Gill asks for opportunity to seek a resolution with the complainants and adds that he has never seen a business dragged into oblivion due to unhappy customers.

Questions from Council:

Councilor Jamaleddine says there is a big difference between unhappy clients and the experiences relayed during public comment. This is not about someone walking into the store unhappy with what they purchased; it is about family not given time to grieve. Apologizes for the city not handling the matter appropriately and notes to the Buckalews proprietor (in attendance) that the

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

council supports good businesses. Asks the applicant how this will be fixed? Attorney Gill says he can try but this may not be fixable.

Point of order by Councilor MacMaster -this is not a back-and-forth discussion with Attorney Gill. This is the council's opportunity to ask questions and notes Councilor Jamaleddine hasn't been able to complete her questions because the attorney has interjected twice.

Councilor MacMaster. Confirms the council is not here because someone came to the City Clerk or Police Department but rather because they are the licensing authority reviewing the application. He asks how many formal complaints have been filed regarding the business practices of Madison Ave, either by phone, or in person? Chief Lyle says several including one on Sunday. Councilor MacMaster asks if all the complainants know the application is being reviewed? Chief Lyle says he doesn't know if they are aware but believes some audience members picked it up on social media. Councilor MacMaster questions whether the Chief has any reason to believe, based on filed reports, that complainants are coordinating with each other as Attorney Gill suggested. Chief Lyle states social media seems to be how individuals are made aware. Councilor MacMaster reviews the Chief's employment history (chief for 15 years and an officer for a total of 36 years). Asks if based on his experience whether it is unusual for a crime victim to delay filing a report and asks if it is possible there are others that choose not to report what happened. What concerns Councilor MacMaster, based on information provided by multiple people, is that this is not an isolated allegation. There is probable cause to believe there was an intent to defraud members of the public by false pretenses. He asks the Chief if there a reason this wasn't brought before a clerk magistrate in Malden District Court? Chief Lyle responds there was a complaint before the district attorney's office and that was denied. Councilor MacMaster asks if the district attorney was made aware of the other complaints? Chief said he does not know - most of the complaints are one and done. Councilor encourages referring this to the district attorney's office based on multiple incidents beginning in 2019 up through this past Sunday.

Councilor MacMaster agrees with Attorney Gill that this is not a court of law, the councilors aren't judges or a jury but there is a consumer protection matter that is of public interest. Takes exception to the characterization of a witch hunt with torches and pitchforks because what is before council is a business application and members of the public raising concerns of consumer protection. He was deferential to the request for immediate consideration and notes that the council did not have to allow the matter this evening. He objects to the characterization that council has no jurisdiction - the council has jurisdiction over licenses. There is a level of oversight at the municipal level.

Councilor Migliorelli feels horrible for this situation. Is irritated that matter

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

was brought forth necessitating characterizations of a business owner and members of the public sharing painful stories since the council can't offer anything in return. The council is not a judge or a jury. This is not a court, and this is not the appropriate avenue. These complaints need to be handled through appropriate channels. Disagrees with Councilor MacMaster that this is the appropriate venue.

Councilor Grigoraitis says this process is unfair to everyone present. Concerned with level of decision making without thought to the consequences. Notes most of this council has been in place since 2019 and in reading the city code (providing direction for licensing) this is an annual May license to be presented to council. She says this is the first time most of the body has seen this type of license and is taken aback by the city solicitor's decision to issue a cease and desist on a license the municipality has not been consistently tracking or reissuing. The council is not able to make any of the complainants whole. The police chief's decision was to treat the complaints singularly rather than as a pattern of crime filed with D. A's office. Chief Lyle indicates he is in attendance solely on the license denial. Councilor Grigoraitis notes criminal matters are pursued by the D.A. versus civil complaints and chapter 93A attorney general/small claims court matters. She is does not want emotions to rule a licensing decision and recognizes that through no fault its own, the council has not been doing their job because for the past couple of years licenses have not been brought forward.

Councilor Eccles asks Chief Lyle whether he has petitioned for suspension or revocation of this applicants' license. Chief Lyle says the business never had a license to revoke.

Councilor Garipay feels frustrated that the administration did not sit down with the business and try to work it out and instead it was brought to council. Questions where do we stop? Must be careful where we (council) fall on this issue.

Councilor Migliorelli asks how were attendees notified of matter? Chief Lyle states he called the five complainants to determine if the issues were resolved and they asked.

Councilor Stewart asks if the parties were able to resolve the issues would that change the denial. Chief Lyle explains he told Attorney Gill if the parties were made whole it would be resolved. Councilor Stewart continues that it is difficult to decide tonight so to allow time for resolution he moves to hold in council. This is seconded by Councilor MacMaster. On discussion Councilor Grigoraitis indicates the business has been closed since April and to hold would be unfair. Recognizes there are ongoing concerns including her own about how an Attorney and the Chief work out situations that usually involve a court. If there was a willingness to withdraw the motion, the council could

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

issue a temporary 90-day license bringing the matter through the summer so the business could participate in events held on Main Street. Gives the applicant ample time to resolve matters.

Councilor Stewart withdraws. Councilor MacMaster does not withdraw. On discussion, he has no concerns with issuing a temporary 90-day decision, but he has questions for city solicitor regarding cease and desist. Not comfortable without opportunity to ask questions. Councilor Eccles is favorable for 90-day temporary license but believes there may be cause for revocation. Councilor Grigoraitis moves for a temporary license and requests the presence of the City Solicitor at the September 12th council meeting. Councilor Karamcheti feels for the complainants but notes that the council is not looking to shut down businesses. Pursue the appropriate avenue. She hopes involved parties look at business policies and consider positive ways forward. Councilor Jamaleddine hopes applicant will reflect on what was heard and will improve business decisions. She is very support of Melrose businesses. Councilor Eccles notes something to consider is what a resolution of the issue looks like after 90 days -what does council want done in 90 days?

INFO-2022-6: Joint Meeting of the City Council and the School Committee to be held at 7:30 p.m. on Monday, May 16, 2022 on the financial condition of the City, revenue and expenditure forecasts, and other relevant information in preparation of the FY2023 Operating Budget

Mayor Brodeur speaks to the City's fiscal picture for 2023. Highlights include his continued responsible spending. Urges residents to watch the budget hearings that are about to begin. The priorities this year include the health and well-being of residents including growth and (re)development with an expanded reach of the newly renamed health and wellness department. He discusses ARPA opportunities, free cash requests and notes a focus on meeting the economic and social/emotional needs of residents. Looking to find additional ways to bring social connection and community mental health services. He will continue to support, enhance, and expand Melrose businesses as he looks to boost foot traffic downtown with live entertainment in open public spaces. Says we must have a commitment to a shared set of ethics to truly be one community open to all when referencing the recent racially motivated shooting in Buffalo, New York.

MEMORANDUM

Date: May 10, 2022

To: Melrose City Council

From: Elena Proakis Ellis, P.E., Director of Public Works
Sponsored by Mayor Paul Brodeur

Subject: Salt Shed Informational Order

The Melrose Department of Public Works' salt shed, constructed in the 1970s, is well beyond the end of its useful life and presents substantial hazards to both employees and to the public in its present shape. As discussed previously with the City Council in 2021 and 2020, the City needs to determine an alternative that allows us to demolish the existing salt shed as soon as possible with a plan in place for its replacement or a suitable alternative.

The DPW had bid our recommended design in 2021 with a construction bid price of approximately $1.44 million. The City Council did not approve the related borrowing order in 2021. Since the time has now elapsed for awarding that contract, we have put the design documents back out to bid, to obtain new pricing. Given the uncertainty in the construction industry, we did not feel confident that a bid price from 2021 could be used to accurately estimate the current construction costs. The bid opening is scheduled for late-May, and the contract would need to be executed within 30 days under the present bid language if we decide to proceed with seeking approval for that option.

We are simultaneously investigating other options, which we would like to present to the Council via this informational order, to allow the Council to ask questions and obtain additional information from both City staff and our consultants from Weston and Sampson. Based on the outcome of this discussion and the bid results, we will then determine whether to submit a borrowing order for consideration in early June.

Additional information will be submitted prior to the discussion before the Council for your consideration. We appreciate the opportunity to reopen this discussion and hopefully arrive at a preferred option that meets the needs of all involved.

Dear Mr. Brodeur,

Congratulations! We are pleased to inform you that the **Melrose Fire Department** has been awarded **$2,500.00** in funding from the Automated External Defibrillator Equipment Program offered by the Executive Office of Public Safety and Security's Office of Grants and Research (OGR).

If you have any questions, please feel free to email your grant point of contact Samantha Frongillo, at samantha.frongillo@mass.gov.

Once again, congratulations on your award and we look forward to working with you and your municipality on this important public safety initiative.

Sincerely,

Governor Charles D. Baker

Lt. Governor Karyn E. Polito

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Commonwealth of Massachusetts Executive Office of Public Safety and Security
Office of Grants & Research

FY22 Automated External Defibrillators Equipment Program
For Municipal Public Safety and First Responder Vehicles
Certifications and Assurances

In accordance with the Commonwealth of Massachusetts' FY22 appropriations, the Office of Grants and Research (OGR) is making available up to **$2,500** per AED requested for municipalities to purchase an Automated External Defibrillator (AED) for public safety and first responder vehicles. This initiative is being supported by state funds authorized by Chapter 24 of the Massachusetts Acts of 2021, An Act Making Appropriations for Fiscal Year 2022.

By submitting this application, the eligible applicant confirms the following:

- AED training has/will be completed by the receiving agency personnel;
- Requested AED is compatible with existing AEDs already in use within the municipality, if applicable;
- If the cost of the requested AED exceeds the award amount from the Office of Grants and Research under the AED Grant Program, then the municipality agrees to absorb the additional costs;
- If a grant award is received, the municipality will not incur costs until a final, counter-signed, executed contract is received from the Office of Grants and Research, confirming the official start date of the program; and
- Requested AED will be purchased and received by the AED Equipment Program's end date of May 31, 2022.

Signature of Official *The following must be completed and signed by a Municipal Official (Mayor/City or Town Manager/Select Board Chair), on behalf of the municipality submitting this application, in acknowledgment of the project requirements.*

As the Senior Municipal Authorizing Official for this City/Town, I am requesting grant funds from the Automated External Defibrillator (AED) Equipment Program, as administered by OGR. I have reviewed and approve the content contained in this application being submitted for consideration of funding and I agree to comply with the required program requirements listed above.

Municipality: Melrose **Department Selected to Receive AED:** Fire Dept.

Mayor

OFFICE OF THE MAYOR
City Hall, 562 Main Street
Melrose, Massachusetts 02176
Telephone - (781) 979-4440

May 12, 2022

Dear Honorable City Council and Melrose Community members,

Pursuant to M.G.L. c. 44 § 32 and § 6-3 of the Melrose City Charter, I respectfully submit for your consideration the City of Melrose's proposed operating budget for Fiscal Year 2023. With this letter, I hope to provide assurance to our community and the City Council that we have successfully managed, and will continue to manage, downturns of the economy such as the fiscal dips that we have overcome during the COVID-19 pandemic.

With that said, I am pleased to share the details of this year's proposed balanced budget with total estimated operating expenses of $95,256,808, representing a 4.7% increase over Fiscal Year 2022. Please also note that FY23 budgets have been adjusted to reflect a 53-week year, rather than a 52-week year.

A top priority of my administration is to guarantee the residents of Melrose that we will be able to successfully navigate any economic storm and maintain a stable level of services. The total FY23 Operating Budget accomplishes these objectives for both the City and the Melrose Public Schools.

This budget delivers on a commitment to our residents to:

- provide first-rate education by investing in our schools
- enhance quality of life by supporting seniors, continuing sustainability efforts, advancing diversity, equity, and inclusion in our community, and increasing support for community members experiencing mental health crisis
- use data to drive decision-making by investing in critical infrastructure such as IT
- and use what we learned through the pandemic to drive us forward.

We will propose a 4.18% budget increase for the School Department which represents an increase of over $1.4 million for Fiscal Year 2023, and we will meet the state mandated Net School Spending requirement. We will propose balanced budgets for the Water, Sewer, Mt. Hood and Ambulance Enterprise Funds.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

In developing the Fiscal Year 2023 Operating Budget, the City formulated the budget utilizing the following:

- new tax revenue resulting from the 2½ Tax Levy;
- approximately 75% of the New Growth realized last year;
- an increase in Net State Aid of $1,285,000 or just over 12.0%, (principally driven by revenues received through the New Student Opportunity Act in Chapter 70 Educational Aid);
- and we are also recognizing approximately 75% of the total Local Receipts revenue realized in the last full fiscal year.

In developing this strategic plan, we have also requested an increase in the amount to be deposited into the City's Stabilization Funds. We have requested $1,225,000 be deposited into these funds prior to July 1, 2022. This is a significant deposit into the City's Stabilization Funds and continues the administration's effort of insuring solid fiscal health.

If approved, in conjunction with our FY23 requested budgetary funding for the Stabilization and OPEB funds, over $8.4 million dollars will reside in our Stabilization Funds as of July 1, 2022 (the highest level in the City's history).

I am equally committed to increasing transparency in our City's finances. As Mayor, it is also my goal to inspire and increase civic engagement within our community. To achieve these goals, my office has once again collaborated with the Auditor's department to deliver an interactive FY23 budget tool. This interactive budget presentation makes the numbers clear, accessible, and digestible. Transparency is nothing without accessibility, and the budget tool allows for both.

Finally, I also offer the following pages as a supplement to the clear and accessible numbers you will find on our budget presentation's dashboard. These subsequent pages add context and texture to the services City departments provide.

Respectfully submitted,

Paul Brodeur
Mayor of Melrose

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

General Government

Executive Office of the Mayor

Mission & Overview

The Mayor is the Chief Executive Officer of the City of Melrose, elected by the voters at large every 4 years. The Mayor oversees all City operations and is responsible for appointing Department Heads, city officers, and the members of multi-member bodies (Boards & Commissions). Paul Brodeur is the 23rd Mayor of Melrose and assumed office on November 15, 2019.

Mayor's Office Departmental Organization

- His Honor, the Mayor
- Director of Strategic Initiatives & Communication (Mayor's Chief of Staff)
- Communications & Outreach Coordinator
- Director of Economic Recovery and Business Development

Changes from FY22 to FY23

Staffing Changes:

In FY22, the Mayor's Office welcomed back Senior volunteers, high school interns, and Property Tax Write-Off program participants to help staff the Mayor's Office front desk. In FY23, the Mayor's Office will be creating a part-time administrative position to provide a consistent level of staffing for the office, answer phones, coordinate volunteers, and provide billing and payroll administrative support for Mayor's Office and other departments on an as-needed basis.

In FY22, the Mayor added a new economic recovery and business development position to better serve the needs of small businesses and arts/culture sector non-profits. This is a grant funded position that will continue in FY23, and therefore does not affect the Mayor's Office operating budget.

What is the percentage increase in your budget over FY22?
The Mayor's Office budget increase for FY23 is 14.6%.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

What are the major changes to the Mayor's budget?

- Increase to Salary and Wages
- Increase in Dues and Membership

What are the reasons for these changes (major cost drivers)?

- Salary and Wages has been adjusted to reflect a 53-week year
- Salary and Wages for a PT administrative position has been added
- Dues and Membership had been underbudgeted for several years so was adjusted to reflect the actual cost of Metropolitan Area Planning Council (MAPC) dues for FY23

City Council

Mission & Overview

The City Council is the legislative branch of The City of Melrose consisting of eleven elected members, one from each of the seven wards (Ward Councilors), and four city-wide representatives (At-Large Councilors). All terms of office are two years.

The Council adopts ordinances, orders and resolutions; reviews and approves the annual budget; approves appropriations, appointments and other matters proposed by the Mayor. Annually, the Council selects one member to serve as President who then presides over the bimonthly Council meetings, decides committee assignments and assures that information and member discussion is conducted fairly and democratically. The Council is governed by its own Rules of Order and follows Roberts Rules of Order.

Department Organization

The City Council oversees the City Clerk's Office and the Clerk of Committees.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Clerk of Committees

Mission & Overview

The Clerk of Committees, an office of one, supports the eleven-member council. The Clerk oversees the posting of agendas for each of the seven committees he supports. He runs their meetings, be it remote or in person. He acts as a liaison between each department head and the Mayor. The Clerk oversees the Boards and Commissions operating under the Administrative Code. He provides guidance on applicable law and ensures that all members have received oaths and have met all onboarding standards.

Department Organization

- One Clerk

Why Do People Contact Us?

- For assistance with City services
- To determine their ward or who their ward councilor is
- To schedule Oaths of Office and Notary appointments

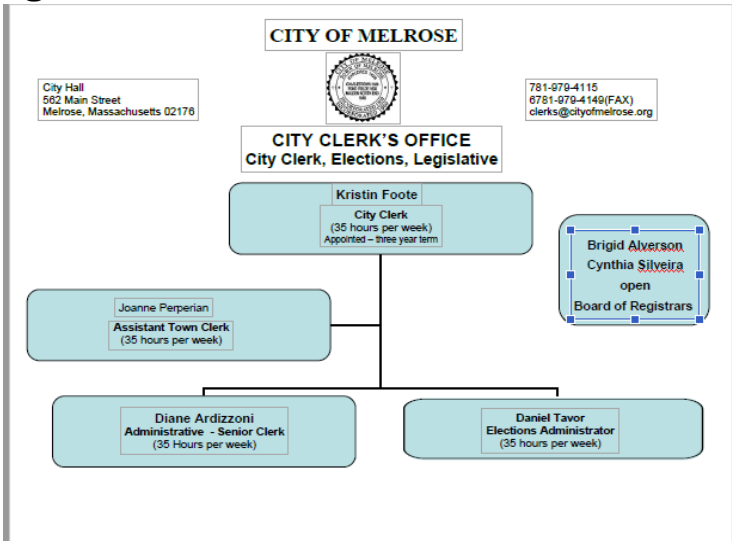
Clerk of Committees by the Numbers

- 75 Total meetings held from July 1, 2021 – May 6, 2022
  - 22 City Council Meetings
  - 17 Appropriations & Oversight Committee Meetings
  - 6 Finance Committee Meetings
  - 9 Health, Education & Welfare Committee Meetings
  - 7 Legal and Legislative Committee Meetings
  - 4 Protection and License Committee Meetings
  - 4 Public Service Committee Meetings
  - 6 Public Works Committee including one site visit
- Rendered assistance in 45 different requests for website updates
- Aided with Granicus / IQM2 in 15 different occasions.
- Hosted 2 workshops to assist with remote meeting setup and virtual public comment for other city departments.
- 47 Notaries performed

Little Known Facts/Common Misconceptions

- This office does not have your vital record!

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)



City Clerk & Elections

Mission & Overview

The City Clerk's office is a service-oriented office and typically the first stop in the building. As the official record keeper and clerk of the municipal organization, the City of Melrose, our mission is to maintain and preserve records in the best possible manner. We are here to serve the public by providing information in an efficient and timely manner. The City Clerk supports the City Council with meeting agenda preparation, producing minutes and clerking the meetings as well as posting meetings for all appointive bodies in the City. The Clerk ensures the City charter and administrative codes are kept current with new ordinances and zoning regulations. The City Clerk serves as a member of the Board of Registrars of Voters and supervises the Election Administrator. The City Clerk is also responsible for all functions related to elections.

As one of five Records Access Officers (RAO), the City Clerk is responsible for public records requests general in nature. The Clerk's office serves as custodian of all vital records (Birth, Death, & Marriage) dating back to the 1800s and oversees the issuance of common victualer, business, and dog licenses. The city clerk is also a justice of the peace and hosts many weddings in city hall.

Department Organization

Why Do People Contact Us?

- Business and dog licensing and raffle permits
- Vital records & historical research
- Getting married at city hall
- To register to vote

City Clerk by the Numbers:

- 18 Vital Records Issued per day on average
- 207 Marriage Intentions (previous staff elevated the FY 22 figure – there were 145 intentions)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- 57 Weddings Performed
- 124 New Business Certificates
- 36 Common Victualer Licenses issued
- 1 special election for the Northeast Vocation school building vote
- 68 Election Day Poll Workers
- 15,089 City Census Forms Mailed

Little Known Facts

- The Clerk's Office issues fortune teller licenses.
- We are responsible for over a century's worth of public records

Goals for FY23

- Having met the 25% paper reduction goal of FY22, continue this by enhancing online services.
- Respond to customer request to increase cloud-based transaction options to enhance resident access. This workflow has increased staff productivity and efficiency.
- Conduct a comprehensive review of the charter and administrative code to create a calendar noting stated deadlines.

What is the percentage increase in your budget over FY22?

The City Clerk's budget changes by 5.96% and the Election/Registrar changes by 7.51%

What are the major changes to your budget?

Clerk - lines increased: overtime, public hearing notices, printing, recodification, paper. Elections – supplies; printing, postage

What are the reasons for these changes (major cost drivers)?

- Permanent changes to the fall elections process including the covid accommodations, changes to the administrative code/charter, increases cost of supplies like paper, replacing broken time/date stamp, 14 retractable banners for polling identification, re-precinct postcards and postage.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Community Services Division

Mission & Overview

The City of Melrose benefits from having a consortium of department heads who work together to offer life-enhancing services to our community members. The Community Services Division is headed by Director of Strategic Initiatives and Communications and is comprised of the following department heads:

- Council on Aging Director
- Melrose Free Public Library Director
- Executive Director, Soldiers and Sailors Memorial Building ("Memorial Hall")
- Superintendent of Mount Hood and Open Spaces
- Recreation Director
- Veterans' Services Director

Together, these department heads collaborate to provide cultural, social, and wellness events, connect Melrose residents to resources such as COVID-19 vaccination clinics, and most recently, coordinating with the Director of Health and Human Services to address community mental health needs through the development of initiatives and training for mental health and wellness.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Council on Aging

Mission/Overview

To advocate for older adults and connect them with available programs that promote their health and well-being and help them live with dignity. Our job is to enrich the lives of our seniors and create a community where they can age in place with dignity and respect. The Council on Aging operates on a "no wrong door policy." Not only do we serve the older residents of Melrose, but we also operate as a resource hub for anyone in need.

Department Organization

- Executive Director
- Administrative Assistant/Program Coordinator
- Milano Center Manager
- Social Worker – 18 hours
- 7 Drivers- total 30 hours per week
- 2 Senior Center Assistants- total 20 hours per week
- 36 Volunteers

Why Do People Contact Us?

- Adult learning, skills, and craft workshops/classes
- Social and recreational activities including excursions
- Congregate meals
- Resource/Referral Assistance

Council on Aging by the Numbers

- 15 employees – 233 hours per week
- 81 average weekly wellness check calls
- 3,125 older adult contacts in Milano Center database
- 841 newsletters mailed monthly, 1,346 electronic versions, 876 public locations
- 99 referrals to Mystic Valley Elder Services (services, ombudsman, protective)
- 189 Benefits Assistance referrals (fuel assistance, snap, mass health, etc.)
- 49 Melrose Emergency Board cases (housing assistance)
- 87 Melrose Emergency Fund cases (rent, necessities, utilities, etc.)
- 23 Housing applications assistance
- 82 unduplicated participants in outdoor activities
- 1200 additional square feet of outdoor space coming with the canopy project for the patio.
- 100% Covid compliant HVAC system installed at the Milano Center

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Little Known Facts/Common Misconceptions

- We operate as a resource portal for *all* Melrose residents in need
- We believe that teaching life skills along the younger age spectrum hopefully positions one to plan better for their later years

Changes from FY22 to FY23

- Transportation services resumed with increased hours of operation and multiple busses supported by service fees and formula grant
- 53 weeks of payroll

Goals for FY23

- Community needs assessment
- Resume strategic planning

Melrose Public Library

Mission & Overview

Melrose Public Library's staff, building and collections provide a portal for all to explore, imagine and engage. The library is where literacy, local history and community connect! We serve as an educational and cultural hub for residents and visitors alike.

Department Organization

- Library Director
- Assistant Director
- Head of Children's Services
- Adult Services & Circulation Librarian
- Teen Services & Circulation Librarian
- Reference & Technology Librarian
- Reference & Local History Librarian
- 3 Senior Library Assistants (Children's Assistant Librarian; Office Coordinator; Acquisitions Manager)
- 3 Library Assistants
- 3 Part time Reference Librarian (14 hours/week total)
- 6 Part time Library Assistants (52 hours/week total)

Why Do People Contact Us?

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Finding fiction and nonfiction reading, listening or viewing material
- Readers' Advisory Services
- Technical help (computers and technology)
- Genealogical and School Research
- Space to meet/gather
- Questions about programming

Melrose Public Library by the Numbers:

- Third highest NOBLE circulations, averaging 15,444 physical items per month between July 1, 2021, and April 30, 2022
- 45,383 e-audiobooks, e-books and e-magazines (including e-picture books) circulated from Overdrive and Hoopla from July 1, 2021 – April 30, 2022
- 951 new library cards issued from July 1, 2021 – April 30, 2022
- 237 Programs were held – 16 hybrid, 123 in-person, 15 passive, 82 virtual (10 recorded), with total attendance of 4,938. 542 people/devices watched the recorded programs.
- 939 take-home kits were used for crafting programs
- 14,246 active Melrose patrons

Little Known Facts/Common Misconceptions

- We value access to information in all formats, not just books. We now use mobile hotspots and laptops to help increase access to the internet and our library databases from home, for patrons who may not have this technology.

Changes from FY22 to FY23

- No major financial changes
- We will be moving in early Fall to a portion of the Beebe School when construction on the library building project begins. Although will have limited space, we will be open our full hours.

Goals for FY23

- Partner with other City departments and community stakeholders to provide library programming during our time in temporary quarters.
- Conduct Diversity Audit on collections for all ages to ensure broad representation in our library materials.
- Provide access to library materials and services in our temporary location by ensuring that all residents are made aware of where the library is located, and what services we will be offering.

Percentage Increase Budget over FY22?

The library budget has a 4.6% increase in the total budget.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Major changes to the Library Budget FY22 to FY23

The mileage line (523000) has decreased 50%. However, the dollar amount represents a $500 budget cut to $250, so the financial impact is not significant. The contract maintenance line (527702) has a 15.1% increase. Physical format budgets for the Supplies and Materials section have been level funded or reduced, while electronic and downloadable format budgets have been increased. The overall increase is 3.5%, which includes contractual increases.

Reasons for these changes

The decrease in the mileage budget is due to the continuation of virtual meetings and trainings for library staff. The increase in contract maintenance includes a variety of contracts including microfilm machine maintenance, software contracts for the library's museum pass program and calendar program, as well as an increase in wireless hotspots available to the public. The changes in the Supplies and Materials section are due to the limited physical space at our temporary location, combined with continuing demand for downloadable and electronic resources.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Memorial Hall

Mission & Overview

The mission of the Soldiers & Sailors Memorial Building is to provide the City with a commemorative monument to the patriotism of service men and women from Melrose who died for their country. It is also a cultural center for the community. It continues for the usage of meetings of the veterans and for commemorative ceremonies marking certain dates in the history of the Veterans of the United States as well as inaugural ceremonies for the city of Melrose.

Department Organization

- Executive Director
- (4) part time Operations Assistants: average @ 17.5 hours/week per person

Why Do People Contact Us?

1. Rental inquiries
2. Scheduled Events Information: Ticket sales, HP access to building and seating, parking, time doors open, length of event, organization contact information and general event information

Memorial Hall by the Numbers:

Memorial Hall is seeing an overall increase in the number of event bookings and the attendance at the events as the public becomes comfortable with indoor events. In FY22, we are on target for 225 event bookings and will welcome over 37,000 guests (attendees) to Memorial Hall. As of April 2022, we have received requests for 191 event dates in FY23. Our customer database is made up of 75% nonprofits organizations and 25% businesses, (dance companies, private businesses, individuals for private events, etc.). 78% of our customers are listed as Melrose addresses, with 22% outside Melrose.

We partnered with several City of Melrose departments to use Memorial Hall for public programs:

- Melrose Recreation Department: a summer robotics program for 3 weeks in July which will be increased to 4 weeks in FY23 due to its great success
- Melrose Health Department: Vaccine Booster Clinic run by the MHD, (2,181 attendees), five Vaccine clinics run by the MHD and MA state PHD contractors, (750 attendees), and a MHD Public Information Meeting (100 attendees)
- Melrose Veterans Services Department: Monthly Veterans Food Mart serving 4 communities in conjunction with the Boston Food Bank
- Mayor's Office: Senior Resource Fair (207 attendees) and the city of Melrose Inauguration (200 attendees)
- Council on Aging: due to temporary closure of Milano Center, hosted 6 events (265 attendees)
- Melrose Emergency Management: Hosted 2 Active Shooter Training sessions for

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

city of Melrose employees (96 attendees)

Little Known Facts/Common Misconceptions

- Memorial Hall operates as a business with the staff of Memorial Hall responsible for the facilities management, i.e., service plans, maintenance plans, daily maintenance and repairs, annual inspections, etc. and all aspects of event management. Melrose DPW is responsible for the exterior i.e. landscaping, trash disposal, snow plowing
- Revenue generated is from facility rental fees only.

Percent increase in Memorial Hall's Budget

- Memorial Building budget increase is 3.33%

Budget changes from FY22 to FY23

- Increase to elevator line item due to approximate 4% union wages increase for service plan
- Increase to Professional Services line item for MERV Filter replacements
- 53 weeks in Salary line item

Goals for FY23

- Completion of the Melrose Civil War Heritage Project, which will identify, catalogue, restore and preserve the artifacts housed at Memorial Hall and to research the history of our local veterans to ensure that all Civil War veterans who resided in Melrose are recognized
- Building Envelope Improvements at the Soldiers and Sailors Memorial Building: construction project will occur Summer 2022 through Spring 2023 coordinated around event schedule
- Increase event bookings to pre-COVID levels
- Interior renovation plan finalized

Park Department/Mount Hood

Mission & Overview

The goal of the Melrose Park Department is to protect, maintain and develop the City's parks, fields and recreational facilities for the benefit of Melrose residents.
The Park Department is responsible for the City's parks, fields and open spaces including Mount Hood Golf Course and Memorial Park. Apart from Mount Hood, these properties are maintained by the Department of Public Works. Mount Hood is operated and maintained under a management agreement between the City of Melrose and Mass. Golf Management, LLC.

Why Do People Contact Us?

- Park permits
- Golf

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Guidance on how to use outdoor spaces

Department Organization

- Superintendent of Mt. Hood and Open Spaces
- Executive Assistant

Parks by the Numbers

- **3219** Permits Issued across 27 parks
- **81** Parks and Fields Overseen
- **50** Adopt-a-Sites
- **40** gardening beds added at 2 Greenwood Pl
- **45,693** Rounds of golf played in 2021
- **$2.5 million** Total Revenue
- **$1.9 million** Golf Revenue
- **$390K** Food & BeverageRevenue
- **$148K** Pro Shop Revenue

Little Known Facts/Common Misconceptions

- Our department does not control the weather

Changes from FY22 to FY23

Mt. Hood's budget is comprised of revenue brought in by the golf course and functions. It is not funded out of the City's general fund. In our contract with the management company, we contractually have agreed to spend a minimum of $50K on capital improvements each year.

Goals for FY23

January 1, 2023, we look forward to starting a relationship with a new management company for Mt. Hood Memorial Park and Golf Course. GMC has had 4-5-year contracts with the City and will not be putting in a bid for the 2023 Management Contract for Mt. Hood, due to internal changes/illness within their company. The transition should start internally once we review the bids and pick the vendor, (expected beginning of June). Our shift to the new company will be as smooth as possible by the end of year. Golf course revenue is driven by weather. Parks and Open Spaces requires comfortable weather for residents to take advantage of all the wonderful sports fields, parks, playgrounds, hiking trails, dog parks, community gardens, skateboard park, and bike paths Melrose has to offer.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Recreation Department

Mission & Overview

The Melrose Recreation Department creates high quality recreational programs and events that are affordable, safe, and fun for residents of all ages and abilities.

Through our programming we provide resources and opportunities to strengthen our community while

promoting social, cultural, and physical well-being. On average our department has over 8,000+ residents participate in our programs and events per year. Some of our largest programs include Melrose Youth Basketball (1000+ participants, 200+ volunteers), Melrose Flag Football (300+ participants, 50+ volunteers) and Middle School Afterschool Athletics & Clubs (600+ participants, 25+ volunteers). In total we have 300+ community volunteers and 80+ seasonal / part-time workers helping us make our programs run.

Additionally, we typically provide 60+ scholarships per year for families who are experiencing financial hardships. A face for the City, our department works and interacts with residents ranging from ages 2 to 100. Daily, we can have contact with hundreds of residents.

Department Organization

- Recreation Director
- Recreation Coordinator
- 2 Recreation Assistants (Part-time)

Why Do People Contact Us?

1. Register for a program
2. Apply for job
3. Drop volunteer paperwork

Recreation by the Numbers:

- 3,000+ Program Participants
- 200+ Programs Offered
- 60+ Scholarships
- $3,000+ Fundraising/Donations
- $350,000 Approx. Revolving Budget

Little Known Facts/Common Misconceptions

- The Recreation Department is revenue-generating
- The Recreation Department is level funded and has received a 0% budget increase over the past 10+ years
- Our department's operations never stopped through the pandemic
    - While other communities' rec. departments shut down, we continued programming on top of the ways we assisted with COVID response

Budget Requests & Changes

- Overall percentage increase of 31.2% for FY23
- One request: $20,000 increase to Salary & Wages line item
- Requesting funds to fill vacancy of the Recreation Coordinator position. During HR compensation study it was determined that the position was grossly underpaid compared to surrounding communities.
    - These additional funds will allow us to hire a qualified candidate with a competitive

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

salary. The Recreation Department has responsibly held this vacancy since November 2021 (understaffed) waiting to confirm financial support from the City prior to hiring. Funds will allow the Recreation Department to return to two full-time employees and continue to provide quality programs and events for the Melrose community.

- Note: The Recreation Department has received 0% budget increase in the past 10+ years.

Changes from FY22 to FY23

- Filling of Recreation Coordinator position and returning to full staff
- Expanding offerings to include programming that supports mental health

Goals for FY23

- Continue to adapt ourselves and programming to meet the changing needs of our residents

Veterans' Services

Mission & Overview

Melrose Veterans' Services is led in the Melrose-Wakefield-Saugus (MWS) Veterans Services District. The MWS Veterans' Services District seeks to advocate on behalf of all the district's veterans and provide them with guidance on local, state and federal benefit programs, quality support services and to direct an emergency financial assistance program for those veterans and their dependents who are in need.

Goals and Objectives

- To execute timely and accurate benefit delivery for all veterans seeking help from the Federal, State and Local branches of government
- To provide dignity, compassion, respect and privacy to all veterans seeking assistance
- To empower veterans through technology, information sharing, and networking, where they can assist themselves and their fellow veterans by connecting services
- To continue the fight against homelessness and joblessness within the veteran community
- To be honest and forthright with our veterans, researching the correct answer and providing results as quickly as accuracy allows
- To see the office as a base of operations, not a home, bringing services to the veteran wherever they are whenever they need

Department Organization

- Director of Veterans' Services
- Administrative Assistant

Why Do People Contact Us?

- Department of Defense (DoD) questions, Chapter 115*, VA Claims, VA Healthcare,

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

anything VA related in addition to local ceremonies for veterans.
- Vaccine inquiries
- Home healthcare inquiries

The Chapter 115 Benefits Program is run by the Massachusetts Department Veterans' Services (DVS). This program is run locally and benefits are reimbursed up to 75% by the State. he U.S. Department of Veterans Affairs (VA) offers federal benefits and at the local level we aid veterans and their families in applying for them.

Veterans' Services by the Numbers:

- 3 Municipalities served
- 75–100 Chapter 115* clients served across the 3 communities
- Average 30 Disability claims filed annually
- Average 10 VA pensions for Aid and Attendance filed annually
- Over $625,000 brought back to VA beneficiaries who reside in the City of Melrose between VA disability compensation and VA pensions and survivor benefits.

Little Known Facts/Common Misconceptions

- While we are seen publicly at events, the office runs much more than events and ceremonies
- We run the MVMMS Operation club and trip annually which involves meeting with the students weekly culminating in a trip to Washington DC in May. (Hoping to start back up in school year 2022-23)
- We help with all the events and fundraising efforts the VAB does.
- We serve as a source of socialization for some of our senior veterans.
- Assist from cradle to grave with VA disability claims and pensions

COVID-19 Response

The Veterans' Services Office was busier than ever during the pandemic.

- Continued providing services and filing claims
- Admin Assistant helped with Friday food delivery for veterans in need of food

Changes from FY22 to FY23

- Increase in Veterans Benefit line 015432/544000 by 6% in anticipation of DVS COLA adjustment in July 2022 to match Social Security COLA increase of 5.9% in January 2022.

Goals for FY23

- Increase current part-time Melrose Veterans Administrative Assistant to full-time based on number of residents in the District/State compliance (greater than 70K residents)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Finance and Administrative Services

Finance and administrative services departments act as the organizational engine of municipal government operations. While some of these departments are public facing (e.g., Treasurer/Collector), most operate internally, playing a critical role in ensuring the City's assets are stable and protected (Assessor, Auditor, City Solicitor), and that your public servants have the support they need to provide the customer service our residents deserve (Human Resources).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Assessor

Mission & Overview

The mission of the Melrose Assessing Department is to determine the valuation of all real and personal property within the City in a fair, transparent, and cost-effective manner. To taxation, the Assessing Department is obligated under law to assess all property at full and fair market value as of January 1st of each year.

The Assessing Department is responsible for the following functions:

- Ensuring the accuracy of real property valuation through annual inspection of all sale properties, all properties for which building permits have been taken out, and all abatement application properties.
- Routine re-inspection of all properties on a ten-year cycle.
- Discovering, listing, and valuing over 8,760 residential properties, including single-family homes, multi-family homes, condominiums, and apartment buildings. There are 294 commercial, industrial and mixed-use properties, 424 exempt properties and 473 business personal property accounts which are also valued on an annual basis.
- Maintenance and administration of the assessing databases and maps.
- Recording all changes in property ownership, land subdivisions, and changes in land use codes.
- Analyzing real estate sales transactions and annually adjusting property assessments to reflect market value.
- Processing property tax exemption applications for income-eligible senior citizens, veterans with service-related disabilities, and persons who are legally blind.
- Processing Motor Vehicle Excise tax abatements. The City of Melrose annually issues over 22,000 excise tax bills and more than 750 excise abatements.
- Capturing new growth from building permit activity as defined by Mass. General Law.

Department Organization

- Chief Assessor
- Assistant Assessor
- Assessing Clerk

Why Do People Contact Us?

- Excise abatements
- Personal exemptions
- Valuation information
- Assessors Maps

Little Known Facts/Common Misconceptions

- The Assessor's Office is incredibly innovative in its use of technology
- We save the City money by ensuring 100% valuation on all Melrose properties

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

COVID-19 Response

- The Assessing Office was already innovating and was able to transition to a virtual format and meet the requirements of the department in a remote setting
- As a result of the digitizing the Assessing Office did ahead of the pandemic, the Department served as a model for conducting remote municipal work
- We were able to effectively communicate with the public and facilitate transactions, enhance resident support and assist people with navigating government functions throughout the pandemic
- External inspections continue with aerial cameras and lasers to measure outside of buildings, as well as incorporating the use of street-view cameras

Changes from FY22 to FY23

- 5% **decrease** in overall budget
- 7.6% **decrease** in Salary & Wages line due to staffing changes
- No other funding changes

Goals for FY23

- Continue to be a leader in using data to drive decision-making
- Collaborate with Building Department and GIS Manager to integrate mapping and permitting data systems with Assessors Database
- Collaborate with Treasurer/Collector to develop efficiencies and streamline tax billing and abatement processes

Auditor

Mission & Overview

The mission of the Office of the Auditor is to protect the City's assets. We serve as the financial foundation for all the City's operations by ensuring every bill, every payroll, every purchase, every grant that comes across our Office is lawful, accurate, and in line with the Council's approved budget.

Department Organization

- City Auditor/CFO
- Assistant City Auditor
- Financial Manager
- Senior Accounting Clerk

Why Do People Contact Us?

1. Vendors checking the status of payments
2. Internal help desk for MUNIS software
3. Payroll inquiries from employees

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Little Known Facts/Common Misconceptions

- All departments must flow through the Office of the Auditor to achieve their goals
- This Office keeps *all* the City's finances secure
- While the Office of the Auditor does not have much direct contact with the public, we have a very direct impact on the lives of residents by ensuring appropriate application of all public monies

Changes from FY22 to FY23

- Salary and Wage adjustments for staff
- Increase in hours for union employee from 30 to 35

Goals for FY23

- Continue to develop and train All MUNIS users on enhancements (version 2021) and best practices.
- Continue to work on MUNIS projects that create efficiencies for all departments.
- Collaborate with School Finance Team to identify efficiencies.
- Collaborate with Treasurer's Office to move to electronic payments for larger vendors.

City Solicitor

Mission & Overview

The City Solicitor's office functions as a full-time law office handling the City's litigation and other legal functions in-house to the greatest extent possible. The office serves to provide high quality legal representation and advice to the City Council, School Committee, Mayor, and to all departments, agencies and multiple-member bodies of the City in numerous areas, including but not limited to: zoning, employment & labor law, elections, civil rights, civil service, contracts and procurement, permitting and licensing, real estate, workers' compensation, education law, ethics, conflict of interest law, open meeting law, public records law, and tort actions involving personal injury and property damage claims.
The City Solicitor's office strives to successfully prosecute and defend any actions before state and federal courts and administrative agencies, provide well-reasoned and timely legal opinions, draft legislation, draft and review contracts, leases, and deeds, and help facilitate the lawful implementation of programs, policies and best practices throughout all City operations. Its staff has broad expertise in various areas of municipal law.

Department Organization

- City Solicitor
- Assistant City Solicitor

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Executive Assistant

Why Do People Contact Us?

- Requests for Advice and Legal Opinions
- Departmental Operation Items
- Insurance Claims Processing

Little Known Facts/Common Misconceptions

- Legal department oversees the Melrose Liquor Commission

Budget Changes from FY22 to FY23

- Overall Budget Increase of 19.26%
- Increase Assistant City Solicitor hours from 30 to 35 hours. Former City Solicitor's departure occurred right in the middle of switching this employee from 30 to 35 hours. For FY22, this position was budgeted for only 30 hours.
- Increase of $15,000 for Professional Services. Increase reflects cost of specialized Labor Counsel this coming fiscal year to assist in Main Table Collective Bargaining Negotiations for Public Safety Contracts and continued use of Outside Counsel for Cable License Negotiations with Verizon/Comcast.
- Increase in annual subscription cost for online legal database Westlaw
- Increased education/seminar line to allow for more advanced opportunities for professional development and growth for Law Department staff. For example, City Solicitor and Assistant City Solicitor review/draft contracts and advise on the procurement process on a very regular basis on the School and City side. The Massachusetts Certified Public Purchasing Official (MCPPO) program classes and training would greatly benefit their specializing in these tasks. In addition, since COVID-19 there has also been an increase in online course offerings and legal updates that would greatly benefit the Law Department personnel in its goal of staying up to date on the current state of municipal law and best practices.
- Increase in Property Insurance coverage to reflect new Pole chargers that were not part of the FY22 budget due to timing. Increase in coverage is also reflective of capital acquisitions in process at a regular basis and insurance cost increases to cover liability/defense of public safety employees. This number is also reflective of a 5% assumed increase across existing policies.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Human Resources

Mission & Overview

The Human Resources Department ensures that the City of Melrose follows fair and consistent employment practices, supports employees and retirees in health and welfare benefits, complies with federal and state laws and collective bargaining agreements, and effectively communicates employment matters to all City employees. By providing

exemplary service to City employees, and ensuring a safe and inclusive work environment, the HR Department strives to create an environment where employees of all backgrounds can succeed and thrive while providing citizens of all backgrounds with excellent municipal services.

Department Organization

- Director of Human Resources and Labor Relations
- Human Resources Coordinator
- Human Resources Assistant

Percentage Increase in HR Budget over FY22

152 Human Resources- overall increase **5.6%**

- Salaries and Wages
  - 6% increase due to having 53 payroll Fridays in FY2023
- Dues and Membership
  - 83.6% ($230) increase for SHRM membership, which offers useful tools, Employment news and legal updates, and best practices for HR professionals.
- Education/Training (for HR)
  - A new line item of $500. Training is an important element for the professional development of employees, keeping up with the ever-changing HR field, aiding in performance boost and retention of HR staff

912 Worker's Comp - no changes

- Level-funded

913 Unemployment- no changes

- Level-funded

914 Employee Benefits - overall increase **4.3%**

- Health Contractual Benefits – 4.7% increase
  - FY23 health insurance increase is 4.3% for the City cost (calculation used 3/1 membership enrollment)
    - Non- Medicare health plan rates increased between 2.9% to 10.2%
    - Medicare health plan rates increased between 1.2 % to 3.0%

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- The health budget projection is always a snapshot of a moment in time and cannot predict the behavior of employees, life events or economic changes that may affect future enrollment.

- Salaries and Wages
  - 7.1% increase due to having 53 payroll Fridays in FY2023

What are the major changes to your budget?

The HR department doesn't have major changes to the budget in FY2023

What are the reasons for these changes (major cost drivers)?

The Health Insurance budget, which has the largest financial impact on our budget is a contractual obligation for the City of Melrose and is primarily driven by the healthcare inflation, which we don't control. The 5% average increase of the health insurance plans has been consistent over the last few years.

HR by the Numbers:

Clients Served

- **22** Departments
- **396** City Employees: 265 Benefit Eligible & 131 Non-Benefit Eligible (not including election help)
- **503** School Benefit Eligible
- **762** retirees/survivors

Benefits & Budget Administration

- Administrate **the following benefits for active employees:**
  - 14 Health plans
  - 2 Dental Insurance plans (Employee and Retiree)
  - 3 Life Insurance plans
  - 3 Deferred Compensation plans
  - Disability Insurance
  - Pet Insurance
  - Flexible Spending Account
  - Opt. Out Incentive program
- Administrate **the following Benefits for retirees:**
  - Health Insurance
  - Dental Insurance
  - Basic Life Insurance
  - Optional Life Insurance
  - Medicare Part B Reimbursement for **654 retirees & their spouses.**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Financial Management: We manage approximately $15 million.

Recruitment:
Oversaw and participated in the recruitment, screening, hiring and orientation for positions in the Police Fire, Public Works, Library and City Hall departments and three Regional offices:

- Health and Human Services: Melrose, Wakefield
- Veterans: Melrose, Wakefield, Saugus
- Pine Banks: Melrose, Malden

- FY 2022 new hires (through May 2022):
  36 Benefit eligible
  46 non-benefit eligible (excluding election help)

City Staffing Changes:

- FY 2022 (through May 2022):
  30 Retirements (9 School; 21 City)
  18 Resignations
  26 Deceased Retirees

Little Known Facts/Common Misconceptions

- We are a department of three employees with a broad range of responsibilities:
  - Benefit Administration
  - Finance Management
  - Labor Relations
  - Performance Management
  - Recruiting and retention
  - Succession Planning
  - Unemployment
  - Worker's Comp and 111F Administration
  - Supporting 22 departments, 400+ City employees, and 700 retirees

COVID-19 Continued Response

- In FY22, HR continued to play a major role in interpreting the ever-changing federal and state regulations around pandemic protocols and response.
  - Created new testing, quarantine and leave policies based on guidelines, educated and supported staff and managers on their application
  - Tracked pandemic-related leaves and reported to the state for reimbursement

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Goals for FY23

- Implement the new Comp and Class system; develop a compensation administration policy based on a hybrid model of length of service and performance and create a uniform performance guide for managers to support the new policy.
- Develop and implement Employee Recognition and Retention strategy for employees to feel appreciated, supported, and engaged in the workplace, which further enhances the morale and performance of staff and translates into higher retention and excellent service for the residents of Melrose.
- Continue supporting the DEI mission of the administration and work on implementing the recommendations of Visions Consultants, HRS' Organizational Needs Assessment and DEI Taskforce.
- Work closely with the Executive Police Chief Search Consultant and coordinate the process for the successful selection, hiring and transition of a new Police Chief.
- *Long term goals and projects:* streamline resumes submission, automate processes, including new hire paperwork collection, leaves management, etc.; research a new Benefit Tracking software product since current software is outdated; continue developing partnerships and researching best practices for the purposes of attracting and retaining a talented diverse workforce and building up a DEI employer brand.

Treasurer/Collector

Mission & Overview

The Treasurer Collector department is responsible for the billing and collection of water and sewer bills, real estate, personal property and auto excise taxes and the receipt of various fees for permits, licenses and miscellaneous payments. The department is also responsible for the reconciliation of all bank accounts, short-term and long-term investments, short-term and long-term borrowing, management of Tax Title accounts, payroll processing, W-2 issuance, income tax reporting and other required governmental filings, and the funding of all disbursements.

Department Organization

Treasurer Collector	Head Collector – Real Estate Tax
Assistant Treasurer	Senior Collector – Excise Tax
Parking/Treasury Clerk	Senior Collector – Water & Sewer

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Why Do People Contact Us?

- Billing questions: not understanding water liens, missed payments, excise tax
- Parking questions: tickets, stickers, overnight parking.
- Payroll questions: deduction changes, lost checks, employment verification, W2 information

Little Known Facts/Misconceptions

- Every dollar received or spent in City Hall flows through our office.
- We manage maintenance of the postage machine.

FY22 Accomplishments/Changes

- Clean-up of over 200 legacy reconciling items in the General Ledger
- Implementation of the Munis Cash Management module in April 2022
- Internal promotion of Head Clerk and hiring of new Senior Clerk - Water and Sewer
- Implemented PayByPhone payment app at the train stations in collaboration with the DPW
- Implemented debit and credit card payments at the Collector's window for real estate and personal property tax and water/sewer payments
- Collaborated with outward facing departments on the collection of outstanding taxes prior to the issuance of permits and licenses
- Finalized two IRS audits with minimal findings

Percentage Increase in FY22 Budget

- The overall Treasurer Collector department budget is 8% higher than FY22.
- The Parking Budget is flat to FY22.

Changes to FY22 Budget and Reasons

- Salaries – up 1.6% or $6,105 due to contractual step ups/COLA increases on a fully staffed team.
- Printing – up 121.7% or $13,000 due to the reallocation of certain Kelley & Ryan processing charges that should be booked to printing rather than Postage.
- Postage – up 6.4% or $3,000. Estimated cost of two elections offset a large portion of the reallocation of certain Kelley & Ryan processing fees plus impact of potential increase in postage rates.
- Bank Fees – $6,000 low interest rate on bank accounts do not generate enough interest to offset lockbox fees. This was not a budgeted item in past years as the processing costs were always offset by the interest earned. This cost will decrease and potentially eliminate as rates rise over time.
- Professional Services – up 25% or $3,000 based on average bill of Clifton Larson after FY22 price increase.

Goals for FY23

- Address Personal Property tax receivables.
- Research options for automating excise tax payments from leasing companies.
- Vet certain processing providers to ensure best price for best product/service.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Public Safety and Infrastructure

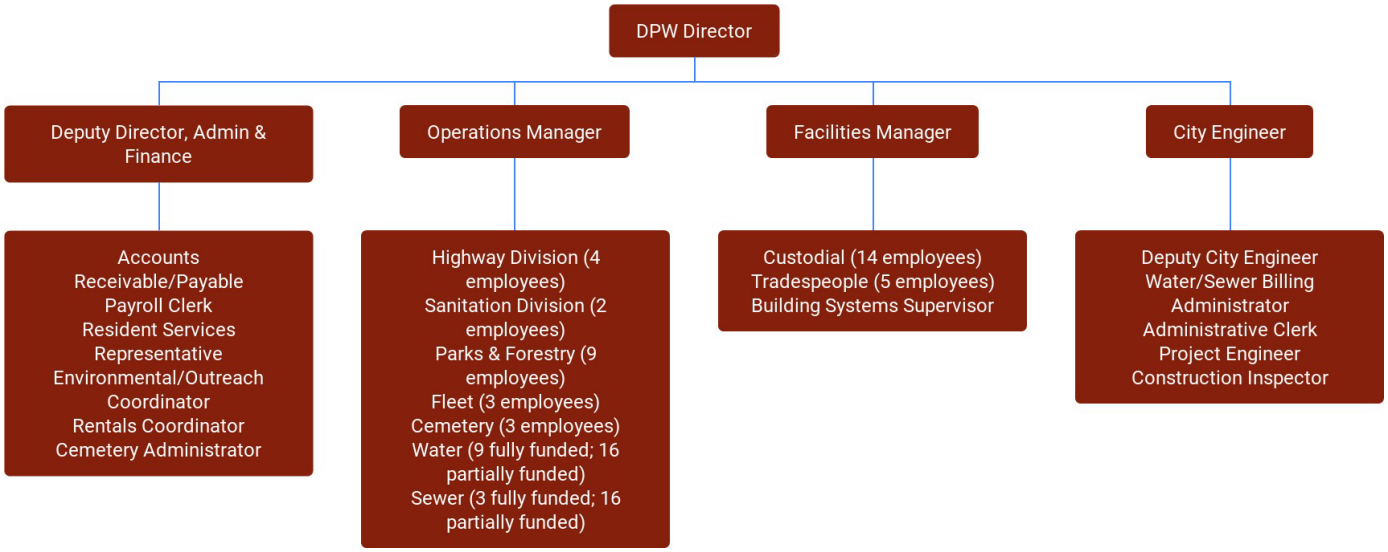
Local government operations are like a clock: many pieces move independently of one another but rely on one another's success to function. While no one department can truly optimally perform without another, what the following departments do is truly bedrock to the City of Melrose.

Municipal government operates best in the background of our lives. We typically only notice it when something goes wrong: when a sidewalk is cracked, the WiFi at school goes out, a traffic light breaks. What we don't see are the fires prevented because of strong building codes and talented inspectors; the lives saved this year because of a dedicated health department's commitment to ensuring public safety as the COVID-19 pandemic continued to have a major impact in 2021 and early 2022; the hours spent collaborating on logistics to bring cultural events to our public spaces while ensuring all attendees are safe and the crowds manageable; the family dinners missed to respond to winter storms, so our children can get to school safely.

It is my hope that the following pages will demonstrate that capital investments are nothing without the talented and dedicated public employees who implement them.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Department of Public Works



Mission & Overview

The Department of Public Works is one of the most diverse branches of city government, working to ensure the safety and wellbeing of all residents of Melrose by providing essential services with the responsibility of maintaining critical infrastructure for the City such as streets, sidewalks, water, sewer, catch basins, rubbish and recyclable collection, and vehicle and equipment maintenance.

The Department is also responsible for response to snow, ice and other emergency services; responsible for the care of all City trees, for the maintenance of all parks and fields, for the maintenance and general operations of the cemetery, for enforcing of water, sewer and street ordinances; and engineering design and construction management for capital improvement and maintenance projects. To accomplish these functions, the Department is organized into eleven divisions:

Administration, Engineering, Facilities, Fleet, Highway, Parks, Sanitation, Sewer, Trees, Water, and Wyoming Cemetery

Department Organization

Why Do People Contact Us?

- Potholes and other road/pavement maintenance issues.
- Trash pickup questions
- Snow removal

DPW by the Numbers:

Since the beginning of Fiscal Year 2022, these are some of the items DPW has addressed:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- potholes filled: 547 locations
- storms responded to: 51.6 inches of snow
- vehicles in fleet maintained: 140 pc. of equipment
- tonnage of trash/recycling:
    - 1.6,923 tons of trash
    - 1.2408 tons of recycling
- parks/fields/open spaces maintained: 81 locations
- total work orders: 3250 resolved
- invoices processed: 2393 purchase orders YTD
- recycled 290 mattresses as part of the new mattress recycling program
- provided 919 affordable barrels to residents through the temporary barrel purchasing program

The Department of Public Works also played a critical role in several large projects/events:

- Capital projects including paving, water main replacement, sewer main improvements, and drainage improvements
- Support of all City events including school sports, elections, memorials, Earth Week,
    - Healthy Melrose, and private facility rental events
- Continued delivery of COVID-related services such as additional cleaning and disinfection of buildings and assisting with storage and delivery of supplies
- Launched and managed a temporary barrel purchasing program to provide affordable and compliant barrels to the community

Little Known Facts/Common Misconceptions

- DPW functions mostly in the background of the lives of people in Melrose yet we are foundational to all City operations.
- We play a key role in putting on community and cultural events like Home for the Holidays, Earth Week, Victorian Fair, Summer Stroll, etc.

COVID-19 Response

- DPW provides essential services to the City, and we did not miss a beat despite the pandemic
- Met the guidelines for school safety in an environment that needed to shift frequently as a result of COVID rates
- Spearheaded deep cleaning efforts in City facilities throughout the pandemic
- Installed and maintained four parklets, oversaw changes to Central Terrace (alley next to the YMCA) into a public amenity, and provided materials for Mayor Brodeur's Safe Streets initiative

Changes from FY22 to FY23

- Contractual increases in salaries (step increases for both union and non-union staff). Please note that union cost-of-living increases are currently being negotiated and have therefore not been included at this time.
- Annual increase in Massachusetts Water Resource Authority assessment in water and sewer

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

funds.

- In the Administration and Engineering Budget, increases to the line items of Professional Services and Professional Development are due to the additional contracted services that provide oversight on projects and the professional association memberships for our staff. Similarly, professional services are needed for the Facilities Division, which has been tasked with many small capital projects for which outside consultant support is frequently required to assist with bid document preparation and construction administration. (These services for larger capital projects are typically included in the capital project budget, but for smaller projects paid for with operating funds, they do not presently have a funding source.)
- Some of the biggest challenges facing the DPW are with costs associated with delivering facilities maintenance services. Rising costs for supplies and materials have affected the Facilities Division more than any other DPW Division. To address the rising cost and inventory need to deliver services, we have requested increases to three supply line items. These increases assume that costs will level off.
- The Highway Division budget is drastically affected by our obligations for NPDES MS4 drain services under the related federal permit, thus resulting in increases requested to those line items Additional traffic markings (bike lanes, etc.) have resulted in increased cost to maintain these markings, through both materials costs for in-house efforts and contractual costs with our on-call line painting contractor.
- For Snow and Ice Operations, it should be noted that our 5-year average annual spending is $996,049. Although the budget has been adjusted each year, the average budgeted amount in the same period has been $574,103.
- Our Solid Waste and Recycling hauling and disposal contract will be entering the second of three option years. The base cost of the contract will increase to $835,000. Disposal costs increase to $68/ton. At a projection of 8,500 tons of trash, the result is a cost of $578,000 in FY23. We will also see an increase in recycling costs that project to a $159,000 need in order to fully fund the contract Lastly, in response to resident and City Council requests to increase downtown barrel pickup, the additional costs to the overtime line item are $2,000 to provide this added service.
- Requested increases in the Parks & Forestry Division are associated with our contracts to maintain our City trees with the increase in windstorms in recent years.

Goals for FY23

- Meeting the obligations of all regulatory programs, such as lead water service removals, NPDES MS4 drainage requirements, and hazardous materials reduction/removal
- Fostering a positive work environment through enhanced professional development

Emergency Management

Mission & Overview

Melrose Emergency Management, using the guidelines of the Federal Emergency Management Agency (FEMA), facilitates planning, secures and provides resources to assist and help protect the residents,

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

business community, and city government from hazards that threaten Melrose. This is done through the four phases of Emergency Management: Preparedness (Planning, Training, Exercising), Response, Mitigation and Recovery.

Working in close partnership with City Departments and our Regional/State Partners, EM plans and prepares for emergencies, educates the public about emergency preparedness, conducts training exercises and performs other services to support the City's overall preparedness. EM follows an all-hazards approach, preparing for various types of emergencies – natural or man-made.

Department Organization

- Emergency Management Director

Why Do People Contact Us?

The Emergency Management Director rarely interfaces with the public and generally acts as a liaison between the State and the City, as well as the Chiefs of Police and Fire.

Little Known Facts/Common Misconceptions

- Every municipality is required by state law to have an Emergency Management Director
- The EMD spearheads coordination of City Departments for planned and demand response events using the Federal Incident Management System (NIMS) and the Federal Incident Command System (ICS)
- In the event of a disaster, fire or flood, the EMD would coordinate emergency relief for residents, (food, temporary sheltering, etc.)
- Melrose Emergency Management is the third-tier layer of emergency management system, our partners are the Massachusetts Emergency Management Agency (MEMA) and the Federal Emergency Management Agency (FEMA)
- Melrose Emergency Management makes application to MEMA and FEMA for grants and all reimbursement from Declarations of Emergencies

Changes from FY22 to FY23

With the effects of COVID-19 becoming less life threatening, the ordering of PPE supplies has stopped as we maintain a sufficient supply.

Goals for FY23

- Phase back to normal operations
- For all event planning, foster the use of NIMS and ICS
- Complete the EOC/Training Center upgrade
- Conduct Tabletop Exercises with city departments, State and Federal Agencies and local constituents to plan and train for events that could have a negative or disastrous impact on the City
- Establish written evacuation plans for City Hall

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Fire Department

Mission & Overview

The Melrose Fire Department (MFD) strives to improve and safeguard the quality of life within the City of Melrose. The members of the department guarantee the citizens and visitors of Melrose that we will provide dependable service in a responsible fashion, while showing care and compassion for those in need. As public servants, our first and foremost duty is to serve the community. We will treat those we serve fairly, regardless of their race, color, creed, sex, age, lifestyle, national origin, or economic status. We ensure that any service we provide adds value to our citizens'/customers quality of life. The department recognizes the individuality of everyone who works here. We will treat one another with respect, kindness, and sense of importance of teamwork. We continue to foster a spirit of excellence throughout the organization while we serve our citizens.

The MFD responds promptly and efficiently to structure fires and emergency medical incidents. The members of the MFD continuously train in all aspects such as fire safety, hazmat operations, technica rescue operations, EMS training, specialty team training, water rescue, and automobile extrications.

Department Organization

- Fire Chief
- Financial Administrator
- Fire Alarm Superintendent
- 7 Captains
- 9 Lieutenants
- 40 Firefighters

Why Do People Contact Us?

- Emergency response calls
- Master-box plug outs
- Fire prevention

Melrose Fire Department by the Numbers: (July 1, 2021 - May 6, 2022)

- 3,797 Emergency Response Calls
- 95 Training Activities consisting of 1,320 personnel hours
- Fire Prevention/Code Enforcement Activities:
    - 1 Complaint
    - 11 School Fire Drills
    - 528 Permits Issued
    - 538 Inspections Conducted

Little Known Facts/Common Misconceptions

- We are a multi-faceted all-hazard fire department

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

FY22 Accomplishments

In July of 2022, the Fire Department received 16 new hand-held thermal imaging cameras (TIC's) as a result of a Firefighter Safety Equipment Grant. This allows each riding position to hold their own TIC during each shift. Also in this grant, we received scene lighting for fire prevention investigations.

The Tremont Street Fire Station received a new 2021 Seagrave Pumper in place of the 2007 Seagrave Pumper. The 2007 engine will replace the 1999 engine which is now a reserve. The 2021 pumper was placed in service on November 17, 2021. Approximately 5 minutes after being in service, the first call came in to respond to a house fire on Marmion Road.

The Fire Department is also anticipating a delivery of a new tractor drawn aerial truck (TDA ladder truck) mid-May of 2022.

COVID-19 Response

The Fire Department continues to respond at the frontline of the Covid-19 pandemic.

In FY22, the Fire Department was able to procure funds to purchase a patient simulator (SimMan 3G Plus). With this patient simulator, our members can train on the proper techniques and interventions when faced with bodily fluids. Staying ahead of the curve starts with proper training. With the patient simulator we can help prepare our team to develop clinical knowledge to manage severe cases of a patient suffering from Coronavirus and other infections. Scenarios can be run as an individual scenario or back-to-back in series. The scenarios focus on key decisions regarding invasive care and patient management. The patient simulator allows providers to remain proficient with interventions and clinical judgement. Scenarios will allow providers to properly complete a scene size up and deploy proper PPE to protect themselves and others.

Percentage Increase in the Fire Budget for FY23

The Fire Department will receive an overall budget increase of 6% for FY23

- .5% increase in overtimes due to contractual raises
- 100% increase in fire contracts for Metro Fire Chief's annual dues. Metro Fire Chief's is a consortium of cities and towns within the 128-belt known as Metro Boston
- 20.5% increase in professional services for in-house fit testing and in-house annual Hazmat training

Goals for FY23

• Increase our training to stay in line with national standards as well as documenting said training by implementing Lexipol/Fire Rescue Academy. Lexipol/Fire Rescue Academy is an online training module that sends out and tracks the training performed by the Fire Department members. The Lexipol side of the module holds policies and procedures, most

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

mandated by the State. The Fire Rescue Academy side of the module contains training videos and allows our department to upload our own videos for training purposes.

Health and Human Services Department

Mission & Overview

The Melrose Health and Human Services Department promotes the personal and environmental health of the community through education and policy development supported by enforceable regulations, and collaboration with other people and organizations.
Our goal in the public health sector is to protect and promote health. The Melrose Health Department offers a wide variety of services and functions for the City of Melrose to accomplish just that. The services range from a variety of topics, including, but not limited to, vaccinations, health permits and applications, informational sheets, healthy eating and living activities, pest control, tobacco use control, substance abuse prevention, animal control, and more.

The Melrose Board of Health is the policymaking, rule-making, and adjudicatory body for public health in the county or counties in Melrose. State legislature gives boards of health specific powers and duties.

Department Organization

- Health Director for Melrose & Wakefield
- Public Health Nurse
- Health Inspector
- Sr. Health Inspector
- Public Health Specialist
- Mass in Motion Coordinator
- Regional Tobacco Control Coordinator
- Animal Control Officer
- 11 School Nurses

Why Do People Contact Us?

- Complaints about trash/housing/food establishments/noise/pests
- Flu shots

- Clarification on the Governor's 60 Orders and Standards
- How to get a mask (in the beginning when these were scarce)
- Reporting COVID protocol violations
- Vaccination inquiries

Health and Human Services Department by the Numbers:

- 4,138 vaccine doses administered

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- 1,925 COVID-19 cases (excluding non-residents working in Melrose)
- 16 contact Tracers
- 32 personnel working on COVID issues
- 40 weekly hours currently being spent on contact tracing
- 125 complaints January 2020 through April 2021

Little Known Facts/Common Misconceptions

- Melrose shares a Health department with Wakefield
- Melrose Health and Human Services Department is responsible for working with schools through School Nursing

COVID-19 Response

Everything changed at the outset of the pandemic. All staff members were cross trained to help with contact tracing and answering phones. We utilized volunteers and Wakefield personnel to expand our contact tracing. We shifted resources and ensured everyone performed COVID-related work. The biggest challenge was the incredible stress and working 24/7. There was no work life balance over the last year. Another main challenge included the State providing information last minute and making the City responsible for execution, as announcements were often made before infrastructure was in place to execute at the local level.

Changes from FY22 to FY23

- 5.8% increase in salary and wages; to respond appropriately and in a timely manner, the department needs more health inspections capacity to fulfill the City's needs. We are proposing an increase of 0.5 FTE in the Health Inspector position to fulfill the volume of complaints and mandatory routine food inspections.

Goals for FY23

- Reduce stigma around mental health and increase behavioral health resources
- Formalize and expand shared services with the Mystic Valley Public Health Coalition
- Reinstate the Substance Use Prevention Program

Information Technology

Mission & Overview

The City of Melrose IT Department strives to make technology services better, quicker, effective, and efficient for all students, families, employees and residents.
The IT Department is responsible for installing and maintaining critical infrastructure for the City of Melrose including the schools. We provide all technology-related equipment and software in the City and Schools including but not limited to, networks, copiers, projectors, printers, smartboards, wireless access points, telephones (both analog and Voice over IP (VoIP),

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Public Address (PA) systems, uninterrupted battery backup systems, security systems, door hardware, fobs, cameras & intercoms, computers, monitors, laptops, Chromebooks, police cruiser computer systems, Public safety devices, servers, virtual servers, email, websites, mobile phones, fiber optic network on street poles, desktop support for City and School personnel, backup and disaster recovery systems, running new cabling and repairing old cabling, and reverse 911 systems. We are also responsible for designing, contracting and leading projects for the City and Schools to upgrade or install new systems. We communicate with City and School leaders to understand needs and provide technical solutions to those needs.

Department Organization

- IT Director/Chief Information Officer
- Assistant IT Director
- IT Systems Analyst
- IT Project Manager
- Financial Systems Analyst
- School Systems Administrator
- School Elementary Desktop Technician
- School MVMMS/HS/Franklin Desktop Technician
- School SIS Data Coordinator

IT Department by the Numbers:

- FY21: 1,510 Tickets processed. FY22 (so far): 1,241
- FY21: 2,996 Tickets processed. FY22 (so far): 3,553
- $242,360 received in successful grants and $250,000 in potential grants written

There are also dozens of both small and large-scale projects the IT department spearheaded this fiscal year which cannot be distilled in neat qualitative numbers. Some of these include:

- M365 implementation and migration
- M365 training for entire city
- All Roosevelt projectors, Interactive White Boards (Smartboards), and room audio amplifiers were replaced
- All Horace Mann projectors, Interactive White Boards (Smartboards), and room audio amplifiers were replaced and 3 interactive touchpanels installed
- Field camera installed on Fred Green Field Press Box for MMTV coverage of games
- Distributed 1,042 new Chromebooks to secondary students as part of our 1 device for every student program (1:1).
- Cameras installed in the MHS Gym and the MVMMS Gym for MMTV broadcast
- Completed Telephone system implementation to all buildings
- Roosevelt telephone system replaced (in-house) and new phones installed throughout the building
- 74 Mobile phones replaced and upgraded
- Successful MCAS Exam conducted with students in school and students testing remotely on Chromebooks

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- WIDA ACCESS for English Language Learners - Successful Implementation under pandemic conditions
- K and Pre-K web registrations built and implemented
- Moved Veteran's office to Milano Center
- Implemented cybersecurity training throughout the City and the Schools
- 44 Chromebooks repaired in-house (parts replaced)
- 6 computer labs rebuilt
- 22 new laptops rolled out to City staff
- New camera security system installed at the School Central Administration Office
- Conferencing setup including room camera, microphone, speakerbar and 75" LCD touchpanel in the Emergency Management Training Room at City Hall
- Began scanning invoices and quotes straight into Munis
- New wireless system installed at the Milano Center
- Created internal data dashboard for COVID-19 cases in the schools
- Successfully submitted many state-mandated reports
- Installed digital signage hardware and software at the Police Station lobby
- Design work with vendor for a city-wide fiber-optic upgrade and extension of critical public safety radios

Little Known Facts/Common Misconceptions

- IT is responsible for over 10,914 pieces of equipment up from 5,322 6 years ago
- IT has a fleet of over 4,000 Chromebooks

Changes from FY22 to FY23

- Munis support
    - This change reflects the traditional annual 5% increase for all MUNIS products
- Computer Paper and Printing Supplies
    - Toner and paper will now be consolidated to the Office Supply line
- Software Licenses
    - Microsoft M365 cost added
    - Microsoft M365 backup software added
    - New helpdesk ticketing system added
    - Offsite Disaster recovery added
    - Antivirus renewal added

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Inspectional Services

Mission & Overview

The Inspectional Services Department is responsible for the health and public safety of the community and for the monitoring of improvements for both residential and commercial properties. Our goal is to help the residents of Melrose by providing timely and quality service and providing answers to questions regarding building and zoning issues. We also ensure compliance with the Architectural Access Barriers Board regulations to ensure everyone living, working, and moving through Melrose can adequately access our buildings and spaces.

Department Organization

- Director of Inspectional Services
- Executive Assistant to the Director
- Part- Time Plumbing and Gas Inspector (26 Hrs.)
- Part-Time Wire Inspector/Sealer of Weights & Measures (28 Hrs.)
- Part-Time Local Building Inspector (28 Hrs.)

Why Do People Contact Us?

- Permit Applications for Building, Electric, Plumbing, Gas or Occupancy
- Information regarding application requirements and zoning
- Information about opening a business
- To learn and understand the Codes and Ordinances
- To complain/inquire about:
    - if permits were issued
    - obstructions to intersections
    - unregistered vehicles on a property
    - the condition of a house/building

ISD by the Numbers (in an average year):

- 7,000 emails fielded
- $800,000 in permit fees collected
- 3,300 inspections
- 6,000 in-office customer visits
- 3,100 permits issued

This year (as of May 5, 2022):

- 2694 permits issued
- $869,670.00 in fees collected
- 3234 inspections
- 300 walk-throughs (were not ready for inspection)

Little Known Facts/Common Misconceptions

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- There is a tremendous number of nuances in zoning and building codes and it requires a huge amount of knowledge and agility to keep up with the changes
- Regulations are constantly changing but funding does not always come down from higher government levels to accommodate those regulation changes
- Building and inspectional services provide public safety. If we don't ensure compliance with all codes, this could result in loss of life. We keep residents safe with stringent building codes, talented and dedicated inspectors, and thorough processes
- Housing stock in Melrose remains the way it is because of the work of ISD. The work we do is foundational to making Melrose an attractive place to live

COVID-19 Response

- Developed system to accept and process permit applications and payments online
- Performed virtual inspections
- Had system in place within two weeks of the pandemic hitting
- Challenge faced: not having access to historical hard files which contain construction documents, letters, plans, applications etc.
    - Looking forward, digitizing our records will allow us to operate fully remotely when needed

Changes from FY22 to FY23

- Work to develop and institute online permitting for Melrose
- We are happy to announce that we have gone live to the public with online permitting
- Upgraded local Building Inspector to a permanent 28-hour-per-week position

Office of Planning and Community Development

Mission & Overview

It is the mission of the Office of Planning and Community Development (OPCD) to protect and enhance the quality of life in Melrose. To accomplish this mission, OPCD provides long range planning, manages the capital improvement program, reviews and recommends changes in zoning, applies for and administers grants and community development programs, implements special projects, oversees sustainability efforts throughout the City and provides mapping and GIS (Geographic Information System) support. Additionally, OPCD supports the work of several Boards and Commissions in the City and reviews all major land use proposals, including subdivision plans and significant residential and commercial development proposals. OPCD provides staff support to the following Boards and Commissions: Planning Board, Board of Appeals (ZBA), Historic District Commission, and Energy Commission.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Department Organization

- Director of Planning and Community Development
- Senior Planner
- Account Manager & GIS Analyst
- Sustainability Manager
- Assistant Planner

Why Do People Contact Us?

- Property owners & developers inquiring about land
- Affordable housing opportunities
- Questions about electricity pricing
    - Questions about establishing a business in Melrose

OPDC by the Numbers:

Planning Board Activity

- 12 Meetings
- 25 ZBA cases reviewed
- 2 Subdivision applications reviewed
- 6 Site Plan Review Applications permitted: 2 pending
- 22 housing units permitted: 61 housing units pending
- 2 Zoning Subcommittee Meetings
- 1 Design Review Subcommittee Meeting

Zoning Board of Appeals Activity

- 12 Meetings
- 25 permit applications reviewed and decision filed

Historic District Commission Activity

- 5 Meetings
- 9 Cases Reviewed for Certificate of Appropriateness

Housing Production Plan

- Community Engagement #2 on Housing Goals, Types and Locations
    - Online Open House – 375 participants
    - Webinar – 30 participants
- Plan presented and approved by Planning Board and City Council and submitted to DHCD for approval

Affordable Housing Activity

- 2 deed restricted housing units permitted with 9 units pending permitting
- 2 lotteries held for 3 affordable homes
- 2 lotteries pending for 21 affordable homes
- Current Affordable Housing percentage on the Subsidized Housing Inventory – 8%

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Capital Improvements

- Evaluated 96 capital projects representing over $90M in requests for the FY22-26 timeframe
- Produced FY22 CIP Report with prioritized list of capital requests and recommendations for FY22 funding
- Secured grant approvals for 2 school roof projects
- Secured additional $1.5 million capital funding for Memorial Hall Building Envelope Project
- Participated in effort to secure $21 million funding for Library Renovations & Addition Project

Geographic Information Systems (GIS)/Mapping/Sign making –

- Worked with CDM Sewer App project
- Renamed and geo located 7000 sewer tie cards for CDM & Arc Reader Map
- Created Trash survey app for DPW
- Worked with Weston & Sampson on Catch Basin Cleaning App
- Worked on 2020 Census redistricting data, mailing notification address changes for the state, and created new 2020 Ward Precinct Maps
- Edited and researched the water, sewer, drainage, and easement GIS layers.
- Assisted Inspectional Services with new Permitting software
- Continued with scanning plans - vault drainage cabinet plans

FY22 Sustainability

- Melrose Net Zero Action Plan - Completed and released in April 2022, charting a roadmap to reach community-wide greenhouse gas emissions reduction goals for 2030 and 2050 for buildings, transportation, and energy supply
- Green Community Grant #6 for $104,663
- Municipal Vulnerability Preparedness Grant #2 for $101,108
- MassSave Community First Partnership award for $25,000 annually for three years for energy outreach and coaching
- Melrose Community Power – Introduced new contract and rates for 2021 – 2024 that includes a standard product with 10% more local renewable energy than required by the state
- First 15 pole-mounted EV chargers on the east coast – installation completed
- Events – Participated in Victorian Fair, Senior Resource Fair, Earth Week, Healthy Melrose, EV Showcase and various other webinars and virtual events

Little Known Facts/Common Misconceptions

- OPCD oversees a sign and façade grant program to help small business defray the cost of new signage
- OPCD does not decide what kinds of businesses come to Melrose
- OPCD manages the capital improvement program and has overseen renovations projects in many of the City's school and municipal buildings

COVID-19 Response/Impacts

OPCD did not miss a beat during the pandemic and had to contend with an increasing workload while pivoting to a completely new working modality which added to the complexity of the work.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- All employees went fully remote until City Hall re-opened
- Shifted to staggering staff to keep office open while City Hall was open to the public
- Instituted routine virtual meetings with staff
- Shifted to online platform for permitting and virtual meeting platform for public hearings
- Post permit review application materials online for all applications to facilitate access by the public

Changes from FY22 to FY23

- Upgraded part time Planning Coordinator position to a full time Assistant Planner position to better respond to demands of the Department

Goals for FY23

- Continue to assist residents, developers, and business owners and provide technical and administrative support to the Boards and Commissions under OPCD purview
- Continue to provide mapping and GIS support to enhance the City's GIS capabilities and Maps Online functionality
- Implement the Housing Production Plan and support the newly formed Affordable Housing Trust
- Implement the Net Zero Action Plan
- Increase total number of residents purchasing 100% renewable energy through our aggregate
- Continue to provide project management support for the Library Renovations, Roof Replacements and other Capital Projects

Police Department

Mission & Overview

The Melrose Police Department pledges to maintain the highest standards of integrity, ethics, excellence and teamwork in the performance of our mission while at the same time protecting the Constitutional rights of the citizens. Our mission is to strengthen public confidence in the organization, develop and maintain positive relationships with the community and promote the concept of teamwork for the benefit of all, while at the same time promoting a safe and friendly community through enforcement and education.

Department Organization

- Chief of Police
- Executive Office Manager
- Administrative Assistant
- 4 Lieutenants
- 10 Sergeants
- 31 Patrol Officers
- 5 Academy Recruits
- 1 Explosives K-9; 1 Patrol K-9

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Little Known Facts/Common Misconceptions

Police departments do not write laws; they are tasked with the responsibility of enforcing laws that are enacted by elected officials in the legislature and that are interpreted by the courts. Enforcing laws is just one of many different roles of the police. Other important roles include working with communities to prevent crimes and solve various "quality of life" problems, maintaining order, and conducting investigations. Police officials are responsible for performing their various roles and responsibilities in a way that protects everyone's constitutional rights. This means that policing must be conducted in accordance with the parameters set by the U.S. Constitution, state constitutions, and the many court decisions that have defined in greater detail what the text of the Constitution means in terms of the everyday practices of policing.

Changes from FY22 to FY23

- Three officers separated from the Melrose Police Department as well as the Patrol Commander, Lieutenant DeCroteau
- One officer was promoted to Sergeant, one Sergeant was promoted to Lieutenant, and one Lieutenant was promoted to Patrol Commander
- Both Unions' contracts expired in FY21, negotiations are ongoing
- The introduction of the Massachusetts Peace Officer Standards and Training (POST) State-mandated training and policies has significantly impacted the police department budget

Goals for FY23

- Complete Accreditation Compliance
- Implement Police HUB Program
- Implement Social Media Investigation Trial Program
- Rotate in a new SRO for Melrose High School

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

MEMORANDUM

To: Melrose City Council
From: Margot Fleischman, Director of Strategic Initiatives and Communications
Re: FY23 Budgets for Boards and Commissions
Date: May 16, 2022

In preparation for the review of Fiscal Year 2023 budgets, I am pleased to provide the Honorable City Council a summary of the commissions with budgetary allocations. As you will note from the chart below, the only commission that will see an increase in FY23 is the Conservation Commission. The Conservation Commission requested an increase in the salary and wages line of $5,700. This will allow the Conservation Agent to work 16 hours weekly versus the current 10 hours weekly.

		FY22	FY23	$ Change	% Change
165	Liquor Commission	2,000.00	2,000.00	0.00	0.00%
171	Conservation	20,825.00	26,590.00	5,765.00	27.68%
196	Melrose Energy Commission	2,500.00	2,500.00	0.00	0.00%
540	Beebe Estate	7,900.00	7,900.00	0.00	0.00%
542	Women's Commission	2,000.00	2,000.00	0.00	0.00%
544	Human Rights Commission	3,000.00	3,000.00	0.00	0.00%
545	Commission on Disability	2,500.00	2,500.00	0.00	0.00%

MEMORANDUM

To: Melrose City Council
From: Margot Fleischman, Director of Strategic Initiatives and Communications
Re: FY23 Mayor's Office Budgets (121 and 692)
Date: May 16, 2022

In preparation for the review of Fiscal Year 2023 budgets, I am pleased to provide the Honorable City Council a summary of the proposed changes to the Mayor's Office budgets.

The Mayor's Office operating budget (121) for FY23 reflects a 14.6% increase over FY22. The main cost drivers for this increase are Dues and Membership and Salary and Wages.

In the case of Dues and Memberships, the Mayor's Office budget has been underfunded for the past several years relative to the current annual dues paid by the City to the Massachusetts Municipal Association (MMA) and the Metropolitan Area Planning Council (MAPC). This line item has been increased by $4,556 (23.4%) to reflect the actual cost of these dues.

The Salary and Wages line item has been increased by $42,572 (15.8%) to reflect the 53-week year, as well as funding for a part-time (18 hours per week) administrative position in the Mayor's Office in FY23.

Mayor Brodeur's office is currently comprised of three employees:

- Director of Strategic Initiatives & Communication Margot Fleischman, who also serves as the Mayor's Chief of Staff
- Communications & Outreach Coordinator Lily Wall
- Director of Economic Recovery and Business Development Lauren Grymek

The Mayor's Office has traditionally relied on volunteers and participants in the Property Tax Work Program (PTWP) to staff our phones and front desk. While we value and deeply appreciate the contributions our excellent senior volunteers make to our office, there are some limitations to this set-up: PTWP participants are limited in the number of hours they work, and as they reach their maximum benefit of $1000, their turn-over means that we must continue to train and recruit new volunteers throughout the year.

Reliance on volunteers also means that it is not always possible to provide coverage during all the hours of the work week. There are frequently times when all members of the Mayor's staff need to be out of the office, in meetings, or on webinars, and there is no one available to answer phones or greet visitors to the Mayor's Office. Since our office has also taken over the responsibility to receive general calls on

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

the City Hall main phone number, members of the public are unable to reach a live person when they call during business hours if our front desk is unstaffed.

This new part-time position will provide a consistent level of staffing for the office, answering phones, coordinating volunteers, and providing billing and payroll administrative support for the Mayor's Office and other departments as needed. We will continue to utilize volunteers and PTWP participants to cover the front desk for the remaining 17 hours per week.

Finally, the Mayor's Office recently welcomed Lauren Grymek as the City's first Director of Economic Recovery and Business Development. This new role was created by the Mayor to address the economic impacts of the COVID-19 pandemic and will be funded using ARPA funds. This position will continue through FY23-FY25, but as it is grant funded, there is no impact to the Mayor's Office operating budget.

The Community Events Budget (692) which is overseen by the Mayor's Office will remain unchanged from FY22 as we anticipate that the Memorial Day parade will return next year.

Allan I. Alpert
Director

MEMORANDUM

DATE: May 5, 2022
TO: Honorable City Council
FROM: Director Alpert
SUBJECT: FY Budget 2023

Below are the answers to your questionnaire.

1. Please identify any noteworthy changes or events that took place during FY22 in your department (staffing changes, technology upgrades, new regulations, or procedures, etc.)

1.1 The director was relocated to a first-floor office. 1.2 Using MEMA EMPG and HMEP Grant Funding, the EOC/training center was upgraded with new furniture, laptop computers and large screen monitors.

2. Do all your department's salaries come from the same budget, if not, please identify the split among multiple budgets?

Yes

3. Are there any significant changes to your FY22 budget compared to previous years? Please explain.

None

4. Any events or changes you anticipate in your department for 23?
4.1 Publish Evacuation Plans for City Hall. 4.2 Assess all city buildings (with the police department) to determine what is required to safely secure the location in the event of an intruder (armed or unarmed). 4.3 Prepare a protocol for intruder notification to departments and the police, 4.4 Establish a policy for an active intruder incident. 4.5 Conduct tabletop exercises for City Plans 4.6 Install radio equipment in the EOC/Training Center for FD & PD training, emergency use and EOC Operations.

Kpigottbrodeur@cityofmelrose.org

MEMORANDUM

TO: The Honorable Melrose City Council
FR: Kathy Pigott-Brodeur, Executive Director/Operations Manager, Memorial Hall
DATE: May 5, 2022
RE: FY23 Memorial Hall (693) Budget

The following is an overview of the Soldiers and Sailors Memorial Building, (Memorial Building 693), FY23 budget and projects that will occur in FY23.

The Memorial Hall FY23 budget has an overall increase of 3.3%. The increases are due to:

- Elevator Maintenance line item: Memorial Hall has a stand-alone elevator service contract as Memorial Hall requires 24 hours on demand service, (ex: elevator needs repair during an event on Saturday night). The $568 increase (12.3%) is due to the annual contractual International Union of Elevator Contractors labor rates.

- Professional Services line item: There is an increase of $1,000 (6.7%). We are now required to use MERV Filter replacements in the HVAC system which have a higher cost than the filters that were used in the past.

- Salary and Wages line item: FY23 has an increase of $5,483 (3.7%) due to the 53 week-year and the annual steps for staff
    - Memorial Hall staff includes one Executive Director/Operations Manager, (4) part time Operations Assistants and (1) temporary summer custodian
    - All Memorial Hall salaries are in the Memorial Hall Salary and Wages line item

In FY23, the Memorial Hall Building Envelope Improvements project will occur. Construction will begin in Summer of 2022 with completion expected in Fall of 2023. As this project will include mostly exterior work, the construction will be scheduled around the event schedule to avoid disruption. Updates on the progress of the project will be posted weekly on the Memorial Hall city website page during construction.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

With the awarding of a matching SHRAB grant, the Melrose Civil War Veterans Heritage Project will be started in FY23. The project, will identify, catalogue, restore and preserve the artifacts housed at Memorial Hall and to research the history of our local veterans to ensure that all Civil War veterans who resided in Melrose are recognized. If it is discovered there are Civil War Veterans who have not been recognized, the next step will be to determine how and where to recognize these heroic veterans.

In FY22, we are on target to host 225 events, with approximately 37,000 guests in attendance. These events including symphony concerts, live concert performances and comedy shows fundraisers, business meetings, dance recitals, private music school performances, private family parties, rehearsals for surrounding communities and out of state professional music organizations (choral, music, symphonies, etc.), boxing, wrestling and muay thai amateur and professional matches, out of state dance company performances, vaccination clinics and the annual Nutcracker performances. As of April 2022, for FY23 we have requests for 191 event dates at Memorial Hall. For FY23 our main goal is to return to pre-COVID event bookings level, (FY19: 301 events).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Clerk's Certificate
Pine Banks Park

A meeting of the Board of Trustees of Pine Banks Park was held at 5:00 P.M. on Tuesday, May 10, 2022, due notice of which was given to all members in advance thereof, via ZOOM Conferencing from 350 Main Street, Malden, Massachusetts.

Present at the meeting were the following members:

C. Henry Kezer, of Melrose, Presiding, Hon Gary Christenson, Mayor of Malden, Hon Paul A. Brodeur, Mayor of Melrose, Richard R. Burns, Jr. of Malden, Peter M. Carroll, of Malden, and Richard C. Rudolph, at large. John W. Lynch, of Melrose was personally consulted in advance by Mr. Kezer, and approved by proxy.

A quorum was declared present and voting.

Section 6. of St. 1905, Chap. 393 states:

> The board shall annually in the month of January make a full report to the cities of Malden and Melrose of its receipts and expenditures, with its estimate of the amount required for maintenance for the ensuing year.

Section 7. of St. 1905, Chap. 393 states:

> The Cities of Malden and Melrose shall in their annual appropriation bills each appropriate and place at the disposal of said board one half of the amount determined by said board to be necessary for the maintenance of said property for that year, and set forth in its annual report as provided in section six.

Wherefore, the Annual Report of Pine Banks Park for January 2022, containing the Budget for the fiscal year 2023, and the report of the Superintendent of operations for Calendar 2021 was presented for the consideration of the board.

Upon motion duly made and seconded, it was unanimously:

VOTED: To adopt the report and budget, and submit the same to the Cities of Malden and Melrose for the purposes set forth in St. 1905, Chap. 393.

A true copy

C. Henry Kezer

		Total	$ 851,361.92

Statutory Excerpt: St. 1905 Chapter 393; amended by St. 1906 Chapter 162

Section 6.

Said Board of trustees shall have the absolute control and management of the property, and shall have power to make rules and regulations regarding its use and management, in such manner as it shall deem best.

The board shall annually in the month of January make a full report to the cities of Malden and Melrose of its receipts and expenditures, with its estimate of the amount required for maintenance for the ensuing year. Its expenditures in any year shall not exceed the sum of the appropriations for that year and the income at the disposal of said trustees by reason of any gifts received under the authority of section two of this act.

Section 7.

The cities of Malden and Melrose shall in their annual appropriation bills each appropriate and place at the disposal of said board one half of the amount determined by said board to be necessary for the maintenance of said property for that year, and set forth in its annual report as provided in section six.

If either of said cities shall in any year fail to make such appropriation, the said board shall upon the written request of said donors or their heirs or devisees who may then hold their estate, reconvey said property to said heirs or devisees free from all trusts;

but the amount required of each city by said board to work a forfeiture shall not in any year exceed one one hundred and fiftieth part of one per cent of the assessed valuation for the preceding year of the city having the smaller assessed valuation.

Said cities may, if in their judgment the proper maintenance or improvement of said property shall require it, appropriate in equal amounts and place at the disposal of said board sums in excess of the amount which said board is hereby authorized to require of said cities.

pine banks park

ANNUAL REPORT
OF
PINE BANKS PARK

Fiscal Year 2022

July 1, 2021 through June 30, 2022

Board of Trustees

C. Henry Kezer, President and Chairman, Melrose
Richard R. Burns, Jr., Treasurer, Malden
Peter M. Carroll, Malden
John Lynch, Melrose
Gary Christenson (Ex Officio), Mayor of Malden
Paul Brodeur (Ex Officio), Mayor of Melrose
Richard Rudolph (Provisional at-Large)

Staff Members of Pine Banks Park

Kevin Benner, Superintendent
Russell P. Kezer, Skilled Laborer
John Wright, Skilled Laborer
Frank Celona, Mechanic/Skilled Laborer

Report of the Superintendent.

As Superintendent of Pine Banks Park, I herewith submit the following report for the year 2022.

The park's overall usage has been very busy and is basically back to the 2019 schedule for organized programs, since the lifting of restrictions due to the pandemic. We were once again able to provide picnic reservations for three picnic sites which are available from May 1st through October 31st. The sports fields are heavily used by the cities of Malden and Melrose for high school and youth organizations, and any time left over is for reservation for private rental by travel programs and other athletic user groups for a set fee. The track and dog park continue to be very popular, as well as the hiking trails, which our staff tries to maintain regularly to keep a safe and consistent walking path.

Thanks to the Trustees and the cities of Malden and Melrose, the new maintenance building will be completed for this summer. This building will create a better operation for maintenance of every aspect of the park, and for the first time we will have everything needed at one location. The building process started in the summer of 2021 with the demolition of the old building and has continued throughout the fall and winter and is now in its final stages before completion.

For the first time since 2019, the park was able to hold the Santa event back in the Santa house on Main Street on Saturday December 18th from 2PM-6PM. Also, the Fairy House event was held on Saturday August 28th from 12PM-

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4PM. Special thanks to Malden city councilor Barbara Murphy and her Ward 5 volunteers for organizing both events and making it very special for all who attended.

We continued again this year to hire a private tree service to prune and remove certain trees which pose a threat and create hazards to areas such as roadways, parking areas, pond and playground areas, or anywhere there is a potential target. On October 27th, we had to make an emergency call for a large oak tree which split at the base and was hung up several feet in the air, hung up in another tree and compressed on the road surface. The trees were cleared and later a large section of trunk scheduled for crane removal. We had that same tree service come in a couple of other times for similar work but was based upon scheduled set-up location to remove hazardous trees and limbs. Some of the logs were kept onsite to decrease cost and were cut up by park staff safely (always wearing proper personal protective equipment, hard hat, face shield, leg chaps, as well as a work plan and focus on continued education involving tree work). The logs were then split and piled as firewood.

There are 13 maple trees at the field areas located along the road from field BB1 and ending at the track by Main Street. Most recently we had one small dead maple removal, and nine others were pruned of all dead wood. These trees are all in decline and have suffered from past road construction, compaction, storm damage and other factors. A project for tree planting throughout this area mentioned as well as removals should be strongly considered.

Though this year has been tough without a maintenance building, the new building will create a terrific environment for successful maintenance throughout the park. Overall, this year was a success. The park continues to see an interest from outside renters, and the revenue has been very good, but we are probably at capacity. The sports fields are heavily used, but with our regular maintenance, they still hold up well and can handle the heavy use.

This year, I was appointed to the NESTMA (New England Sports Turf Managers Association) Board of Directors, and hopefully either this fall or next spring we will be able to host a field day event. On May 18th, the park will be holding a field day for the Massachusetts Tree Wardens and Foresters Association, which will provide lunch, as well as a tree planting demonstration and risk assessment and vendor booths. Organizations such as the ones mentioned have helped me so much and offer education and advice for all in these related fields of open space and recreation.

The support of the Pine Banks Park Board of Trustees and the cities of Malden and Melrose make all of this possible for this just over 100 acre gem to be used for these communities as a public park. I think Mr. Converse would be proud of what it has become.

I would like to thank the Pine Banks staff – Russell Kezer, John Wright and newly hired mechanic/skilled laborer Frank Celona. The work that they do, and all their continued efforts are so important for this facility.

Finally, I would like to thank the Board of Trustees for giving me this opportunity to be Superintendent, it is a great honor and means a great deal to me. I would also like to thank past Superintendent, Andrew Walsh for all that he did for Pine Banks over five years. Also, to all that have had a part in the new building, whether it be in architecture or design, engineering, whatever it may be, thank you so much.

Respectfully submitted

Kevin D. Benner

Superintendent

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Scheduled Field Usage

The following is a list of participants using the sports fields on an annual basis:

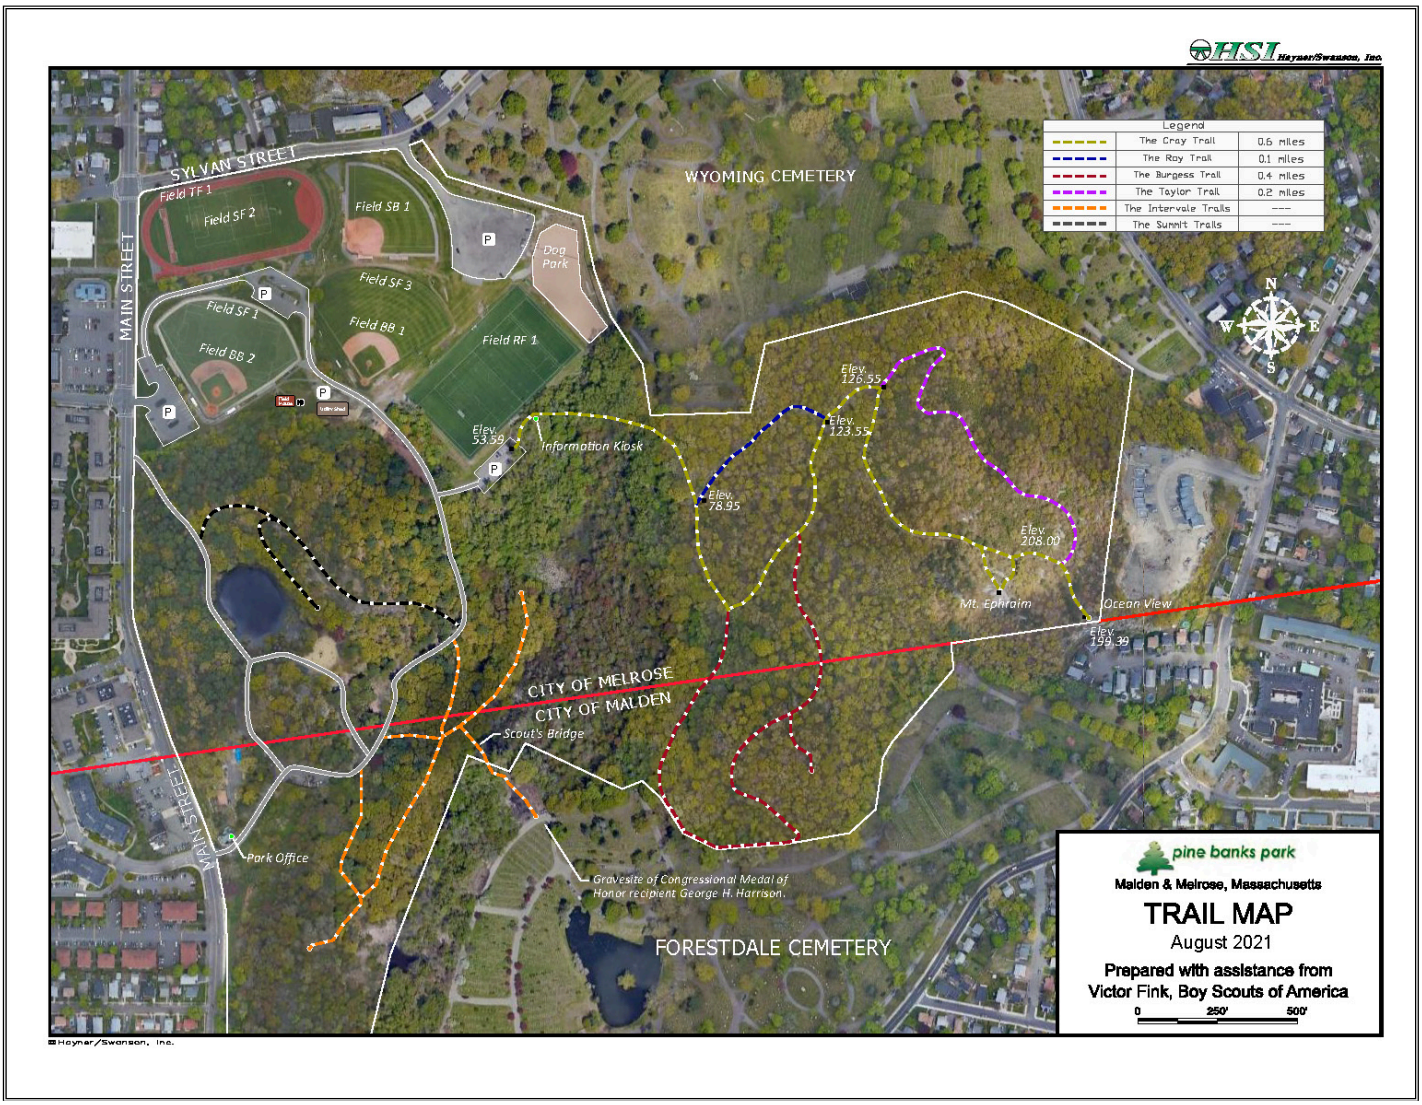
Malden:
Varsity, JV & Freshman Baseball
Varsity & JV Soccer
Varsity, JV & Freshman Field Hockey
High School Cross Country
Girls' Varsity & JV Lacrosse
Boys' Varsity & JV Lacrosse
Malden Youth Soccer (with lights)
Malden Babe Ruth Baseball (with lights)
Malden Pop Warner Football
Malden Youth Softball

Melrose:
Varsity, JV & Freshman Baseball
Boys' Varsity & JV Soccer
High School Girls' Varsity & JV Soccer
High School Girls' Field Hockey
High School Girls' Varsity Softball
High School Girls' Lacrosse
High School Boys' Lacrosse
Babe Ruth Baseball (with lights)
Pop Warner Football practice (with lights)
Melrose Youth Soccer (with lights)
Melrose Youth Lacrosse

Other Organizations:
Kendall Wanderers AFC Soccer
Melrose Running Club
Mystic River Rugby Club (with lights)
Melrose Men's Softball League (with lights)
Vikings AAU baseball
Team Boston AAU baseball
Malden Youth Flag Football
North East Baseball Tournament
Boston City Football Club

Special Events Calendar

A sample of groups which hold their "Special Events" at the Park during the season. They included:



A. Melrose Running Club Mother's Day 5K Race
B. Bread of Life Walk
C. Melrose High School Marching Band Memorial Day Picnic
D. Melrose and Malden Boy Scouts Camp Out
E. Mayors' Cup (Malden vs. Melrose scholastic teams).
F. Malden YMCA Summer Program (a day camp)
G. Malden YWCA 5k road race.
H. Melrose Victorian Fair Road Race
I. Fundraising event for the Jimmy Fund
J. Learn to Cope Run and Walk Race
K. Weekly AA Meetings
L. Mystic River Rugby Club – Youth Rugby Summer Camp June – July

Youth Rugby Summer Camp

Pine Banks Park – Satellite Photo.

This is a satellite photo of Pine Banks Park as it is presently configured, with an overlay of the locations of improvements and adjoining streets. The trail mapping was part of Victor Fink's Eagle Scout project, and was accomplished with a hand held GPS unit that provided exact locations and elevations. Victor stopped every six feet along the way to get these. His original work has been placed on the updated satellite image showing the new track, softball, dog park and parking area. This has been provided to us by our Civil Engineer, John Vancor, of Hayner/Swanson, and his son, Thomas Vancor, and our thanks goes out to them for it.

It is always interesting to see that the portion of the Park dedicated to the ball fields is a small portion of the total. It is also interesting to see the extensive trails running through the area, which a not well known to residents of either city.

A good portion is covered by a tributary stream to the Malden River. This comes down through the notch in our boundary with Wyoming Cemetery, running in a Southwesterly direction along our border with Forestdale Cemetery. This is the reason that there are no trails on the map where the boundaries for Melrose and Malden are shown. This low area is in contrast to the area to the East, which runs up to the high point at Mt. Ephraim and the view from Ocean View. Anyone who has not been up to visit these areas should try to make it and see the great views of Boston and the Ocean that available at Pine Banks Park.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Pine Banks Park - Trustees' Notes 2022

Contributions.

In support of various projects, the trustees received the following contributions during the fiscal year:

- The Adelaide Breed Bayrd Foundation is in the renewed its grant of $250,000 over five years. Total contributions from them now exceed $1 million for park improvements. An additional grant for a similar amount to support capital improvements is to be submitted.
- The Adelaide Breed Bayrd Foundation contributed $25,000 for the purpose of acquiring miscellaneous equipment, improvements and other initiatives.
- The Adelaide Breed Bayrd Foundation contributed $5,000 for the hiring of a student from Malden as an intern during the late Spring and Summer. .
- The Piccolo Family Charitable Foundation contributed $25,000 for the purpose of acquiring miscellaneous equipment, improvements and other initiatives.
- The Piccolo Family Charitable Foundation contributed $5,000 for the hiring of a college student as an intern from the city of Melrose during the late Spring and Summer.

Capital Projects – Adelaide Breed Bayrd Foundation Loan.

As mentioned last year, the 1963 storage shed was to be replaced with a new Field Utility Building. This is the before picture:

Construction on the building began in the summer of 2021. Due to the East Boston Savings Bank acquisition by Rockland Trust Company, and the departure of key lending personnel, we lost our primary funding source since obtaining the MassDevelopment Bond. As an alternative, the trustees of the Adelaide Breed Bayrd

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Foundation agreed to loan the Pine Banks Park Foundation, Inc. the principal amount of $800,000.00 payable at 4.00% interest fixed over a term of ten years as had previously been discussed with East Boston Savings Bank. From the borrower's perspective, this is an advantageous arrangement in providing a fixed below market loan facility with minimum administrative overhead. From the lender's perspective, it allows the Adelaide Breed Bayrd Foundation to create an innovative and flexible charitable benefit to a local operating charity, like Pine Banks Park, while providing a fixed income investment at competitive rates. And all the Bayrd Trustees grew up at Pine Banks Park.

This loan was closed on February 16, 2022, and has been deployed toward the completion of the building. This loan was included in the FY 2022 budget, and is shown on the FY 2023 budget on line 46 of the Budget Summary.

This is a picture of the new building taken in May 2022, with occupancy set for Memorial Day 2022.

The main entrance is provided by two large overhead doors to the left, and behind the parked truck. To the right is the repair shop, with its own door for access. Inside is a complete vehicle workshop, complete with a lift for repair of park vehicles. Behind the workshop, but not visible here, is the office entrance to the right, The staff area consists of the Superintendent's office, a common break room with kitchenette, staff lockers, and bath and shower facilities. This new facility will provide Pine Banks Park with increased storage, maintenance capacity, and administrative space for the next fifty years. It took a lot of effort from all the friends of Pine Banks Park, but it came in on budget and on time. Our thanks to all.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Pine Banks Park – Budget Summary – Fiscal 2023 Line Item Notes.

Pine Banks Park organizes its funding into three parts:

Part I Income - Compensation and Benefits. Lines 1 – 5 page 5.

The Park 'Leases' its employees from the City of Melrose. All compensation and benefits are administered through the Human Resources Department of the City of Melrose, and the entire scope of the costs are shown on the Park Budget. The City of Malden advances to the City of Melrose one half of the amounts required quarterly as shown on page 6. We include all costs related to benefits and retirement to be sure that the amounts are shared equally. The process was put into place in November 2012, and has been working extremely well, with thanks to the Human Resources Department of Malden and Melrose. Detail information is shown on the Compensation & Benefits Summary on page 6. These figures have remained flat from last year.

Part II Income – Operations - Budget Summary Lines 6 - 42. & 59 – 67.

These expenditures are made through a segregated central operating account at the Park, funded by monthly disbursements from each city. This has allowed a more accurate and timely control over expenses, which previously were made by each city on a per-expenditure basis. It also provides a more accurate basis for budgeting. The process has indicated areas to focus for more effective application of resources. These figures show and increase of $23,450 due to increased overhead in the operation of the new building, including heat, burglar alarm & internet totaled on line 67. The figures in the red box represent funds advanced from each city during the year.

Part III Income - Equipment and Capital Purchases Lines 43 - 55.

Capital expenses and acquisitions are shown on lines 43 - 55. These items are allocated and billed to each city as they are incurred during the year. Line 45 is the continuing amortization payment for the field improvements, and line 46 is for the supplemental funding of the Field Utility Building. Line 51 is a new one time capital expenditure to pave the parking lot by the playground.

Conclusion.

The Summary of expenditures is on lines 56 through 70. The Statutory Mandate is shown on line 71, and due to growth in assessed values has grown $56,538.43 this year to $851,361.92. The proposed budget is $973,571.89 and exceeds the mandate by $122,209.97, attributable largely to capital improvements.

The Trustees wish to express their appreciation to the citizens of Malden and Melrose for making this project possible. Those contributions together with the private grants that we continue to receive have permitted the Park to greatly improve its services for the citizens of both communities.

Respectfully submitted,

C. Henry Kezer, President & Chairman.

CITY OF MELROSE

PARKS DEPARTMENT
100 Slayton Road
Melrose, MA 02176

Joan Bell
Superintendent of Mount Hood
& Public Open Space
jbell@cityofmelrose.org

On behalf of the Melrose Parks Department, I am pleased to present to the City Council the budget for the Mt. Hood Enterprise.

The mission of the Parks Department is to protect, maintain and develop the City's parks, fields and recreational facilities for the benefit of Melrose residents. The Park Department is responsible for the City's parks, fields and open spaces including Mount Hood Golf Course and Memorial Park. Apart from Mount Hood, these properties are maintained by the Department of Public Works. Mount Hood is operated and maintained under a management agreement between the City of Melrose and Mass. Golf Management, LLC.

The Mount Hood Enterprise budget is comprised of revenue brought in by the golf course and functions. It is not funded out of the City's general fund.

The proposed Mt. Hood Enterprise Budget for FY is $1,572,549. This represents a 0.7% change over the FY22 budget. The increase is due to a small uptick ($11,407) in the Salary and Wages line item, primarily due to the 53-week year.

In our contract with the management company, we contractually have agreed to spend a minimum of $50K on capital improvements each year, which will continue in FY23.

January 1, 2023, we look forward to starting a relationship with a new management company for Mt. Hood Memorial Park and Golf Course. GMC has had 4-5-year contracts with the City and will not be putting in a bid for the 2023 Management Contract for Mt. Hood, due to internal changes/illness within their company. The transition should start internally once we review the bids and pick the vendor, (expected beginning of June).

Our shift to the new company will be as smooth as possible by the end of year. Golf course revenue is driven by weather. Parks and Open Spaces requires comfortable weather for residents to take advantage of all the wonderful sports fields, parks, playgrounds, hiking trails, dog parks, community gardens, skateboard park, and bike paths Melrose has to offer.

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Melrose Liquor License Commission Re-appointment
Date: May 11, 2022

I respectfully request the Honorable City Council confirm the re-appointment of Joseph Nevin, of 415 East Foster Street, to the City of Melrose Liquor License Commission for another six-year term, said term to expire the first day of June 2028. Nevin's current appointment as Chair for the Commission expired on the first day of June 2022.

For over a decade, Nevin has exceeded expectations in his capacity Chair of the Commission – going above and beyond to build relationships with the Melrose community, routinely visiting every establishment, and operating as Chair in a fair and diplomatic nature. Outside of the Commission, Nevin's professional experience with the hospitality industry as an architect has lent the commission a unique perspective, helped foster these relationships with our local businesses, and more.

I am eager for Nevin to continue his work supporting the local business community and the residents of Melrose through his service, and I look forward to having the opportunity to discuss my confidence in Nevin with you.

Thank you for your consideration.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Re: Reappointment to Liquor Licensing Commission

Dear Mayor Brodeur,

I am writing you to let you know that I would like to continue my work on the City of Melrose's Liquor Licensing Commission in my current role as Chair. I respectfully request your consideration for reappointment.

It is a privilege to serve the City of Melrose in this volunteer capacity as a special municipal employee and I look forward to continuing the work of the commission and serving the people of Melrose, the Administration, and our local businesses.

If you have any questions or comments, please do not hesitate to contact me.

Warm regards,

Joseph P. Nevin, Jr.

AN ORDER

ORDER-2022-106

Authorizing a Bond under the Water Enterprise System through MWRA Local Water System Assistance Program bonds for FY2022 in the amount of Six Hundred Eighty Five Thousand Dollars ($685,000)

Offered by Mayor Paul Brodeur

BE IT ORDERED

The Department of Public Works requests the Authorization to borrow funds to continue Water System Improvements. Construction of said improvements would begin in the Spring of 2022 and continue throughout the 2022 construction season. Projects proposed include the replacement and upgrade of over one mile of water infrastructure at the following locations:

1. Appleton Street
2. Irving Street
3. Elliott Street
4. Frost Avenue

REQUEST FOR AUTHORIZATION OF BOND (WATER)

The Department of Public Works respectfully requests that the City Council authorize the City Treasurer, with approval from the Mayor, to issue bonds or notes of the City to the aggregate principal amount of **Six Hundred Eighty Five Thousand Dollars ($685,000)** under the Water Enterprise System through MWRA LWSAP bonds for FY2022. In general, the borrowing will fund design, engineering and construction of programs that will continue to address water system improvement projects aimed at addressing leak history, fire flow capacity and water quality in the above mentioned corridors and other areas throughout the system as required. This is a zero percent (0%) interest loan with a ten (10) year pay-back period commencing in FY 2023 (FY23).

*The City Council of the City of Melrose, appropriates the sum of Six Hundred Eighty Five Thousand Dollars and No Cents **($685,000.00)** to*

> *-pay costs of designing and constructing water system improvement projects aimed at addressing leak history, fire flow capacity and water quality in the Appleton Street, Irving Street, Elliott Street, and Frost Avenue corridors and throughout the City's water system, which projects shall be undertaken in conjunction with loan funding to be received by the City through the MWRA's Local Water System Assistance Program,*

and that to meet the aforesaid appropriation, the Treasurer with the approval of the Mayor is hereby authorized to borrow said amount, under and pursuant to Chapter 44, Section 8 of the General Laws, or pursuant to any other enabling authority, and to issue bonds or notes of the City therefor.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Any premium received upon the sale of any bonds or notes approved by this vote, less any such premium applied to the payment of the costs of issuance of such bonds or notes, may be applied to the payment of costs approved by this vote in accordance with Chapter 44, Section 20 of the General Laws, thereby reducing the amount authorized to be borrowed to pay such costs by a like amount.

The funds borrowed pursuant to this Order will be deposited into Fund 6149.

The MWRA's Local Water System Assistance Program provides interest-free loans to member water communities for local water system improvement projects. Loan funds have been approved for distribution from fiscal year 2011 through fiscal year 2022. MWRA's goal in providing financial assistance to member communities is to improve local water systems to help maintain high quality water as it passes from MWRA's facilities through local pipelines to customers' taps. As of May 2022, Melrose has $685,000 in eligible funding available to borrow within the parameters of this program. It is requesting the authorization to borrow said amount.

Re: Timing of MWRA Water Local Assistance Program Borrowing Authorization

Following up on the request of the City Council Appropriations Committee at the May 5, 2022 meeting, this memorandum outlines the required timeframes for authorizing this borrowing request, according to the City's Bond Counsel:

- The intent to borrow must be posted 21 days prior to the City Council vote
- The bond order must be placed on two agendas of the full City Council
- There is a 21-day waiting period after the vote, prior to finalizing the loan, to provide the public time to make comments or objections

Based on these requirements and the date the order was submitted to IQM2, the City Council can take a final vote on the current loan order on or after May 16th.

Thank you for your attention to this added detail regarding this order.

Melrose City Hall
Melrose, MA 02176

Dear Honorable Councilors,

Please accept this letter of interest in serving as a Trustee for the Melrose Affordable Housing Trust.

I spent my career pursuing affordable housing for families, persons with disabilities and elders. At the time I joined the US Department of Housing and Urban Development, I focused on fair housing, especially as it relates to large-scale housing development and public housing. Within five years, however, I was reassigned to the development team. I did not anticipate the passion I would find developing affordable housing.

I always understood the need for affordable housing. I also intuitively understood the challenge developing affordable housing. But I did not know how enjoyable resolving the challenges could be. The challenges might include land acquisition, zoning, neighborhood resistance, sustainability, and, of course, funding.

I am proud to live in a city that has prioritized inclusive and affordable housing. I would be honored to accept new challenges as a Trustee to the Melrose Affordable Housing Trust.

Please find a simple resume below. If you have questions or would like to talk with me, I may be contacted at [redacted]

Sincerely,

Carolyn Federoff

Experience

1986-2016 Attorney, U.S. Department of Housing and Urban Development
- primarily responsible for the development and preservation of affordable housing for low income families, people with disabilities, and elders in Massachusetts.

Residency

2001-present Homeowner at 108 Ashland Street, Melrose, Massachusetts.

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Affordable Housing Trust Appointment
Date: April 19, 2022

I respectfully request the Honorable City Council confirm the appointment of Carolyn Federoff, 108 Ashland Street, to the City of Melrose Affordable Housing Trust for a three-year term, said term to expire the last day of February 2025.

Carolyn Federoff has spent the bulk of her career dedicated to pursuing affordable housing for persons with disabilities, elders, and families an attorney for the United States Department of Housing and Urban Development.

Ms. Federoff understands the challenges that come with the development of affordable housing - funding, zoning, land acquisition, neighborhood resistance, sustainability, challenges - and in turn understands how to navigate them. I am confident that she will serve the Melrose community well in her role as a member of the Affordable Housing Trust.

Thank you for your consideration.

CITY OF MELROSE

DPW-PARKS DEPARTMEN

TO: Mayor Paul Brodeur, Patrick Dello Russo, CFO/Auditor

FROM: Joan Bell, Superintendent of Mt. Hood & Public Open Space
Elena Proakis Ellis, Director of Public Works

SUBJECT: Fred Green Field - Fabric Replacement

DATE: April 15, 2022

DPW/ Parks is respectfully requesting $600,000.00 dollars to replace the athletic fabric on Fred Green Football Field and the replacement of the surrounding fence.

The field was installed in 2011 with a 10-year life expectancy. There are some tell-tale signs of its age: it is frequently losing inlays that pose tripping hazards, splitting, and shedding turf fibers and worn inlays and lines are significantly more worn than the turf in the body of the field. Over time infill migrates, displaces, compacts, and breaks down. Because of these issues the City is paying more for repairs each year as the fabric ages. This is our primary field for high school sports and our only field for high school football. Our youth and recreation programs benefit from it as well. It is also used for many community events throughout the year.

The fence that encloses the field is in need of replacement. There are many top and bottom rail pipes missing, and in some areas the fence is bowed from impact and stretched beyond repair. We are looking to add additional gates for entrance onto the field where we can spread the wear patterns to other areas than just one.

We recently had the field tested, and the drainage and crumb rubber were determined to still be in great condition, with an anticipated 30-year total lifespan on those elements of the field. Thus the proposed replacement will include replenishing of a minimum amount of rubber, followed by replacement of the “carpet” that comprises the playing surface. This means that the City will not have to remove and dispose of any of the existing rubber pellets, which is environmentally preferable.

We have received a vendor quote for approximately $525,000 to perform the replacement. We are required by state procurement laws to publicly bid the labor component of this estimate, at a minimum, which will entail the assistance of a design engineer/landscape architect to develop plans and specifications suitable for a public bid. With the combined costs of the design, implementation, construction oversight, and desired fencing improvements, we have estimated the total cost of the project to be $600,000. We anticipate a project schedule of design in spring/summer 2022, bidding in fall 2022, and construction in summer 2023. This will allow us to plan and coordinate with the various users of the field and ensure its availability during the desired construction period. It is also anticipated to be the most realistic schedule given current employee and materials shortages.

We respectfully request your consideration of an appropriation from retained earnings in the amount of $600,000 to implement this project.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Subject: Fred Green Field

Dear City Councilors,

I am writing in regards to the proposed replacement of the turf at Fred Green field. I have a few questions and concerns and would appreciate your time and consideration to these before deciding how you will vote.

$600,000 is a significant financial investment to be making every 10 years. What is the cost to return the field to grass and what was the yearly upkeep costs when the field was grass?

Has there been an increase of injuries among Melrose athletes on the turf field over previous years when the field was grass? The health and safety of our children and all athletes who use the field should be considered. The NFL Players Association has been asking owners for years to replace all turf fields with grass surfaces due to the higher occurrence of injuries on turf fields. FIFA does not allow any Men's World Cup games to be played on turf and after a discrimination lawsuit filed by the US Women's Soccer Team the Women's World Cup games will also only be played on grass fields.

Fred Green Artificial Turf Playing Field Project: Artificial Turf Field Concerns and Alternatives

Zero Waste Melrose is asking Melrose City Council to vote "no" on the requested $600,000 to fund updates to the Fred Green artificial turf field, without a more in-depth analysis of the risks and costs of the field relative to a natural grass field.

Reasons:

- Plan for the future with the most up-to-date information: Making the Fred Green Field artificial turf may have been the right decision when the project was funded more than 10 years ago. Since then, extensive research has been done on the dangers of artificial turf fields to health and safety. Has the City reviewed the data, and made an informed decision that keeping artificial turf is the right decision for the community?
- Fiscal responsibility: Before the City spends $600,000 to replace the plastic "grass" carpet and do minimal infill replacement, has there been a total-cost-of-ownership (TCO) analysis on the artificial turf field relative to a natural grass field? Before making a very large investment to maintain this field, we ask that the City do a comprehensive analysis of the complete long-term cost of the artificial turf field, relative to reverting the field back to a natural grass surface.
- Recyclability of the "carpet" surface: As a City committed to being a green community, has the City determined the disposal method of the plastic grass carpet and whether it will be land-filled or incinerated, or if it can be recycled? Research by Zero Waste Melrose shows that this material is very difficult to recycle and costly to dispose of, which can lead to improper disposal. In Franklin MA in 2019, residents discovered improperly disposed of piles of artificial turf piled near a wetlands. https://www.bostonglobe.com/metro/2019/10/09/toxic-chemicals-found-blades-artificial-turf/1mlVxXjzCAqRahwgXtfy6K/story.html
- Data on the human safety and environmental risks of artificial turf:
    - Plastic pollution: Synthetic particles migrate into the environment, contributing to microplastic pollution.
    - Toxics exposure: Toxic chemicals have been measured in artificial grass fibers, according to the Toxics Use Research Institute (TURI). Analysis of the turf discarded in Franklin MA also showed PFAS (carcinogenic "forever chemicals") in the turf.
    - Heat island effect of the artificial turf field: On summer days, artificial turf temperatures have been measured at over 150 degrees. These temperatures can burn skin and increase the risk of heat-related illness among athletes. In addition, the City should be seeking to reduce environmental temperatures with heat mitigation, not creating a heat island effect.
    - Player safety: Has the City of Melrose reviewed the data on player injuries that occur on artificial turf versus natural grass fields? The NFL Players Association has asked the NFL to replace all artificial-surface fields with natural grass, based on injury data. A study published in Current Orthopaedic Practice in 2021 shows injury incidence is higher on artificial turf compared with natural grass among high school athletes

The enclosed documents provide useful background documents from the Toxics Use Research Institute (TURI), based at UMass Lowell, that collaborates with businesses, community organizations and government agencies to reduce the use

Artificial Turf Concerns

Infills

- Tire crumb contains chemicals that are known to be hazardous to human health and the environment
- Other infills can also contain chemicals of concern

Other Materials

- Toxic chemicals have been measured in artificial grass fibers
- Shock pads can be made with chemicals of concern
- Maintenance may require application of hazardous antimicrobials

Heat

- On summer days, artificial turf temperatures have been measured over 150 degrees F
- Can burn skin and increase the risk of heat-related illness among athletes

Disposal

- In most cases artificial turf cannot be completely recycled
- Most turf and infill is not recycled
- Most waste artificial turf goes to landfills

Environme t

- Synthetic particle migrate into the environment, contributing to microplastic pollution
- Replacing natura grass reduces habitat for small organisms

Associated Press

NFL urged by players association to replace all artificial-surface fields with natural grass

Published: Oct. 1, 2020 at 9:33 a.m. ET

By Associated Press

Noncontact knee and ankle injuries occur more frequently on synthetic surfaces, according to an analysis of the league's official injury reports

San Francisco 49ers defensive end Nick Bosa is driven off the field after being injured during the first half of a Sept. 20 game against the New York Jets in East Rutherford, N.J.
ASSOCIATED PRESS

BEREA, Ohio (AP) — Fifteen NFL teams play their home games on artificial turf. Cleveland Browns center J.C. Tretter wants to see that number reduced to zero.

The NFL Players Association president cited the league's official injury reports from 2012 to 2018 to state his case that natural grass fields provide a much lower risk for injuries, compared to artificial surfaces, during practices and games.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The analysis shows that players have a 28% overall higher rate of noncontact lower-extremity injuries on turf. Noncontact knee injuries occur at a 32% higher clip, and noncontact foot or ankle injuries are 69% percent more likely on artificial fields.

“The data stands out, and the numbers are staggering in the difference in injury rate,” Tretter said Wednesday. “We all should be working toward the safest style of play, and we know the dangers of playing on turf.

“It’s not good for players, it’s not good for the GMs and the head coaches, it’s not good for the owners, and it’s not good for the fans. Increased injuries are not good for anybody.”

Tretter, who detailed the data in his monthly newsletter to union members, spoke extensively on the subject before Cleveland’s afternoon practice at the club’s suburban training facility.

The seven-year veteran was elected NFLPA president on March 10 after winning a three-way election over Michael Thomas of the New York Giants and Sam Acho of the Tampa Bay Buccaneers. He has advocated for player safety while maintaining a diplomatic approach.

“Anecdotally, I know how my body responds playing on turf versus grass,” said Tretter, who graduated from Cornell University, an Ivy League institution. “The data backs that up, which was my main reason for writing it. It’s something that from here on out, I think we need to make a priority.”

The subject of field safety moved to the forefront in Week 2 when San Francisco standout Nick Bosa and teammate Solomon Thomas both suffered season-ending torn anterior cruciate ligaments in a road win over the New York Jets. Several 49ers players described the synthetic turf at MetLife Stadium as “sticky,” prompting NFL representatives to inspect — and confirm the quality of — the field before the team returned in Week 3 to play the Giants.

“Until we can find a way to get synthetic turf to respond and react like natural grass, it’s too much of a danger to continue to play on and expect different results,” Tretter said. “It’s possible to get grass in every location, and it’s about pushing for that.”

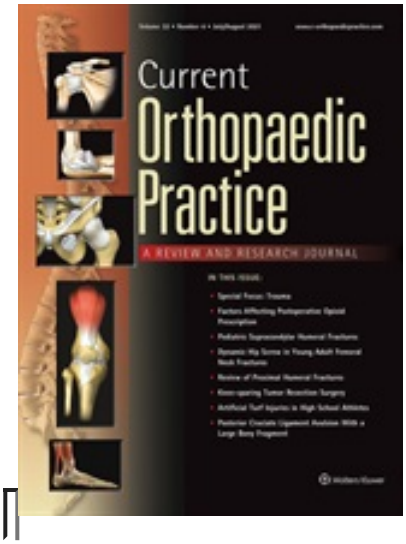
The 6-foot-4, 307-pounder noted that natural fields are used in cold-weather markets like Cleveland (FirstEnergy Stadium), Green Bay (Lambeau Field) and Pittsburgh (Heinz Field), in addition to enclosed stadiums in Arizona (State Farm Stadium) and Las Vegas (Allegiant Stadium).

Seventeen NFL teams play their home games on grass, while 15 franchises do so on artificial turf. The latter include the Rams and Chargers, who share SoFi Stadium in suburban Los Angeles, and the co-owners Giants and Jets in East Rutherford, N.J.

“You add in the increase in injury rate, just based on how synthetic turf is built and grass’ ability to tear away and release your ankles or your knees from compromised situations,” Tretter said. “When you put so much force and so much torque in the ground, eventually something has to give. When you’re on turf, it’s going to be your joint.”



Before any surface is deemed playable, the NFL uses the Clegg Impact Tester to determine if the field is too hard, but does not measure other safety factors. The players association has a committee of engineers developing a more comprehensive method.

In his new role, Tretter says lobbying for grass fields will be a key talking point in any labor negotiations with the league.

“If we know grass is significantly more safe than synthetic turf, it’s about continuing to push forward and making it a priority,” Tretter said. “This is about continuing to push to provide us with the safest work environment possible. Player safety will always be a priority for us and for the union.”

Abstract

Background:

Prior investigations have demonstrated increased injury risk on artificial turf at the collegiate and professional levels. However, no prior study has examined this risk among high school athletics beyond football. The purpose of this study was to compare injury incidences on artificial versus natural playing surfaces among high school athletes.

Methods:

Data collected from 26 high schools was analyzed to compare injury incidences on artificial turf versus natural grass based on sport. Analyses were also performed to compare injury incidence by injury location (upper extremity, lower extremity, torso), sport, level of competitive play (freshman, junior varsity, varsity), and practice versus competition.

Results:

We identified 953 injuries, with 61% (n=585) occurring on turf and 39% (n=368) on grass. Athletes were 58% more likely to sustain injuries on artificial turf than natural grass relative risk ratio [RR] 1.5897, confidence interval [CI]: 1.4062 to 1.7971, $P<0.0001$). Lower extremity (RR 1.9597, CI: 1.6169 to 2.3752, $P<0.0001$), torso (RR 1.8636, CI: 1.1123 to 3.1225, $P=0.0181$), and upper extremity (RR 1.4494, CI: 1.1104 to 1.8919, $P=0.0063$) injuries were significantly more likely to occur on artificial turf. Football (RR 1.4572, CI: 1.2726 to 1.6687, $P<0.0001$), girls soccer (RR 1.7073, CI: 1.1857 to 2.4583, $P=0.0040$), boys soccer (RR 1.8286, CI: 1.2296 to 2.7194, $P=0.0029$), and rugby (RR 23.0000, CI: 3.1998 to 165.3244, $P=0.0018$) had higher injury incidences on artificial turf.

Conclusions:

Athletes were 58% more likely to sustain an injury on artificial turf. Football, soccer, and rugby athletes were at a significantly greater injury risk on artificial turf. Upper and lower extremity and torso injuries also occurred with higher incidence on artificial turf.

Level of Evidence:

Level IV.

Athletic Playing Fields: Choosing Safer Options for Health and the Environment

Introduction

Municipalities, universities, schools and other institutions frequently need to make decisions about maintenance and installation of athletic playing fields. This may include choosing between natural grass and artificial turf (also referred to as synthetic turf). Factors that may be considered include cost of installation and maintenance, number of days the field can be used, likelihood of player injuries, temperature of the playing environment, and athletes' exposure to chemicals.

A number of communities have requested technical assistance from TURI in evaluating the questions they face as they make these decisions. In response to these requests, TURI has conducted research on individual materials used in artificial turf. TURI has also worked with municipalities and other institutions to facilitate the adoption of athletic field management practices that are cost-effective and preferable for human health and the environment. This area of work has included projects to help communities eliminate or reduce the use of pesticides and facilitate the adoption of organic grass management practices.

This document provides information based on TURI's research on selected materials used in artificial turf. It also includes information on organic management of natural grass. TURI has identified organically managed natural grass as a safer alternative for sports surfaces. Additional educational documents and video resources are available on TURI's website.[1]

Principles of Toxics Use Reduction

TURI's work is based on the principles of toxics use reduction (TUR). The TUR approach focuses on identifying opportunities to reduce or eliminate the use of toxic chemicals as a means to protect human health and the environment. Projects to reduce the use of toxic chemicals often have additional benefits, such as lower life-cycle costs.

Children's Environmental Health

People of all ages benefit from a safe and healthy environment for work and play. However, special concerns exist for children. Children are uniquely vulnerable to the effects of toxic chemicals because their organ systems are developing rapidly and their detoxification mechanisms are immature. Children also breathe more air per unit of body weight than adults, and are likely to have more hand-to-mouth exposure to environmental contaminants than adults.[2] For these reasons, it is particularly important to make careful choices about children's exposures.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Artificial Turf Components

Artificial turf generally has several components, including a base layer made from gravel or stone; an artificial grass carpet, including a backing material and artificial grass fibers; and one or more infill materials, used to hold the grass fibers upright and provide cushioning, among other functions. Infill is the portion of the artificial turf that mimics the role of soil in a natural grass system. Many artificial turf fields also include a shock pad below the carpet for additional cushioning.[3] Depending on the infill type, this shock pad may be an optional component of the turf system, or may be required in order to provide a sufficiently resilient playing surface.

This document provides information on several infill materials. It is important to note that the materials available on the market may change frequently and the information presented here is not comprehensive. It is also important to understand that infill is just one component of an artificial turf system. This document focuses primarily on infill, but in evaluating the health and environmental impact of artificial turf, it is also important to consider the impacts of all the components, including the artificial grass blades, shock pad, and lower structural layers.

Regulatory/Testing Standards

There is no comprehensive regulatory or testing regimen specifically for artificial turf.

The standard cited most frequently by vendors is European Standard EN 71-3 – "Safety of Toys Part 3: Migration of certain elements" (the European Toy Safety Standard). For communities applying this standard, it is important to understand that it focuses only on metals. It does not cover other compounds that may be found in artificial turf materials, such as volatile organic compounds (VOCs), polyaromatic hydrocarbons (PAHs), phthalates, and others. The standard includes three different safety levels, so it is important to understand which level has been applied. Detailed information on this regulation is available in another TURI publication, *Chemicals in Artificial Turf Infill: Overview*.[4]

Other standards sometimes applied by researchers to artificial turf include regulatory standards for contamination of soil (e.g., comparing lead levels to those considered by the US EPA to pose a "soil-lead hazard" in play areas);[5] and checking metals in artificial turf runoff against federal and state regulatory levels for drinking water, surface waters and groundwater.[6] Studies in Europe have checked chemical levels in infill against a variety of regulatory standards for soil, sediment, and building materials, among other standards.[7] Germany has developed a regulation specifically for artificial turf, including requirements related to leaching of certain metals and organic compounds.[8]

Another relevant standard is California's Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65). This law requires disclosure of the presence of chemicals that are identified by the state of California as causing cancer or reproductive harm.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Artificial Turf: Chemicals in Infill

TURI has received many queries from communities and institutions that are working to understand the health and safety profiles of a variety of infill types. Therefore, TURI has reviewed existing literature on these infill types, with a focus on chemicals found in the materials. Additional detail on selected individual infills can be found on TURI's website.[9]

It is important to note that chemicals in infill are just one piece of the picture. The artificial grass blades pose concerns as well. Toxic chemicals such as lead are found in the artificial grass blades in some cases.[10] It is also important to understand and research the materials used in any pad or underlayment used in the layers below the infill.

Overview

Crumb rubber made from recycled tires, also referred to as **tire crumb** or as styrene butadiene rubber (SBR), is present in a large number of artificial turf fields.

A number of materials are currently marketed as alternatives to recycled tires. Some are based on synthetic materials, while others are mineral- or plant-based, or contain a mixture of natural and synthetic materials. Alternative synthetic infills include **ethylene propylene diene terpolymer (EPDM)**, **thermoplastic elastomer (TPE)**, and **waste athletic shoe materials**, among others. **Mineral-based** and **plant-derived** materials used in infill can include sand, zeolite, cork, coconut hulls, olive cores, and walnut shells, among other materials. Infill can also be made with acrylic-coated sand.

Some vendors may also offer an option of tire crumb coated with polyurethane. Limited information is available on the chemicals in the coating, the ability of the coating to reduce exposure to chemicals in the tire crumb, or the durability of the coating.[11]

Relatively little information is available on the chemicals present in, or emitted from, alternative infills. Some of them may pose less of a concern than tire crumb, but some may introduce serious hazards. Some available information on these materials is provided here, but there is a need for more research on all of these materials. Some of these materials have also been evaluated in a 2017 review by the Norwegian Environmental Agency[12] and in a 2018 review by the National Institute for Public Health and the Environment (RIVM) in the Netherlands.[13]

This overview is not comprehensive. New infills are introduced to the market frequently. It is important to understand that any synthetic material used as infill will pose some concerns related to introduction of rubber or plastic particles into the environment, as well as whatever specific chemicals may be found in the material. Mineral- and plant-based infills can pose hazards as well. In addition to any issues associated with infill, all artificial turf introduces synthetic materials into the environment through the other components, including breakdown over time of the artificial grass carpet.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Understanding rubber and plastic products: terminology

For those interested in understanding more about rubber and plastic products, the following terminology may be useful.

Thermosets vs. thermoplastics. Both natural and synthetic rubbers are **thermosets**. A key characteristic of a thermoset is that although heat is used in the initial manufacture of the material, once the material has been formed, it cannot be melted. For this reason, tires and other products made from thermosets cannot be melted and re-formed into new products. Among the materials used in artificial turf infills, SBR, EPDM and shoe sole materials are all thermosets.

Thermoplastics, in contrast, are materials that can be melted and re-formed into new shapes. Thermoplastic elastomers (TPEs) are one broad category within the larger category of thermoplastics.

Curing/crosslinking/vulcanization. Thermosets gain their stability through a process of **curing**, also referred to as crosslinking or vulcanization. Curing is a process of creating links among polymer strands in order to create a stable, three-dimensional structure. In the case of a thermoset, these links are composed of irreversible chemical bonds.

A variety of chemicals can be used in the curing process. These include chemicals that become part of the crosslinking bond, as well as chemicals that catalyze or accelerate the crosslinking process. The term "vulcanization" is often used specifically to refer to crosslinking with sulfur.

In contrast to the large molecules of a polymer, the molecules added in the curing process are often relatively small. Some of these molecules may remain present as free molecules in the final material, and these may be released during product use.

Plasticizers. Plasticizers are added to stiff or rigid materials to make them more pliable. One important category of plasticizers is the phthalate esters, also commonly referred to simply as phthalates. Mineral oil can also be used as a plasticizer. The specific plasticizers used in a given product are frequently not disclosed.

Other additives. A variety of other additives may be used in rubber and plastic products. **Fillers** such as carbon black or silica can be used to attain specific material properties or simply to extend the volume of the material. **Stabilizers** can be added to decrease the effect of light, heat or other environmental conditions on the material. Other additives that may be used include **pigments** and **antimicrobial agents**.

Tire crumb

A large number of chemicals are found in tire crumb. Many of these have adverse effects on human health or the environment. In a literature review, the US Environmental Protection Agency (EPA) identified just over 350 chemicals or chemical categories that were discussed in existing literature on tire crumb.[14] The presence and amount of a given chemical can vary depending on the sample of tire crumb.

Table 1 shows the categories of chemicals considered by EPA, with examples of individual chemicals in each category.[15] As shown in the table, these include metals, such as lead and zinc; volatile organic compounds (VOCs); semi-volatile organic compounds (SVOCs); and a variety of uncategorized chemicals including vulcanization compounds (chemicals used in rubber curing). The broad category of SVOCs includes PAHs, phthalate esters, and chemicals that may be applied to the crumb rubber as biocides during the life of the artificial turf.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Some of the chemicals found in tire crumb are endocrine disrupters (e.g., phthalate esters); some are known or suspected carcinogens (e.g., arsenic, cadmium, benzene, styrene); and some are associated with other human health effects.[16] A recent study evaluated the potential carcinogenicity of 306 chemicals found in tire crumb and found that 197 of them met certain carcinogenicity criteria, while 58 were actually listed as carcinogens by a government agency.[17]

Table 1: Selected categories of chemicals found in tire crumb

Category[a]	Subcategory	Examples
Metals		Aluminum, arsenic, barium, cadmium, chromium, copper, lead, nickel, zinc
VOCs		Benzene, benzothiazole, hexane, naphthalene, styrene, toluene, xylenes
SVOCs	PAHs	Anthracene, benz(a)anthracene, fluoranthene, naphthalene, phenanthrene, pyrene
	Phthalate esters	Benzylbutyl phthalate, di(2-ethylhexyl)phthalate [a.k.a. bis(2-ethylhexyl)phthalate]
	Biocide product ingredients	May include quaternary ammonium compounds such as alkylbenzyldimethyl ammonium chloride, alcohol ethoxylate 6, or others[b]
Other[c]		4-tert-(octyl)-phenol [a.k.a. 4-t-octylphenol], butylated hydroxytoluene

[a] Note: Categorization shown here follows categories used in EPA's August 2016 publication.
[b] Thomas et al. note these have been identified by the California Office of Environmental Health Hazard Assessment (OEHHA) as "potential turf biocides."
[c] As organized by Thomas et al., this category includes "potential rubber curatives, antioxidants/antiozonants, and other chemicals reported in literature."

Exposure to low doses of multiple chemicals can have health effects that may not be predicted based on the expected effects of each exposure individually. For this reason, some studies have considered the mix of chemicals in tire crumb, rather than looking at each individually. A study of a tire shredding facility in Taiwan tested airborne particulates from the facility for mutagenicity, and found that they showed "a substantial presence" of mutagens.[18] Another study considered the mutagenicity of dust and fumes at two tire-shredding facilities; they found "high mutagenic activity" of dust and fumes at one facility and "almost no mutagenic activity" at the other, a difference they attributed both to choices of chemicals and to the way in which each facility operated.[19]

EPDM

EPDM rubber is a specialty elastomer that can be mixed with high levels of additives and oils while retaining its desirable physical properties, including strength and resistance to tearing. Additives can include oil, carbon black, and other materials. EPDM may be manufactured with anywhere from 15 to 100 parts of oil per 100 parts of polymer.[20] Like tire crumb, EPDM is a vulcanized (cured) rubber product, so it can be expected to contain vulcanization compounds. Not all EPDM infills are necessarily the same, so it is important to find out what chemicals are present in any given EPDM product.

There has been limited examination of EPDM granules to evaluate their suitability from a public

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

health and environmental perspective. In one study published in 2004, the Norwegian Building Institute (NBI) examined levels of selected chemicals in one sample of EPDM infill, comparing these levels with those found in three samples of recycled tires. The study found that the EPDM rubber contained more chromium than the tire material, similar amounts of zinc, and lower concentrations of PAHs, phthalate esters, and phenols. Polychlorinated biphenyls (PCBs), which were found in one sample of recycled rubber, were not found in the EPDM. The authors state that "with the exception of chromium and zinc, the EPDM rubber contains lower concentrations of hazardous substances than the recycled rubber types overall."[21] A 2008 study by the Danish Ministry of the Environment also included tests of one sample of EPDM.[22] A study supported in part by the tire industry in France found that EPDM emitted larger amounts of VOCs than tire crumb.[23]

In reviewing pros and cons of EPDM infill, the Norwegian Environmental Agency notes possible concerns about VOC emissions at indoor fields, introduction of microplastics into the environment, and aquatic toxicity from leachate, among other factors.[24]

RIVM reviewed the limited existing literature on EPDM infill as well as conducting limited testing of its own. RIVM concludes that EPDM infill is likely to contain PAHs but at lower levels than tire crumb; carbon black may be a concern in black EPDM, but not in EPDM of other colors; and phthalate esters such as diethylhexyl phthalate (DEHP), an endocrine disrupter, may be present in the material. Nonyl- and octylphenols, also endocrine disrupters, are detected at low levels in both EPDM and tire crumb. RIVM also notes that leaching of zinc from EPDM could potentially pose a concern similar to the level of concern posed by tire crumb.[25]

In summary, EPDM may pose some of the same health and environmental concerns posed by tire crumb, although it may contain lower levels of some important categories of chemicals of concern and a smaller number of chemicals of concern, compared with tire crumb. Additional detail on EPDM infill is available on TURI's website.[26]

TPE

Thermoplastic elastomer[27] (TPE) is a general term that can encompass a variety of materials. TPEs are composed of two materials: one that is hard at room temperature and one that is soft and rubbery at room temperature. The two materials can be either chemically bonded or blended together.

TPEs generally do not require curing or vulcanization during manufacturing. However, some products marketed as TPE do contain a vulcanized material as one part of the mix, further complicating the distinctions among material types.

As with EPDM infill, TPE infill has not been studied extensively. Based on the limited information available on TPE used in artificial turf infill materials, it appears to contain lower levels of many toxic chemicals than tire crumb. In particular, measurements indicate that TPE infill emits fewer VOCs. Furthermore, since TPE does not require vulcanization (curing), it is generally expected to be free of the vulcanizing agents that are used in crumb rubber made from tires.[28] However, TPE infill can contain and emit some chemicals of concern, and since individual TPE products may vary widely, it is important to obtain information on the chemicals found in any individual product that is under consideration.

Although the term TPE encompasses a broad category of materials, TURI examined details about one TPE infill to better understand the chemical composition. Using information obtained from Safety Data Sheets and the US National Library of Medicine's database (ChemID*plus)*, the TPE sample was found to be composed of styrene block copolymer, polyethylene, paraffin oil, calcium carbonate (chalk), carbon black, and unspecified stabilizers/antioxidants. Carbon black is identified

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

by the International Agency for Research on Cancer as a possible human carcinogen (Group 2B), and many forms contain a variety of adsorbed compounds, including PAHs.[29]

A 2006 study by the Norwegian Pollution Control Authority compared three indoor fields: two containing crumb rubber (SBR) infill made from tires, and one containing TPE infill.[30] In measurements of airborne dust, the quantity of fine particulate matter ($PM_{2.5}$) was elevated for the two SBR fields, while quantities were in the expected ranges for an indoor setting for the TPE field. The researchers also noted that the dust generated by the TPE field was free of the vulcanization compounds, preservative compounds, and carbon black found in the SBR fields. Dust from all locations contained PAHs, but the levels in the dust generated by the TPE field were lower than those in the SBR dust. Total VOCs measured at the TPE field were also lower than those measured at the tire crumb fields. Phthalate esters were present at comparable levels at all locations; phthalate esters measured in airborne dust during one time period were slightly lower at the TPE field, but were higher at the TPE field during another time period.

RIVM's literature review suggests that little information is available on TPE infills, but that they are likely to contain lower levels of metals and VOCs than tire crumb or EPDM, lower or comparable levels of PAHs, and comparable levels of phthalate esters.[31]

In summary, based on the limited information that is available, TPE infill is likely to contain fewer chemicals of concern than tire crumb, but is still likely to contain some chemicals of concern. Communities considering purchasing a TPE infill product may wish to request additional information from the vendor on the specific type of TPE used. Additional detail on TPE infill is available on TURI's website.[32]

Waste shoe material

Infill made from post industrial waste shoe material can be made from a single brand of shoe product, or from several mixed together. For example, the Sole Revolution brand of infill may draw materials from a variety of shoe manufacturers, while Nike Grind is made from Nike® shoe material.[33]

Shoe manufacturing uses a wide variety of materials, and manufacturers' choices about these materials vary over time. Factors relevant to the environmental, health and safety characteristics of athletic shoe materials include the polymers used in shoe soles, the additives that impart key performance characteristics to those polymers, and the mandatory and voluntary testing protocols used to limit toxics in shoe materials.

Some shoe materials are governed by Restricted Substances Lists (RSLs) developed by shoe manufacturers to minimize or eliminate the use of certain chemicals that pose particularly high concerns. For example, Nike has an RSL that "restricts approximately 350 substances that have been regulated or voluntarily phased out of [their] manufacturing processes,"[34] and Nike Grind materials are governed by the RSL.[35]

According to Nike's RSL, certain VOCs (such as benzene or toluene) are subject to tight control in the manufacturing process. Thus, these substances are not necessarily absent from Nike products but they are used in the minimum quantity possible to achieve the desired effect. Nike also limits the levels of other categories of chemicals of concern, such as specific PAHs and specific phthalate esters.[36]

Waste shoe material can contain some of the same chemicals of concern as other rubber infills, although it offers the advantage that levels of some of the chemicals of highest concern may be regulated by an RSL. Neither of the recent assessments by European government agencies considered waste shoe material in detail as an

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

alternative to tire crumb. TURI has not identified detailed independent studies of waste shoe material as used in infill.

Acrylic-coated sand

TURI was able to gather information on one acrylic-coated sand product that is currently marketed for use in artificial turf.[37] According to the manufacturer, this product is composed of well-rounded sand, a proprietary (undisclosed) acrylic, a Microban® antimicrobial, and a pigment.[38]

The specific acrylic used in the product is a proprietary component of the manufacturer's production process, so no other information was available on its health and environmental properties. According to the manufacturer, it does not contain any additives beyond the pigment and antimicrobial.[39] Laboratory test results provided by the manufacturer show that all PAHs for which tests were conducted were below the detection limit.[40] The manufacturer also states that the product was below the detection limit for all VOCs for which tests were conducted.[41]

The antimicrobial helps to protect the acrylic coating from deterioration. The company currently uses ZPTech®, a zinc-based antimicrobial. According to the Microban website, "ZPTech is a broad-spectrum antimicrobial."[42] According to Microban, the product "encapsulates zinc pyrithione in customized carriers." Zinc is released when the material is exposed to water.[43] The product is also available without the antimicrobial.

According to the manufacturer, the antimicrobial product originally used in the product was triclosan, but the transition to the zinc-based antimicrobial has been complete since the end of 2016.[44] Triclosan poses concerns based on bioaccumulation and adverse health and environmental effects.[45]

Test data are available both for presence of metals in the material and for leaching of metals from the material. The metal that appears in the largest quantity is zinc (18 and 57 mg/kg in two samples respectively). Tests show that the material leaches 0.82 mg/L of iron and 0.13 mg/L of zinc.[46]

Many of the categories of organic chemicals of concern that are present in the other synthetic infills may be lower, or absent, in acrylic-coated sand. On the other hand, there may be a need for more research on the environmental implications of the broad use of sand coated with an antimicrobial-infused polymer.

Mineral- or plant-based materials

A growing list of mineral- or plant-based materials is marketed for use in infill. At least one of these options, zeolite, poses serious health concerns. The other materials have generally not been studied in depth. As with the other materials discussed in this report, it is essential to gather detailed information on these materials to understand their potential health or environmental impacts. This section mentions a few areas of concern, but is not comprehensive.

Zeolite. Zeolite poses a respiratory hazard. Animal studies suggest that exposure to some types of zeolites may be associated with increased risk of developing mesothelioma.[47] Erionite, one type of zeolite, poses particular concerns; its health effects can be similar to those of asbestos.[48]

Cork. Respiratory disease has been documented in cork workers exposed to cork dust. For example, a 1973 study concluded that workers in the cork industry may suffer from various complaints related to the inhalation of cork dust. It states that "workers in factories where cork is processed and transformed into commercial products may acquire incapacitating disease of the respiratory tract."[49] Respiratory disease associated with cork dust exposure is known as suberosis. Fungi that frequently colonize cork appear to play some role in the disease, although the disease is not fully understood.[50]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Coconut fiber. Some individuals are allergic to coconut, although coconut allergies are relatively rare. The American College of Allergy, Asthma & Immunology notes that "coconut is not a botanical nut; it is classified as a fruit, even though the Food and Drug Administration recognizes coconut as a tree nut. While allergic reactions to coconut have been documented, most people who are allergic to tree nuts can safely eat coconut."[51]

Walnut shells. Nut shells may pose concerns related to allergies if nut allergens are present on the shells. Walnut shells are used as an alternative to silica in sand blasting, and there is one report of an individual developing an allergic reaction in that context.[52] According to the manufacturer, USGreentech, the shells used in Safeshell[53] (a proprietary infill made from walnut shells) are processed to remove allergens to "below 2.5 parts per million."[54]

Fibers. A variety of respirable plant-based fibers can cause disease and disability. For example, cotton dust is a well-known source of respiratory disease.[55] TURI has not identified any studies that consider possible hazards related to plant-based fibers in infill.

Comparing infills

As noted above, infills are just one part of an artificial turf system and all portions of the system should be evaluated as part of the decision making process. Table 2 provides comparative information on selected chemicals or chemical categories in infill materials.

Most infill vendors are able to provide test results for a number of metals. The information on metals in this table is drawn primarily from one set of tests on individual infill products provided by a vendor of multiple infill types. The table shows specific information on lead because it is a particular concern for children's health, and zinc because it has been flagged as a possible environmental concern associated with artificial turf. However, other metals may be equally or more important. Communities working to make a decision should request the most up-to-date results on metals present in the specific product they are considering.

Information on other chemicals may not be as readily available from vendors. Communities may wish to request information on organic chemicals, such as VOCs or PAHs, found in any specific product. Note that the term "organic" in this context refers to any chemical that is based on carbon. This is not the same as the use of "organic" to describe pesticide-free management of natural grass systems.

As shown in the table, vulcanization compounds are likely to be found in tire crumb, EPDM, and shoe materials. VOCs have been measured in many of the materials, but are higher in some than in others. Similarly, PAHs may be present in varying quantities depending on the material. There may be some increased predictability when purchasing waste shoe materials if they are subject to an RSL. Mineral- and plant-based materials are unlikely to pose concerns related to the four broad categories of synthetic chemicals listed in the table, but some pose other significant concerns. It is important to note that even in cases where the chemicals listed below may be absent, infills may pose other hazards.

In the course of TURI's research, a number of data gaps were identified. For example, not all vendors were able to provide information on PAHs in infill products. To help address this data gap and better understand the presence of PAHs in these materials, TURI contracted with the Icahn School of Medicine at Mount Sinai to conduct limited testing on samples of commercial infill products. As shown in Table 2, the tire crumb sample contained the largest total PAH concentration, with over 500 mg/kg. Waste athletic shoe material and EPDM had the next largest total PAH concentrations, although they were both an order of magnitude lower than tire crumb (55 and 20 mg/kg respectively).[56]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 2: Comparing infills: Selected categories of chemicals of concern						
Category	**Tire crumb**	**EPDM**	**Shoe materials[a]**	**TPE**	**Acrylic-coated sand**	**Mineral- or plant-based**
Lead[b]	Present	Present	Present	Present	Below detection limit[c]	Absent in some cases
Zinc[b]	Present	Present	Present	Present	Present[c]	Present in some cases
Other metals[b]	Present	Present	Present	Present	One additional metal present[c]	Present
Vulcanization compounds[d]	Present	Present	Present	Generally absent	Expected to be absent	Zeolite, when present, poses serious respiratory hazard. Plant-based materials can pose concerns related to dust, fungi, or allergens. Vulcanization compounds and phthalates are expected to be absent; VOCs and PAHs are expected to be low or absent.[h]
Phthalates	Present[e]	Present (lower)[f]	May be present, but subject to RSL	Present[g]	Expected to be absent	
VOCs	Present[e]	Present (lower in some cases, higher in others)[f]	Expected to be present, but subject to RSL	Present (lower)[g]	Expected to be absent	
PAHs	Present[e]	Present (lower)[f]	May be present, but subject to RSL	Present (lower)[g]	Below detection limit[c]	
PAHs (TURI sample)[i]	Present (highest) (548 mg/kg)	Present (20 mg/kg)	Present (55 mg/kg)	Present (below 10 mg/kg)		

[a] Some information in this column is drawn from Nike's RSL. *VOCs:* Nike's RSL restricts benzene to 5 ppm and a number of other VOCs to a total of 1,000 ppm. *PAHs:* Nike's RSL restricts certain PAHs to 1 ppm each and sets a 10 ppm total for all PAHs on the list. *Phthalate esters:* Certain phthalate esters are listed on the Restricted Substances Lists (RSLs) of major shoe manufacturers. Specifically, Nike restricts all ortho-phthalates to a total of 1,000 ppm.

[b] Except where otherwise noted, information is drawn from Labosport. 2014. *Technical Report: Toxicological Analysis of Performance Infill for Synthetic Turf Fields according to EN 71-3 Standard – Safety of Toys Part 3: Migration of Certain Elements.* Report #R14565CAN-A1, provided to Jason Smollett, FieldTurf.®

[c] AIRL, Inc. 2018. Lab report #304074, provided to Ross Vocke, US Greentech. Detection limit 10 µg/Kg for PAHs, 0.25mg/Kg for metals.

[d] By definition, the vulcanized rubber products (tire crumb, EPDM and shoe materials) may contain residual vulcanization compounds. TPE is not vulcanized; however, in some cases, products marketed as TPE are a blend that also contains vulcanized rubber.

[e] US EPA. 2016. *Federal Research Action Plan on Recycled Tire Crumb Used on Playing Fields and Playgrounds: Status Report.* EPA/600/R-16/364. Viewed on October 23, 2018, at https://www.epa.gov/sites/production/files/2016-12/documents/federal_research_action_plan_on_recycled_tire_crumb_used_on_playing_fields_and_playgrounds_status_report.pdf.

[f] Norwegian Building Research Institute (NBI - BYGGFORSK). 2004. "Potential Health and Environmental Effects Linked to Artificial Turf Systems: Final Report." Report prepared for the Norwegian Football Association. Project no. 0-10820. September 10, 2004. Authors: Thale S.W. Plesser, Ole J. Lund. Moretto R. 2007. *Environmental and health assessment of the use of elastomer granules (virgin and from used tires) as filling in third-generation artificial turf.* Report prepared for ADEME/ALIAPUR/Fieldturf Tarkett. Note: The terms "lower" and "higher" refer to the comparison with tire crumb.

[g] Dye, Christian, A. Bjerke, N. Schmidbauer, S. Manø. 2006. *Measurement of Air Pollution in Indoor Artificial Turf Halls.* Trondheim, Norway: Norwegian Pollution Control Authority/Norwegian Institute for Air Research. Report #NILU OR 03/2006. TA number: TA-2148/2006. ISBN number 82-425-1716-9. Note that in this study, phthalates measured in airborne dust at a TPE field were found to be lower at one time, and higher at another time, compared with levels measured at a tire crumb field.

[h] Plants can produce some substances that are classified as VOCs. However, based on currently available information, the plant-based materials used in infill are not expected to pose concerns related to VOCs. PAHs can be taken up by plants from ambient pollution in some cases.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

When researching turf options, communities should evaluate materials carefully and may wish to require additional testing to ensure they have considered the full range of chemicals. Existing tests generally apply only to the sample on which they were conducted, so it is important to obtain data on the specific product in question.

Environmental Concerns

Environmental concerns include loss of wildlife habitat and contaminated runoff into the environment. A study by the Connecticut Department of Environmental Protection identified concerns related to a number of chemicals in stormwater runoff from artificial turf fields. These include both metals and organic compounds. They noted high zinc concentrations in stormwater as a particular concern for aquatic organisms. They also noted the potential for leaching of high levels of copper, cadmium, barium, manganese and lead in some cases. The top concerns identified in the study were toxicity to aquatic life from zinc and from whole effluent toxicity (WET).[57] WET is a methodology for assessing the aquatic toxicity effects of an effluent stream as a whole.[58] In another example, a study found that leachate from several artificial turf systems was toxic to aquatic organisms.[59]

Another environmental concern is migration of synthetic particles into the surrounding environment. Both infill particles and broken synthetic grass fibers do not stay limited to the boundaries of the artificial turf field. Photographic evidence collected by community members in Massachusetts show broken pieces of artificial grass fibers widely dispersed in environments surrounding artificial turf fields. Field maintenance protocols provide for periodic addition of infill to replace infill lost from the field in the course of play, further demonstrating that not all infill particles remain in place within the field. With growing concern about global microplastic pollution, some communities are working actively to reduce the amount of plastic they introduce into the environment. Little or no research has been conducted on ways in which dust and broken particles from artificial turf fields may contribute to microplastic pollution in the environment.

Acrylic-coated sand particles, according to the manufacturer, pose less risk of migrating into waterways compared with other infills because they do not float; however, they could still generate dust that may move offsite. To the extent that particles migrate off the original field site and enter water resources, there could be concerns about whether sedimentary organisms could incorporate these materials and whether they could enter the food chain in this way.

Disposal of the synthetic materials, including the infill and the shock pad, poses an additional concern. Some synthetic materials may be reusable one or more times, while others may have to be disposed of in a landfill or through incineration when the field is due for replacement. RIVM notes that it may be possible to use waste material from a replaced artificial turf field in some other sporting applications, but also notes that due to the degradation of the material over time, this will not always be possible. RIVM

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

also notes that the substructure elements of an artificial turf field may need to be cleaned prior to recycling, if they are contaminated with any chemicals that have leached from infill. For the limited set of infills it analyzes, RIVM assumes an average 10 year service life for artificial turf fields and assumes that the infill materials are not reused on additional fields.[60]

Artificial Turf and Heat Stress

In sunny, warm weather, artificial turf can become much hotter than natural grass, raising concerns related to heat stress for athletes playing on the fields.[61] Research indicates that all artificial turf reaches higher temperatures than natural grass,[62] although some infill materials may reach higher temperatures than others.

A report by the New York State Department of Environmental Conservation found that surface temperatures on an artificial turf field were 35°F to 42°F higher than those on natural grass.[63]

Another study found that the highest temperature measured on artificial turf was 60.3°F greater than that observed on natural grass.[64]

In another study, artificial turf fibers reached temperatures of 156°F under direct sunlight, while the crumb rubber infill reached 101°F.[65]

Measurements taken by sports managers at Brigham Young University found that the surface temperature of artificial turf was 37°F higher than asphalt and 86.5°F hotter than natural turf. The hottest surface temperature recorded during the study was 200°F on a 98°F day. Even in October, the surface temperature reached 112.4°F.[66]

Irrigation can lower field temperature for a short time. A study by Penn State's Center for Sports Surface Research found that frequent, heavy irrigation reduces temperatures on artificial turf, but temperatures rebound quickly under sunny conditions.[67] Another study found that irrigation could lower temperatures by 10 to 20 degrees for a period of at least 20 minutes.[68] Another found that irrigation lowered the surface temperature from 174°F to 85°F; however, the temperature rebounded to 164°F after 20 minutes.[69]

Heat-related illness can be a life-threatening emergency. Experts note that athletic coaches and other staff need to be educated about heat-related illness and understand how to prevent it, including cancelling sport activities when appropriate.[70] In one example, a number of students developed heat-related illness after band practice on a new artificial turf field.[71]

Heat can also affect chemical emissions. For example, one study expressed concern about PAH emissions from tire crumb at elevated temperatures. [72]

Additional information on heat is available in TURI's website.[73]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Injuries

Injury rates can be affected by a variety of factors, including the type and condition of the playing surface as well as equipment used and type and level of sport. Studies show variable outcomes in the rates and types of injuries experienced by athletes playing on natural and on artificial turf.[74]

One particular concern is increased rates of turf burns (skin abrasions) associated with playing on artificial turf. For example, a study by the California Office of Environmental Health Hazard Assessment found a two- to three-fold increase in skin abrasions per player hour on artificial turf compared with natural grass turf.[75] These study authors noted that these abrasions are a risk factor for serious bacterial infections, although they did not assess rates of these infections among the players they studied.

Additional information on injuries is available in TURI's website.[76]

Current Federal and State Studies on Artificial Turf and Tire Crumb

As noted above, a number of existing studies have examined the chemicals present in artificial turf, with a particular focus on tire crumb. Some of these studies include a risk assessment, in which an effort is made to estimate the number of cases of disease that could result from exposure to a subset of the chemicals found in tire crumb.

After reviewing the studies, federal and state officials have identified a need for additional information. Two current studies are described here.

California Office of Environmental Health Hazard Assessment

In 2015, the California Office of Environmental Health Hazard Assessment (OEHHA), an office within the California Environmental Protection Agency, began a new study of the potential health effects of exposure to artificial turf as well as playground mats made from recycled waste tires. The study includes analyses of samples of new and used artificial turf and playground mats; the development of exposure scenarios; and the development of a risk assessment based on this information. OEHHA has sampled more than 30 fields in a range of climate regions within California, including both new and old fields.[77] OEHHA is also examining the range of routes by which players and bystanders can be exposed to chemicals found in the artificial turf materials, including through skin contact, breathing, and ingestion. As part of this effort, OEHHA has conducted a survey of both child and adult athletes to learn more about whether they report getting infill materials on their skin, in their eyes, and/or in their mouths during the course of play.[78]

In the future, OEHHA may also examine people's actual exposures through measurement of biological specimens or use of personal monitors.[79]

Research by federal agencies

Three federal agencies are also engaged in an assessment of potential health effects of exposure to artificial turf. The agencies working on the study

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

are the US EPA, the Consumer Product Safety Commission (CPSC), and the Agency for Toxic Substances and Disease Registry (ATSDR) within the Centers for Disease Control. As background on the need for this study, EPA noted that "limited studies have not shown an elevated health risk from playing on fields with tire crumb, but the existing studies do not comprehensively evaluate the concerns about health risks from exposure to tire crumb."[80] EPA further states, "While this effort won't provide all the answers about whether synthetic turf fields are safe, it represents the first time that such a large study is being conducted across the U.S."[81]

In this project, the federal agencies are working to identify chemicals of concern found in tire crumb, and gain a better understanding of how people are exposed to tire crumb on playing fields and in playgrounds. The study has four components: a literature review and analysis of gaps in current knowledge; a tire crumb characterization study; a sports turf exposure characterization study; and a playground study.[82]

The agencies have issued summary documents based on the work they completed in 2016, including a summary of all the literature that was reviewed and a detailed spreadsheet showing information on which chemicals were examined in each study.[83] These are useful resources for people interested in learning more about the studies that have been conducted to date.

Among other information, the federal agencies' preliminary report on their work provides an overview of knowledge gaps about tire crumb used in playing surfaces. For example, with regard to characterizing tire crumb materials, there are gaps related to chemical characterization, emissions assessments, microbial assessments, bioaccessibility, and variability.[84] For example, EPA notes that there is a lack of studies that measure a wide range of tire crumb samples and consider the full range of chemicals that can be found in tires. Regarding emissions, EPA notes that "few laboratory-based studies have investigated VOC and SVOC emissions from synthetic fields and playgrounds under different temperature conditions," and those studies that do exist have considered only a limited set of chemical emissions. Regarding bioaccessibility (the likelihood that the human body will take up the chemicals present in the material), there is a lack of studies that "systematically measure a wider range of metal and organic chemical constituents, using multiple simulated biological fluids, and across a large range of tire crumb rubber samples." Finally, EPA notes that "most studies characterizing tire crumb rubber from synthetic fields and playgrounds in the United States have been relatively small, and restricted to a few fields or playgrounds. Measurements for samples collected from a wider range of tire recycling plants, synthetic fields, and playgrounds across the United States is lacking."

Additional gaps exist with regard to other important areas of study. For example, with regard to characterizing exposure and risk, there are gaps related to exposure factors, dermal or ingestion exposures, exposure through broken skin or through eyes, and more. EPA notes that while a number of studies have examined possible exposures through inhalation, "more limited information is available for understanding dermal and ingestion exposures." EPA also notes that "little information is available on the potential for increased exposures via broken skin (i.e., due to cuts and scrapes) and through ocular fluids," and that few studies have examined the potential cumulative effects of exposures through multiple routes, including inhalation, ingestion, and skin exposure.

Other parts of the federal agencies' work are still in progress at the time of publication of this report. EPA and CDC/ATSDR have completed the collection and analysis of samples for the exposure and tire crumb characterization parts of the study, and the draft report is now undergoing technical peer

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

review, according to EPA's website, updated September 2018.

In addition, CPSC has completed a study of how children interact with recycled tire materials on playgrounds. CPSC used a combination of focus groups, field observations, and a national survey of parents and child-care providers to collect information on children's behavior when playing on playground surfacing made from recycled tires or other materials. CPSC focused in particular on the behavior and experience of toddlers on playgrounds. Among other findings, CPSC noted that children "may be commonly exposed to rubber surfacing materials in various ways, such as chewing the materials and being scraped by them." They noted concerns including children mouthing and chewing rubber surfacing materials; stains from rubber surfacing left on children's skin and clothing; children picking up rubber mulch; children being exposed through bare feet; and children eating snacks at playgrounds. The CPSC found that the study findings raise concerns that deserve further investigation.[85]

What is a Risk Assessment?

Many existing studies on the use of tire crumb in artificial turf are quantitative risk assessments. Risk assessment is a methodology used by researchers to estimate the number of cases of disease that could result from anticipated exposure. To develop a risk assessment, researchers may bring together information on chemical toxicity, level of exposure, route of exposure, expected ages at which exposure may occur, expected duration of exposure, and expected ways in which the body may absorb and process the chemicals. Since risk assessments often consider just a subset of the chemicals present in artificial turf, they may not present a complete picture. In addition, a number of assumptions have to be made in the course of the assessment, and the final result is an estimated number of cases of disease (e.g., an expected number of cancer cases per million people exposed). This number may be used in discussions about levels of risk that are considered acceptable.

The Toxics Use Reduction approach does not rely on quantitative risk assessments; rather, the focus is on reducing or eliminating toxic chemical use when possible.

New Regulatory Initiatives in Europe

The European Union regulates chemicals under its Registration, Evaluation and Authorisation of Chemicals (REACH) regulation. The Netherlands has developed a proposal under REACH to regulate the presence of PAHs in sports turf infills.[86] Specifically, the proposal would limit the level of eight PAHs in sports turf infills, as well as in materials used in loose form on playgrounds. The proposed restriction is based on a finding that the EU's current exposure limits for these materials are not sufficiently protective. The proposed restriction would limit the sum of the eight PAHs to 17 mg/kg in granules or mulches used as infill or as playground surfacing in order to reduce the estimated cancer risk for exposed individuals to 2.6×10^{-6} (2.6 per million).[87] The proposed restriction was developed in response to concerns about PAHs in waste tires but would apply to any alternative material as well. This is the first step in a multi-stage regulatory and consultation process. If there is agreement on the restriction, the estimated timeline is that it would be adopted in 2020.[88]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Laboratory Testing of Artificial Turf

A number of communities have asked TURI what types of information they should gather as they make decisions about artificial turf fields. All the issues noted above are relevant for decision making, but confusion often arises around the testing that may be conducted on turf infill and grass blades.

In general, manufacturers are able to provide test data covering a number of metals of concern. Manufacturers often provide a comparison between this information and the standards provided in the European Toy Safety Standard.

Communities may choose to order their own tests on metal contents as well.

Less information tends to be available on other, non-metal chemicals that may be present in either the infill or the grass blades. Therefore, communities may wish to either conduct their own testing or request test results from the vendor on these other chemicals. For example, it may be useful to ask the vendor for data on VOCs, SVOCs, and PAHs present in the product.

Safer Alternative: Natural Grass

Natural grass fields can be the safest option for recreational space, by eliminating many of the concerns noted above. Grass fields may be maintained organically or with conventional or integrated pest management (IPM) practices. Organic turf management eliminates the use of toxic insecticides, herbicides and fungicides.

Photo credit: Adam Anulewicz

Forest Park, Springfield, MA, 2018.

Natural grass can reduce a field's overall carbon footprint by capturing carbon dioxide. A natural grass field can also provide a number of ecosystem services, such as providing habitat for invertebrates and microorganisms, reducing the heat island effect in urban areas, and helping to control flooding, among others.

Table 3 shows a broad comparison between artificial turf and natural grass, including conventionally and organically managed grass. As shown in the table, artificial turf can pose chemical hazards related to chemicals either present in the surfacing material or applied to the surface. Cleaners, disinfectants and even herbicides may sometimes be applied to the artificial turf surface as well. Natural grass, on the other hand, only contains whatever is already in the ambient environment and generally does not include polymers, rubber and plastic additives, or respiratory hazards such as zeolite. Conventionally managed natural grass may be treated with synthetic pesticides or fertilizers; organically managed natural grass builds soil health, making it unnecessary to apply chemical treatments.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 3: Comparing artificial turf with natural grass				
Category	**Subcategory**	**Artificial turf**	**Natural grass – conventional**	**Natural grass – organic**
Chemicals	**Present in surface**	Polymers, additives; respiratory hazards, e.g., zeolite	Ambient environmental exposures only	
	Applied to surface	Cleaners, disinfectants, herbicides	Synthetic pesticides, fertilizers	Soil health built through aeration, proper mowing practices, organic soil amendments, and other approaches
Other health hazards	**Heat**	Higher	Lower	
	Risk of skin abrasions and infections	Higher	Lower	
	Other injuries	Variable injury patterns		
Other environmental considerations	**Ecosystem services**	None	Habitat for a range of organisms; carbon fixation; water/flood control; reduction of heat island effect in urban areas	
	Migration of materials	Particles of infill & artificial grass blades can migrate into environment	Possible fertilizer runoff or pesticide drift	n/a
	Water use	Irrigation may be used to lower temperature	Irrigation may be used to support grass growth	Irrigation may be used to support grass growth; organic management reduces irrigation needs by supporting root development

Organic Management of Recreational Field Space

Organic management of a recreational field space requires a site-specific plan to optimize soil health and minimize long-term costs. Over time, a well-maintained organic field is more robust for recreational use due to a stronger root system than that found in a conventionally managed grass field. Water needs also decrease over time. Key elements of organic management include the following steps.[89]

- **Field construction**: Construct field with appropriate drainage, layering, grass type, and other conditions to support healthy turf growth. Healthy, vigorously growing grass is better able to outcompete weed pressures, and healthy soil biomass helps to prevent many insect and disease issues.
- **Soil maintenance**: Add soil amendments as necessary to achieve the appropriate chemistry, texture and nutrients to support healthy turf growth. Elements include organic fertilizers, soil amendments, microbial inoculants, compost teas, microbial food sources, and topdressing as needed with high-quality finished compost.
- **Grass maintenance**: Maintain turf health through specific cultural practices, including appropriate mowing, aeration, irrigation, and over-seeding. Address trouble spots through composting and re-sodding where necessary.

It is important to note that organic turf management requires proper training. Conventional turf management may follow a similar protocol each year; organic turf managers make adjustments based on changing conditions.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Installation/Maintenance Costs: Comparing Artificial Turf with Natural Grass

In analyzing the costs of artificial vs. natural grass systems, it is important to consider full life cycle costs, including installation, maintenance, and disposal/replacement. Artificial turf systems of all types require a significant financial investment at each stage of the product life cycle. In general, the full life cycle cost of an artificial turf field is higher than the cost of a natural grass field.

Cost information is available through university entities, turf managers' associations, and personal communications with professional grounds managers. Information is also available on the relative costs of conventional vs. organic management of natural grass.

Installation

According to the Sports Turf Managers Association (STMA), the cost of installing an artificial turf system may range from $4.50 to $10.25 per square foot. For a football field with a play area of 360x160 feet plus a 15-foot extension on each dimension (65,625 square feet), this yields an installation cost ranging from about $295,000 to about $673,000. These are costs for field installation only, and full project costs may be higher. Costs for a larger field would also be higher. A range of choices in materials and underlayments can influence the total cost of the field.

In one site-specific example, information provided by the town of Natick, Massachusetts, shows that the full project budget for the installation in 2015 of a new artificial turf field (117,810 square feet), along with associated landscaping, access and site furnishings, totaled $1.2 million.[90]

For natural grass, installation of a new field may not be necessary. For communities that do choose to install a new field, costs can range from $1.25 to $5.00 per square foot, depending on the type of field selected. For the dimensions noted above, this would yield an installation cost ranging from about $82,000 to about $328,000.[91]

Maintenance

Maintenance of artificial turf systems can include fluffing, redistributing and shock testing infill; periodic disinfection of the materials; seam repairs and infill replacement; and watering to lower temperatures on hot days. Maintenance of natural grass can include watering, mowing, fertilizing, replacing sod, and other activities. In both cases, specialized equipment is needed. Communities shifting from natural grass to artificial turf may need to purchase new equipment for this purpose. According to STMA, maintenance of an artificial turf field may cost $5,000 to $8,000 per year for materials and 300 to 500 hours of labor per year. These estimates are higher for artificial turf fields used for multiple sports. Maintenance of a natural grass field may cost $4,000 to $14,000 per year for materials plus 250 to 750 hours of labor.[92]

Organic turf maintenance can be cost-competitive with conventional management of natural grass. One study found that once established, an organic turf management program can cost 25% less than a conventional turf management program.[93]

Fifteen acres of playing fields in Marblehead, MA are managed organically. Annual maintenance costs are $2,400–$3,000 per 2-acre playing field, not including mowing costs. Mowing costs for a 2-acre field were estimated in 2010 to be $10,000 annually. Thus, total maintenance costs per 2-acre field are $12,400 to $13,000 annually (or $0.14 to $0.15 per square foot per year).[94]

Disposal/replacement

Artificial turf also requires disposal at the end of its useful life. STMA estimates costs of $6.50 to $7.80 per square foot for disposal and resurfacing.[95] Those estimates yield $426,000 to $512,000 for a

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

65,625 square foot field and $552,000 to $663,000 for an 85,000 square foot field.

Annualized costs

In 2008, a Missouri University Extension study calculated annualized costs for a 16-year scenario. The calculation included the capital cost of installation; annual maintenance; sod replacement costing $25,000 every four years for the natural fields; and surface replacement of the synthetic fields after eight years. Based on this calculation, a natural grass soil-based field is the most cost effective, followed by a natural grass sand-cap field, as shown in Table 5.[96] Another study, conducted by an Australian government agency, found that the 25-year and 50-year life cycle costs for artificial turf are about 2.5 times greater than those for natural grass.[97]

Planning over time

Each municipality or institution will face its own considerations as it works to develop plans for athletic fields. Some municipalities are working from a baseline of an existing, poorly-maintained grass field, or a field with poor drainage, and may wish to research options for upgrading these existing resources. In planning for the medium term, it is necessary to have a maintenance plan, whether the field is grass or artificial. For an artificial turf field, the community also needs to plan for disposal.

Summary

In summary, when the full product life cycle is taken into account, natural grass is likely to be more cost effective than artificial turf. Organic management of natural grass can further lower costs over time by building healthy soil and robust root systems. When assessing the cost of any option, whether natural grass or artificial turf, it is also important to note that there can be cost gradations depending whether a basic or a premium field is needed. More detailed cost information is also available on TURI's website.[98]

Organic Management of Playing Fields: Springfield, MA

The city of Springfield, Massachusetts, manages many of its sports fields organically. According to the Springfield Parks Department, organic management has improved the overall condition of these fields. Many hours of both formal and informal sports play occur on these fields, and there are few or no cancellations due to weather-related field conditions.[99]

Forest Park, Springfield, MA, 2018.

The consultant working with Springfield was able to provide TURI with cost figures for the first three years of organic management. The cost was $1,740/acre in the first year, $1,245/acre in the second year, and $1,110/acre in the third year. Thus, maintenance costs decreased each year as the health of the soil and vegetation improved.[100]

The consultant was also able to provide an estimate of the hours of play on one of the organically managed fields. The field has 650 scheduled hours annually. In addition to this, physical education classes are held on the field and there is an estimated 100 hours of non-programmed use. The consultant estimated that this adds up to a total of about 1,000 hours of field use per year.[101]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Conclusions

Artificial turf poses a number of health and environmental concerns. Those communities that have decided to install artificial turf are encouraged to make careful choices among the materials available to them. This is likely to include requiring some additional testing to get information on organic compounds as well as metals. Communities should bear in mind that existing tests apply only to the sample on which they are conducted, and materials used in artificial turf may vary widely in composition. From an environmental and health standpoint, organically managed natural grass is a safer choice for sports fields. When the full product life cycle is considered, organically managed natural grass also offers lower costs over time.

Glossary of Acronyms

ATSDR	Agency for Toxic Substances and Disease Registry
CPSC	Consumer Product Safety Commission
EPA	US Environmental Protection Agency
EPDM	Ethylene propylene diene terpolymer
FDA	US Food and Drug Administration
IPM	Integrated pest management
NBI	Norwegian Building Institute
OEHHA	California Office of Environmental Health Hazard Assessment
PAHs	Polyaromatic hydrocarbons
$PM_{2.5}$	Particulate matter with diameter less than 2.5 micrometers
REACH	European Union's Registration, Evaluation and Authorisation of Chemicals
RIVM	National Institute for Public Health and the Environment (Netherlands)
RSLs	Restricted Substances Lists
SBR	Styrene Butadiene Rubber
STMA	Sports Turf Managers Association
SVOCs	Semi-volatile organic compounds
TPE	Thermoplastic elastomer
TUR	Toxics Use Reduction
TURI	Massachusetts Toxics Use Reduction Institute
TVOCs	Total volatile organic compounds
VOCs	Volatile organic compounds
WET	Whole effluent toxicity

Natural Grass Playing Field Case Study: Martha's Vineyard, MA

Improving the quality of grass playing fields with data collection and organic management

COMMUNITIES ON THE ISLAND of Martha's Vineyard, Massachusetts – Chilmark, Edgartown, Oak Bluffs, and West Tisbury – have chosen to work with a non-profit group, The Field Fund, to manage their natural grass playing fields. The Field Fund was formed in 2017 with a goal of providing quality grass playing fields that can support the full demands of local youth and adult recreational activities, and increase community access to pesticide-free play spaces. This case study provides information on maintenance practices, costs, use, successes, and challenges for three natural grass field complexes managed by The Field Fund.

Children playing soccer at West Tisbury School field

In its work with towns and schools, The Field Fund has chosen to use a combination of established organic management techniques and innovative technologies to pinpoint the needs of each field and allocate resources with precision. The Field Fund worked with a consultant to design the project and to create individualized maintenance plans for the fields. The Field Fund places a high priority on maximizing availability of the fields for play. Their techniques are designed to ensure that fields are never closed for maintenance.

Elements of organic management include frequent aeration, frequent mowing, soil testing, and the use of organic fertilizer and soil amendments. These practices are designed to create a healthy ecosystem with an active soil microbial community and a strong root system. In addition to these organic techniques, The Field Fund uses technologies such as drone photography and soil moisture mapping to assess field maintenance needs. Information collected through these techniques makes it possible to target the field areas needing additional maintenance, and to reduce total maintenance costs. The Field Fund also chose a mixture of grass types that are resilient in the Massachusetts climate and provide maximum root stability to withstand sports activity.

The Field Fund tailors maintenance to the use needs of each field. Some fields need only simple maintenance; others benefit from more support, including use of innovative technologies, to match their usage demands. Annual costs per acre range from $4,900 to $10,600. These costs are about 30% higher than would be faced by mainland communities for the same activities, due to additional costs associated with transporting materials and equipment to an island, as well as higher labor costs overall.

Fields maintained by The Field Fund are fully meeting the needs of their communities. None of The Field Fund partner fields were closed due to field conditions in 2019. By using organic maintenance practices, they are protecting their limited water resources and creating quality fields both for general use and for organized sports.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Introduction

This case study focuses on the organic management of natural grass on athletic fields on Martha's Vineyard, managed by The Field Fund in collaboration with town and school partners. This is the third in a series of case studies created by the Toxics Use Reduction Institute (TURI), intended to share the experiences of communities that have chosen to invest in organically managed natural grass athletic fields. The first two case studies described the experiences of the City of Springfield and the Town of Marblehead. The Springfield and Marblehead case studies show what can be accomplished with use of core organic management techniques. This case study presents how precision technologies can be used alongside core organic management techniques, for those communities that have resources for additional investment.

This case study, and the companion case studies, help to answer questions faced by many communities. These include questions about annual costs of maintenance, field use hours, and how to make the transition to organic management.

Overview

Children, teens and adults on Martha's Vineyard have played on grass fields for generations. As in other communities, these fields are used for physical education (P.E.), organized sports, pick-up games, and general use. In 2017, a group of Martha's Vineyard parents established The Field Fund, Inc. (www.fieldfundinc.org), with a goal of providing support to Martha's Vineyard schools and towns seeking to improve, or better maintain, their grass playing fields using organic practices. The Field Fund's services are funded through donations and grants. Their services include assistance with ongoing maintenance, purchase of materials and equipment, education/training for groundskeepers and other community members, and assistance in redesigning existing fields and adjacent playing surfaces.

The Field Fund received a TURI community grant award in fall 2017 to support its healthier playing fields initiative. The funds purchased an $8,500 slicing aerator, used to reduce compaction, improve drainage, and encourage healthy root systems.

As of September 2020, The Field Fund was supporting five athletic field complexes in partnership with four schools and towns, each with different use needs. Table 1 summarizes these field areas and their uses. Data presented in this case study were collected throughout 2019.

Table 1: Organically managed athletic fields in Martha's Vineyard

Park	Area (sq. ft.)	Sports/other information
Oak Bluffs School	119,790	Soccer, lacrosse, recess and P.E. activities
West Tisbury School	87,120	Soccer, track, and P.E. activities
West Tisbury Town	60,984	Soccer, Little League baseball, and pick-up games
Edgartown School	54,450	Recess and P.E. activities, pickup games, lacrosse camps
Chilmark School	26,136	Recess and P.E. activities, informal baseball, soccer, lawn tennis, summer camp, recreational use, and community gatherings

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Design and Startup

The Field Fund's work is tailored to the needs of each school or town. Individual fields have varying needs depending on the amount of formal and informal recreational use they receive each year.

The Field Fund begins each new project by meeting with stakeholders, including school administrators, local Parks and Recreation departments, and facilities caretakers, to identify existing or desired field usage, existing maintenance practices and challenges, time constraints, and town regulations. Once a relationship is formed, The Field Fund coordinates directly with facilities staff regarding mowing and scheduling maintenance around school activities. The Field Fund also works with natural grass athletic field consultants at Natural Grass Advisory Group (NGAG) to develop a rehabilitation plan and to create a maintenance plan by season that includes organic grass management techniques.

The Field Fund uses soil testing, an important step in organic grass care, to understand existing physicochemical characteristics and balance of nutrients for each field. Fostering a healthy balance of these soil characteristics is essential to supporting healthy grass root systems. Soil test findings are used to create a unique maintenance for each field.

The Field Fund coordinates field maintenance with each field's respective school or town partner and places a high priority on ensuring that fields can be used continuously, regardless of maintenance activities. Partnering towns and schools have never been asked to close a field during or after maintenance by The Field Fund.

Hours of Activity: Examples from Three Athletic Fields

Decision makers often ask how many hours of activity they will be able to schedule on a natural grass playing field. NGAG applies the principle that a natural grass field can accommodate any amount of play; maintenance practices simply need to be adjusted based on amount and type of activity. Thus, the number of hours recorded for the fields highlighted in this case study were not the maximum number of hours possible. Rather, the fields were used for the number of hours needed by the community, and The Field Fund was able to focus on improving the overall quality of their playing fields.

Playing fields in Martha's Vineyard cover a wide range of use needs. Some fields are needed for school related activities only. Other fields, such as Oak Bluffs, are also regular practice and game locations for sports leagues. Towns and schools that have partnered with The Field Fund have been able to meet all of their use needs, with few cancellations due to weather-related field conditions.

Based on information provided by Martha's Vineyard athletic directors, P.E. teachers, and The Field Fund, TURI was able to compile scheduled sports team use as well as estimated informal recreational use hours for three field complexes: Oak Bluffs School fields, West Tisbury School fields, and West Tisbury Town field. These complexes are used primarily by youth, but also by some adult sport teams. They are used mainly in the spring and fall, but are open year-round.

Hours of sports team use were estimated by multiplying the number of scheduled practices and games per week by the number of hours scheduled for each activity.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Field Closures

None of The Field Fund partner fields were closed due to field conditions in 2019. The Field Fund encourages schools and towns to leave fields open for play unless there is standing water on the fields. Pooling is uncommon on these fields due to the regular aeration and the relatively high amount of sand in the soil. However, if pooling occurs after a rainstorm, coaches are able to shift play away from the puddled area to a drier area on the field.

Oak Bluffs School Fields

The Oaks Bluff School field complex consists of one regulation 11v11 soccer field and one regulation 9v9 soccer field.[1] The total playing area of the two playing fields at Oak Bluffs measure 2.75 acres, or approximately 120,000 square feet. The fields are mainly used for soccer in the fall and spring as well as hosting recess and physical activity for 445 students. The Oak Bluffs fields host some of the practices and games for Martha's Vineyard Island League Soccer and the Martha's Vineyard Youth Lacrosse league, as well as school activities (e.g., recess, P.E. classes).

The Oak Bluffs school fields were rebuilt in the summer of 2018. Work began on June 27, 2018. Both fields were open for the start of the school year just over two months later, on September 4, 2018, three weeks after seeding. Both fields were overseeded again on September 3 and the grass continued to fill in throughout the season.

A. Oak Bluffs School fields rebuild project: Excavation on July 3, 2018; B. Seeding of fields, August 15, 2018; C. Overseeding before first game on new field, September 3, 2018; D. Oak Bluffs School fields on May 21, 2019

[1] 11v11 indicates 11 players per team and 9v9 indicates nine players per team.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The Oak Bluffs fields have the highest use needs of the three athletic fields highlighted in this case study. Over the course of 2019, the Oak Bluffs School fields were jointly used by sports teams for just over 380 hours. Adding recess and P.E. time leads to an estimated total of just over 890 hours of use for 2019. Approval is generally required for organized sports teams to use the Oak Bluffs School field complex. However, the fields are available for community use without special arrangements. Informal recreation was not included in the 2019 annual estimate of use hours, as the campus was closed during the summer for school building renovations. Table 2 shows estimates of the total number of use hours by sports teams and the school in 2019.

Table 2: Oak Bluffs School fields (two fields)

Sport	Age group	Season	Weeks	Total use: hours per week	Total use hours per season[a]
MV Island League Soccer	Youth	Fall	8	42	340
Lacrosse	Youth	Spring	12	4	48
Total documented sports team use – all seasons					**380**
Recess	Youth	Fall, spring	37	3	110
Physical education	Youth	Fall, spring	16	25	400
Estimated total hours – all seasons					**890**

Note: Informal recreation was not included in the 2019 annual estimate of use hours, as the campus was closed during the summer for school building renovations.

[a] Due to rounding to two significant digits, totals may not correspond to the sum of the separate figures.

West Tisbury School Fields

The West Tisbury School (pre-K through 8th grade) has two multi-purpose fields with a total area of two acres, or just over 87,000 square feet. The fields host a variety of school activities, scheduled sports, and informal recreational uses. The West Tisbury School fields are the main site for the island's recreational soccer program, which hosts 300 children aged four to ten annually. These fields also host the school's track team activities as well as the school's daily recess and P.E. classes. During the spring, the field is used primarily by the recreational soccer program and the West Tisbury School P.E. classes for around 15 hours per week.

Soccer game at West Tisbury School

In the fall, these fields are used by the recreational soccer program, the school track team, and the school for recess and P.E. classes, for a combined total of 26 hours per week. Over the course of 2019, the West Tisbury School fields were used by sports teams for just over 220 hours in the fall and spring seasons. Adding estimated school use time and informal summer recreation leads to an estimated total of around 470 hours of use in 2019. Table 3 shows the total number of hours of field use for each sport per season.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 3: West Tisbury School fields (main field) [a]					
Sport	**Age group**	**Season**	**Weeks**	**Total use: hours per week**	**Total use hours per season[a,b]**
MV Soccer Recreation Program	Youth	Spring, fall	15	11	170
MV Island League Soccer	Youth	Fall	8	3	24
Track	Youth	Fall	8	4	32
Total documented sports team use – all seasons					**220**
Physical education	Youth	Spring	10	4	40
Physical education	Youth	Fall	10	5	50
Recess	Youth	Spring, fall	36	3	110
Informal recreation[c]	Youth/adult	Summer	10	5	50
Estimated total hours – all seasons					**470**

[a] Hours are presented for main 75 x 110 yard field. A small grass play area is located adjacent to this field and is also used for some recess and informal recreation.
[b] Due to rounding to two significant digits, totals may not correspond to the sum of the separate figures.
[c] This is a conservative estimate that includes pickup games and occasional camp use.

West Tisbury Town Field

The West Tisbury Town field is adjacent to the West Tisbury School's fields and covers 1.4 acres, or approximately 61,000 square feet. This field is used for youth soccer, youth baseball, adult soccer, and pick-up games by community members year round. In the spring, the West Tisbury Town field was used for 12 hours per week for soccer practice and games. In summer, the women's adult soccer league used the West Tisbury Town field for four hours per week for practice and games. During the fall season, this field was used for the Island League youth soccer program for 12 hours per week for eight weeks. The informal recreational use by the surrounding community occurs throughout the entire year.

Aeration at West Tisbury Town field

Over the course of 2019, the West Tisbury Town field was used by sports teams for around 250 hours. Adding estimated informal use time leads to an estimated total of around 390 hours of use for 2019. Table 4 shows the total number of hours used by adult and youth teams as well as informal recreational use for 2019.

Table 4: West Tisbury Town field					
Sport	**Age group**	**Season**	**Weeks**	**Total use: hours per week**	**Total use hours per season[a]**
MV Island League Soccer	Youth	Fall	8	12	96
Little League baseball	Youth	Spring	10	12	120
Women's Soccer League	Adult	Summer	8	4	32
Total documented sports team use – all seasons					**250**
Estimated informal recreation use [b]			28	5	140
Estimated total hours – all seasons					**390**

[a] Due to rounding to two significant digits, totals may not correspond to the sum of the separate figures.
[b] This is a conservative estimate that includes pickup games and occasional camp use.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Maintenance

The Field Fund's maintenance protocols focus on improving overall soil health and increasing soil organic matter in order to create athletic fields that can recover quickly from compaction and tolerate drought conditions. Maintenance plans range from basic best practices to high-tech, depending on the athletic demands of the field. Costs are about 30% higher than would be faced by mainland communities for the same activities, due to additional costs associated with transporting materials and equipment to an island, as well as higher labor costs overall. Fields used mainly for formal sports use require more maintenance; less maintenance is required for fields used mainly for P.E. classes and other lower-impact activities. In addition to applying best practices such as regular aeration and soil testing for all fields, The Field Fund employed a natural grass athletic field consulting group, NGAG, to help create tailored rehabilitation and maintenance plans for each field. All maintenance labor was subcontracted.

Soil Testing

Soil samples were analyzed by Logan Labs in Ohio for pH and soil nutrients such as phosphorus, potassium, and nitrogen. Soil at Oak Bluffs fields and West Tisbury School fields was tested using a paste extraction. Paste extractions measure the same variables as a standard soil test, but can also identify which nutrients are immediately available for use by grass roots when dissolved in water. Soil samples from Oak Bluffs fields and West Tisbury School fields were also used to determine the proportions of clay, silt, sand, organic matter, and fine gravel.

Soil sample collected from playing field in Chilmark

Aeration and Mowing

Aeration is a critical part of The Field Fund's organic grass maintenance because it relieves compaction, resulting in improved drainage, decreased need for irrigation, and a softer, more protective playing surface. For surface aeration, The Field Fund uses a spike aerator, which drives large spikes into the soil to create space to allow oxygen, water, and any added products to reach the plant roots. This aerator opens 14% of the field surface area each time it is used, without damaging the grass. In 2019, The Field Fund also rented a deep reaching hollow-tine aerator for subsurface aeration. This aerator relieves compaction by pulling out plugs of soil. The Field Fund aerated the entire fields two to three times per year, and high traffic areas an additional one or two times per year.

Spike aerator used by The Field Fund

It is important to mow grass frequently and with sharpened blades, especially in the summer during peak growing season. Fields managed by The Field Fund are mowed twice per week in the peak grass-growing season, and once per week or as needed in the shoulder seasons.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Choosing and Adding Grass Seed

The Field Fund adapts to Martha's Vineyard's sandy soils and weather conditions by using a combination of perennial ryegrasses and Kentucky bluegrass. Kentucky bluegrass creates a strong root structure, while the perennial ryegrasses fill in plentiful grass blades. This seed combination creates heat-tolerant, durable fields that are able to support heavy use nearly year round.

Two techniques are used to plant grass seeds on The Field Fund fields: slit seeding and overseeding. Slit seeding uses a slice aerator to create holes to drop the seeds under the soil surface. Overseeding involves spreading the seeds on the surface of the soil using a spreader. Slit seeding is typically performed twice a year.

Fertilizers and Soil Amendments

Decisions about fertilizer and soil amendments are based on soil test results and the unique conditions of each field. The Field Fund works with NGAG and a practicing turf grass agronomist to create the nutrient management plan. The exact products used vary based on nutrient testing, availability, and cost. The Field Fund uses organic fertilizer and soil amendments, such as humic acid and calcium silicate, to balance soil pH and physical properties of the soil. The Field Fund also works to increase organic matter in the soil, which can decrease the need for fertilizer over time and improve water retention capacity. Loam and sand are used for field repairs and topdressing high-use areas.

The Chilmark School field and the smaller field at West Tisbury School are not fertilized due to their proximity to wellheads. The Field Fund plans to begin using organic liquid worm casting as a nutrient source.[2]

Other Diagnostic and Maintenance Technologies

NGAG uses technologies such as drone photography and soil sensors to pinpoint irrigation issues and compacted areas in need of extra attention. These additional technologies are not necessary for a successful organic management program, and other communities whose experience TURI has documented have not made use of them. However, these techniques provide valuable supplementary options. Directing resources to targeted problem areas rather than the entire field can help reduce costs.

Soil sensors. Periodically, NGAG uses a wireless sensor tool called POGO to measure soil water content, soil salinity, field surface temperature, and GPS location. These data are used to create a map to identify specific areas on the field in need of extra maintenance. Low soil moisture is an indicator of compaction or low organic matter

Example of moisture map using POGO sensors, provided by NGAG

content. Field crews are able to address compaction and low organic matter in these areas by adjusting irrigation or maintenance. This style of targeted maintenance is useful for fields with heavy use in particular areas, such as in the middle of soccer fields.

[2] Several other Massachusetts communities have also made decisions about athletic field surfacing based on wellhead zoning. For information on Zone 1 wellhead protection zones, visit MassDEP's website.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Drone photography. The Field Fund also uses drone photography to determine the areas in need of specific maintenance. This unique view of the fields allows for identification of wear patterns in the fields as well as helping to monitor irrigation function. This allows The Field Fund to tailor maintenance practices while saving time and resources.

"Smart" irrigation. In an effort to conserve water in the island's sole source aquifer, The Field Fund irrigates the Oak Bluff fields using non-potable water, and controls irrigation using a HydroPoint WeatherTRAK ET Pro3 controller. The HydroPoint is a "smart" irrigation system programmed to water the field only when necessary based on rainfall and soil moisture. The irrigation controller also takes account of site characteristics including soil type, grass type, sprinkler type, land slope, and sun exposure.

Choosing the Best Maintenance Plan

Maintenance plans for the Martha's Vineyard fields demonstrate a wide range of approaches to creating field surfaces that perform for different purposes. Some fields, such as Chilmark and Edgartown School fields, are used primarily for school recreation. Maintenance on these lightly used fields requires only foundational organic techniques: aeration, frequent mowing, and adding fertilizers and soil amendments based on soil testing. Other fields, such as Oak Bluffs, are used more regularly to accommodate practices and games for sports leagues and require extra attention. Table 5 summarizes the maintenance techniques used for Oak Bluffs School, West Tisbury Town, and West Tisbury School fields.

The West Tisbury Town field has some specific requirements due to the particular conditions of the location. The field tends to become compacted because it is not irrigated. Regular surface and subsurface aeration serve to keep the soil decompacted. West Tisbury School Field has a unique challenge of underground tree stumps, which decompose and leave sunken areas. This is treated by filling and overseeding these areas an additional two times per year.

Table 5: Summary of maintenance practices

Field	Maintenance
Oak Bluffs School Fields	• Aerated soil on entire field 3-4 times per year[a] • Overseeded 2 times per year • Mowed 2 times per week during growing season and as needed other times of the year • Fertilized according to soil tests • Irrigated using HydroPoint controller
West Tisbury Town Field	• Aerated soil on entire field 2-3 times per year[a] • Mowed 2 times per week during growing season and as needed other times of the year • Fertilized according to soil test and weather • No irrigation
West Tisbury School Fields	• Aerated soil on entire field 2-3 times per year[a] • Fertilized according to soil tests • Mowed 2 times per week during growing season and as needed other times of the year • Filled and overseeded sunken areas due to underground tree stumps • Irrigated with well water

[a] High use areas are aerated twice during each aeration event.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Costs

Annual maintenance costs include soil testing, mowing, surface and subsurface aeration, slice seeding, grass seed, fertilizer, and irrigation adjustments. In 2019, the total annual cost of all fields managed by The Field Fund ranged from $4,900 to $10,600 per acre. Table 6 summarizes annual costs needed to maintain playing fields with organic practices in 2019. The costs cited in this section are specific to work on Martha's Vineyard, which was subcontracted. These numbers also reflect a 30% "island markup." The Field Fund receives funding from private donors to cover costs for maintenance.

As noted earlier, fertilizer and soil amendments are not applied on two of the fields due to their close proximity to public water sources on the island.

Table 6: Estimated annual costs for athletic fields managed by The Field Fund using organic maintenance

	Oak Bluffs School fields	West Tisbury School - large field	West Tisbury School - small field	West Tisbury Town Field	Edgartown School	Chilmark School	Total for all fields[a]
Acres (sq. ft.)	2.75 (120,000)	2 (86,000)	0.6 (25,000)	1.4 (60,000)	1.25 (55,000)	0.6 (25,000)	**8.6 (371,000)**
Products							
Seed	$3,460	$2,450	$324	$1,770	$1,600	$762	**$10,400**
Fertilizer	$3,660	$2,010	-	$1,550	$1,690	-	**$8,920**
Humic acid	$772	$558	-	$386	$386	-	**$2,100**
Calcium silicate	$834	$626	-	$417	$382	-	**$2,260**
Loam/ sand	$100	$260	-	$250	$40	$160	**$810**
Labor and rentals							
Slice seeding[b]	$2,250	$1,800	$900	$900	$900	$1,350	**$8,100**
Slice aeration[b]	$2,250	$1,800	$900	$900	$900	$1,350	**$8,100**
Labor[c]	$2,630	$2,270	$358	$986	$1,200	$398	**$7,840**
Mowing	$3,080	$4,610	$210[d]	$3,700	- [d]	$2,100	**$13,700**
Core Aerator Rental[e]	$1,080	$784	$235	$549	$490	$235	**$3,370**
Total costs	**$20,100**	**$17,200**	**$2,930**	**$11,400**	**$7,590**	**$6,360**	**$65,600**
Annual costs per acre	$7,320	$8,580	$4,880	$8,150	$6,070	$10,600	$7,620

[a] Due to rounding to three significant digits, totals may not correspond to the sum of the separate figures.
[b] Price for a contractor to truck the equipment owned by The Field Fund to each site and pull with his tractor 2-3 times per year.
[c] Labor includes spreading seed, fertilizer and amendments, and filling holes by contractors.
[d] Some mowing was completed by school facilities staff.
[e] Rented at a discounted rate from Finch Turf.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Summary and Lessons Learned

The fields maintained by The Field Fund met community needs and had few to no game or practice cancellations due to poor field conditions or maintenance in 2019. Through both field renovations and rebuilds, The Field Fund was able to revitalize fields swiftly by taking account of varying field needs, utilizing available field technology, and keeping up with regular field maintenance. The Field Fund's data-driven maintenance practices created protective play surfaces and avoided rainouts.

Playing field at Edgartown School

It is worth noting that the fields highlighted in this case study were not used for the maximum number of hours possible. Rather, they were used for the number of hours needed by the community. The information in this case study illustrates the type and frequency of maintenance activities, and associated costs, used to provide a quality play surface for the amount of activity that is desired by the communities described here. Some communities are particularly concerned about maximizing number of playable hours. In the examples described here, the primary concern was to improve the quality of the play surface while meeting the needs of the community.

It is also important to note that hours of play are not adjusted to account for type of activity. For communities comparing artificial turf with natural grass options, it is important to understand that expected hours of use are often adjusted for activity type (e.g., one hour of football may be calculated as two hours from the perspective of wear and maintenance). No such adjustment has been made for the information presented here.

Maintenance efforts, such as aerating, mowing, and irrigation, were based on use needs of the fields. The Field Fund used innovative technologies to diagnose and maintain the more heavily used areas of fields throughout the year. For example, in 2019 the Oak Bluffs School fields were used around 380 hours by sports leagues, and an estimated total of around 890 hours including school use. This field complex has an advanced, high-efficiency irrigation system, useful in conserving the limited water supply on the island.

While the maintenance practices highlighted here were created to match Martha's Vineyard's specific soil, climate, community needs, and sports culture, these methods can be adapted to any town, school, or community looking for a cost-effective way to maintain their playing fields.

Natural Grass Playing Field Case Study: Marblehead, MA

20 Acres of Organically Managed Playing Fields

THE TOWN OF MARBLEHEAD, Massachusetts, has managed all of its playing fields organically since 2002. This approach had its origins in a policy adopted by Marblehead's Board of Health in 1998, which noted the adverse health and environmental effects of pesticides and made a commitment to protecting children's health.

The town has achieved its performance goals by focusing on building and maintaining a healthy ecosystem with active microbial life in the soil and a strong root system. Key elements of the program are frequent aeration, frequent mowing, soil testing, and the use of organic fertilizer and soil amendments.

Organically managed fields at Veterans' Middle School located in Marblehead, MA

This case study provides detailed information on the number of hours played at four multi-use fields in Marblehead. Each of these fields may serve as a useful model for other communities interested in organic field management. For example, the Seaside Park field is used for baseball and field hockey. The scheduled practice and play time on this 105,000 square foot field totaled about 1,180 hours in 2018. With estimated informal recreation included, the field was used for approximately 1360 hours.

The annual cost of organic management of Marblehead's fields, including products, mowing, aeration, and other activities, is approximately $4,250 - $4,500 per acre.

Marblehead also has one artificial turf field, installed in 2013. Information is provided on maintenance costs for the artificial turf field, including grooming, cleaning, compaction testing, decompaction, and disinfection.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Introduction

This case study has been developed by the Toxics Use Reduction Institute (TURI) as part of an effort to provide information to municipalities, schools and other institutions as they make decisions about play surfaces. TURI has documented information on the materials often used in artificial turf playing fields.[1] TURI has also gathered information on natural grass fields and has developed a series of case studies to share experiences.

This case study focuses on the organic management of natural grass on 20 acres of sports fields by the town of Marblehead. The organic practices described in this case study can be used on grass properties of any size.

Communities often have questions about whether natural grass can meet their recreation needs and be cost-effective. TURI has compiled the following information for other communities to learn from the successes of Marblehead.

Overview

In 1998, the Board of Health of the Town of Marblehead adopted a statement on pesticides that enumerated the adverse health and environmental effects of pesticides, with a particular emphasis on children's health. In this statement, the Board of Health made a commitment to phasing out pesticide use, stating: "The Board of Health of the Town of Marblehead hereby commits itself to the goal of reduction and eventual phase-out of pesticide use in the Town of Marblehead, both on public and private property."[2]

With support from a TURI grant, in 1999-2000 Marblehead developed the state's first municipal organic lawn demonstration site, serving as a resource for residents interested in alternatives to pesticides. The town also developed the state's first organic pest management policy,[3] and served as host to a wide variety of educational programs for landscapers, homeowners and others. Building on this commitment, Marblehead began organic management of all its publicly managed land, including sports fields. All of Marblehead's fields have been managed organically since 2002.

Marblehead currently has twenty acres of publicly owned grass fields, all of them managed organically. This total area includes both grass and skinned surfaces (i.e., clay in infield areas of baseball and softball fields).

Specifically, the fields include the following: five little-league baseball fields; four girls' softball fields; three all-purpose fields (soccer, lacrosse, youth football, and other activities); one 90-foot regulation baseball field where the outfield is also used for field hockey; one 90-foot regulation baseball field where the outfield is also used for all-purpose practice, including football; and additional areas used for informal recreation, including a neighborhood pocket park. [4] The town is also planning to build a new, fully renovated field, which will be organically managed from the outset.

[4] 90-foot refers to the distance in feet between bases. This is a standard baseball field size.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

This case study focuses on four of the athletic fields in Marblehead, as shown in Table 1. The Seaside Park field is a well-designed park with good drainage and few maintenance difficulties; the Hopkins Field is a high-use park; the Veterans' Middle School field is used for physical education and recess and was used for field hockey in the past; and the Village School Lower Field back half field is a field with very high use and some design problems. This case study helps to illustrate the successes of a 100% organic management program, as well as the ways in which the grounds managers have overcome specific difficulties that can be faced by many communities using or renovating existing fields.

Table 1: Marblehead athletic fields included in this case study[a]

Park	Area (sq. ft.)[b]	Sports/other information
Seaside Park	105,000	Fitness trail, cross country meets, conditioning, baseball (adult & youth), field hockey
Hopkins Field	65,000	Football, soccer, lacrosse, middle school physical education
Veterans' Middle School field	90,000	Girls' youth softball, high school softball, middle school physical education, middle school advisory, high school field hockey, youth flag football, middle school ultimate Frisbee[c]
Village School Lower Field back half	65,340[d]	High school lacrosse, boys' youth lacrosse, youth soccer, middle school recess, high school soccer, youth soccer

[a] Marblehead has 20 acres of athletic fields, all of them managed organically. This table only shows the fields for which detailed information is provided in this case study.

[b] Area shown is total for grass only.

[c] Advisory is an activity break in which the students play outdoor games and do team-building activities

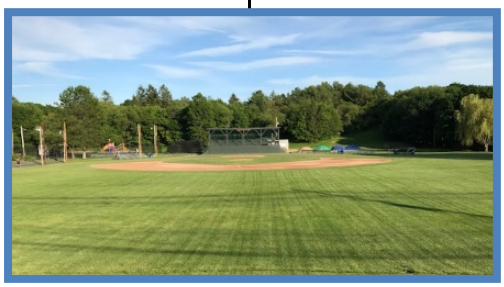
[d] The full Village School field is 3 acres, but the section covered in this case study is 1.5 acres (65,340 sq. ft.).

Hours of Activity: Examples from Four Sports Fields

Decision-makers often have questions about how many hours of use a natural grass field can accommodate. Marblehead documented the use of their athletic fields in 2018. Total hours of use are presented for each activity and age group, and include practice and games for sports. Hours of use per season were estimated by multiplying the number of hours booked for each activity by the number of weeks each activity was played per season.

These fields are also used by Marblehead residents for informal activities, such as pick-up games, or passive recreation, such as picnics. These activities take place during open park hours that have not been scheduled for team use, or on areas of the complex that are not in use during formally scheduled activities. In the absence of data on informal activities, TURI estimated that each case study park was used an additional 14 hours per week for informal/unscheduled activity.

Cancellations



Marblehead chooses to cancel games when there is standing water on fields. Notifications are sent by email to residents. Youth groups have learned about the importance of preserving the grass in good condition; the youth are protective of the fields and careful not to play when they are too wet. In 2018, between April 1 and November 15, the fields were closed five times due to rain and twice due to extreme heat. Each was a one-day closure. The heat-related closures were the first that the town has experienced.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Seaside Park: Baseball and Field Hockey Field within a Larger Park

Seaside Park is a 34-acre park that offers a network of walking trails as well as a play area, including a baseball diamond, a playing field, tennis courts, basketball courts, and other resources. The baseball field is a regulation 90-foot baseball field. The outfield of the 90-foot regulation baseball diamond is also used for field hockey. The total grass area is 105,000 square feet.

The fitness trail and part of the field space are used for cross-country meets. Several teams use the fitness trail for conditioning as well.

Baseball and field hockey fields at Seaside Park

Youth and high school baseball are played on the field in the spring and summer, and field hockey is played on the field in the fall. In 2018, there were about 1,180 scheduled hours of practice and play on the field.[5] Adding estimated informal recreation time in the summer months, the estimated total is about 1,360 hours of use. This total does not account for the five day-long closures that occurred in 2018.

Table 2: Seaside Park baseball and field hockey complex: hours of use, 2018

Sport	Age group	Season	Total use: hours per week	Weeks per season	Approximate hours per season[a]
Baseball	Youth	Spring	31	13	400
	High school	Spring	20	13	260
	Youth	Summer	35	9	320
Field hockey	Middle school	Fall	15	13	200
Total scheduled use – all seasons					**1180**
Estimated informal recreation hours (summer only)			14	13	180
Estimated total hours – all seasons					**1360**

Note: Hours shown here do not account for cancellations. In 2018, there were five day-long closures of Marblehead fields due to rain and two due to heat.

[a] Totals rounded to the nearest 10.

Hopkins Field: Full-Sized Football Field

Hopkins Field is a full-sized football field surrounded by a track. The total grass area is 65,000 sq. ft. The field is used for soccer, lacrosse, and middle school physical education in the spring, and soccer, football, and middle school physical education in the fall. Other youth soccer-related activities are also scheduled weekly between the end of June and the end of August. In 2018, there were about 1,680 hours of scheduled practice and play on the Hopkins Field. Adding estimated informal recreation time in the summer months, the estimated total is about 1,860 hours of use, not accounting for the five day-long closures that occurred in 2018.

When organic management of Hopkins Field began in 2004, 35% of the field was covered in weeds,

[5] In summer 2019, the Seaside playing field was temporarily shut down for improvements, allowing only one third of the season to be played on this field.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

primarily broadleaf plantain. The high percentage of weeds was due to compaction of the fields. Compaction led to low oxygen levels, creating anaerobic conditions that fostered the growth of microbes that were not conducive to a healthy root system for the grass. The situation was reversed over time through the application of organic techniques.

Hopkins Field, a full-sized football field

Table 3: Hopkins Field full-sized football field: hours of use, 2018

Sport	Age group	Season	Total use: hours per week	Weeks per season	Approximate hours per season[a]
Lacrosse	Youth	Spring	21	13	270
Soccer	Youth	Spring	8	13	100
Soccer	Adult	Spring	4	13	50
Phys Ed	Middle School	Spring	30	8	240
Soccer	High School	Fall	17.5	13	230
Soccer	Youth	Fall	11.5	13	150
Soccer	Adult	Fall	2	13	30
Football	Youth	Fall	13.5	13	180
Phys Ed	Middle School	Fall	30	8	240
Other youth soccer activities (summer only)					190
Total scheduled use – all seasons					**1,680**
Estimated informal recreation hours (summer only)			14	13	180
Estimated total hours – all seasons					**1,860**

Note: Hours shown here do not account for cancellations. In 2018, there were five day-long closures of Marblehead fields due to rain, and two due to heat.

[a] Totals rounded to the nearest 10.

Veterans' Middle School Field: Softball Diamonds and Playing Field

The Veterans' Middle School field consists of two softball diamonds, one with an extended outfield. Together, these fields have an area of 90,000 square feet of grass.[6] In the spring, the field is used for high school and youth softball, and middle school physical education and school advisory. In the fall, the field is used for high school field hockey, youth flag football, middle school ultimate Frisbee, and middle school physical education and advisory.[7] During the summer in 2018, the field was used 189 hours for additional youth soccer activities. A total of about 2,140 hours of practice and play were scheduled on the field in 2018. Including estimated informal recreation, the field complex was used for about 2,320 hours.

[6] Each softball infield is 8,000 square feet. There is some sharing of outfields.

[7] Advisory is an activity break in which the students play outdoor games and do team building activities.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 4: Veterans' Middle School Field two softball diamonds and overlapping playing field: hours of use, 2018

Total scheduled use – all seasons					**2,140**
Estimated informal recreation hours (summer only)			14	13	180
Estimated total hours – all seasons					**2,320**

Note: Hours shown here do not account for cancellations. In 2018, there were five day-long closures of Marblehead fields, and two due to heat.

[a] Advisory is an activity break in which the students play outdoor games and do team-building activities.

[b] Totals rounded to the nearest 10.

To aid in comparing the activity level on this field with fields in other communities, it may be helpful to consider the softball activities separately from other activities that occur on the field. The softball hours on the two diamonds total about 1,160 hours, or an average of about 580 hours per field (although there is some overlap of the outfields). Other scheduled field activities total about 980 hours.

Table 5: Veterans' Middle School Field: Subtotals of scheduled hours	
Softball only	1160
All other scheduled field activities	980

Village School Lower Field Back Half: Two U10 Soccer Fields[8]

The Village School Lower Field back half is equivalent in size to two soccer fields for age group U10, or one full sized, plus a quarter sized field. The total area is 65,340 square feet.[9] For practices, the field can accommodate four teams simultaneously; for games, it accommodates fewer teams. The field is used for youth soccer in the spring and fall, boys' lacrosse in the spring, high school soccer in the fall, and middle school recess in both fall and spring. In the summer, the field is scheduled for other youth soccer-related activities for just over 300 hours and use by a medical sports clinic for 380 hours. Thus, in spring, summer and fall 2018, a total of 2030 hours of practice, games, and recess were scheduled on the field. In addition, there were an estimated 180 hours of informal use, leading to an estimated total of 2210 hours for all seasons.

[8] U10 is a soccer age group classification of 10 years and under

[9] The full Village School field measures 3 acres, but the section covered in this case study is 1.5 acres (65,340 sq. ft.).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 6: Village School Lower Field back half two U10 soccer fields: hours of use, 2018

[a] Totals rounded to the nearest 10.

Maintenance

The elements of field maintenance include mowing, aeration and application of products such as fertilizer and soil amendments. Field areas with extra heavy use, such as in front of soccer goals, are also "over-seeded" with grass seeds to allow fuller plant grown to withstand more wear.

Chip Osborne, Chair of the Marblehead Recreation and Parks Commission, designed the maintenance and testing protocols for the fields. He uses soil testing to determine the appropriate amount of products to use and the most effective maintenance approach for individual fields. This eliminates over-application of products and allows the town to adjust maintenance according to the performance needs of each field. Soil testing measures several characteristics of soil, including nutrients (such as nitrogen, potassium, and phosphorus), physical elements (such as soil texture), and biologicals (such as nematodes).

Marblehead has divided field management practices into three tiers according to intensity of use. Tier 1 fields (totaling 12 acres) receive the top level of management for heavy sports use; Tier 2 fields (totaling four acres) receive the same amount of mowing but half of other maintenance activities; and Tier 3 fields (totaling four acres) receive mowing only, with occasional fertilizer.

Over the years, the Marblehead field manager has experimented with a variety of approaches to optimize soil health and grass quality. The details described here represent the current approach, but can be varied.

Fertilizers and Soil Amendments

Marblehead uses organic fertilizers and soil amendments from PJC Organics, a small consulting company and fertilizer producer/distributor in Massachusetts. Amount of product ordered and their application schedules for each park are based on soil results along with the performance needs of each individual field.

The fields are fertilized four times a year with a granular fertilizer at a low dose. These granular applications are carried out in late April, mid-June, late August, and early October. In addition to the granular applications, there are three liquid

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

fertilizer applications, in June, August, and early October.

The industry standard for use of granular fertilizers on a conventionally managed field is one pound of nitrogen per 1,000 square feet for each application. Because Marblehead uses soil testing to estimate the amount of fertilizer needed for individual fields, the most heavily used fields receive 3/4 pound of fertilizer per 1000 square feet for each application. For fields with lighter use, such as some of the baseball fields, a smaller amount of nitrogen is used.

A mycorrhizal inoculation and a biological supplement are also added to certain fields in June and August. The mycorrhizal inoculation strengthens the system of beneficial fungi that colonize root systems and supports healthy plant growth.

Marblehead field managers also add a soil conditioner to fields to jump-start microbial activity. The soil conditioner is made with biochar (charcoal), kelp, molasses, and soybean and is used to improve the chemistry, structure, and biological activity in the soil.

Aeration, Mowing, and Irrigation

Aeration is accomplished by pulling up plugs of soil and grass using a riding or push machine. This process relieves soil compaction and grass thatching and allows air, water, and added nutrients to penetrate the soil. Aeration can be a time-consuming process, but is arguably the most important step for maintaining healthy, organic grass.

The groundskeeping crew uses two types of aerators interchangeably throughout the year to penetrate 4 inches into the soil. One is a hydraulic core aerator, and the other is a shatter-tine aerator. The crew aims to aerate the fields five times a year, although some years they aerate four times depending on staff availability and weather.

Mowing frequency changes throughout the year. Fields are mowed once a week, except during the peak grass growing season in July, August and September, when fields are mowed twice a week. Fields are irrigated once a week for 26 weeks.

Community Participation in Field Rehabilitation

At the beginning of the organic management program for Seaside Park, the density of weeds was high. This was reversed using organic techniques over the course of five years. The last stage of the field's rehabilitation occurred when a number of weed species had already been reduced and knotweed was the only remaining weed of concern in the field. This was addressed through mechanical means: The girls' hockey team, a group of 40 players, spent several hours walking systematically across the field and pulling up all the knotweed. The next day, the field was aerated and seeded, and grass grew to fill in the spaces created by removing the knotweed. In this way, the team was able to participate in the management of the field, and the weeds were removed without using herbicides.

Costs

The principal costs associated with organic maintenance of fields in Marblehead cover products, labor for organic management activities such as aeration, and labor for mowing.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Annual product costs, including fertilizer and soil amendments, are typically $1,500 - $1,750 per acre, or $30,000 - $35,000 for the full 20 acres.

A dedicated Turf Specialist with a salary (including benefits) around $75,000 per year was responsible for aerating, seeding, applying fertilizer and soil amendments to the fields. The Turf Specialist spent slightly under half of annual work time on these activities, costing around $34,400.[10] Separate staff members were responsible for mowing all 20 acres 25 times per year. Average salary for these staff members was $60,000 (including benefits). Mowing one acre took around 50 minutes, plus 25 minutes additional time for staging (travel, set-up, break-down). Thus, total labor costs for mowing were approximately $20,500 for the year. This brings the total cost for products and labor per acre to $4,250 - $4,500 per year.

Table 7: Estimated annual costs associated with organic management of 20 acres of athletic fields in Marblehead, MA

Cost category	Costs per acre	Total costs (20 acres)
Products (e.g. fertilizer, soil amendments)	$1,500 - $1,750	$30,000 - $35,000
Maintenance labor (e.g. aeration, other activities)	$1,720	$34,400
Mowing labor	$1,030	$20,500
Annual total for 20 acres of athletic fields	**$4,250- $4,500**	**$84,900 - $89,900**

Note: Cost values were revised in November 2020 based on information provided by Marblehead Recreation and Parks.

Artificial Turf

For a maintenance and cost comparison, TURI also gathered information on Marblehead's 1.5-acre (65,340 square foot) synthetic turf field.[11] The field was installed in 2013; funding of $1.3 million was obtained privately for this project, and youth leagues pay a per-player fee to help support maintenance costs. Maintenance for the synthetic turf field requires grooming, cleaning, compaction testing, and decompaction.

The cost information presented here refers only to field maintenance, not to the initial acquisition and installation of the field. For detailed information on both acquisition and maintenance costs, see TURI's sports turf alternatives assessment cost analysis.[12]

For field maintenance, the town made a capital investment of between $10,000 and $14,000 for a Gator utility vehicle, and $7,500 for a brusher to attach to it. The field is groomed by an in-house Marblehead Recreation and Parks Department staff member who spends about a half day every three weeks in the spring and fall and every four weeks in the summer. That equates to $1,000 - $1,400 in labor costs (including fringe).

Marblehead received a bid for a disinfection product that contains several potential human carcinogens. For two applications per year, the total annual disinfection bid was $6,000. A less toxic, enzyme-based treatment could be provided for a higher cost, but specific figures are not available for this option. Assuming use of the lower-cost disinfection option, total annual costs for the 1.5-acre field add up to $7,000 - $7,400, not

[10] The Turf Specialist's time allocated to field maintenance was estimated for the time periods April-June, July-August, and September-October at 90%, 65%, and 75%, respectively, for an annual total of approximately 46% time.

[11] Marblehead All Sports Foundation. Web page available at marbleheadallsports.com/track/masf/.

[12] Sports Turf Alternatives Assessment: Preliminary Results Cost Analysis. Toxics Use Reduction Institute. 2016. Available at turi.org/artificialturf.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

including up-front capital costs for field installation or maintenance equipment.

To gain more information on cost options, the town of Marblehead obtained a cost quote for synthetic turf maintenance performed entirely by an outside contractor. For two maintenance visits per year (including grooming, cleaning, de-compacting, field inspection, impact testing and infill depth measurements) the total cost would be $5,300 per year. A higher cost option would provide six visits per year, with disinfectant applied at each visit, as well as minor repairs. This option is offered for $6,800 per year for maintenance of the 1.5-acre field. Other costs to consider include those associated with disposal and replacement of synthetic turf surfacing and padding after 8-10 years of wear.

Summary

Marblehead has maintained high quality, organically managed grass fields throughout the community over a period of more than 15 years. Young athletes are invested in the goal of protecting and maintaining their fields, and take pride in the results

The town has focused on maintaining high quality fields on a limited budget. They are able to maintain a healthy soil ecosystem on 20 acres of natural grass with the use of soil testing, aeration, frequent mowing, and the use of organic fertilizer and soil amendments.

"Marblehead's twenty-year example of organic fields shows that success can be achieved in a variety of ways. It is an approach that focuses on healthy, biologically active soil combined with best management cultural practices and the exclusive use of natural, organic inputs. It is not measured in terms of 60 or 90 days, but rather over multiple years when results meet or exceed expectations. The goal here in Marblehead always has been playing fields that are free from harmful pesticides and meet community expectations."

- Chip Osborne, Chair, Marblehead Recreation and Parks Commission

Natural Grass Playing Field Case Study: Springfield, MA

Organic Grass Fields Meet Athletes' Needs and Protect Connecticut River Watershed

THE CITY OF SPRINGFIELD, Massachusetts, manages 12 properties, or a total of 67 acres, organically. This includes sports fields, park areas, and other public properties. Springfield's organically managed fields fully meet the community's needs for sports and other recreational activities, with high quality grass and soil.

Since starting the organic program in 2014, the city has doubled the number of properties in the program and experienced an increase in overall recreational use due to the improvement in soil and grass conditions.

This case study provides detailed information on the number of hours played at three parks in Springfield: two large complexes and one single, full-sized soccer field. Communities wishing to estimate the number of playable hours on a soccer field can use Treetop Park, the full-sized soccer field, as the most relatable model of the three parks discussed here. Treetop Park is used for approximately 1,050 hours of practice, play, and informal activity annually.

Children playing a pick-up soccer game on an organically-managed field in Springfield.

Aeration of the fields is a central element of successful organic maintenance. Other key elements include product application plans based on performance needs and soil testing for each field. Field management costs in 2018, including products, irrigation maintenance, and all labor costs, were just under $1,500 per acre across all the properties.

Springfield's organic management of natural grass has eliminated the need for pesticides, while providing a practical playing surface that fully meets the needs of athletes and others who use the parks. The Parks Department also notes that their field management choices help to protect water quality in the Connecticut River.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Introduction

This case study has been developed by the Toxics Use Reduction Institute (TURI) as part of an effort to provide information to municipalities, schools, and other institutions as they make decisions about play surfaces. TURI has documented information on the materials often used in artificial turf playing fields.[1] TURI has also gathered information on natural grass fields and has developed a series of case studies to share experiences.

This case study focuses on the organic management of natural grass on city properties, including sports fields, by the Department of Parks, Buildings, and Recreation Management in the city of Springfield, Massachusetts ("the Parks Department"). This large, city-wide program includes management of nearly three million square feet, or 67 acres. However, the organic practices described in this case study can be used on grass properties of any size.

Forest Park baseball outfield. This area is converted to a soccer field in the fall.

Communities often have questions about whether natural grass can meet their athletic and recreational needs, and whether organic management of natural grass is cost-effective. TURI has compiled this case study so that other communities can learn from the successes in Springfield.

Overview

In 2014, the Springfield Department of Parks, Buildings, and Recreation Management made a commitment to begin organic management of its natural grass fields and parks. Springfield received support through a TURI grant to design and implement organic land care and grass turf management practices on municipal and school properties.

The city began with six pilot sites. Over time, the city expanded organic care practices to additional school properties and public land. As of June 2019, these properties include 12 organically managed sites (Table 1). The Parks Department hopes to expand the program city-wide within the next few years.

This case study provides information on maintenance and costs for all the fields currently under organic management. It also provides detailed use information on three individual field areas. Each of these fields is used for scheduled sports team activities. In addition, each field is used for other activities, such as concerts, pick-up games, and informal picnics.

Communities may have a variety of reasons for choosing organic practices for grass maintenance. For Springfield, the motivation was to protect the surrounding watershed and provide healthy playing spaces for youth.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Table 1: Springfield organically managed properties in order from largest to smallest, June 2019		
Park	**Area (sq. ft.)**	**Sports/Other Information**
Blunt Park	757,508	Baseball, softball, football, soccer, lacrosse, and concerts
Forest Park Playing Field	733,165	Baseball, softball, football, soccer and concerts
Van Horne	459,994	Baseball, soccer, rugby concerts
Nathan Bill Park	306,662	Baseball, softball, soccer
Central High School	231,739	Baseball, soccer; two separate fields included in organic program
Treetop Park	117,771	Soccer
Sweeny Athletic Field at High School of Commerce	104,108	Athletic play and physical education classes
Court Square	74,862	Park in downtown Springfield across the street from City Hall; heavy foot traffic
Camp Wilder	64,577	Park with playground, pond, and small playing field; leisure sports; organically managed since construction
Terrace at Mason Square	25,350	Irrigated small park in downtown Springfield
Merrick Park	24,956	Small park in downtown Springfield
Mary Troy Park	22,700	Small park in the city; includes playground
Total organically managed area	**2,923,392**	

Project Design and Startup

The first steps in the organic management program were to conduct soil testing, identify priority actions to improve soil health, and allocate staff time for maintenance activities. Chip Osborne of Osborne Organics designed the testing protocol, analyzed results, and developed a detailed maintenance plan for the city.

Soil Testing

The soil testing provided information on physiochemical characteristics of the soil such as texture and acidity (pH), and levels of key nutrients such as phosphorus, potassium, nitrogen and calcium (Table 2). Soil testing also provided information on microorganisms in the soil, including bacteria, fungi, and nematodes. The correct balance of physiochemical and biological variables is essential to healthy soil and a healthy grass root system.

Since the project startup, Springfield has repeated selected soil tests every two to three years in order to estimate an accurate amount of fertilizer and other soil amendments to add to fields throughout the year.

Table 2: Variables measured during soil testing (examples)		
Physiochemical	**Nutrients**	**Biological**
Texture	Phosphorus	Total organic biomass
Moisture	Potassium	Active bacterial biomass
pH	Nitrate	Active fungal biomass
Organic content	Calcium	Nematodes

Source: Osborne, Chip. 2015. *Organic Land Care Project: Springfield, MA: Technical Review.* Report provided to Patrick Sullivan, Director, Springfield Parks Department.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Hours of Activity: Examples from Three Sports Fields

One of the questions frequently asked by decision-makers is how many hours of activity they will be able to schedule on a natural grass playing field. According to the Parks Department, organic management has improved the overall condition of these fields. Many hours of both formal and informal sports play occur on these fields, and there are few cancellations due to weather-related field conditions.

The Parks Department provided TURI with scheduled sports team use hours for two sports field complexes, Forest Park and Blunt Park, and one full-sized soccer field, Treetop Park.

Youth and adult (high school and adult league) sports teams generally use city fields from late March through late November. Hours of sports team use were estimated by multiplying the number of scheduled practices and games per week by the number of hours booked for each activity. Table 3 shows the number of weeks each sport is played per season, and the amount of time allotted for practices and games for each sport and age group.

Table 3: Weeks per season, hours of use per practice, and hours of use per game for each sport played on case study fields

Sport	Age Group	Weeks per Season	Hours per Practice	Hours per Game
Baseball/softball (Mid-March to June)	Adult	14	2	3
	Youth	14	1.5	2.5
Football (Mid-Aug to Nov)	Adult	14	3	3
	Youth	14	2	2
Soccer (Mid-Aug to Nov)*	Adult	14	2	2
	Youth	14	1.5	1
Lacrosse (Mid-April to June)	Adult	10	2	none **

*Soccer is played in both the spring and fall at Treetop Park. Treetop is the only park with a longer soccer season.

**Lacrosse games are not played on case study fields; only practice is held on these fields.

These fields are also used by Springfield residents for informal activities, such as pick-up games, or passive recreation, such as picnics. These activities take place during open park hours that have not been scheduled for team use, or on areas of the complex that are not in use during formally scheduled activities. Though this type of use is not formally tracked, the Parks Department noted steady use for unscheduled activities throughout the year. In the absence of data on informal activities, TURI estimated that Forest Park and Blunt Park were used for an additional 14 hours per week, and Treetop Park an additional seven hours per week, of informal/ unscheduled activity.

Cancellations

Baseball games and practices are rescheduled during active rain. In general, baseball field use is cancelled during rain because puddles form on the clay areas in the infield. This is unrelated to the organically managed grass, and is standard for baseball fields. An estimated total of 30 baseball

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

games/practices were cancelled in 2018 in both Forest Park and Blunt Park, primarily due to rain at the time of the scheduled activity.

In contrast, soccer, football, and lacrosse generally do not need to be cancelled due to rain. Cancellations occur only if there has been heavy rain for an extended period of time (a full day or more). For soccer, football and lacrosse in 2018, there were 10 individual game or practice cancellations at Forest Park, zero cancellations at Blunt Park, and 12 individual game or practice cancellations at Treetop Park.

Forest Park: Baseball and Soccer Complex

The playing field area at Forest Park is around 730,000 square feet and includes four 60-foot diamonds and two 90-foot diamonds with converging outfields.[2] The fields are open seven days a week from dawn until dusk. Scheduled play occurs each weekday from 2 p.m. to 8 p.m., and weekend days from 9 a.m. to 7 p.m. During these time periods, the area is in continuous use by sports teams.

In the spring and summer, the sports complex is used primarily for baseball and softball team games and a few weeks of pre-season practices. An average of 20 adult and 25 youth baseball and softball team games were played weekly in the spring/summer season of 2018.

In the fall, the baseball outfields are merged together to form three soccer fields used for both team practices and games. In 2018, adult teams used the fields for 10 games and 10-15 practices per week. Youth teams used the fields for 15 games and 10-15 practices per week.

Over the course of 2018, sports teams used the Forest Park sporting complex just over 200 hours per week, or nearly 2,900 hours for the entire year, for sports practice and games. Adding estimated informal use time leads to an estimated total of nearly 3,300 hours per year. Table 4 shows the total number of hours used by adult and youth teams for each sport per season.

Table 4: Forest Park baseball and soccer complex (733,165 sq. ft.): Hours of use for sports practice and games, 2018

Sport	Age Group	Season	Total Use: Hours per Week*	Total Use: Hours per Season
Baseball/softball	Adult	Spring	67	940
	Youth	Spring	68	950
Soccer	Adult	Fall	40	560
	Youth	Fall	30	420
Total documented sports team use – all seasons			**205**	**2,870**
Estimated informal recreation hours			14	392
Estimated total hours – all seasons			**219**	**3,262**

*Baseball/ softball and soccer seasons were 14 weeks each. Informal use hours were calculated for 28 weeks.
Hours do not account for cancellations. There were approximately 60 hours of baseball cancellations and 20 hours of soccer cancellations in 2018.

[2] "60 foot" and "90 foot" refers to number of feet between bases. The sizes of these fields are standard for baseball and softball diamonds.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Blunt Park: Baseball, Soccer, Football, and Lacrosse Complex

Blunt Park's field area measures around 760,000 square feet and is open from dawn until dusk. The sports complex contains four 60-foot fields and two 90-foot diamonds, along with space for other recreation. The complex is mainly used for baseball/softball, football, soccer, and lacrosse practices and games. The park is also used for pickup games and many other non-sports events, such as concerts, throughout the year. Table 5 shows the total number of hours used by adult and youth teams for each sport per season.

In spring and summer 2018, the fields were used for 35-40 adult baseball/softball practices per week before the start of the season. During the game season, they were used for an average of 20 adult games per week. Youth teams used the fields for 15-20 youth practices and an average of 10 games per week. Blunt Park outfields were also used for five youth lacrosse practices per week during the spring.

In the fall, these baseball/softball outfields are combined and converted into two football fields and one combination field area for soccer, football, and lacrosse. During the 2018 football season, the outfield complex was used for 15 adult and five youth football practices per week. The field was also used for eight adult and five youth football games per week. During the fall soccer season, the field was used for five adult and five youth practices per week throughout the season. In addition, the field was used for five adult lacrosse practices per week during the fall. The estimated hours of use by sports teams on the complex totaled just over 230 hours per week and just over 3,200 hours for the year. Including estimated informal recreation, the field complex was used for about 3,600 hours in 2018.

Table 5: Blunt Park baseball, soccer, football, and lacrosse complex (757,508 sq. ft.): Hours of use for sports practice and games, 2018

Sport	Age Group	Season	Total Use: Hours per Week*	Total Use: Hours per Season
Baseball/softball	Adult	Spring	70	980
	Youth	Spring	48	665
Lacrosse	Adult	Spring	10	100
Football	Adult	Fall	69	966
	Youth	Fall	20	280
Soccer	Adult	Fall	10	140
	Youth	Fall	8	105
Total documented sports team use – all seasons			**234**	**3,236**
Estimated informal recreation hours			14	392
Estimated total hours – all seasons			**248**	**3,628**

*Baseball/ softball, football, and soccer seasons were 14 weeks each. Lacrosse season was 10 weeks. Informal use hours were calculated for 28 weeks.

Hours do not account for cancellations. There were approximately 60 hours of baseball cancellations in 2018.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Treetop Park: Full-Sized Soccer Field

Treetop Park is around 118,000 square feet and is primarily reserved for scheduled soccer practices and games in the spring, summer, and fall. The field is used less frequently for informal recreation than Forest Park and Blunt Park, as the entrance to the parking lot is locked. Table 6 summarizes the number of hours used for each sport and age group in 2018.

Forest Park and Blunt Park both include multiple overlapping fields. In contrast, Treetop Park is a single, full-sized soccer field. Communities wishing to estimate number of playable hours on a soccer field can use Treetop Park as the most comparable model.

In spring 2018, the field was used for five adult and 10 youth practices per week, two weeks prior to the start of the official spring playing season. During the official season, the field was used for five adult and 10 youth games per week. In the fall, Treetop was used for five practices and five games by adult teams, and five practices and 10 games by youth teams per week. The soccer field was estimated to have been used by sports teams for about 60 hours per week and just over 850 hours for the year. If estimated informal use is included, usage in 2018 totals about 1,050 hours.

Table 6: Treetop Park soccer field (117,771 sq. ft.): Hours of use for sports practice and games, 2018

Sport	Age Group	Season	Total Use: Hours per Week*	Total Use: Hours per Season
Soccer	Adult	Spring	11	160
	Youth	Spring	12	170
Soccer	Adult	Fall	20	280
	Youth	Fall	18	245
Total documented sports team use – all seasons			**61**	**855**
Estimated informal recreation hours			7	196
Estimated total hours – all seasons			**68**	**1,051**

*Soccer is played year-round at Treetop Park. Spring and fall seasons were 14 weeks each. Informal use hours were calculated for 28 weeks.

Hours do not account for cancellations. There were approximately 24 hours of soccer cancellations in 2018.

Maintenance

Maintenance occurs throughout the playing season, and includes aeration and the application of organic products including fertilizer and soil amendments. Soil amendments are materials added to soil to improve physical and/or chemical properties. Table 7 shows the 2018 schedule for aeration and application of organic products for the three parks highlighted in this case study.

Aeration

Aeration is accomplished by pulling up plugs of soil and grass using a riding or push machine. This process relieves compaction of soil and thatching of grass and allows air, water, and added nutrients to penetrate the soil. Aeration can be a time-consuming process, but is arguably the most important step for maintaining healthy, organic grass.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

All of the organically managed fields in Springfield are aerated four times per year (Table 7). The Park Environmental Specialist aerates all the fields, at times with the assistance of one additional staff member. Choosing the type of aerator to use depends on the size of the grass area. A riding aerator is used for large, open areas with space for wide, gradual turns. A smaller push aerator is used for smaller areas or tight spaces near sports equipment or trees.

Springfield's tractor-led aerator used for large areas

Fertilizers and Soil Amendments

Springfield uses organic fertilizers and soil amendments and utilizes services provided by PJC Organics, a small consulting company and fertilizer producer/distributor in Massachusetts. PJC organizes soil testing and recommends products and their application schedules for each park based on these results along with performance needs.

Recommendations include how many pounds of product are needed per field, per acre, and per application. These site-specific recommendations help avoid over-application of products.

Springfield uses an organic granular fertilizer made from soybean meal, feather meal, and potassium sulfate. Fertilizer is added to each field twice per year: once early in the summer, and again in late summer (Table 7). Springfield uses a Lely Broadcast Spreader to apply all products to fields.

Springfield also uses soil amendments including a soil conditioner and lime. The soil conditioner is made with biochar (charcoal), kelp, molasses, and soybean and is used to improve the chemistry, structure, and biological activity in the soil. Conditioner is added to the fields in the spring or early summer to jump-start microbial activity. Lime is added to the fields in October to adjust soil pH.

Key elements of Springfield's organic grass management:

- Soil testing for physical, chemical, and biological characteristics
- Aerating grass and soil
- Using organic fertilizer & soil amendments
- Mowing regularly

Table 7: Aeration and organic product applications schedule, 2018

Location	Field Aeration				Fertilizer		Conditioner	Lime
	Round 1	Round 2	Round 3	Round 4	Round 1	Round 2		
Blunt Park	May	Jun	Sep	Nov	Jun	Sep	Jun	Oct
Forest Park	Apr	Jun	Sep	Oct	May	Sep	Jun	Oct
Treetop Park	May	Jun	Aug	Oct	Jun	Oct	spring	Oct

This table shows only the fields highlighted in this case study. The other organically managed properties follow a similar schedule.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Costs

The majority of costs fall into three main categories: products, irrigation maintenance, and staffing. In general, costs associated with organic grass management often decrease after the first few establishing years, as the health of the soil and vegetation improves. The following are cost figures for 2018, the fourth year of Springfield's organics program.

Products

Products include organic fertilizer, soil conditioner and lime. The amount of product needed for a field depends on soil properties and intended use of individual fields. Grass seed was used to fill in small areas of heavy use, such as the areas in front of soccer goals. The amount of grass seed needed to accomplish this was small, and the cost was negligible for the year.

In 2018, Springfield used 440 pounds of fertilizer (total for two applications), 420 pounds of soil conditioner, and 230 pounds of lime per acre of land (Table 8). Springfield spent a total of $670 per acre, or $45,280 total, on soil products in 2018. A further breakdown of product cost estimates per organic property is shown in Table 9.

Irrigation Maintenance

Maintenance costs associated with irrigation include repairs on sprinkler heads and water lines, as well as the winterization of the system during months when the ground freezes. Springfield spent a total of $7,200 on irrigation maintenance in 2018 (Table 9).

The total cost for the Parks Department's organic management of 12 grass properties was $98,080 in 2018 (Table 9). Broken down by acre of land, the city paid around $1,460 per acre.

Table 8: Annual amount of soil products used and associated costs per acre in Springfield's organic management program, 2018

Product	Pounds Used per Acre	Cost per Acre
Fertilizer (two applications)	440	$410
Conditioner	420	$200
Lime	230	$60
Totals	**1,090**	**$670**

Totals are rounded to the nearest 10.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Camp Wilder	1.5	650	$610	620	$300	330	$90	$1,000
Terrace at Mason Square	0.6	250	$240	240	$120	130	$40	$400
Merrick Park	0.6	250	$240	240	$120	130	$30	$390
Mary Troy Park	0.5	230	$220	220	$110	120	$30	$360
Annual total for products on 12 fields								$45,280
Maintenance								
Irrigation maintenance	Includes all repairs: broken sprinkler heads, lines, startup, shutdown and winterization							$7,200
Labor								
Labor costs for all fields	Includes full-time staff and assistant for 120 days of work							$45,600
Annual total for products, maintenance, and labor on 12 fields								$98,080
Annual total for products, maintenance, and labor per acre								**$1,460**

Totals have been rounded to the nearest 10. Case study fields are highlighted in green text.

Summary and Lessons Learned

Between the beginning of the program in 2014 and the end of 2018, the city has doubled the number of properties in its organic program and experienced an increase in overall recreational use due to the improvement in soil and grass conditions. These results were accomplished through frequent aeration of the fields, and the creation of field-specific product application plans based on performance needs and soil testing for each field. Field management costs in 2018, including products, irrigation maintenance, and all labor costs, were just under $1,500 per acre across all the properties.

Springfield's experience is that the organically managed fields fully meet the community's needs for sports and other recreational activities. They have also found that all of the organically managed

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

properties have higher quality grass and soil than those outside of the program.

The Parks Director notes that field needs have changed over time. In the past, there were few or no formally scheduled sports after the baseball season ended in early July. Today, sporting requirements continue throughout the year. The fields never shut down during open hours, and game cancellations are rare.

For 2018 use information, this case study focused on three fields: Forest Park, Blunt Park, and Treetop Park. Formal use of the Forest Park sports complex totaled about 2,900 hours by baseball and soccer teams, and about 3,300 hours per year with estimated informal use included. Blunt Park sports complex totaled about 3,200 hours of use by baseball, football, and lacrosse teams, and about 3,600 hours with estimated informal use included. Treetop Park was used about 850 hours by soccer teams, and a total of about 1,050 hours with an estimated informal use included. Treetop Park is the best field to use for comparison of playable hours on an individual field, as it is composed of a single, full-sized soccer field.

> "The organically managed fields are definitely in better condition than they were before organic management. When you look at a natural meadow, it's self-sustaining. That's what we're replicating with our organic fields. And our parks are part of the Connecticut River watershed, all of our choices affect that broader ecosystem."
>
> – Patrick Sullivan, Director, Springfield Parks Department

The Parks Department Director recommends using organic management as soon as a field is constructed, when possible. Camp Wilder, a field measuring 64,577 square feet and used for general recreation by a summer camp, has been managed organically since it was constructed. Planning for organic management at the beginning of the field's life saved Springfield time and money on restructuring soil and grass in the future.

Staff working on the organic program note that the process is time-consuming but that they derive satisfaction from the process and its results. They consider field aeration to be the most essential element of the program.

The Parks Department notes that their choices affect water quality in the Connecticut River, illustrating that there are broad advantages to choosing the organic approach. The Parks Department has set a goal of reaching out to homeowners to educate them about the advantages of organic grass management, further expanding the benefits of this project.

Subject: Fred Green Field - artificial turf replacement

Good afternoon,

I am writing to voice my concerns about the proposed replacement of the artificial turf at Fred Green Field. Having kids that often play sports at that field, I have worried about their exposure to the highly toxic PFAS chemicals and other hazardous chemicals contained in this type of turf. PFAS chemicals specifically accumulate in the body and do not break down, and are linked to various types of cancer.

It is impossible to completely eliminate these chemicals from our bodies due to the society that we live in, but we can do our best to limit them and to use better options whenever possible, especially for our children who are the most vulnerable. This has become an issue in many communities, and some now use organically managed grass without chemical fertilizers and pesticides, and over time the costs and time needed to maintain it gets less and less.

Thank you very much for your consideration of healthier options for Fred Green Field, and for all you do for our city!

Best,
Joanne Mujalli

Subject: From an 8th grader at MVMMS

Hi All - I was asked to forward this to all of the City Councilors - its from an 8th grader at MVMMS. I think she wasn't able to send from her MPS email account.

Hello City Councilors,

My name is Aisling Donegan and I am an eighth grade student at MVMMS. I heard that you all plan to talk about the opportunity of returfing the Fred Green and possibly the Cabbage Patch. I honestly think that the field that needs the turf is the West Knoll over the Cabbage Patch and Fred Green. Melrose, out of all the fields doesn't have one soccer dedicated turf field as all the others either share with football, rugby, baseball and more which allows them to all have priority. The MHS girls soccer team has practices at the Pine Banks rugby field which is turf but they have to wait until after Malden finishes practice. The Fred Green is occupied by other sports and teams so turfing the West Knoll could allow the team to have an easy commute to practice and not have to wait until after another team. Also, for games they have to get to Pine Banks and no bus is provided so the option being across the street could definitely make life much easier. The knoll is also a dangerous field to play on and has no draining system whatsoever making it prone to cancellations after some rain. Turf though would completely eliminate this allowing draining to be simpler. The knoll also causes injuries because of the numerous holes that just can't be avoided during the middle of a soccer game. If you take a fall all you land on is solid dirt and goose poop, which can easily injure a player and is also unsanitary. The knoll would also require zero trees needed to be cut down which is also good for the environment as it wouldn't ruin any of it. I appreciate your time and thank you for hearing my opinion. I know it may just be one person but I can guarantee there are many more kids agreeing with me too. I plan to continue pushing for this with my 8th grade Civics Action Project.

Thanks
Aisling Donegan

Subject: Please do NOT allow artificial turf at Fred Green Field

City Councilors,
I'm writing this to you concerning the turf replacement at Fred Green field at the High School. I feel STRONGLY that artificial turf (i.e. green carpeting) is the wrong choice. Although it may be less work for DPW and/or the school to maintain, it will NOT be healthy for the kids who play on it.

More injuries occur on artificial turf than natural grass. In fact, many fields that now have artificial turf are being replaced with natural grass. The NFL Players Association has requested the NFL replace artificial grass and the Current Orthopaedic Practice, the medical journal for the orthopaedic profession, indicates injury rates are higher on artificial surfaces.

Artificial surfaces are warmer than grass, often well over 100ºF on sunny days. It can increase storm runoff while limiting or preventing water from percolating into the earth. Plus, the plastics and synthetic materials that constitute astroturf can be toxic.

Artificial turf will NOT be the best surface for the kids to play ball on. Please do not allow it to be used.

Sincerely,
Bruce Herrmann

Subject: Plastic Turf

why spend $600,000 for resurfacing grass field with something that will harm our children playing it, hurt their lungs (studies have show), and hurt the environment. The NFL is getting away from plastic tur.

$600,000 will cut a lot of grass.

I'm against replacing the grass.

Re: Acceptance of Massachusetts Cultural Council Grant for Healthy Melrose

Date: April 12, 2022

On behalf of Mayor Brodeur, I am pleased to present the Honorable City Council with a request to accept funding from the Massachusetts Cultural Council (MCC) in the amount of $1,500.

The grant is being awarded for the City of Melrose's annual Healthy Melrose Family Wellness and Fitness Fair scheduled for May 7, 2022. The grant comes from the MCC's FY22 Festivals Program. 100% of the funds will be disbursed to the City upon receipt of the signed MCC Standard Contract Form. There is no match required, and funds are required to be spent by June 30, 2022.

This funding will allow for additional marketing and promotion of Healthy Melrose to encourage attendance, production or technical costs related to photography and videography of the event and added programming for attendees to participate in.

About Healthy Melrose:
Since 2009, the Healthy Melrose Wellness and Fitness Fair has been led by a local team of educators, City leaders, and health and fitness professionals. The mission of Healthy Melrose is to create enthusiasm around adopting and nurturing a healthy and physically active lifestyle in the Melrose community. The event aims to improve the quality of life of attendees by helping them find new ways to make health and fitness a priority in accessible and meaningful ways with a focus on the science of exercise, nutrition and mental health.

With over 40 vendors exhibiting, this year's Healthy Melrose fair will showcase local fitness, wellness and mental health options through demos, fitness activities, displays, information and samples from local service providers and health/wellness experts across all ages.

The in-person event returns to Fred Green Field at the Melrose Athletic Complex after being cancelled in 2021 and held virtually in 2020 due to the COVID-19 pandemic.

I respectfully request acceptance of these funds so that this recovery work may move forward. Thank you for your consideration.

ORDER-2022-110

Acceptance of a MassSave Community First Partnership Award in the Amount of Twenty-Five Thousand Dollars to Support Energy Efficiency Measures for Melrose Homes and Businesses

Offered by Mayor Paul Brodeur

BE IT ORDERED

The Honorable City Council is requested to accept a grant of $25,000 from the MassSave Community First Partnership Program (CFP) in cooperation with National Grid.

The City of Melrose is one of 30 Massachusetts communities selected to participate in the MassSave Community First Partnership Program. The City will receive a grant of $25,000 to support the strategies articulated in Melrose's recently completed Net Zero Action Plan, in particular efforts to maximize uptake of energy efficiency measures in homes and businesses with a focus on low to moderate income households, renters and landlords, and small businesses who have historically not taken part in similar programs.

MEMORANDUM

TO: Melrose City Council

FROM: Martha Grover, Sustainability Manager

RE: MassSave Community First Partnership Award

DATE: April 14, 2022

I'm pleased to inform you that the City of Melrose is one of 30 Massachusetts communities selected to participate in the MassSave Community First Partnership (CFP) Program. The City will receive a grant of $25,000 to support efforts to maximize uptake of energy efficiency measures in homes and businesses consistent with the strategies articulated in Melrose's recently completed Net Zero Action Plan. Attached is the CFP Memorandum of Understanding for your review, as well as the Net Zero Action Plan for reference. No additional matching or other funding is required other than in-kind staff time.

The CFP program is an updated version of the 2016 MassSave Community Initiative that supported the Melrose Energy Challenge. Under the current program, MassSave, through National Grid, will provide funding up to $25,000 annually over three years to the City to conduct outreach and energy coaching to Melrose residents and small businesses on efficiency measures, weatherization, and heating system upgrades.

The updated program focus is on low to moderate income households, renters and landlords, and small businesses who have historically not taken part in similar programs. The city has lined up a number of internal and community partners to help in this outreach effort including Melrose Energy Commission volunteers, fuel assistance program managers, the Council on Aging, Veterans Services, and the Health and Human Services Department, among many others.

The CFP Program aligns perfectly with our Net Zero Action Plan goal to reduce greenhouse gas emissions in our community and beyond and is supported by recently approved statewide MassSave incentives which also focus on electrification and emissions reductions.

I look forward to sharing more about our program goals and objectives for the next three years of the CFP Program. Please don't hesitate to contact me if you have any questions. Thank you for your consideration.

Mass Save Community First Partnership Agreement
By and Between
National Grid USA Service Company, Inc. d/b/a National Grid ("National Grid" or "Program Administrator" or "PA") and The City of Melrose

OVERVIEW

This agreement memorializes the understanding of the National Grid USA Service Company, Inc. d/b/a National Grid ("National Grid" or "Program Administrator" or "PA") and The City of Melrose. The City of Melrose The City of Melrose As part of the Energy Efficiency Program Administrators' (PAs) 2022-2024 Three Year Energy Efficiency Plan, the PAs are committed to working with environmental justice (EJ) communities as designated by the Commonwealth of Massachusetts to reach residents and businesses with energy efficiency services. The PAs have made equity one of the key strategic priorities of the 2022-2024 Plan. Equity, defined as the process of establishing more equal access to and participation in energy efficiency, particularly among those priority groups who have historically participated at lower rates, including renters/landlords, moderate-income customers, English-isolated families,[1] and microbusinesses.

The PAs strive to leverage such relationships with Communities to contribute to achievement of these critical priorities. As part of PAs Plan, the PAs are committed to working with a wide range of community-based organizations, municipalities, and business organizations with demonstrated experience in reaching and serving customers who have not participated in energy efficiency programs and who are in need of targeted approaches to increase access and participation in energy efficiency programs through our Mass Save Community First Partnership (CFP).

The objective of the Community First Partnership is to leverage the local knowledge and trusted relationships of trusted members within identified communities to prioritize these partnerships to, increase engagement with EJ communities, and reach low to moderate-income customers, renters, landlords, English-isolated customers, and microbusinesses to provide access to and ensure participation in PA Energy Efficiency Programs. The PAs focus includes a flexible design to encourage innovative proposals, and align goals, data, and outcomes shared between the PAs and community partners.

[1] In Massachusetts, the EEAC and the PAs refer to customers where 25 percent or more of their household has *no one* over the age of 14 who speaks "English only" or "very well" as "English-isolated families." Being classified as an English-isolated family is one of the Commonwealth's three criteria for a geographic area/community to be designated as an Environmental Justice community. The Environmental Protection Agency (EPA) defines the same population of customers as "linguistically-isolated customers." For the 2022-2024 Plan document, the Massachusetts PAs will use the term "English-isolated families" to remain consistent with the Commonwealth's and EEAC's policies.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

As a Community First Partner, the The City of Melrose must plan and execute 36 months of activity including public education and outreach, such as marketing and/or participation in local events to drive measurable uptake in residential weatherization, residential heating system upgrades, and Small Business Turnkey program participation through the following PA initiatives:

Residential Coordinated Delivery (RCD) Initiative
The Mass Save RCD Initiative is designed to promote and facilitate the implementation of energy efficiency upgrades in existing homes to help customers reduce their overall, whole-home energy usage. Through the RCD Initiative customers access home insulation and air sealing services (referred to collectively as "weatherization"). The Initiative provides customers with information and technical assistance, primarily through home energy and facility level assessments, to help them understand their specific energy efficiency opportunities, and which financial incentives can help defray the costs of their investments. Customers are served in a fuel-blind manner, with PAs coordinating a streamlined experience for customers, even if they are served by two different PAs. The Initiative strives to provide flexibility in delivery of services to best match each customer's unique needs and preferences and align with the technical opportunities for the home and the customer's authority to implement recommended improvements.
The RCD Initiative includes incentives for some measures installed directly by program contractors, such as water savings devices, and for air sealing and insulation. Additionally, the RCD Initiative promotes a wide array of energy-efficient technologies which are incentivized through the PAs other initiatives such as Retail (energy-efficient products, HVAC and DHW systems) and the HEAT Loan (zero percent financing). The PAs work with Lead Vendors selected through competitive solicitations, to administer the Initiative. The Lead Vendors work with trade ally partners, including Independent Installation Contractors (IICs) and Home Performance Contractors (HPCs), along with other contractors such as electricians and HVAC companies to deliver the RCD Initiative. Within RCD, customers are eligible for a variety of assessment types to determine opportunity for efficiency upgrades, which include the Online Home Energy Assessment (OHEA), the virtual Home Energy Assessment and the in-Home Energy Assessment.

Online Home Energy Assessment: An online tool to help customers see how they're currently using energy, review efficiency recommendations and rebates, and receive an estimate of potential cost savings. Customers also learn if their home is a good candidate for an in-home or virtual energy assessment. The online assessment asks a series of questions to determine opportunities and make recommendations.

https://www.masssave.com/en/saving/energy-assessments/online-home-energy-assessment.

Home Energy Assessment (delivered either in-home or virtually): Mass Save Energy Specialists will visit the customer's home to identify opportunities for energy savings including reviewing the base load (evaluating opportunities for more efficient products), thermal boundary (identifying opportunities for additional insulation and air sealing) and mechanical equipment (assessing the HVAC equipment for efficiency). Efficient products such as advanced power strips and water-saving measures are provided at the visit to help customers start saving immediately. Additionally, customers receive a personalized report with recommendations on other savings opportunities and are provided information on available rebates and incentives.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Residential Retail
The Residential Retail Initiative provides a broader integrated marketplace where energy-efficient products and equipment are positioned as attractive, primary choices for customers making purchasing decisions, whether online, in-store, or through independent contractors and distributors. The Residential Retail Initiative offers education to help customers make informed decisions, incentives to make efficient choices more financially attractive, and training and support for the market actors, to help shift contractors toward more efficient, correctly installed equipment. The Residential Retail Initiative ensures that all residential customers can access high-efficiency heating, ventilation, and air conditioning (HVAC) and domestic hot water (DHW) equipment, smart thermostats, appliances, and other energy-efficient products. The Initiative works to place the most energy-efficient options in front of customers and assists customers in transitioning from traditional electric resistance or fossil fuel systems for home heating and domestic hot water to energy efficient heat pump systems. Customers have the flexibility of selecting their own HVAC technician or plumber to access this initiative.
https://www.masssave.com/en/saving/residential-rebates

Small Business Turnkey
The Small Business Turnkey initiative offers a no-cost on-site energy assessment. Small business customers receive a site-specific proposal with recommended energy efficiency measures that may include lighting upgrades and controls, gas measures (for natural gas customers), walk-in cooler efficiency measures, and site-specific custom projects. PAs also provide removal of fluorescent lights and ballasts if necessary. Massachusetts PA will cover up to 70% of the installation and equipment costs. Note that houses of worship and small 501c3 non-profits are eligible for the Small Business Turnkey initiative.
https://www.masssave.com/en/saving/business-rebates/energy-saving-solutions-for-small-businesses

GOALS AND FINANCIAL AWARD

The City of Melrose's PARTICIPATION GOALS
Customer participation is defined as scheduled to complete work or work completed within a calendar year.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Year	Residential Weatherization (including income eligible, moderate income, and market rate) Goal	Residential heating and hot water heating (including income eligible, moderate income, and market rate) Goal	Small Business Turnkey Goal	Total
2022	125	100	25	250
2023	125	100	25	250
2024	125	100	25	250

The City of Melrose'S FINANCIAL AWARD

Based on the application submitted by The City of Melrose and included as Appendix A, The City of Melrose will be eligible for an annual award from National Grid which will total up to $25,000 pending goal achievement for each of the three years of the program.

The City of Melrose is independently responsible for reaching the above goals. Each year, The City of Melrose will be eligible to receive 50% of the financial award at the start of the year, 25% at the end of Q2 (June to early July), and the remaining 25% at the end of Q3 (September to early October). A bonus award may be provided in January of the following year for surpassing all goals. There will be an annual re-assessment of awards based on goals reached. National Grid reserves the right to adjust the award for the following year upward or downward based on previous year's goal achievement.

Q1: $12,500
Q2: $6,250
Q3: $6,250

As the lead applicant for their team, The City of Melrose will be solely responsible for all further disbursement of funding to them provided through the Community First Partnership to the other members of their team.

SUPPORT RESOURCES FROM NATIONAL GRID

In addition to the financial support listed above, The City of Melrose will receive support from National Grid including, but not limited to:

- Designated point of contact with a utility company account manager from both gas and electric PAs for the communities the applicant team will focus on.
- Additional point of contact who specializes in energy saving opportunities within municipal buildings.
- An orientation session including an introductory training on energy efficiency programs.
- Periodic training sessions by content experts to orient CFPs on energy efficiency offerings, best practices, and coordination with the local network providers to better serve eligible residents.
- Training sessions to orient CFP on energy efficiency offerings, best practices and coordination with the local Community Action Program (CAP) or Low-Income Energy Affordability Network (LEAN) including incentives available to income eligible customers and how to best ensure that income-eligible customers connect to energy efficiency programs.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Daily support from Lead Vendor to include technical support with reaching CFP goals.
- Mass Save and PA specific marketing collateral created and printed. Materials may be co-branded with Mass Save, sponsoring Program Administrators, municipal seal, or organizational logo. These materials will be translated in up to three languages in addition to English.
- Regularly scheduled meetings with Lead Vendor to provide guidance and deliberate on CFP performance and opportunities for growth.
- Monthly progress report on progress to goals, including monthly conference calls to discuss outreach, successes, challenges and best practices to address barriers to greater program participation.
- Assistance planning local events.

National Grid will work with The City of Melrose on the requested marketing materials to help support the City's outreach efforts. All marketing should be approved by National Grid prior to use.

THE CITY OF MELROSE'S RESPONSIBILITIES/PARTICIPATION REQUIREMENTS

Participation Requirements:

- Must be a municipality, registered nonprofit or have a fiscal agent. Applicants representing multiple municipalities and/or nonprofits must designate a lead municipality/nonprofit that will receive disbursements of funds.
- Must have a track record of work in, and proposal to focus partnership activities in, designated Environmental Justice communities in Massachusetts.
- Must commit to a three-year partnership.
- Must submit outreach, marketing and communication plan for first year and then annually each following year.
- Must submit budgets for all three CFP years. Greater detail for year one budget will be expected; broader budget breakdown for years two and three is acceptable. Cost to compensate an Energy Advocate for 5-10 hours a week for at least $17/hour must be included as a component of the budget.
- Must be open to building partnerships with additional community organizations.
- Must be open to completing local community organizing.
- Must be open to creating innovative strategies and initiatives to engage residents.

Participation Responsibilities:

- Must attend mandatory three-hour orientation on targeted Massachusetts PA offerings and best practices in marketing and community outreach.
- Must participate in monthly calls and submit monthly outreach reports.
- Must complete at least one marketing activity per month. The marketing activity could include any of the following categories: social media posts, ads, direct mail, articles, video, informational flyers dispersed in schools, workshops/webinars, etc.
- Must track and report progress – see additional detail in the "Tracking & Reporting" section.
- Must have a primary contact who will dedicate at least one hour per week to this initiative, as well as a designated "Energy Advocate" who will dedicate at least 5-10 hours per week to this initiative. It is acceptable for the primary contact and the Energy Advocate to be the same person. Energy advocate roles and responsibilities:
    - Participate in all trainings held by National Grid or its designee for Energy Advocates to familiarize them with energy efficiency offerings, community based social marketing, and community based participatory research.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

  - Serve as an advocate for customers who need support and guidance to enroll in the Mass Save programs.
  - Work with PAs to track and record participation barriers.
  - Work to increase customers' program participation rates by supporting coordination between program vendors and customers.
  - Actively communicate with customers to guide them through the application process and broker communication with stakeholders to reduce program participation barriers.
  - Manage administration of a community-based social marketing campaign to promote communitywide behavioral change by collaborating across a diverse group of partners.
  - Submit reports to Lead Vendor to support tracking and exploring solutions to program participation barriers.
- Must submit all marketing materials for review and approval to National Grid or their designee before they are finalized and used in the community.
- Must coordinate with the local Community Action Program/Low Income Energy Affordability Network (LEAN Network) agency to ensure clear process and support for income-eligible residents to access energy efficiency programs, including establishing an effective process for identifying income-eligible customers, explaining to them the increased benefits of participating in the low-income programs and referring all low-income customers to the local low-income program agency.
- Must submit a final report (one to three pages) on progress at the end of the year and hold a year-end review meeting with Program Administrators at the end of each year. National Grid reserve the right to work with The City of Melrose to adjust their goals and budget, if necessary, through a partnership reengagement plan.
- Must complete a survey annually on how the CFP has/will spend its award funding and how they would like to stay engaged with their PA(s) after their participation period.
- Must select at least one or more subset of customers to engage: small businesses, renters, bi-lingual customers or moderate-income customers. Must participate in creating and implementing a community-based social marketing campaign.
- Must actively participate in CFP research and evaluation.
- Must inform National Grid or their designee of planned door to door outreach on behalf of the CFP and ensure that all paid and unpaid staff participating in door-to-door outreach have complied with National Grid's criminal background check process.
- The City of Melrose will be responsible for providing National Grid the necessary documentation for payment, including invoices with the required information.
- Submission of monthly updates to National Grid on progress of marketing activities including specific outreach to identified hard to reach segments.
- As indicated in the Mass Save Three-Year Energy Efficiency Plan- the PAs will draft and implement a Rental Unit Strategic Plan in 2022. All CFP partners will engage in information sharing and ongoing research to support outreach and engagement to renters and landlords that may include the CFP partner's tactics, as well as additional activities. This engagement could include, but is not limited to, outreach to community stakeholders, local organizations, city departments, private businesses, renters, and landlords, to promote events, surveys, and research organized by PAs in support of enhancing efforts to increase program participation among renters and landlords. This additional partnership engagement serves to increase understanding of each partner's community and reduce program participation barriers for residents in their community.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

PAs will provide additional support and logistical coordination for all program partners to minimize the impact on current CFP goals.

PARTNERSHIP DETAILS

- **Partnership path options**
  - Hub Team: Consisting of municipal staff, and community-based organization members representative of the municipality(ies) on the Community Partner team, a representative of the PAs lead vendor for this initiative, and PA representatives. The hub will be led by the Community Partner's "Energy Advocate" who coordinates quarterly meetings with municipal departments. PAs provide marketing templates for the Community Partner.
  - Flex Format: Highly targeted approach; applicant proposes innovative outreach strategies; Energy Advocate is on the team; team creates their own marketing materials (materials must be approved by PAs prior to use) and team partners with contractors, landlords and employers.
  - For either path, Community Partners will convene monthly meetings with their team and include the PAs lead vendor and representative(s) from PA(s). Energy Advocates track primary metrics listed below and PAs track additional metrics listed in "support resources from PA" section of this MOU.

- **Community-based participatory research**
  - PAs will create tracking tools to support Energy Advocates with tracking and recording participation barriers. PAs will utilize this data to build on the strengths and resources of the community by promoting co-learning among PAs and the The City of Melrose to inform program development and goals.

- **Community-based social marketing**
  - As part of the participation in the Community First Partnership, the PAs require that, in certain instances, marketing materials developed by any collaborating community-based organizations direct customers to the vendors directly contracted with them for those customers to participate in a Mass Save program offering. These instances include, but are not limited to, the following:
    - All small business customers.
    - Any residential customer that is on the discount rate code and is to be served by the local CAP agency.
    - Any residential customer who has had an energy assessment in the last two years.
    - All customers who reside in a multi-unit building that a Home Performance Contractor is not able to serve (criteria of this building classification is dependent on when/if the PAs move away from the 5+ unit requirement).
  - This campaign will require accepted applicants to build a coalition of diverse stakeholders who actively work with the hard-to-reach population. The City of Melrose will allocate three to six months toward a planning process to reach the following benchmarks:
    - Select behaviors to promote.
    - Host focus groups to identify program barriers and benefits.
    - Develop strategy.
    - Identify target audience.
    - Develop compelling messages.
    - Obtain clear commitments from local stakeholders/groups.
    - Create an inclusive call to action.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Strategies on how to build community norms through this campaign.
- Craft simple, clear messages for marketing and advertising. Materials must be approved by the PAs prior to use.
- Draft a list of PA approved prizes, awards and or raffles to engage the larger community.
- Implement and evaluate strategy.

- Any external funding or resources procured to do outreach, advertise and/or market to program participants must be marketed solely as Mass Save Community First Partnership. Program Administrators do not authorize the duplication of conflicting marketing campaigns to Mass Save customers.

• Implementation support - Lead Vendor

- PAs will hire a vendor to support coordinated implementation, such as supporting data tracking for Community Partners, and training and supporting the Energy Advocates.
  - All CFP participants are required to work with the selected Lead Vendor to reach goals.

TRACKING & REPORTING

National Grid will provide a baseline of 2019-2021 achievement in residential weatherization, residential HVAC, and Small Business Turnkey for each municipality listed on The City of Melrose's application, as well as monthly municipal-level progress on the same metrics and track use of campaign codes where possible. PAs will also use the Statewide Marketing annual awareness survey to track awareness of Mass Save programs in Community Partner municipalities. The City of Melrose will receive support from an implementation vendor who will be helping to coordinate a tracking system to simplify and streamline the system for all. The Vendor will also help The City of Melrose be able to track more accurately how many people/businesses participate in energy efficiency (EE) programs from their efforts.

The City of Melrose will be responsible for reporting the following data monthly to the PAs or designee:

- Outreach progress summary including data collection on number of residents in each target group being reached.
- Identification of barriers to participation in each municipality and progress made toward breaking those barriers over multiple years.
- Number of customer leads – The City of Melrose will be expected to track names and contact information for customers they are working with.
- Number of events organized and number of event attendees.
- Number of social media, mail and other outreach and number of customers reached, number of languages used and number of pieces of collateral created in multiple languages.
- Number of community members trained with an overview of energy efficiency programs.
- Number of other organizations the CFP is engaging and how often.
- Number of property owners of rental buildings generated as leads.
- Optional: Community Partners who want to track race/ethnicity and other demographic data of customer leads they generate will be expected to propose their own tracking system in their application and share that data with PAs.
- If applicants do not meet the goals established by year one, PAs will review their performance and identify if there is a need for an enhanced activity plan (EAP). This will focus on increasing program enrollment and requires review of the budget to assess best use of funds for the remainder of the initiative.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

5. INVOICING

The City of Melrose should coordinate with National Grid point of contact to provide the necessary information to proceed with payment. Required documents/information could include a W-9 (demonstrating that the municipality or organization is tax-exempt), mailing address, made payable to, etc. PAs will use this information to set up an Authorization for Payment (AFP) with The City of Melrose to issue payment.

Invoices should be submitted on the Municipal or Organizational Letterhead and include the following:

- Invoice Number
- Prepared By
- Date
- Project: Mass Save Community First Partnership
- Description of Award
- Total Amount
- Information on Payment Remittance

DISCLAIMER
PAs may terminate The City of Melrose participation in the Community First Partnership if the PA determines The City of Melrose is not demonstrating a good faith effort to reach the participation requirements as outlined throughout the document.

The PAs may, in their sole discretion, at any time and without notice, terminate the The City of Melrose participation in the Community First Partnership or modify the Community First Partnership and the terms outlined herein. Community First Partnership expenditures, requirements and eligibility may be terminated, canceled, or modified by Massachusetts PAs at any time without notice.

Addendum: PAs hold the right to make changes to the MOU as long as it does not add any barriers to communities doing the work agreed upon and is thought to add efficiency to the program outcomes overall.

Letter from THE FUTURE

Dear Melrose Residents of 2022,

We know that the last few years have been tough in so many ways but please be reassured that you will soon emerge to a brighter future. You may ask yourself, how do we know this? Because we are here, decades in the future, already.

Chastened by the unmitigated disaster of Covid-19, and the imminent existential threat of climate change, America signaled a new era of possibilities had arrived. Eventually, legislation at the local, state and national levels was enacted to revitalize and drive economic and social equality, together with programs for substantially greater environmental quality.

With new momentum spreading across the globe by the 2030's, the dawning of the Sustainable Age arrived as an era of regenerative economic growth driven by the benefits of emerging new technologies and fostering prosperity even as fossil fuel use dramatically declined.

The technological innovations of developing both industrial scale and decentralized sustainable energy sources using wind, waves, tides, solar, biological, terrestrial and hydraulic forces led to vast changes in standards of living across the globe. Self-sustaining redevelopment alleviated many local and global climate threats.

On the local level, communities across the metropolitan Boston area implemented climate action plans in the 2020s to meet the 2050 net zero emissions goal adopted by Boston, Melrose and 12 other surrounding community leaders back in 2016. By 2022, all of the original 14 had begun implementation of the plans and their early success at laying the groundwork began to pay off in the mid '20's as the Sustainable Age gained widespread momentum across New England and other areas of the country.

Energy-efficient heat pump technology to condition our homes and buildings and demand for electric vehicles (EVs) became widespread. Even automobile manufacturers pivoted rapidly away from fossil fuels with most switching to all EVs by 2035. Electric utilities accelerated procurement of renewable energy to meet consumer demand. These and other societal changes led to dramatic improvements in air and water quality.

We extend our heartfelt thanks to the many Melrose citizens whose shoulders we stand on. For it was all of you, who turned your concern for the environment to action, nourished by the small successes, in order to make meaningful change to our community and the larger world. We wish for you all the good fortitude, strength, and continuing love for our Earth needed to make the promise real.

Sincerely,
The 2050 Melrose Energy Commission

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Getting to Net Zero

Melrose has committed to reaching net zero greenhouse gas (GHG) pollution by 2050. What exactly does this mean for our community? Why does our local goal matter? How will we get there and what do we need to do to reach that goal? This Net Zero Action Plan aims to answer these questions and to create a roadmap for our city to reach net zero by 2050.

IN 2017, OUR CITY WAS RESPONSIBLE FOR EMITTING

187,642

METRIC TONS OF CO2e

in MELROSE

THAT WORKS OUT TO

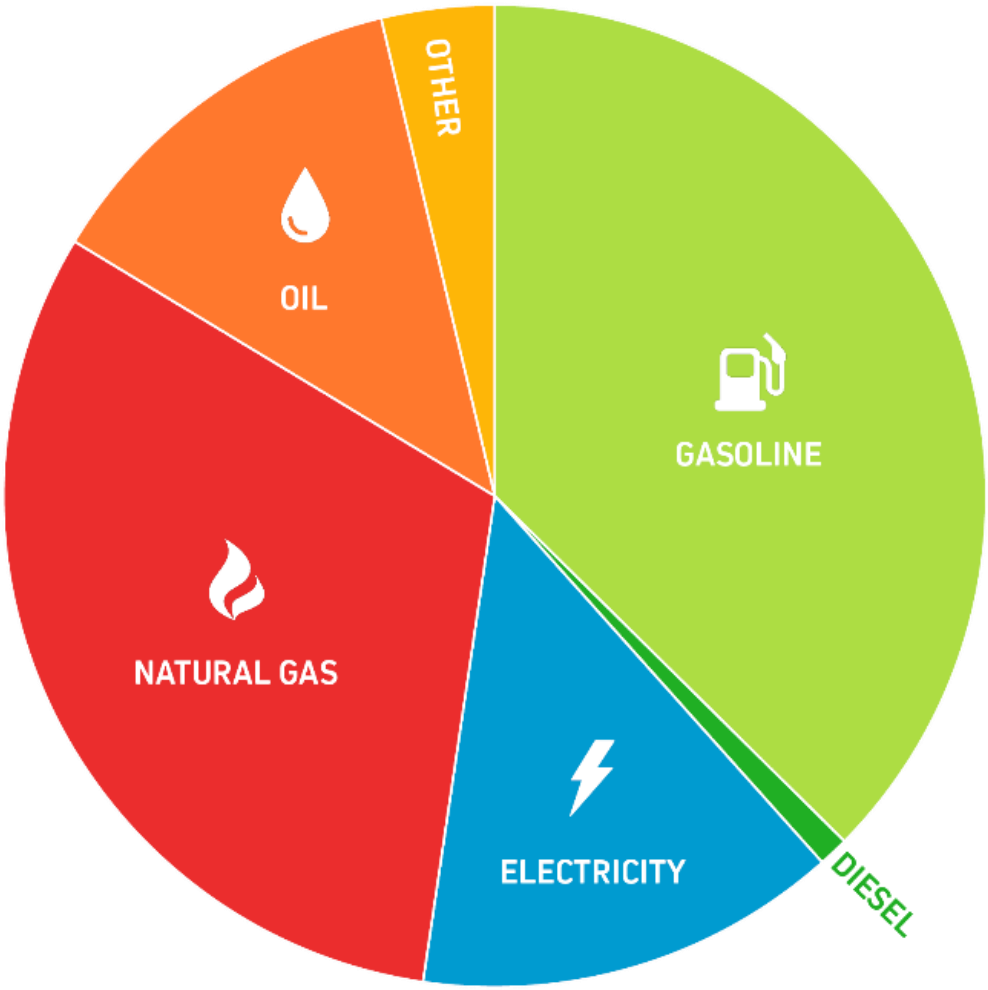
7

METRIC TONS OF CO2e

per resident

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Where are we starting?



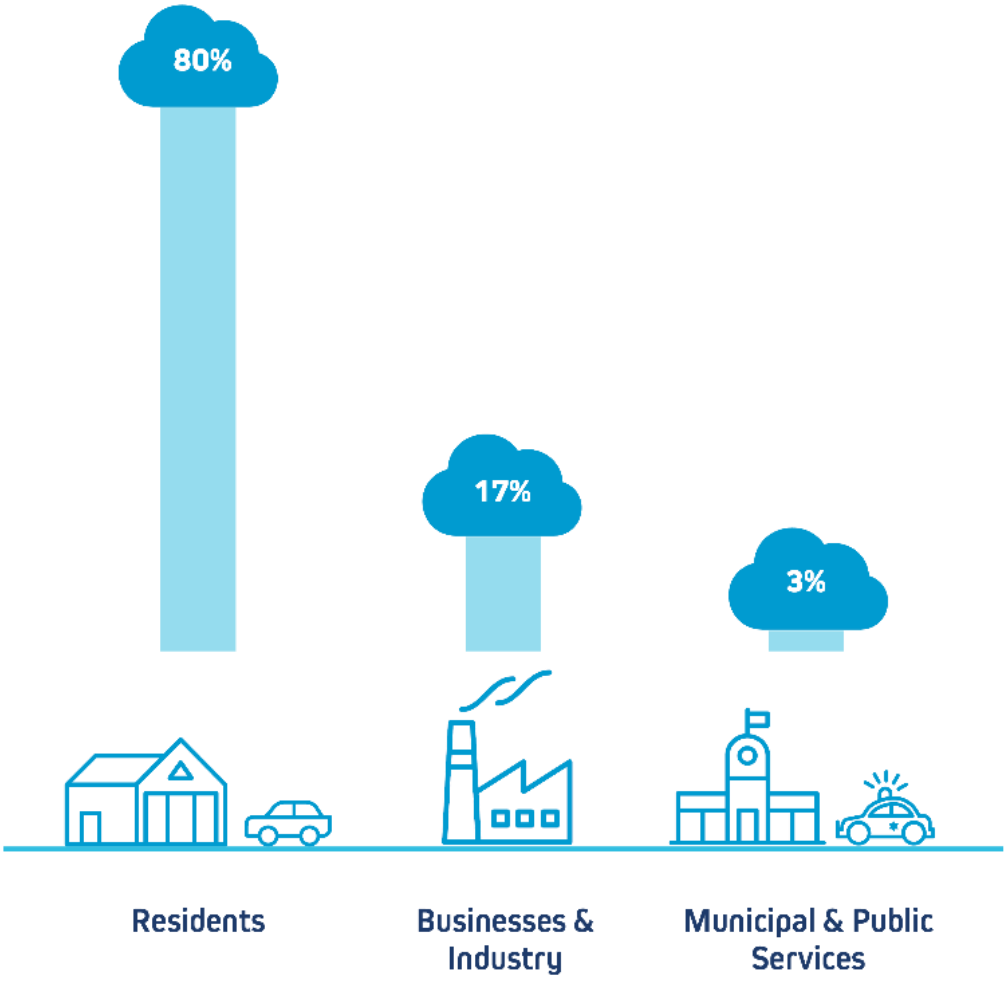
Every day, Melrose residents and businesses rely on fossil fuels to heat and cool our homes, keep the lights on, power our electronics and drive our cars. In doing so, we release **greenhouse gas emissions**.

In 2020, City staff and volunteers worked with MAPC to identify the primary sources of emissions across our community for 2017, the most recent year for which complete data were available, to calculate a baseline for future emission reductions (see Appendix A for the methodology).

In Melrose, buildings are the largest source of emissions (61%). On-road transportation is another major source of emissions, more than 38%.

Which fuels generated the most emissions in Melrose?

The types of fuel sources our homes, businesses, and vehicles rely on every day generate different amounts of emissions in our community. Our 2017 inventory of greenhouse gas emissions shows that the combustion of fossil fuels, such as oil, natural gas, diesel, and gasoline, was responsible for over 82 percent of our community-wide emissions.



SOURCE: MELROSE'S 2017 GREENHOUSE GAS INVENTORY

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Who is responsible for emissions in Melrose?

As a community, the actions and choices we make each day contribute to the amount of emissions we are responsible for. In Melrose, over 80 percent of emissions come from residents' homes and vehicles and another 17 percent comes from businesses and industry in Melrose.

SOURCE: MELROSE'S 2017 GREENHOUSE GAS INVENTORY

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

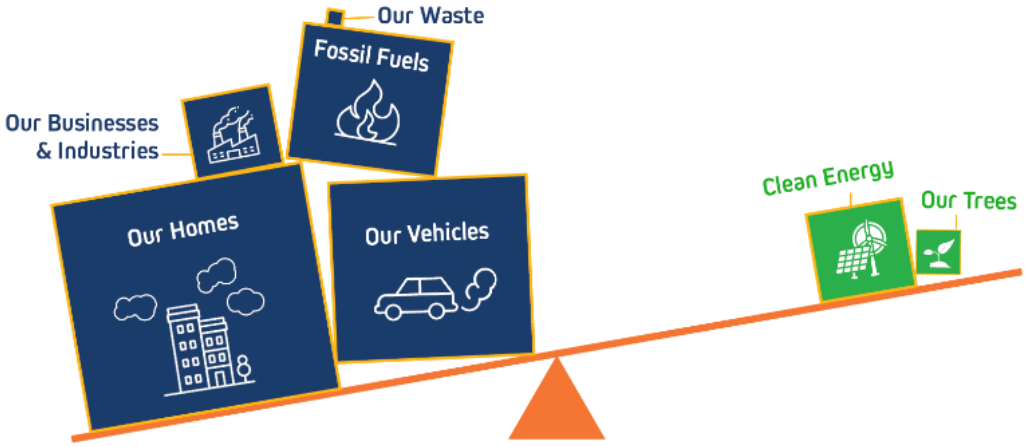
Why net zero?

Climate scientists have made it clear that we need to reduce global GHG emissions to net zero by 2050, or sooner, to avoid catastrophic climate change.

We know that the planet has already warmed by about 1° Celsius since we started burning fossil fuels like coal, oil, and gas in the mid-1800s.[i] We also know that if we can keep warming below 1.5° Celsius we can avoid the worst impacts of climate change like extreme floods, wildfires, and droughts.[ii] The Intergovernmental Panel on Climate Change's 2019 special report, ***Global Warming of 1.5°C***, says that in order to give ourselves a chance to limit global warming to 1.5° Celsius we will need to reduce GHG pollution 45% by 2030 and to net zero by 2050. This means that we have a limited "carbon budget," or amount of GHG pollution that we can afford to put into the air without exceeding 1.5° Celsius of warming.

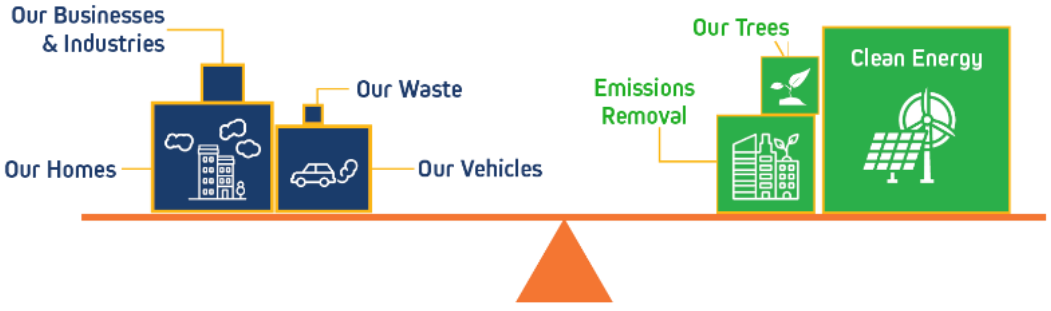
The longer we wait to start reducing our GHG pollution, the faster we use up our carbon budget and the less time we give ourselves to meet our goal. That is why getting to net zero matters and why we have chosen 2050 as our target date.

We recognize climate change is a global problem and that many of the solutions are beyond our control. To reach our net zero goal, we will need help from global, federal, state, and regional policies that support our transition to clean energy, but we can lead at the local level. During the spring of 2021, the Commonwealth enacted Senate Bill 9, An Act Creating a Next Generation Roadmap for Massachusetts Climate Policy, which set the interim GHG reduction targets of no less than 50% by 2030 and 75% by 2040.[iii] Our net zero roadmap highlights the strategies that we can deploy locally to accelerate this transition over the next several years.



Source: Architecture2030.org

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)



What does "net zero" mean?

Reaching "net zero" means that our community will reduce its GHG emissions as much as possible and remove or offset any remaining emissions by 2050 and ideally sooner. This will require a major shift in the way we heat and cool our homes, how we get around, and where our energy comes from. It also presents a huge opportunity to change our community for the better. By achieving net zero GHG emissions, we can also have cleaner air, healthier people, and a more equitable and prosperous community for everyone. **Sounds pretty good, doesn't it?**

From this...

...to this!

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Getting there equitably

Climate change is an existential challenge, but it is also an opportunity to re-imagine Melrose's future, and to make that future safe, affordable, and equitable for all who live and work in our community. Massachusetts municipalities are increasingly undertaking climate mitigation and adaptation strategies and are starting to seek out ways to advance equity within those measures. By centering equity in this plan, we can build a future that not only is safer and affordable for all, but also allows each individual in Melrose to thrive. An equitable net zero carbon future must be our goal.

In equitable planning, we must be conscientious of the history of our region, the differences in how populations are able to respond to a changing climate, and the needs of residents. We recognize that the effects of climate change systemically impact Environmental Justice communities and other vulnerable populations inequitably. The comparatively negative health outcomes that people of color experience are one example. The inequities we see today will persist in the future if we do not act.

In addition, as more households switch from natural gas to electricity for heating, it is expected that gas rates will rise for those still dependent on gas heating systems. Careful planning at the state level is needed in order to avoid the cost burden falling disproportionately on low-income households.

The state of Massachusetts considers income, race, and English language proficiency within its definition of an Environmental Justice neighborhood.[iv] The Environmental Justice neighborhoods in Melrose meet either the state's income or minority population Environmental Justice criteria, or both.

Accordingly, it is essential to assess the potential social equity impacts of climate mitigation strategies. For our plan to be actionable and for our vision of the future to be equitable, we must prioritize equity throughout the planning and implementation of our net zero strategies. An equitable Net Zero Plan investigates the anticipated outcomes of its proposed actions on environmental justice communities and other vulnerable populations.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

How do we get there?

A lot can change in 30 years and this plan is a starting point on our path to net zero that we will revisit and adjust as we continue to move forward in the coming years. We know that we need to make our buildings and vehicles, the two major sources of emissions in our community, much cleaner and more efficient. To reach our net zero goal, our community will need to work towards five core transitions.

Make our homes and businesses super-efficient.

Making existing buildings super-efficient and constructing new buildings to high efficiency standards will reduce emissions and make energy bills more affordable for everyone because the cheapest energy is the energy you don't use.

Electrify heating and cooking equipment.

Switching to electric heating and cooking appliances like air-source heat pumps and induction cooktops immediately reduces carbon emissions and improves indoor air quality, and these benefits only get better as our electric grid gets cleaner.

Electrify cars, trucks, buses, trains, and other ways we get around.

Electric vehicles are cleaner, cheaper to run over time, and require less maintenance. Providing access to charging stations and creating electric transportation options for those who do not own vehicles are essential to this transition.

Make walking, biking, and public transit the best way to get around.

By designing greener and people-centered streets and sidewalks, we can reduce emissions and air pollution while also making residents healthier and more connected to their community.

Green the grid and produce more renewable energy locally.

Renewable energy comes from endlessly sustainable sources such as wind, the sun's heat or light, or the earth beneath our feet. Our electricity is getting greener all the time thanks to state and local policies, but natural gas still provides most of our electricity in Massachusetts and it has to be imported from out of state. Locally produced renewable energy makes the air we breathe cleaner and benefits the local economy in multiple ways.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

What have we already done?

As a member of the Metropolitan Mayors Coalition, the City of Melrose signed a commitment in 2016 to achieve net zero emissions as a region by 2050. The Melrose Sustainability Manager and the Melrose Energy Commission have worked together on behalf of the City over the last decade to reduce greenhouse gas emissions.

LEADING BY EXAMPLE

Green Community since 2010. Designated a Green Community in 2010, Melrose has since received more than $2 million in grants and utility incentives for dozens of energy efficiency projects in city and school buildings and LED streetlight upgrades. Melrose currently hosts 11 public EV charging stations and includes three battery EVs in its municipal fleet as well as a water meter van with a hybrid retrofit system. The roofs of the high school, middle school, and DPW Operations Facility are covered with solar arrays.

BUILDINGS

Melrose Energy Challenge. Two community outreach efforts in 2011 and 2016 incentivized homeowners to take advantage of MassSave home energy assessments and weatherization projects. Continued outreach results in about 600 energy assessments and more than 200 insulation projects annually which save homeowners energy and reduces community emissions.

Melrose Heat Smart Campaign. In 2020 Melrose launched a clean heating and cooling outreach program called HeatSmart Melrose with the support of the Massachusetts Clean Energy Center. Heat pumps and solar hot water systems were promoted with much success and over 138 new installations completed. The program laid the groundwork for continued education and awareness efforts to encourage property owners to consider non-fossil fuel options for heating and cooling.

MOBILITY PROGRESS

The Melrose Pedestrian and Bicyclist Committee has worked with the City over the years to increase access and safety for pedestrians and bicycles via Complete Streets projects and infrastructure improvements. Improving public transit and fighting to maintain service levels continue to be top priorities for elected officials and commuters who depend on it daily.

Smart Growth in Melrose. Long before the terms "transit-oriented development" and "smart growth" became commonplace, the City of Melrose created opportunities for dense development near transit through progressive zoning and cooperative relationships with developers. The City has had progressive, growth-oriented zoning in place since the early 1980s and, in recent years, has seized opportunities to promote high-density housing in our transit-rich locations. Two overlay districts established in 2008 and 2014 incentivize dense, mixed-use

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

PHOTO CREDIT: CITY OF MELROSE

development near public transit on Washington Street and Rail Corridor. In 2021, the Planning Board also approved an incentive program for the zoning districts around the Commuter Rail Stations that is meant to incentivize higher densities in exchange for providing community benefits like green building practices.

EV Charging Infrastructure

In an effort to make electric vehicle charging accessible and easy, Melrose has taken advantage of state grants and utility incentives to install 11 public electric vehicle charging stations (19 total ports) over the last seven years. The most recent chargers are utility pole-mounted chargers – the first of this type of equipment to be installed on the east coast – as a demonstration project with National Grid. Public EV charging is convenient to shopping areas, parks and recreation, as well as to renters and condo owners who may not have the ability to install chargers at home.

CLEAN ENERGY PROGRESS

Solarize Mass Melrose. This 2012 outreach project resulted in 79 homeowners signing up to participate, 425 kW of solar installed, and $48,000 annual energy savings. The number of rooftop solar installations has grown from nine in 2011 to 526 by the close of 2021 with more permits in process.

PHOTO CREDIT: RESONANT ENERGY

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Melrose Community Power Program. The primary goals of the program are to provide competitive choice, longer-term price stability and more renewable energy options to participating consumers. About 90% of Melrose households participate in Melrose Community Power (MCP). Under the new contract that began In November 2021 the program allows residents to choose to support local renewable energy by purchasing 10% more renewable energy than is required by the state. The Massachusetts Renewable Portfolio Standard (RPS) mandates levels increase annually so that in 2022 when the state requirement is at 20% the additional 10% in the MCP program will result in 30% of the supply coming from local Class 1 sources such as wind, solar, and low-impact hydro energy. There is also an option called Melrose 100% Local Green that more than 200 residents have chosen to purchase.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

What have we heard from the community?

Melrose's Net Zero Action Plan was developed by the City of Melrose, in a collaborative effort between municipal staff, committee members, residents, and businesses, with support from the Metropolitan Area Planning Council (MAPC).

The Melrose Energy Commission, with key input from the Melrose Pedestrian and Bicyclist Committee, served as the primary advising body in developing the Plan. The committee received training from MAPC on developing a greenhouse gas inventory to inform the plan development and leading focus groups to expand current and future engagement of key stakeholders.

The strategies and actions identified in the Plan were primarily informed by research MAPC completed on other communities' climate action plans and align with MAPC's Municipal Net Zero Playbook, a regional guide for municipalities seeking to reduce emissions. The final priority actions included reflect Melrose's net zero journey, community feedback, and the major sources of GHG emissions in Melrose.

VICTORIAN FAIR KICK-OFF

In 2019, the volunteers engaged residents at the City's annual Victorian Fair and shared information about the net zero planning process commencing in Melrose.

PHOTO ABOVE: SUSTAINABE MELROSE BOOTHS AT MELROSE'S SEPTEMBER 2019 VICTORIAN FAIR

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

COMMUNITY SURVEY AND ONLINE OPEN HOUSE

In September 2020, Melrose residents were invited to participate in an online survey and provide input on the planning process. Participants were asked to share what their concerns were related to climate change and what strategies they believed the City should prioritize in the Plan. More than 500 people completed the survey. It was followed by an Online Open House in December 2020 that solicited still more feedback on the draft.

How can you be a Net Zero Hero?

Getting to net zero is a journey that will require Melrose to assemble its own A-Team. There is a place and a way for everyone in our community to contribute to, and benefit from, achieving our net zero goal. While this Net Zero Action Plan highlights the strategies and actions our municipal government will take to support our community-wide goal, we also want all members of our community to envision themselves as Net Zero Heroes on Melrose's A-Team.

Community members of all types – from residents to large employers and everyone in between – are invited to be Net Zero Heroes. Below are some ways you are encouraged to participate in Melrose's net zero journey:

Melrose Resident: Share your voice, get involved, and take action on choices in your control (e.g., complete an energy audit, insulate and air seal your home, go solar, switch to clean heating, make your next car electric) and participate in the local and state programs available to support you.

Melrose Small Business: Share your commitments with customers and staff. For those in a climate-adjacent field – such as electricians, HVAC specialists, plumbers – participate in the green economy and support "green growth" locally.

Larger Employer or Local Institution: Provide programs that assist employees in decarbonizing their homes and commute, and work with other large businesses to share experiences and support community-wide GHG emissions reductions.

Elected and Appointed Officials: Consider how the decisions your Board, Committee, or legislative body will impact Melrose's net zero goal. Advocate and vote to support policy or regulations that advance actions identified in the Net Zero Plan.

Municipal and School Staff: Lead by example with new public facility construction and renovation projects and when possible, purchase zero emission fleet vehicles. Continue to make municipal buildings and school as energy efficient as possible and add solar to new roofs as they are replaced.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Net Zero Action Roadmap

The City of Melrose developed this Net Zero Action Roadmap to inform our next five years of action to reduce greenhouse gas emissions across all sectors of the City's economy.

Informed by engagement with Melrose's Climate Action Committee members, municipal staff, and the public, the following actions have been prioritized to identify immediate next steps for the City to implement based on potential for impact.

For the five core transitions we know we need to make to achieve net zero, the City has identified **milestones** to work toward by 2030 and 2050. The **strategies** and **actions** identified in the City's Net Zero Action Roadmap all contribute to our efforts to achieve progress towards the key milestones listed below.

	TODAY	2030	2050
Make our homes and businesses super-efficient. 	**All new buildings built to the state stretch energy code.** **24% of residents participate in the MassSave Program[v]**	**All new buildings built to net zero standards.** **20% of homes and businesses have undergone deep energy retrofits.**	**Nearly all existing homes and businesses in Melrose have had deep energy retrofits.**
Electrify heating and cooking equipment. 	**Approximately 12% of homes rely on electric heating, primarily low efficiency electric baseboard heating.[vi]**	**80% of homes previously on fuel oil, propane, or electric baseboard heat have converted to high efficiency electric heat (heat pumps).** **10% of homes currently on gas heat have converted to high efficiency electric heat.**	**Nearly all homes and businesses rely on high efficiency electric heating.**
Make walking, biking, and public transit the best way to get around. 	**Approximately 27% of residents walk, bike, or take public transit to work.[vii]** **Average number of cars per household is 1.55.**	**All new developments are accessible by biking, walking, or connected to public transit.** **Average number of cars per household is below 1.47 (e.g., vehicle miles traveled are reduced by 5%)**	**All key destinations in Melrose are accessible by biking, walking, or connected to public transit.**

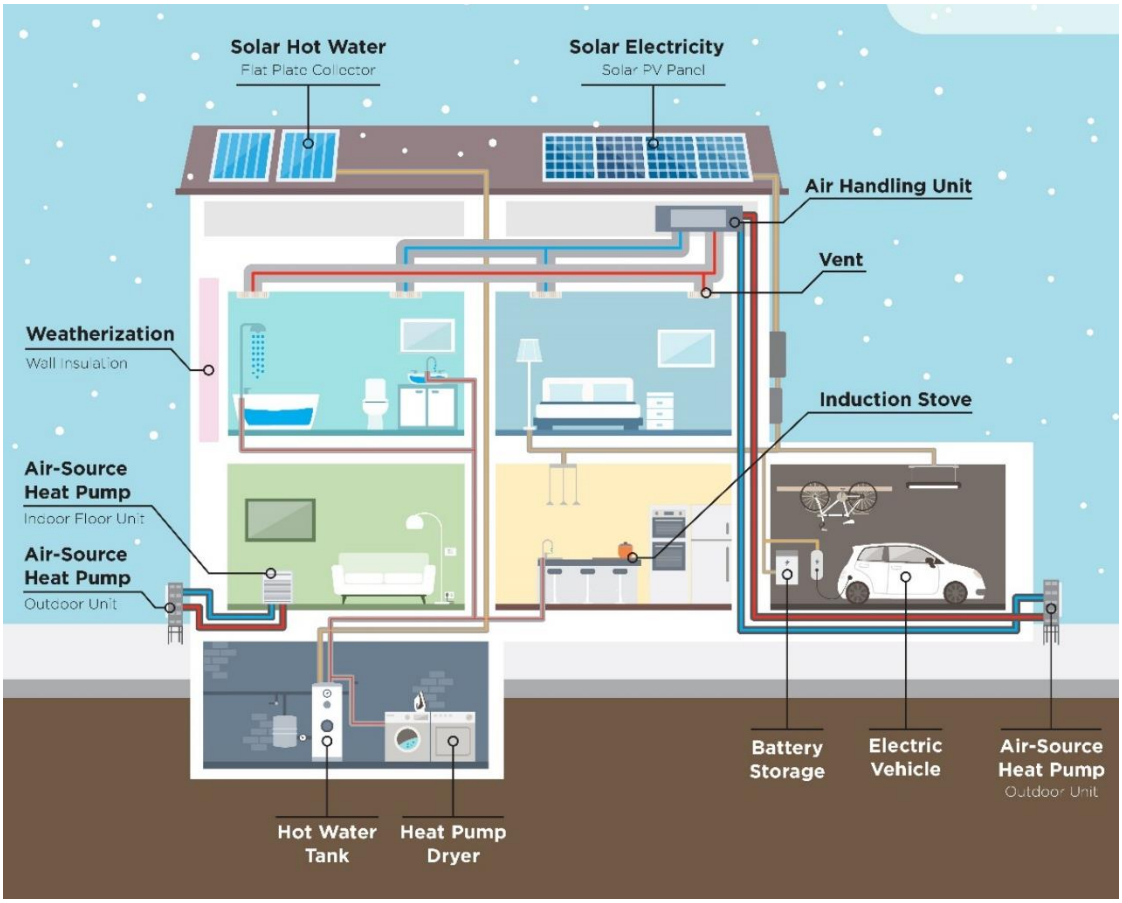
Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Electrify cars, trucks, buses, trains, and other ways we get around. 	Less than 0.1% of vehicles registered in Melrose are zero emissions.[viii]	60% of new vehicle purchases are zero emissions. 37% of registered vehicles are zero emissions.	Nearly all passenger and commercial vehicles registered in Melrose are zero emissions.
Green the grid and produce more renewable energy locally. 	Our electricity supply comes from 21% carbon-free sources.[ix]	Our electricity supply comes from 100% carbon-free sources.	

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Our Homes and Businesses

Making our homes and buildings super-efficient and electrifying our space and water heating and cooking are core to Melrose's Net Zero Action Plan. The City of Melrose commits to implementing actions that advance the following strategies:



Strategy 1. Electrify fossil-fuel end uses.

Strategy 2. Maximize uptake of residential energy efficiency and deep energy retrofits in existing buildings.

Strategy 3. Target energy efficiency retrofits of large multi-family buildings.

Strategy 4. Adopt policies to Incentivize energy efficiency and renewable energy in new construction and major renovations.

Strategy 5. Lead by example with municipal buildings and advocate for net zero building policies.

INFOGRAPHIC CREDIT: MASSACHUSETTS CLEAN ENERGY CENTER

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GROUND SOURCE HEAT PUMPS

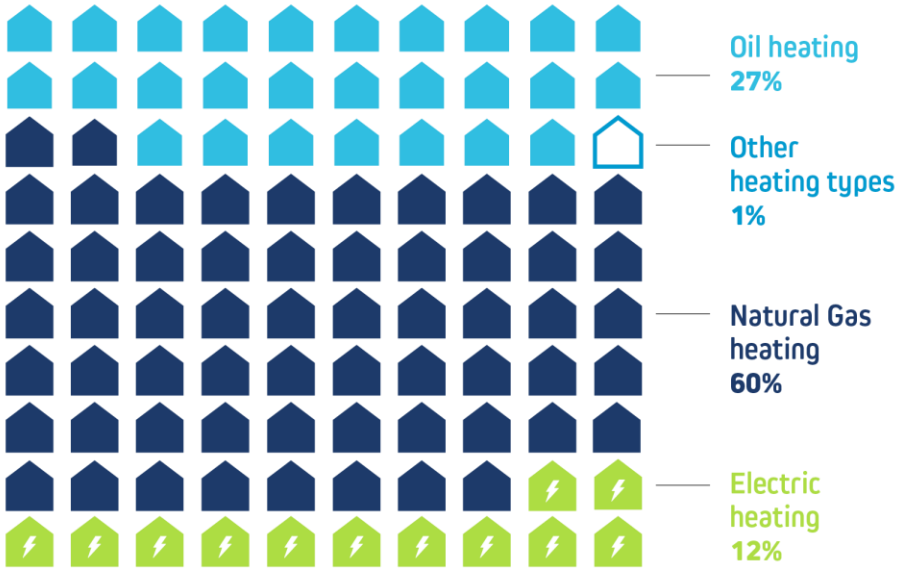
An energy-efficient heating system which uses energy from the earth to efficiently heat or cool a building.

AIR SOURCE HEAT PUMPS

An energy-efficient heating system which uses electricity to transfer heat from outside to inside a building, or vice versa. The technology can also be used to heat domestic hot water.

SOLAR HOT WATER

A type of domestic hot water heating system that use sunlight to heat water using a thermal collector.



INDUCTION COOKTOPS

A type of electric cooktop with electromagnetic coils beneath a ceramic glass surface that transfers energy

In Melrose, **60 percent of building-related emissions** result from the use of home heating fuels like natural gas and fuel oil. Businesses and industry in Melrose rely less heavily on fuel oil, but the use of natural gas and fuel oil still contribute another 14 percent of building-related emissions. Melrose's older housing stock means the vast majority of homes were built before modern insulation and air sealing practices and can benefit from weatherization and energy retrofits.

Burning oil and natural gas to heat our homes and cook our food creates **66,421 metric tons** of emissions every year in Melrose. It also creates pollution both inside and outdoors. In fact, recent studies have shown that methane leaks from gas-burning stoves is far worse than previously thought.

How are homes heated in Melrose?

SOURCE: AMERICAN COMMUNITY SURVEY 2013-2017 ESTIMATES

Switching to highly efficient electric heating and cooking appliances like **ground-source** and **air-source heat pumps, solar hot water, heat pump hot water,** and **induction cooktops** immediately reduces carbon emissions and improves indoor air quality, and these benefits only get better as our electric grid gets cleaner. The long life of home heating systems and other appliances means it is important to electrify these systems as they are replaced, to avoid locking new fossil fuel systems that may last for ten, twenty or thirty years.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 1: Electrify fossil-fuel end uses.

ACTION 1. Create an ongoing "Electrify Melrose" program and campaign.

The City of Melrose will create an on-going "Electrify Melrose" program to help home and business owners transition from fossil fuels to lower emissions alternatives. Melrose's previous successful Solarize, HeatSmart and Energy Challenge campaigns have shown the potential for community-based outreach campaigns to increase uptake and leverage state funding and incentives.

The new "Electrify Melrose" program would combine the following into a sustained ongoing campaign:

- Support for a range of technologies (see sidebar on previous page);
- Community "electrification coach" advisory services relying on a combination of city staff and volunteer coaches;
- Community-based marketing (outreach using local channels, website, certification program, assisting access to financial incentives);
- Partnerships with installers/manufacturers with discounted and transparent prices;
- Target high-cost oil, propane and electric baseboard heat and systems at the end of their useful life;
- Promote decarbonization planning for future electrification for homes with newer systems.

"Electrify Melrose" should operate in conjunction with home energy efficiency coaching (see Action 3) to provide one-stop shopping for energy saving measures.

Equity Considerations: Target outreach to renters, landlords, residents who speak languages other than English, and low- and moderate-income residents with electrification subsidy programs and income-based MassSave incentives.

ACTION 2. Develop and implement a mechanism for tracking home heating type in Melrose.

The City of Melrose will assess opportunities within existing City reporting mechanisms, such as the Annual City Census form, to reliably and simply collect information on residents' home heating fuel type. Current local, state, and national datasets on home heating fuel type are limited in the level of granularity and frequency of updates. This provides a challenge to the City's climate efforts to target and track rapid electrification of homes in Melrose.

Equity Considerations: Provide educational materials regarding different types of home heating systems and how to identify them for both homeowners and renters.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 2: Maximize uptake of residential energy efficiency and deep energy retrofits in existing buildings.

ACTION 3. Create home efficiency coaching program to assist residents with energy efficiency and deep energy retrofits.

Melrose's historic housing stock presents ample opportunities for weatherization, energy efficiency and deep energy retrofits to reduce both energy costs and greenhouse gas emissions. Home energy efficiency is in many cases the most cost-effective means to reduce emissions from the building sector and residents have indicated the need for better information and guidance in implementing energy efficiency improvements, particularly those that may go beyond MassSave's standard recommendations. Melrose's previous successful Solarize, HeatSmart and Energy Challenge programs have shown the potential for community-based programs to overcome information and cost barriers and increase uptake of energy saving and clean energy improvements.

The Melrose home efficiency coaching program will rely on a City staffperson with residential construction and energy efficiency experience as an initial point of contact to answer resident's questions, direct residents to appropriate resources and provide information on incentives and funding. A combination of City staff and volunteers can provide more in-depth coaching, working in conjunction with MassSave's evolving home energy assessments and incentives as well as the Electrify Melrose program (see Action 1).

Equity Considerations: Target outreach to renters, landlords, residents who speak languages other than English, and low- and moderate-income residents with electrification subsidy programs and income-based MassSave incentives.

ACTION 4. Opt into the state's Commercial Property Assessed Clean Energy (CPACE) law.

Melrose will explore opting into Commercial Property Assessed Clean Energy (CPACE), a financing structure that allows businesses to borrow money for clean energy projects and make repayments through an assessment on their property tax bill. CPACE allows commercial property owners to make more comprehensive clean energy upgrades and finance them with longer payback periods. CPACE financing is available in Massachusetts as of July 2020. Melrose will also advocate with state legislators to sponsor or support legislation that increases funding for incentives and financing that encourage deep energy retrofits, renewable energy, energy storage, and clean heating and cooling for businesses and residents of all income levels that prioritize expanding access to historically underserved populations (e.g., low- and moderate-income, renters, low-English-proficiency households) such as Residential PACE (RPACE) or a Green Bank similar to that of Connecticut.

Equity Considerations: Conduct outreach and education to small businesses that own commercial property in Melrose.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 3: Target energy efficiency retrofits of large multi-family buildings.

ACTION 5. Consider requiring licensing for rental units to include energy efficiency requirements for ongoing compliance.

One of the largest barriers to implementation of energy efficiency in rental units is that it requires those who own and manage the property, such as landlords and building managers, to invest in efficiency upgrades while those occupying the building units – assuming they are responsible for the utility payments – experience the benefits, including economic, quality of life, resilience, and health benefits. This is known as a "split incentive." Rental licensing helps to address this challenge and promote energy efficiency in existing buildings by requiring that certain actions, such as energy audits and weatherization, be implemented in rental properties and pass a regular inspection during the point of leasing.

For the 30% of residents who are renters, the City will explore options to establish requirements within the rental licensing process for landlords and building managers to improve their health, safety, and welfare. This could include requirements to provide a minimum level of energy efficiency upgrades to their units. Formalize the timeline of energy efficiency measures so that landlords and building managers can implement appropriate measures strategically. Consider starting with a voluntary program with recognition for joining the program, and ramping up to required rental licensing over time.

The program should provide landlords with flexibility in how to comply, such as the ability to choose which technology, from among a prioritized list or degree of efficiency, is most appropriate. Inspections of rental unit should happen at minimum when the leaser changes, however, more regular inspections could be enforced at a standard interval of time. Results of the inspection should be publicly available for renters.

Equity Considerations: Pair implementation with protection for renters so that they are not displaced by resulting improvements to the property. Enact complementary policies and programs, such as renter protections, free renter legal aid, and renter support phone-lines.

ACTION 6. Target existing multi-family dwellings with electric baseboard or oil heat for conversion to heat pumps.

Melrose's previous outreach campaigns have demonstrated the need for targeted programs to reach residents of multi-family buildings. Many of the largest multi-family properties in the City rely on high-cost, high-emissions heating systems such as electric baseboard (Melrose Towers and Melrose Housing Authority properties) and oil (Towne Estates, Levi-Gould and Fuller House). Targeted outreach to the management of these properties can be incorporated into the Electrify Melrose program (see Action 1) but will require a specialized approach.

Equity Considerations: This action item supports equity, as many of the targeted property residents include lower- and middle-income or fixed income households.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 4: Adopt policies to mandate energy efficiency and renewable energy in new construction and major renovations.

ACTION 7. Adopt net zero stretch building energy code.

Following state action to establish a net zero stretch building energy code in 2022, as mandated under the March 2021 Next Generation Roadmap legislation, the City of Melrose will adopt a net zero stretch building energy code. Melrose will pair adoption of a net zero stretch energy code with outreach and education for developers, builders, and residents (see Action 10). The building code presents an opportunity to make buildings healthier and safer, and to transition away from onsite combustion. Today, the upfront cost differentials of building to a net zero standard are minimal, and will continue to reduce over time. It is far more cost-effective to build to a net zero standard than to retroactively retrofit the same building. Subsequently, the annual energy costs can be reduced when buildings are built to a highly efficient standard and renewables are leveraged. A net zero stretch code allows communities to ensure that new construction and major renovations will be built to net zero standards and helps ensure that buildings are not locked into high emissions for years into the future.

Equity Considerations: Engage in discussions with Environmental Justice populations in Melrose and empower community organizations to weigh-in on the code development process.

ACTION 8. Incentivize energy efficiency, electrification, and renewable energy within special permit processes.

The City of Melrose will seek to adopt and gradually strengthen requirements over time for special permits that incentivize and facilitate the implementation of net zero measures in buildings undergoing significant renovation and new construction. Over the next 30 years, a subset of buildings will undergo a significant renovation or be replaced with a new building. For these buildings, it is important to ensure that they will be both allowed and encouraged to achieve the highest possible energy and emissions reductions because those buildings may not undergo significant rebuilding for another 50 to 100 years.

Until a net zero stretch building code is adopted (Action 7), the best zoning tools for Melrose to enact are special permits that incentivize these net zero measures. Special permit processes will also be important in establishing standards beyond what may be included in the net zero stretch code (under development by the Department of Energy Resources).[x]

In June 2021, the City of Melrose adopted an incentive zoning special permit that allows for appropriate increases in density in the downtown and Commuter Rail station areas for projects that provide community benefits, such as green building practices that result in energy efficiency levels exceeding building code and/or clean energy generation, which go beyond what is otherwise required in the Zoning Ordinance. This special permit can be updated as necessary over time to gradually strengthen requirements around energy efficiency, electrification, and

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

renewable energy in a way that does not impede the creation of new housing units in smart growth locations.

Melrose also has a special permit review process for multi-family residential uses in non-residentially zoned areas that could be updated to include standards for energy efficiency, electrification, and renewable energy to support the City's net zero goals.

Equity Considerations: Develop requirements in consultation with developers and building owners to avoid unintended impacts on energy bills.

ACTION 9. Require energy reporting for all new commercial construction one year after certificate of occupancy, or on an ongoing basis.

To support implementation of Action 8, the City of Melrose will explore options for implementing energy reporting for all new commercial, mixed use, and multifamily construction one year after certificate of occupancy. The reporting requirements for new construction in Action 8 will require Melrose to establish a structure for processing reporting as well as increased staff capacity, but it is the best way to analyze whether permitting and zoning measures are working. This policy is an important enabling action that many communities are already using to drive emissions reductions in the building sector across New England and throughout the United States.

Equity Considerations: Work with affordable housing owners and developers to ensure that the reporting requirements are structured in a way that allows them to participate.

ACTION 10. Provide training opportunities for City departments, boards and committees, realtors, and developers on Net Zero.

Since the development of a Net Zero building utilizes different building standards, calculations, and codes than are typically used in construction, building inspectors and plan reviewers may not have a familiarity with best practices. The goals of these trainings would be to familiarize inspectional services and other staff and members of boards and committees with high-performance building practices, to empower them to conduct relevant energy and performance calculations during plan review, and to enable inspectors to identify common construction mistakes and code violations in order to conduct efficient and effective inspections. A thorough curriculum will cover topics such as: LEED, Net Zero, Passive House and other high-performance standards, HERS ratings, life safety benefits of Net Zero buildings, and energy modeling. Additionally, Melrose will provide guidance to developers on permitting for Net Zero buildings.

Equity Considerations: Include focused training on net zero and net positive practices for multi-family buildings to increase the likelihood that benefits are realized by renters.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 5: Lead by example within municipal buildings and advocate for net zero building policies.

ACTION 11. Adopt net zero standards for new public buildings and major renovations.

The City of Melrose will lead by example by constructing, retrofitting and maintaining City-owned buildings to reduce energy use and maximize clean energy technology as much as feasible. Municipal buildings are the largest source of GHG emissions from municipal operations (municipal emissions overall only represents 3% of total community-wide emissions), and they also present a highly visible opportunity for the City to demonstrate the feasibility and appeal of net zero buildings.

In existing City-owned buildings (including school and municipal buildings), Melrose will complete energy audits and retro-commissioning projects that ensure that existing energy systems are operating efficiently, perform deep energy retrofits that maximize energy efficiency, and deploy renewable energy projects that provide as much on-site energy as possible. We will use the audits to identify buildings with high energy consumption and plan for deep energy efficiency retrofits. We will also evaluate buildings for on-site renewable energy suitability and build renewable energy projects at municipal properties with sufficient resource potential.

Equity Considerations: Prioritize improvements to public buildings that are utilized by residents in the community such as schools, library, and the senior center.

ACTION 12. Implement a suite of strategies to protect and plant trees.

The City of Melrose will implement a variety of strategies to protect the health of existing trees, reduce the removal of viable trees and increase the planting of new trees. Increasing the tree canopy in Melrose reduces heat islands and hot spots in the city and sequesters carbon that would otherwise go into the atmosphere. Require that every tree removed is replaced on site with a dedicated number of trees (2x or 3x). If the trees cannot be planted on site, they must be planted off-site at a location designated by the Department of Public Works with priority given to neighborhoods and streets with little tree canopy and heat islands.

In addition, adopting enhanced sustainable landscape plans for new construction in its zoning ordinances should be encouraged (see, e.g., Somerville's Green Score, which replaces inflexible "minimum landscaped areas" requirements with a point-based system that encourages higher value landscaping elements such as large trees).

Equity Considerations: Engage residents from vulnerable communities in the planning and development of the Green Score to improve the likelihood for a more equitable and impactful outcome.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Getting Around Melrose

Electrifying our transportation system and giving people choices about how they get around are core to Melrose's Net Zero Action Plan. The City of Melrose commits to implementing actions that advance the following strategies:

Strategy 1. Encourage low-carbon modes of transportation.

Strategy 2. Encourage uses of zero emission vehicles.

Strategy 3. Develop zero emission vehicle infrastructure for residents, workers, and visitors.

Strategy 4. Adopt zero emission mobility zoning measures.

Strategy 5. Lead by example through municipal fleet electrification and advocate for community transit needs.

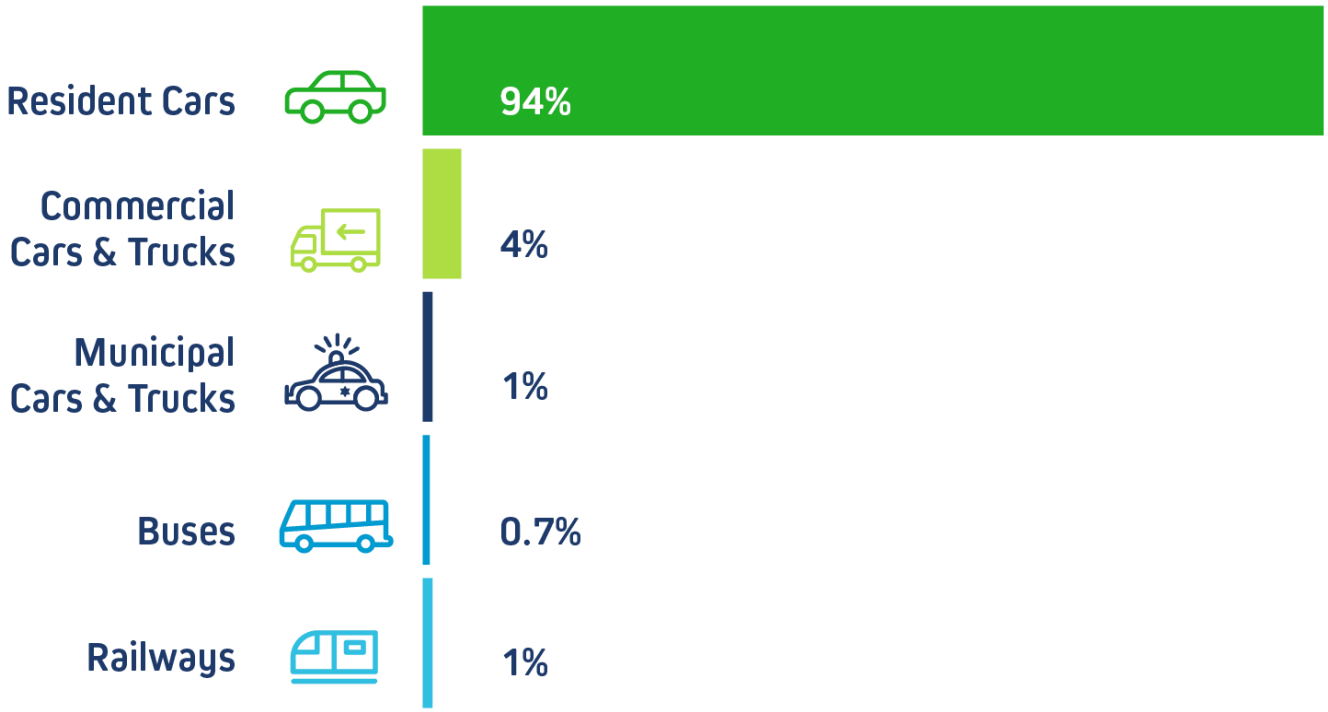


PHOTO ABOVE: MELROSE ELECTRIC VEHICLE SHOWCASE

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Gasoline- and diesel-powered cars, trucks, buses, trains, and other forms of transportation accounted for **more than a third** of our community's emissions in 2017.

Electric cars and buses are cleaner, cheaper to run over time, and require less maintenance. Electric vehicles are becoming more common and more affordable every year, and the range of makes and models available at comparable price points to gasoline- and diesel-powered vehicles is set to increase immensely in the next five years.

Expanding low-carbon mobility options like walking, biking, and transit are some of the best ways to reduce transportation emissions. By designing greener and people-centered streets and sidewalks, we can make walking, biking, and public transit as easy as taking a solo trip in a personal vehicle – and reduce traffic too! These alternatives to driving will help reduce emissions and air pollution while also making residents healthier and more connected to their community.

SOURCE: MELROSE'S 2017 GREENHOUSE GAS INVENTORY

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 1: Encourage low-carbon modes of transportation

ACTION 13. Develop and implement a Safe Streets Plan and pilot projects.

The City of Melrose will develop a Safe Streets Plan to identify gaps in the transportation network and inform how best to prioritize near- and longer-term projects. This effort will build on the work of the Pedestrian and Bicycle Advisory Committee and prioritize the needs of children, older adults, and people with disabilities.

The Safe Streets Plan should analyze mode share patterns, evaluate bicycle and pedestrian infrastructure needs, and make recommendations on best practices to improve bicycle and pedestrian safety and connectivity on major regional corridors and local routes with high access to important destinations (workplaces, retail, recreation, public services, etc.). This plan will also aim to connect Melrose to existing and proposed regional trails and paths, such as the Northern Strand Trail in Malden, Malden River Greenway, Tri-Community Greenway in Stoneham and the Wakefield-Lynnfield Rail Trail.

Melrose will also explore options for off-road community paths. Off-road paths that prohibit motorized vehicles are an important option to encourage residents and commuters to leave their cars. One potential area to explore is the use of the Orange Line MBTA/DCR right of way, which was first recommended in MAPC's Main Street Corridor report published in 2013.

Equity Considerations: Ensure robust engagement of vulnerable populations in the planning processes. Plan for the provision of equitable access to infrastructure investments.

ACTION 14. Expand Safe Routes to School programming.

Safe Routes to School (SRTS) a federally funded initiative of MassDOT, works with schools, communities, students, and families to increase walking and biking among elementary and middle school students in the Commonwealth. SRTS works with a variety of stakeholders to advocate for better bicycling and pedestrian infrastructure, educate students and their families about walking and biking to school safely, and provides other related technical assistance to schools. The City should adopt recommendations made by SRTS studies to make known hot spots safer.

Equity Considerations: Ensure robust engagement of vulnerable populations in the planning processes. Advocate for the provision of equitable access to infrastructure investments

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ACTION 15. Support expansion of the Landline Trail and Greenway Network.

As a part of the safe streets plan in Action 13, the City will support expansion of the Landline Trail and Greenway Network and Safe Routes to School (SRTS) programming.

MAPC's Landline Trail and Greenway Plan envisions a 1,400 mile regional network of trails and greenways across the region. These trails and greenways will provide critical infrastructure and connectivity to facilitate more walking and biking throughout the region. The City will help implement the Landline vision by working with local trail groups to identify priority trail construction areas and advocating for funds at the state level for trail construction and maintenance.

Equity Considerations: Ensure robust engagement of vulnerable populations in the planning processes. Advocate for the provision of equitable access to infrastructure investments.

Strategy 2: Encourages uses of zero emission vehicles.

ACTION 16. Create an education and community engagement program to promote electric vehicle adoption

The City of Melrose will provide a suite of education and outreach services, EV ride and drives, and incentives to promote electric vehicle adoption with a focus on financing and purchase opportunities to make zero emission vehicles more affordable.

At first glance, the transition to zero emission vehicles may seem to rest squarely on consumer choices and behavioral changes of a community's residents. However, there is an important role for larger market forces, federal and state incentives, and local education and awareness building to nudge residents toward the choice that aligns with getting to net zero. The City will develop a suite of municipal outreach services that may include partnerships with nonprofits such as the Green Energy Consumers Alliance Drive Green discount program, utility EV charging and program offerings, and national programs such as National Drive Electric Week to educate Melrose residents about the benefits of EVs.

Local EV showcases at Healthy Melrose and the Victorian Fair have proven to be very effective at increasing EV purchases by residents and those should continue and expand to provide ride and drive opportunities. Giving people direct and extended experience driving an electric vehicle can reduce perceived barriers individuals may have about switching to an electric vehicle. The Portland Greater Council of Governments took this a step further with their Electric Vehicle Lending Program, which provides individuals with the opportunity to borrow an EV for up to a week. This extended exposure allows individuals to see how an EV fits into their day-to-day lifestyle.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Equity Considerations: Identify opportunities to increase the subsidies and incentives for low-income drivers and provide opportunities to access electrified transportation for people who do not own a car. Incorporate translation and accessibility into the program planning.

Strategy 3: Develop zero emission vehicle infrastructure for residents, workers, and visitors.

ACTION 17. Support awareness of on-street EV charging to provide access to infrastructure for renters and homeowners that lack access to off-street parking.

In 2021, the City partnered with National Grid on a demonstration project to test the concept of pole-mounted EV chargers. Nine locations near multifamily housing, recreation areas, and in business districts with limited off-street parking were selected in order to make EV charging more accessible to more people. Other benefits include lower installation costs and easier installation at the power source. Following the installation of 15 new utility pole-mounted EV chargers through the National Grid demonstration project in July 2021, the City will promote them widely through signage, lighting, outreach and other awareness efforts.

Equity Considerations: Perform regular and ongoing outreach to neighborhoods with high concentrations of renters where resident turnover will be more frequent.

ACTION 18. Conduct outreach and education efforts targeting businesses to encourage charging infrastructure deployment.

To support the expansion of charging stations beyond publicly owned lots and right of ways, the City will approach large employers, institutions, and retailers to connect them with funding opportunities (e.g. Volkswagen Settlement, MassDEP Electric Vehicle Incentive Program - EVIP, and National Grid's Make Ready Program) to install electric vehicle charging stations on their sites. The City will leverage connections through the Chamber of Commerce and National Grid to work with large private sector actors interested in installing electric vehicle charging stations. The City will coordinate with National Grid to ensure there is a plan for increased electric demand from the charging stations installed.

Equity Considerations: Ensure robust engagement of vulnerable populations in the planning processes to ensure equitable distribution of charging infrastructure.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ACTION 19. Expand public charging and more municipal parking lots near municipal services and facilities such as the library, schools, and additional business districts.

The City of Melrose will expand public charging at more municipal parking lots near municipal services and facilities such as the library, schools, and additional business districts.

Melrose installed an EV charger in the City Hall parking lot in 2014 and a second one at the Cedar Park commuter lot in 2017 which serve a variety of users and needs. The City will invest in additional electric vehicle charging stations in more locations to help provide the infrastructure needed to support continued EV adoption for residents, workers, and visitors. As a part of this action, the City will assess options and put in place sustainable pricing and parking policies to support management of the charging stations as utilization increases over time. Consider allowing renters and those without at-home access to charging to use the public chargers overnight with special parking permits.

Equity Considerations: Plan for equitable geographic distribution of charging stations across the community and pair with programs to reduce economic barriers to EV adoption (Action 13).

ACTION 20. Specify or adopt design guidelines for EV and PEV charging stations, signage, and wayfinding for both on- and off-street parking. Adopt regulations and enforcement policies for EV and PEV parking spaces.

Consistent wayfinding and visible signage provides the needed support for existing EV drivers to locate charging infrastructure and sends a signal to other drivers that an EV may be viable alternative by reducing range anxiety. The City will pair signage with EV specific parking regulations and incorporate these regulations into existing parking enforcement structures. The City's signage guidelines will adhere to the standards published by the Federal Highway Administration in the Manual on Uniform Traffic Control Devices. Signage requirements will include consistent guidance on parking space stencils and signage that communicates any restrictions to the use of the EV parking space. Regulations will limit use of the spot to EV drivers and impose a time limitation to increase utilization of the charging station.

Equity Considerations: Plans for and requirements around EV charging station installation should include provisions for ADA compliant spaces with access to charging stations.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 4: Adopt zero emissions mobility zoning measures.

ACTION 21. Continue to support transit-oriented development in existing overlay districts.

Recognizing its strong transportation assets, the City is committed to advancing smart growth and transit-oriented development. That is, high-density, mixed-used development near the Oak Grove Rapid Transit Station, as well as around our three MBTA Commuter Rail Stations and in our downtown. As the City of Melrose has increased its housing supply over the years, it has also remained dedicated to increasing the supply of affordable housing. While Melrose has not yet met the 10% threshold set by the Commonwealth for the percentage of housing units designated as affordable, it has reached 8% by making steady progress over the years. Melrose will continue to make progress and increase redevelopment near public transit through progressive zoning and the flexibility of the Planning Board to ease or waive parking requirements.

Equity Considerations: Include requirements for affordability and community amenities within existing overlays. This recommendation should also be paired with strategies that preserve affordable housing and protect against displacement.

ACTION 22. Adopt comprehensive parking policies to maximize efficient use of spaces, reduce use of single occupancy vehicles, and incentivize electric vehicle charging infrastructure.

Parking plays an integral role in influencing vehicle congestion, determining travel behavior, and shaping land use patterns. Not only is parking very expensive to construct, but also in many circumstances, more parking actually contributes to increased vehicular congestion. Under this policy, the City will consider the elimination of minimum parking requirements for all new residential units, establishment of parking maximums within half a mile of high-quality transit stops, creation and expansion of parking benefit districts, and incentives for developers to provide less than maximum allowable parking. There are a wide range of data-driven strategies that cities and towns can employ to encourage more efficient allocation of parking resources. Parking studies provide valuable insight as to how parking is currently utilized and can help inform how parking policies can best meet demand, often reducing the perceived need for more parking.

As a part of the incentive zoning special permit in Action 2, the City will also aim to incentivize electric vehicle charging infrastructure and on or off-site bicycle and pedestrian infrastructure in exchange for allowing increases in density.

Equity Considerations: Incorporate considerations that prioritize creation of housing units and other community amenities within parking policies.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 5: Lead by example in the municipal fleet and advocate for community transit needs.

ACTION 23. Adopt zero emission standards for the municipal fleet.

The City of Melrose will adopt a zero emission municipal fleet policy that commits to complete transition to zero emission vehicles and equipment by no later than 2035 for all vehicles with viable zero emission makes and models. This policy should also address how the vehicle purchase approval process will be managed within the municipality to ensure that all departments are adhering to the new emissions standards. The policy should include maintenance equipment such as landscaping tools and machines.

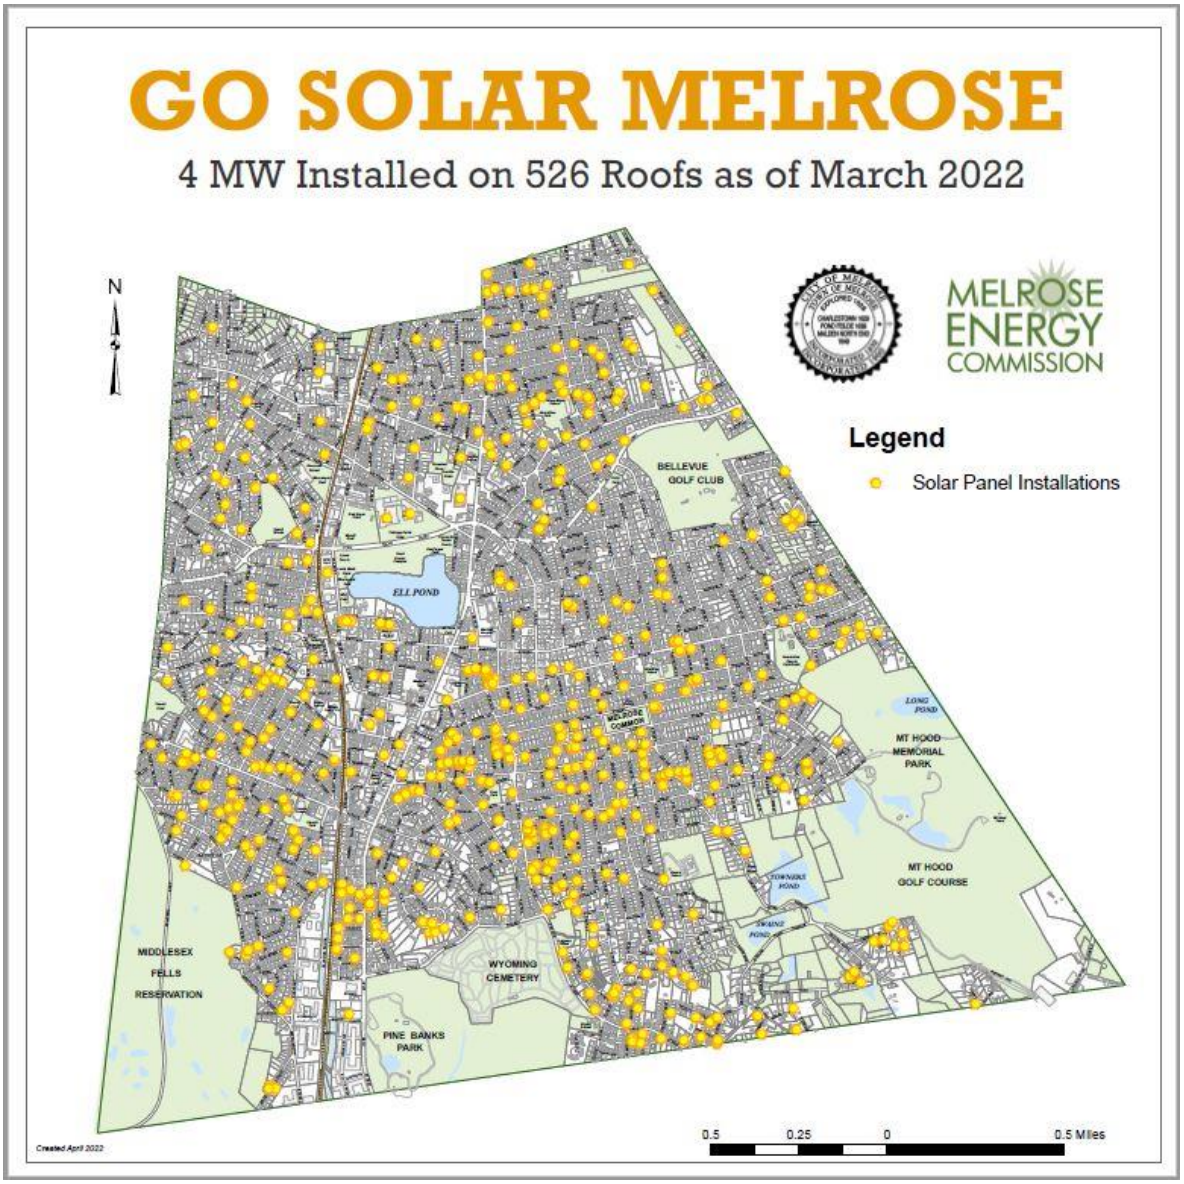
Building on the City's participation in National Grid's Fleet Advisory Services Program (FASP) begun in June 2021, municipal staff involved in fleet purchase decisions will be actively involved in the ongoing analysis. The FASP assessment will provide recommendations on electric fleet replacements, idle reduction technologies, fleet right sizing (i.e., consolidating vehicles with similar use cases and low rates of utilization), and placement of charging stations to support fleet electrification. The FASP process commits the City to revisiting and regularly updating it to account for rapid improvements in vehicle technology.

Equity Considerations: Provide opportunities for community feedback on the policy to promote greater transparency and community involvement in lead by example efforts.

ACTION 24. Advocate for community transit service needs, bus stop upgrades, and increased efficiency and electrification of the regional transit system.

The City of Melrose will continue to advocate for measures within transit planning processes at the MBTA and MassDOT that align with the City's net zero goals. Recent examples include successfully fighting MBTA service reductions on the Reading/Haverhill line with elimination of the Cedar Park station stop and the 136/137 bus routes in 2020.

Melrose will work with the community to identify priority areas to increase access and community transit ridership. The City will also advocate during upcoming planning processes with the MBTA and MassDOT and push for improved energy efficiency and reduced carbon intensity of mass transit vehicles.



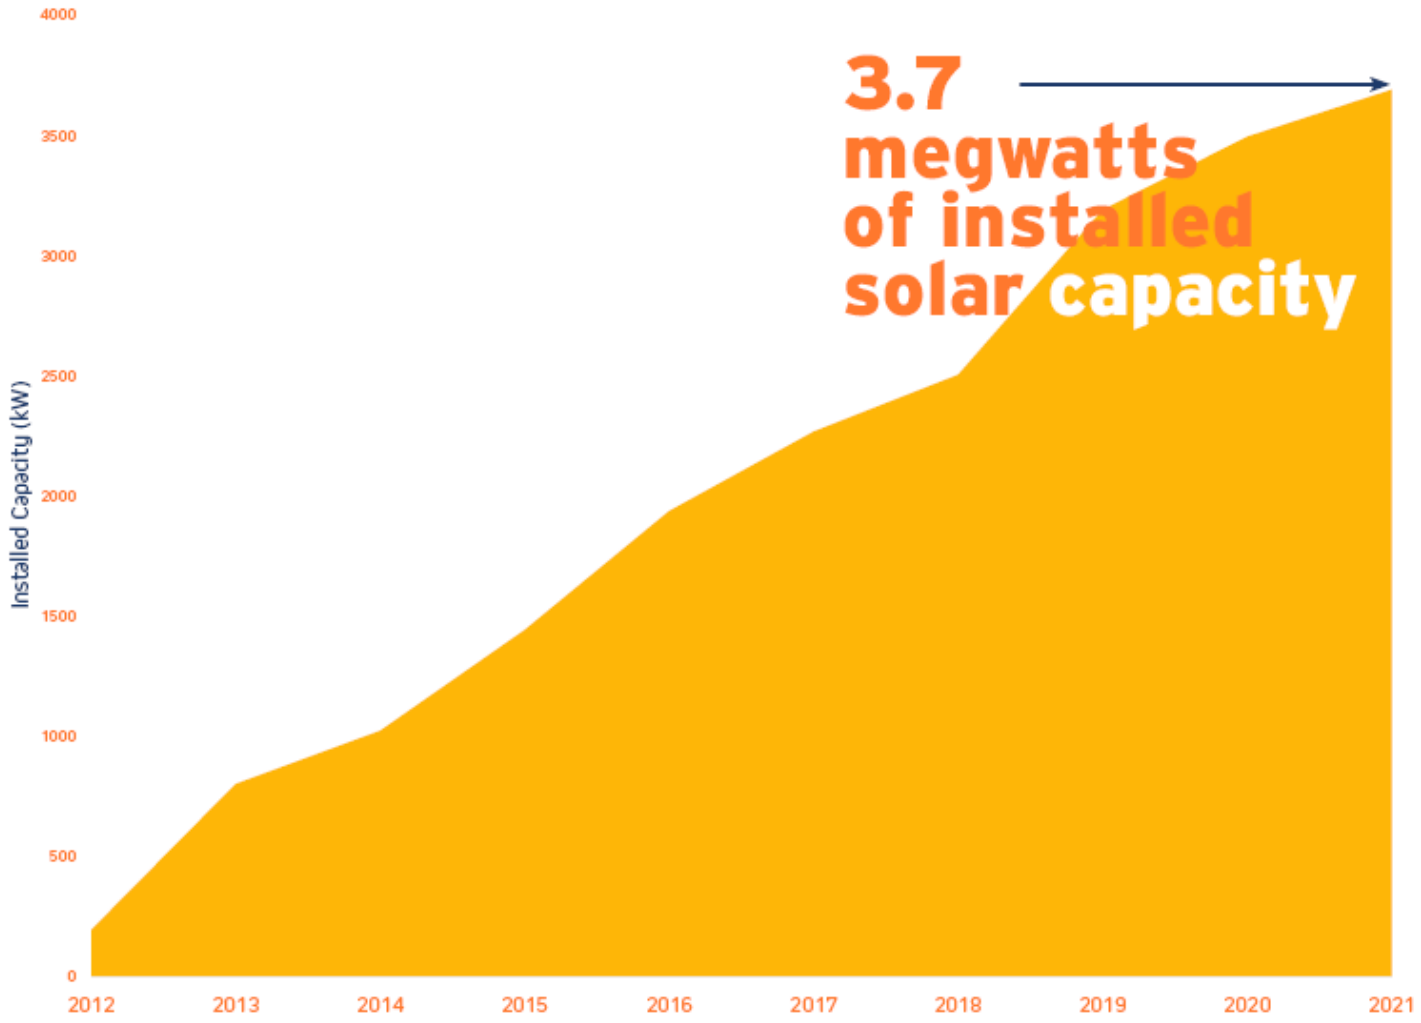
Equity Considerations: Ensure robust engagement of vulnerable populations in the planning processes. Plan for the provision of equitable access to infrastructure investments.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Where Our Energy Comes From

The City of Melrose commits to implementing actions that advance the following clean energy supply strategies:

Strategy 1. Maximize on-site renewables for property owners.
Strategy 2. Maximize off-site community shared solar
Strategy 3. Procure renewable energy for all remaining energy needs
Strategy 4. Lead by example and advocate for smart electricity use.



Graphic Above: Melrose Rooftop Solar Installations Through March 2022. Source: permits

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Electrification of systems that currently rely on fossil fuels (like our home heating systems, our cars, etc.) is essential to achieving our net zero goal in Melrose. However, the success of this strategy depends on fully transitioning our electric grid to renewable sources of energy.

Renewable energy comes from endlessly sustainable sources such as wind, the sun's heat or light (i.e., solar), or the earth beneath our feet (i.e., geothermal). Our electricity is getting cleaner and greener all the time thanks to state and local policies, like Melrose's electricity aggregation, but natural gas still provides most of our electricity in New England. Developing local renewable energy projects and supporting renewable energy projects through electricity aggregation and policy advocacy will help our community speed up the process of switching to clean energy.

In Melrose, more than 526 properties already have solar on their rooftops, and the production of local, renewable energy sources is growing. As of the end of 2021, Melrose's installed solar capacity was more than **3.7 megawatts**.

SOURCE: MASSACHUSETTS DEPARTMENT OF ENERGY RESOURCES, SREC I, SREC II, AND SMART QUALIFIED PROJECT DATA IN MELROSE

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Strategy 1: Maximize on-site renewables for property owners.

ACTION 25. Continue to promote the EnergySage.com platform for residents who want to install solar and for renters who want to participate in community solar.

The City of Melrose will continue to promote the EnergySage.com platform for residents who want to install solar and for renters who want to participate in community solar. The City will also explore mechanisms to support access to community solar for low-income residents.

Building on the success and lessons learned from the City's implementation of Solarize Melrose in 2012 and the partnership with EnergySage that began in 2014, Melrose will continue to promote the EnergySage.com online platform for property owners who want to go solar as a shopping and education tool. The City will also promote EnergySage's community solar platform for renters and other homeowners who are unable to install rooftop solar. The City will consider the potential for additional partnerships with specific installers chosen through a competitive procurement process (see Action 1).

Equity Considerations: Identify and mitigate potential barriers to participation in community solar including long term contracts and credit score requirements.

Strategy 2: Maximize off-site community shared solar.

ACTION 26. Develop a low-income community shared solar program under the state's SMART incentives.

Melrose will explore options available to develop a low-income community shared solar program through the municipal aggregation program Melrose Community Power as authorized in the updated SMART incentives. This will include a review of near-term opportunities under the state's SMART program incentives. The City will work to ensure through project outreach and incentives that low-income residents are involved in the development of the program.

Equity Considerations: Identify and mitigate potential barriers to participation in community solar including long term contracts and credit score requirements.

Strategy 3: Procure renewable energy for all remaining needs.

ACTION 27. Pursue 100% carbon-free electricity in the Melrose Community Power by 2030.

The City of Melrose will gradually increase the amount of renewable energy in the Melrose Community Power program so the default level is 100% carbon-free by 2030, and then maintain that outcome permanently.

Melrose launched what is now called Melrose Community Power in 2015. The 2019-2021 contract set the baseline for electricity supply at 5% more local

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

renewables than the state's Renewable Portfolio Standard (RPS) The new 2021 – 2024 contract will increase the amount to 10%. There is also an option for 100% renewable energy. The program ensures that all additional renewables are from MA Class I RECs (Renewable Energy Credits). MA Class I RECs help to support local renewable energy since projects meeting the criteria for these credits are required by the state RPS.

The City will continue to implement this program into the future with the goal of increasing the percent of Class I RECs in the default rate to 100% renewables by 2030 as well as exploring direct off-taker opportunities in renewable energy developments. This effort will involve active monitoring of rates and the local impact on low-income ratepayers. The City will also continue the successful outreach campaign to encourage residents and businesses to opt-up to 100% Local Green.

Equity Considerations: Pay particular attention to the costs of participating compared to utility electricity costs and provide a default rate that is competitive with these prices.

Strategy 4: Lead by example and advocate for smart electricity use.

ACTION 28. Maximize the installation of clean energy resources on municipal property and purchase 100% renewable municipal electricity supply by 2030.

The City will seek to maximize the installation of clean energy resources on municipal property, including exploration of opportunities to pair solar with storage and retrofit buildings with clean heating and cooling systems.

The City has already installed rooftop solar on every available municipal building roof where there is space and the roof condition makes it feasible including on the high school, middle school and the Public Works Operations Facility. Melrose will demonstrate leadership in this sector by maximizing the installation of solar PV on municipal buildings as more roofs are replaced, such as Memorial Hall and several elementary schools. Solar canopies should be considered again for parking lots such as at the high school and the City Hall parking lot among others. After assessing the feasibility of municipal sites for renewable energy, the City will consider a plan for installation and procure these systems where they are feasible.

In addition, Melrose should progressively increase the amount of renewable electricity in its municipal supply contracts until reaching 100% for municipal operations by 2030. Melrose has already started this transition by contracting for an additional 10% MA Class 1 RECs in the last year of the current contract for 2023. At all points of implementing this action, the City will consider cost impacts to taxpayers in Melrose.

Equity Considerations: Provide opportunities for community feedback on the policy to promote greater transparency and community involvement in lead by example efforts.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ACTION 29. Support state legislation and policies to de-carbonize the region's energy supply.

The City of Melrose will advocate for state policies that increase the Renewable Portfolio Standard (RPS) and promote incentives specifically for low to moderate income (LMI) residents such as LMI solar incentives, and programs and procurements that further decarbonize the region's energy supply, such as offshore wind development.

The current RPS puts the state on track to reach 67% renewable energy by 2030. The Next Generation Roadmap for Massachusetts Climate Policy, enacted in 2021, raised the rate of increase to 3% from 2025 through 2029 at which point the rate of increase returns to 2% and puts the state on a pathway to achieve approximately 80% renewable generation by 2050.[xi]

An increase in the renewable portfolio standard helps to advance the installation of new renewable energy systems across the state. Since many utility programs are driven by the requirements of the RPS, an increase in renewables also improves the financial incentives for renewables and helps to lower soft costs for renewable energy by the increase in competition.

Equity Considerations: Ensure that policies include measures to directly benefit Environmental Justice communities across Massachusetts and increase access to clean energy for all.

ACTION 30. Advocate for expansion of demand response programs and creation of distinct time of use rates.

The City of Melrose has participated in a variety of demand response programs since 2012 with much success. The City should continue these initiatives and also advocate for expansion of demand management programs and the creation of distinct time of use rates for different types of buildings and electric vehicle charging. This will include support for smart metering infrastructure, demand response programs, energy storage infrastructure and advocacy for additional incentives for energy storage.

Equity Considerations: Ensure that policies include measures to directly benefit Environmental Justice communities across Massachusetts with a focus on affordability.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ACTION 31. Advocate to regulators and utilities to greatly accelerate the repair of gas leaks and support the phase-out of the natural gas distribution supply network.

Melrose will advocate for the repair of super-emitter gas leaks and coordinate information and data sharing with National Grid. Repairing gas leaks improves residents' health, makes the gas network more efficient and helps to eliminate difficult to account for GHG emissions. The City will advocate for additional efforts for detection and mitigation of gas leaks and work to expedite the repair of local leaks.

Melrose will also advocate for regulatory changes that help accelerate the phasing-out of the gas distribution network as is being investigated by the MA Department of Public Utilities at the request of the MA Attorney General's Office. We await the outcome of the investigation that was launched in October 2020.

Since the repair of gas leaks and replacement of pipes involves digging up and repairing streets, they can be costly and require multiple permits. Melrose will continue to work with National Grid to see where priorities for gas leak repair and street repair overlap and explore opportunities to develop a shared schedule to complete multiple repairs in the same street opening and re-pavement. This action could also include consideration of ways to expedite permitting for these repairs, including an online permitting system such as Roadworks. Melrose will continue its participation in the Multi-Town Gas Leaks Initiative, working with communities throughout the region to accelerate leak repair by improving data sharing, communication, and coordination between municipalities and National Grid.

Equity Considerations: Ensure equity in setting street repair and gas leak repair priorities throughout Melrose.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Implementation: What's Next?

This Net Zero Action Plan is just the beginning for the City of Melrose. The transitions required to achieve net zero in Melrose necessitates an all-hands-on-deck approach – both internally, with City staff and elected bodies, and externally, with local community partners and municipal peers. The following initiatives will be spearheaded by the City's Sustainability Manager which will facilitate implementation of the actions prioritized in this plan.

Governance

Develop internal practices and structures for multi-departmental coordination on climate action.

The Mayor will appoint key members of City boards, commissions, and departments to join a Net Zero Action Task Force. Task Force members will support the Sustainability Manager in implementing and reporting on the progress of priority actions identified in the plan. The Task Force will also be structured to be a two-way exchange of information – providing opportunities to increase climate literacy and technical capacity across city government.

One of the first objectives of the Net Zero Action Task Force will be to align municipal department responsibilities with the goals of the Net Zero Action Plan and identify any areas where municipal activities may be acting in opposition to the goals of the plan.

This process will result in the incorporation of a climate framework into the goals of every municipal department.

Report on metrics of success and update greenhouse gas inventory on a semi-annual basis.

The City's GHG inventory will be the core tool for benchmarking progress toward its net zero goal. The City will update its GHG inventory as new data sets are made available, using MAPC's Community Greenhouse Gas Inventory Tool. The expectation is that this will occur every two years. The 2017 GHG inventory will be used as the baseline to measure progress against.

Revisit and update the plan every five years.

The Net Zero Action Plan is intended to serve as a living document that will be revisited and revised regularly by the Sustainability Manager and the Net Zero Action Task Force to ensure our community is always pushing ahead and successfully working toward its goals.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Public Engagement and Education

Building community capacity to make the electrification transition

A core component of the community engagement plans to convene focus groups during the planning process had to be put on hold due to the COVID-19 pandemic. As such, the City will prioritize building and strengthening relationships with vulnerable populations that are not currently reached by the City's communication and engagement channels. In addition, broad and continued outreach to stakeholders both in city government and in the wider community is necessary in order to increase understanding of what the transition to net zero entrails. There is a role for everyone in this challenge and more education on how to get there is needed.

Partnership and Collaboration

Coordinate climate action regionally with the Metro Mayors Coalition municipalities

Coordinated action with surrounding municipalities will be a component to the success of Melrose's Plan. The City will continue to connect and share best practices with staff in nearby Metro Boston municipalities, utilizing existing regional networks like the Metropolitan Mayors Coalition Climate Preparedness Task Force to identify regional priorities and programs for implementation.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Net Zero Action Roadmap Summary

NAVIGATING THE ROADMAP

Timeframe

Specifies the anticipated timeframe needed for full implementation of the action.

IN PROCESS Currently underway by City staff

SHORT TERM Less than one year (<1 yr)

INTERMEDIATE TERM Two to three years (2-3 yrs)

LONG TERM Four to five years (4-5 yrs)

Potential Co-Benefits

This section identifies the high-level potential for the types of benefits, in addition to greenhouse gas emissions reductions, the City may experience through effective implementation of the action.

PUBLIC HEALTH BENEFITS

ECONOMIC BENEFITS

ENERGY SYSTEM BENEFITS

ENVIRONMENTAL BENEFITS

Internal Partners

Although the Sustainability Manager is primarily responsible for spearheading implementation, Internal Partners are identified to assist with implementation. Acronyms used refer to Office of Planning and Community Development (OPCD) and Department of Public Works (DPW).

Other Partners

Other partners are identified within municipal operations and the broader community-at-large that will be critical to successful implementation of the action. Acronyms used refer to Melrose Energy Commission (MEC), Massachusetts Clean Energy Center (MassCEC), Massachusetts Department of Energy Resources (DOER).

Funding Needs

This category specifies whether the type of funding need is capital, operations, staff or volunteer time. Particularly intensive actions call out where the City may need additional dedicated staff for successful implementation.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Our Homes and Businesses:

2030 MILESTONES

- All new buildings built to net zero standards.
- 20% of homes and businesses have undergone deep energy retrofits.
- 80% of homes previously on fuel oil, propane, or electric baseboard heat have converted to high efficiency electric heat (heat pumps).
- 10% of homes currently on gas heat have converted to high efficiency electric heat.

2050 MILESTONES

- Nearly all existing homes and businesses in Melrose have had deep energy retrofits.
- Nearly all homes and businesses rely on high efficiency electric heating.

STRATEGY 1: Electrify fossil-fuel end uses

	ACTION	TIMEFRAME	INTERNAL PARTNER	OTHER PARTNERS	FUNDING NEEDS				
ACTION 1.	Create an ongoing "Electrify Melrose" program and campaign.	<1 yr	Energy Coach	MEC, MassSave, DOER, National Grid, MassCEC, MassEnergize	Dedicated staff person Operating expenses	●	●

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

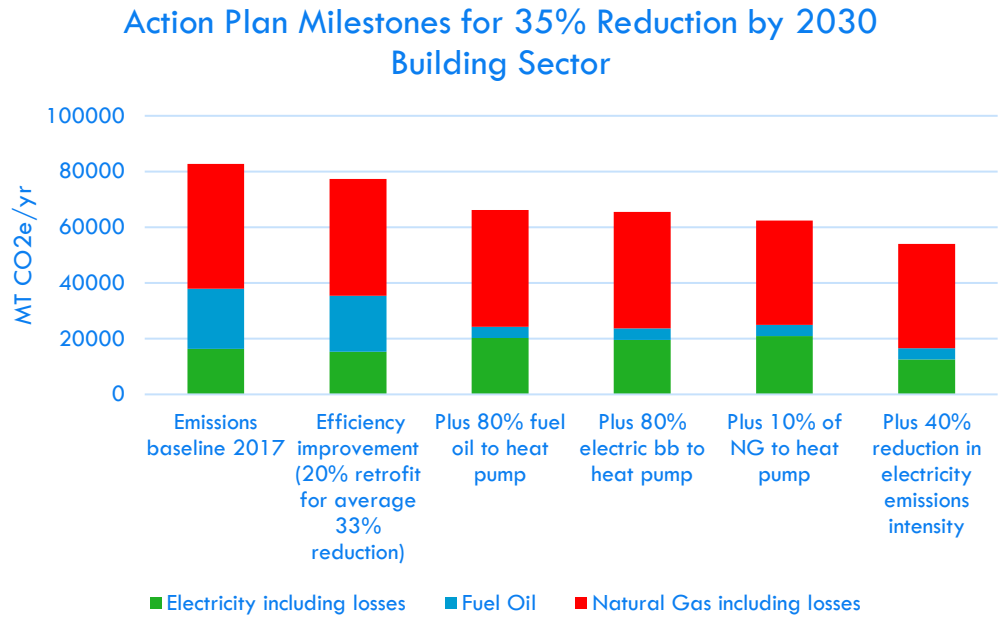
Appendix A: Net Zero Roadmap Milestone Supporting Documentation

The targets set forth in the Net Zero Roadmap for the year 2030 are designed to provide concrete, measurable milestones that will allow the City to assess whether it is on track to meet the Net Zero by 2050 goal. These targets are calculated to be consistent with Massachusetts' climate goals as set forth in "An Act Creating a Next Generation Roadmap for Massachusetts Climate Policy" adopted in 2021, which establishes an emissions limit of not less than 50% reduction from 1990 levels by 2030 (and 75% reduction by 2040), and are tailored to Massachusetts' specific challenges as a largely residential community with an older historic housing stock.

Baseline

The Massachusetts statewide target is assessed based on a 1990 emissions baseline; due to progress made since 1990 (primarily due to reductions in emissions intensity of the electric grid) the state has achieved approximately a 23 % reduction in statewide emissions since 1990, so the target equates to a 35% reduction from current emissions levels.

Melrose does not have data on city emissions from 1990 and is using its 2017 Greenhouse Gas Inventory as the baseline for assessing progress on mitigation goals. For the purpose of setting 2030 targets this plan assumes that Melrose is in a similar position to the state as a whole in terms of the progress made between 1990 and 2017, so the targets are calculated to achieve a 35% reduction from the 2017 baseline. This seems to be a reasonable assumption since Melrose's population in 2017 (28,367)is very similar to that in 1990 (28,112); note Melrose's population declined significantly and then rebounded during that time, so the pattern of emissions trends between 1990 and 2017 may be quite different from that of the state as a whole.



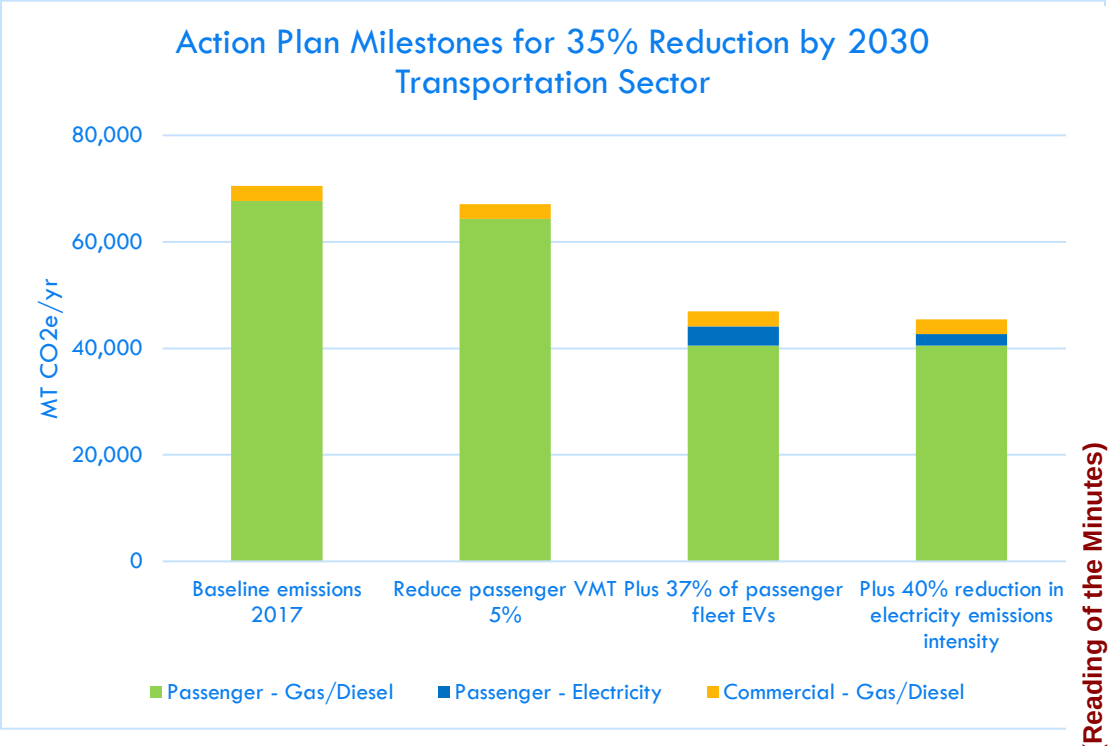
Building sector targets

Reducing emissions from the building sector involves a combination of reducing energy usage through improving building envelopes, improving the energy efficiency of building heating and cooling systems, and electrifying those systems so that they can be run on clean renewable electricity. These changes build on one another; for example, switching from oil heat to electric heat pump reduces emissions through the greater efficiency of the heat pump system and also due to the lower emissions intensity of electricity as a power source, and there will be further emissions reductions from those systems over time as the electric grid becomes cleaner.

The chart below illustrates the cumulative impact of the energy efficiency, heat pump conversion and electric grid clean energy targets to achieve the 2030

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

emissions reduction target. Note that these targets represent one pathway to achieving the goal; shortfalls in one area can be made up by improved progress in other areas, and it is important to keep track of all of the measures to ensure that overall progress is on track.



Transportation

Reducing emissions from the transportation sector involves a combination of reducing vehicle miles, improving the energy efficiency of vehicles, and electrifying vehicles so that they can be run on clean renewable electricity. These changes build on one another; for example, modern electric vehicles use less energy to run and also reduce emissions due to the lower emissions intensity of electricity as a power source, and there will be further emissions reductions from those systems over time as the electric grid becomes cleaner.

The chart below illustrates the cumulative impact of reducing vehicle miles and transitioning to electric vehicles to achieve the 2030 emissions reduction target. Currently approximately 12% of passenger vehicles in Melrose are replaced by new vehicles each year; assuming linear progress towards a goal of 60% of new cars electric in 2030, the percent of registered vehicles that would be EV in 2030 should be about 37%.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Clean electricity

The transition to clean renewable sources of electricity is essential to achieving Melrose's net zero goals, and reduction in the emissions intensity of the electric grid in incorporated into the target calculations for the building and transportation sector. The overall intensity of the electric grid is largely dependent on state policy, but Melrose has committed to targeting 100% of electricity from renewable resources through increasing local renewable generation and through power purchasing programs.

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Commission on Disability Appointment
Date: April 26, 2022

I respectfully request the Honorable City Council confirm the appointment of Alaine Breen, of 18 Woodcrest Ave, to the City of Melrose Commission on Disability for a three-year term, said term to expire the last day of February 2025.

Impassioned by her 20-year-old son, a MHS graduate on the autism spectrum, Alaine Breen has volunteered her free-time supporting various organizations that share her commitment to helping those with developmental disabilities and their families – organizations such as Autism Housing Pathways Inc., Melrose Kind, and the Melrose Special Education Parent Advisory Committee.

Alaine has been operating her own public accounting firm in Melrose for over 30 years and is the primary advocate for her son. Through her steadfast efforts to support him financially and in his journey through the medical and educational systems, she has discovered the importance of enabling people of all abilities at every stage of development and recognizes the value of serving individuals within the community with any presentation, and at any age.

I feel strongly that Alaine's passion for advocacy, hands-on experience, and management skills will help drive forward the Commission on Disability's mission to fully integrate people with disabilities in the City of Melrose.

Thank you for consideration.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ALAINE M. BREEN, CPA, MST

CURRICULUM VITAE

EDUCATION

Bentley University, Waltham, MA
Master of Science in Taxation, October, 1995

Suffolk University, Boston, MA
Bachelor of Science in Business Administration, May, 1986

Subject: Commission on Disability vacancy

Hello,

I'm writing to express my interest in the open position on the Commission on Disability.

I am a (nearly) lifelong resident of Melrose and a self-employed CPA.

I have a 20-year-old son on the autism spectrum. He's an MHS graduate (class of 2020), is currently attending the post-grad program part time and the MAICEI program at Salem State University.

I have a high level of interest in developing an accessible and socially inclusive community housing model for adults like him. I've been trying for several months to be part of the interviewee group for the housing blueprint that's being developed - unfortunately, that has yet to happen.

I've learned an unbelievable amount as the primary advocate for my son - through both the medical and educational systems. Inclusive practices and resources MUST be pervasive throughout all areas of our community for individuals with any presentation at any age.

I would love to find out more about the commission and the open position.

My CV is attached.

Many thanks,

Alaine Breen

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Soldiers and Sailors Memorial Building
Board of Trustees Appointment
Date: April 26, 2022

I respectfully request the Honorable City Council confirm the appointment of Christopher Bernard, of 71 Cranmore Lane, to the City of Melrose Soldiers and Sailors Memorial Building Board of Trustees for a three-year term, said term to expire the last day of February 2025. Bernard's appointment would replace Eric DiNoto's appointment, which expired on the last day of February 2021.

In his capacity as a member of the military, Christopher Bernard's prudent leadership skills safeguarded the lives of thousands of Soldiers and Marines renovating a multimillion-dollar ship and led to a 99% mission completion rate in the Middle East and Pacific. As a civilian, Christopher has continued his tradition as a mentor to others – as a leadership consultant, a strategy consultant, and as a product manger for various industrial science and tech organizations.

In reflection of his vast experience as a leader and advisor to others – both in his role as a member of the armed forces and as a civilian - it is my firm recommendation that Christopher join the Soldiers and Sailors Memorial Building Board of Trustees.

Thank you for your consideration.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CHRISTOPHER BERNARD

71 Cranmore Ln, Melrose, MA 02176 | [redacted]

[redacted]bernard1

EXECUTIVE SUMMARY

- A product management leader with a rare combination of technical aptitude, business acumen and operational management refined through experiences as an engineering undergrad, 10 years of military leadership and a Wharton MBA. Brings a wide-ranging background from building a B2B SaaS analytics platform in a startup environment. managing an integrated partnership ecosystem and building an Industrial IoT platform.

EXPERIENCE

POSTPROCESS TECHNOLOGIES INC — **Remote, Melrose MA**
Software Product Manager — **2021- Present**

- As a Director level Product Manager, created a multi-tiered software strategy to add Annual Recurring Revenue that complemented the hardware-chemistry-software total solution for additive manufacturing customers. Formulated offerings to maximize the addressable market and target multiple segments in the current customer base.
- Driving the roadmap to commercialize the product and develop an on-premise and cloud solution for the CONNECT3D IIoT platform. Incorporated numerous features to transform a development project into a commercialized product.
- Leading the integration of a new machine and software combination through a combination of remote and AWS infrastructure. Transformed the current SW into Helm / Kubernetes for deployment in AWS.

VERIZON CONNECT — **Waltham, MA**
Product Manager, Partners and Integrations — **2019- 2021**

- Lead the Integration and Partners Tribe in a Kanban environment to drive the Strategic Roadmap and transform the product marketplace into a full self-service, eCommerce marketplace enabling customers to integrate their fleet with a few clicks of a button. Developed a UX that reduced time to integrate from over a month to under 3 days, reduced onboarding costs to near $0 and increased integration upsells by 15% shortly after launch.
- Drove the partnership portfolio including resellers, partnerships and integrations by managing business development and legal to source, negotiate and close partnership contracts. Personally lead the development and integration post partnership agreement closing resulting in launching 12 new partners globally in 2020.
- Managed API gateways and libraries for two product brands under the Verizon Connect telematics platform. Functioned as the technical expert and go to for all product integrations.

eTECHNOLOGY SERVICES INC. — **Peabody, MA**
Senior Product Manager — **2017- 2019**

- Led a 4-person development team in a startup environment and built a SaaS application and database platform for the middle market US Commercial Auto Insurance industry based on personally identifiable in-vehicle geospatial (IoT) data, leading to an immediate 20% improvement in policy pricing accuracy for eTech's parent insurance operation.
- Negotiated partnerships and integrations with a portfolio of over 50 Telematics Service Providers to enable a technology agnostic application enabling the capability to integrate with almost any in-vehicle telematics (IoT) devices.
- Developed proprietary analyses and algorithms leveraging machine learning to transform IoT data and integrate third party data to provide a more granular view of policyholder risk. Designed the entire platform including UI/UX, multiple, dynamic business intelligence visualizations and complex geospatial analyses in SQL and R.
- As the Product Manager/ Owner, transitioned the development team from a waterfall methodology to embracing a user-centered design based on Agile methodologies.

Strategy Consultant — **2016- 2017**

- Developed a rapid market assessment for the viability of a vehicle-based data platform to increase the profitability of eTech's parent commercial insurance operation, which consisted of a portfolio of $250 million in gross written premium.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CHRISTOPHER BERNARD

- Developed the business model for a subscription-based US Commercial Auto telematics platform due to the lack of a commercially available platform that incorporated return from integrating underwriting, loss prevention, rating verification and claims processes.

E. I. DUPONT DE NEMOURS CO. **Wilmington, DE**
Management Leadership Development Consultant **Summer, 2015**

- Identified key levers of improvement across a broad portfolio of products across several major business lines for the market leader in the U.S. thermoplastic industry.
- Analyzed the entire U.S. sales force responsibilities and determined significant key driving factors affecting sales volume resulting in the recommendation of 2 FTEs at optimal locations to increase revenue growth in underserved segments of the market.

UNITED STATES NAVY – USS ESSEX (LHD-2) **San Diego, CA**
Head of Safety **2013-2014**

- Commanding Officer's direct representative for all health, safety, and environmental programs for a $400 million ship during a $200 million maintenance overhaul period.
- Ensured the safety of all personnel onboard including 1000 Sailors and a detachment of 1400 Marines. Managed all OSHA compliance and training including HAZMAT, environmental and electrical safety in low and high voltage applications.

UNITED STATES NAVY – HELICOPTER MARITIME STRIKE SQUADRON 41 **San Diego, CA**
Director of Curriculum, Assistant Director of Scheduling **2010-2013**

- Instituted a self-developed, innovative technology platform to reduce scheduling workforce hours by 40% that resulted in a 100% on time graduation of 203 students without requiring any extra resources.
- Led 12 Sailors to maintain a dynamic curriculum to train over two 500-person squadrons of Naval Aviators. Managed 9 aircrew training syllabi including direct coordination with multiple NATO and Middle Eastern countries to develop curriculum for International Military Students totaling $1.3 million in budget resources.

UNITED STATES NAVY – HELICOPTER ANTI-SUBMARINE SQUADRON LIGHT 43 **San Diego, CA**
Senior Maintenance Manager **2009-2010**

- Coordinated post deployment maintenance inspection of two helicopters resulting in 100% of the programs passing and labeled as highest Naval Aviation Maintenance level of achievement of Outstanding. Coordinated supply chain logistics ensuring minimal down time during extensive maintenance periods not normally completed at sea.
- Led 17 maintenance personnel onboard ship and responsible for the safe operation and repair of two helicopters, valued at approximately $20 million each, resulting in a 99% mission completion rate in support of combat operations in the Middle East and Pacific.

Senior Operations Manager, Line Operations Manager **2007-2009**

- Coordinated, scheduled, and executed 500 flight hours with a two-helicopter detachment working with an air wing composed of nine squadrons with a $1 million operating budget in order to maintain maritime battlespace dominance.
- Led a division of 18 Sailors responsible for daily maintenance and safety inspections on 12 helicopters and rejuvenated the qualification and training process that qualified 12 additional personnel increasing the qualification rate by 27%.

UNITED STATES NAVY – AVIATION FLIGHT SCHOOL **FL,TX,CA**
Student Naval Aviator **2004-2007**

- Learned to fly and fight multiple Navy aircraft to support Naval Operations worldwide and graduated in the top of the class in a program with a 60% selection rate of officers and a 25% attrition rate.

EDUCATION

THE WHARTON SCHOOL, UNIVERSITY OF PENNSYLVANIA **Philadelphia, PA**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CHRISTOPHER BERNARD

Full Time MBA: Majors in Operations, Finance, and Management **2014-2016**

- Focus in strategy, operations, financial modeling and valuation.
- Officer of the Veteran's Club and the Beer and Brewmasters' Guild; Member of the Wildmen Hockey Club.

UNITED STATES NAVAL ACADEMY **Annapolis, MD**
BS in Mechanical Engineering **2000-2004**

- Graduated with honors and earned an overall 3.6 GPA and a 3.9 GPA in major with a focus in heat transfer.
- Inducted into the Tau Beta Pi honor society and passed the Fundamental Engineering Exam.

ADDITIONAL INFORMATION

- Skills: Proficient in SQL analysis, Excel business modeling and statistical modeling in R and Python.
- Interests: Enjoy woodworking, home brewing, cooking, motorsports, and am always building something cool!

April 25th, 2022

Chris Bernard
71 Cranmore Ln
Melrose MA 02176

To the City Counsel of Melrose,

My name is Chris Bernard and I humbly submit my name for nomination to the Board of Trustees for the Soldiers and Sailors Memorial Building. I bring a wide range of experiences including a Mechanical Engineering degree from the U.S. Naval Academy, ten years of military experience as a Naval Aviator, an MBA from The Wharton School and civilian experience as a Software Product Manager.

Throughout my academic and professional life, I have been exposed to military and civilian historically important venues and hope to steward these facilities onto future generations. From the solemn Memorial Hall at the Naval Academy to the jovial World Famous I-Bar at Naval Air Station Coronado to the historic 23rd Street Armory in Philadelphia, I understand how these important landmarks can bring everyone in a community together. I have witnessed how buildings like the Melrose Soldiers and Sailors Memorial Building can simultaneously be a monument for those that have come before, an approachable venue for all and an inspiration for new generations to serve. I would love to use my experience to continue this fine tradition in Melrose.

I thank you for the opportunity to present myself to the City Council and the Board of Trustees, and thank you for the opportunity to start a new chapter of service to the Melrose Community.

Very Respectfully,

Chris Bernard

RE: Single Family Residential Property
9 Wildwood Road
Melrose, MA
8,000 Sq Ft of SRB Zoned Land with a
2,133 Sq Ft Cape Style Dwelling

Dear Ms. Reis:

In accordance with your request, we are pleased to transmit the appraisal report detailing our opinion of the impact on market value resulting from the proposed permanent easement at the underlying property referenced above.

The proposed easement is part of a drain relocation project and will affect the single family residential property containing 8,000 sq ft of land at 9 Wildwood Road in Melrose, MA.

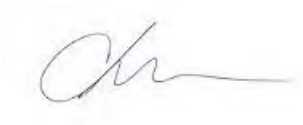
The proposed easement is:

Proposed 12' Wide Easement	1,200 sf	Permanent Easement

The complete appraisal developed in support of the value opinions is presented in the narrative format and is qualified by certain definitions, limiting conditions and certifications presented in detail in the appraisal report.

This appraisal has been completed in accordance with the *Uniform Standards for Professional Appraisal Practice* (USPAP 2020-2021) and is intended to comply with the Local Public Agency (LPA) Appraisal Guidelines of the Massachusetts Department of Transportation (MassDOT).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)



February 1, 2022
Vonnie Reis, P.E.
City Engineer

As a result of our analysis, it is our opinion that the value of the property to be acquired and the damages to the remainder, if any, based upon our independent appraisal and the exercise of our professional judgment as of the effective date of appraisal (January 28, 2022) is as follows:

Parcel #	Area (sf)	Acquisition Type	Final Estimate of Damages
Proposed 12' Wide Easement	1,200	Permanent Easement	$ 48,000

This letter must remain attached to the report, which contains 42 pages plus related exhibits, in order for the value opinion set forth to be considered valid.

Respectfully submitted,

Christopher H. Bowler, MAI, CRE
Massachusetts Certified General
Real Estate Appraiser #495

Jonathan H. Avery, MAI, CRE
Massachusetts Certified General
Real Estate Appraisers #26

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SUMMARY OF SALIENT FACTS AND CONCLUSIONS

OBJECTIVE & PURPOSE: The objective and purpose of this appraisal is to estimate the market value of the property affected and any legally compensable damages resulting from the acquisition of land and/or rights in land as determined by the laws of the Commonwealth of Massachusetts.

CLIENTS & INTENDED USERS: The Town of Melrose.

CURRENT USE OF THE PROPERTY: Single family residential.

BRIEF DESCRIPTION OF UNDERLYING PROPERTY: The larger property consists a single family property that includes an 8,000 sq ft lot and a two story, 2,133 sq ft cape style dwelling. The property is located in the Upham Park neighborhood of Melrose.

PARCELS TO BE ACQUIRED: The proposed easement is as follows:

Proposed 12' Wide Easement	1,200 sf	Permanent Easement

OWNER OF RECORD: Andrew F. Tobin and Katherine O. Tobin.

DATE OF VALUE ESTIMATE: January 28, 2022.

DATE OF REPORT: February 1, 2022.

ZONING: SRB, Single Family Residential.

HIGHEST AND BEST USE BEFORE ACQUISITION: It is our opinion that the highest and best use of the subject property is for its continued single family residential use.

HIGHEST AND BEST USE AFTER ACQUISITION: It is our opinion that the highest and best use of the subject property is for its continued single family residential use.

IDENTIFICATION AND HISTORY OF SUBJECT PROPERTY: The following is the address, assessors, and legal reference for the subject property:

		Assessors		Size of	Current	Legal
Address	Town	Map	Lot	Site (ac)	Owner	Reference (Bk/Pg)
9 Wildwood Road	Melrose	H9	51	8,000	Andrew F. Tobin Katherine O. Tobin	71283/483

Sales History: The current owners of the subject property acquired it on July 9, 2018 for $675,000 from Kathleen A. Thorsen. This sale is recorded in Book 71283 Page 483 at the Middlesex South Registry of Deeds. This sale came after the property was on the market for sale for 24 days with Bill Donahue of Century 21 Sexton & Donahue. Prior to this 2018 sale there had been no sale of the property in over 10 years.

A copy of the deed referenced above can be found in the Addenda to this report.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ESTIMATE OF DAMAGES:

Parcel #	Area (sf)	Acquisition Type	Final Estimate of Damages
Proposed 12' Wide Easement	1,200	Permanent Easement	$ 48,000

APPRAISED BY: Christopher H. Bowler, MAI, CRE
Jonathan H. Avery, MAI, CRE
Avery Associates
Post Office Box 834
282 Central Street
Acton, Massachusetts 01720

COMPETENCY STATEMENT: The appraisers are experienced in the valuation of the subject property type and in the subject market area.

SCOPE OF THE APPRAISAL: Christopher H. Bowler, MAI, CRE inspected the subject property on January 24, 2022 with property owners Andrew and Katherine Tobin, and Vonnie Reis and Jason Coy of the City of Melrose. Photographs of the property were taken at this time.

In addition to the inspections, Mr. Bowler:

- Reviewed the proposed taking plan with City of Melrose officials and discussed the terms of the easement.
- Obtained additional information regarding the subject property from the City of Melrose Assessor's and the Middlesex South Registry of Deeds.
- Gathered information on comparable residential land sales and restricted, low utility land sales in the Melrose and entire Greater Boston markets.
- Confirmed and analyzed the data and utilized Sales Comparison Approach techniques in order to estimate the total damages that will result from the proposed taking from the larger 8,000 sq ft subject property.

This appraisal has been completed in accordance with the *Uniform Standards for Professional Appraisal Practice* (USPAP 2020-2021) and is intended to comply with the Local Public Agency (LPA) Appraisal Guidelines of the Massachusetts Department of Transportation (MassDOT).

Mr. Avery reviewed the report and concurred with the value estimate.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

EXPOSURE TIME: The Dictionary of Real Estate, 6th Edition, defines ***Exposure Time*** as:

> *"The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of appraisal. Exposure time is always presumed to occur prior to the effective date of appraisal." (p105)*

Small fee simple acquisitions and proposed easements are not commonly marketed because the demand for them typically arises from the specific need of a single party. Therefore, to estimate an easement's exposure time we consider the time required to create, approve, draw up the plan an easement document, have the parcels appraised (if required) and negotiate a final payment figure. Exposure time is considered to happen prior to the date of valuation. It is our opinion, based on above criteria, that a reasonable exposure time for the subject easement is 6 to 12 months.

MARKET VALUE IS DEFINED AS FOLLOWS:

Under established law, the criterion for just compensation is the *market value* of the property taken. The courts in the Commonwealth of Massachusetts have defined market value, as used in eminent domain proceedings, as:

"The highest price, in terms of money, which a hypothetical willing buyer would pay a hypothetical willing seller in an assumed free and open market, with neither party being under any obligation or compulsion to buy or sell." (1)

We have completed our analysis under the 'State Rule.' Therefore, the methodology applied herein is summarized as:

Value of the Acquisition
(Plus) + Severance Damages
(Less) - Special Benefits
Value Difference

Severance damage is defined as "damages to the remainder property caused by a partial taking." (2) Special Benefits are defined as "benefits that arise from the peculiar relation of the land in question to the public improvement, usually resulting in a change in its highest and best use." (3) These are benefits that accrue to the property remaining after the acquisition.

PROPERTY RIGHTS APPRAISED: The property rights appraised in the subject property are a combination of fee simple, and less than fee simple as described in the Description of Land and Improvements section of this report: Fee simple is defined as:

"Absolute ownership unencumbered by any other interest or estate. A fee simple estate is subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat." (4)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CONSIDERATION OF HAZARDOUS SUBSTANCES IN THE APPRAISAL PROCESS: Although no specific geotechnical engineering data has been provided, it is our assumption that the property is free and clear of any hazardous wastes or contaminating substances, as specified in applicable municipal, state and federal regulations or laws. In the event that this is not the case, the value as estimated herein may vary to the extent of contamination and the cost of cleanup.

As of the date of valuation the subject property is not included as either a contaminated site or a location to be investigated by the Bureau of Waste Site Cleanup of the Department of Environmental Protection, Commonwealth of Massachusetts. It is our assumption in this report, therefore, that the subject site is not a contaminated site. However, if the subject site is found to be contaminated, the value estimate contained herein will change.

ASSUMPTIONS AND LIMITING CONDITIONS

This appraisal report has been made with the following general assumptions:

1. No responsibility is assumed for the legal description or for matters including legal or title considerations. Title to the property is assumed to be good and marketable unless otherwise stated.

2. Before the taking, the property is appraised free and clear of any or all liens or encumbrances.

3. Responsible ownership and competent property management are assumed.

4. The information furnished by others is believed to be reliable. However, no warranty is given for its accuracy.

5. All engineering is assumed to be correct. The plot plans and illustrative material in this report are included only to assist the reader in visualizing the property.

6. It is assumed that there are no hidden or unapparent conditions of the property, subsoil, or structures that render it more or less valuable. No responsibility is assumed for such conditions or for arranging for engineering studies that may be required to discover them.

7. It is assumed that there is full compliance with all applicable federal, state, and local environmental regulations and laws unless noncompliance is stated, defined, and considered in the appraisal report.

8. It is assumed that all applicable zoning and use regulations and restrictions have been complied with, unless a nonconformity has been stated, defined, and considered in the appraisal report.

9. It is assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from any local, state, or national government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this report is based.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

10. It is assumed that the utilization of the land and improvements is within the boundaries or property lines of the property described and that there is no encroachment or trespass unless noted in the report.

This appraisal report has been made with the following general limiting conditions:

1. The distribution, if any, of the total valuation in this report between land and improvements applies only under the stated program of utilization. The separate allocation of land and building must not be used in conjunction with any other appraisal and are invalid if used.

2. Possession of this report, or a copy thereof, does not carry with it the right of publication.

3. The appraiser, by reason of this appraisal, is not required to give further consultation, testimony, or be in attendance in court with reference to the property in question unless arrangements have been previously made.

4. Neither all nor any part of the contents of this report (especially any conclusions as to value, the identity of the appraiser, or the firm with which the appraiser is connected) shall be disseminated to the public through advertising, public relations, news, sales, or other media without the prior written consent and approval of the appraiser.

5. Any value estimated provided in the report apply to the entire property, and any proration or division of the total into fractional interests will invalidate the value estimate, unless such proration or division of interests has been set forth in the report.

6. The forecasts, projections, or operating estimates contained herein are based upon current market conditions and anticipated short-term supply and demand factors. These forecasts are, therefore, subject to changes in future conditions.

HYPOTHETICAL CONDITIONS & EXTRAORDINARY ASSUMPTIONS

The final estimate of damages is based upon the *hypothetical condition* that the proposed easement has occurred or is in place as of the date of valuation.

MUNICIPAL PROFILE & MARKET ANALYSIS

The subject property is located in the eastern Middlesex County community of Melrose. Surrounding communities are Wakefield on the north; Saugus on the east; Malden on the south; and Stoneham on the west. Its population per the 2020 U.S. Census is 29,817, up 10.5% from the 2010 U.S. Census. Downtown Boston is 7 miles to the south of Melrose.

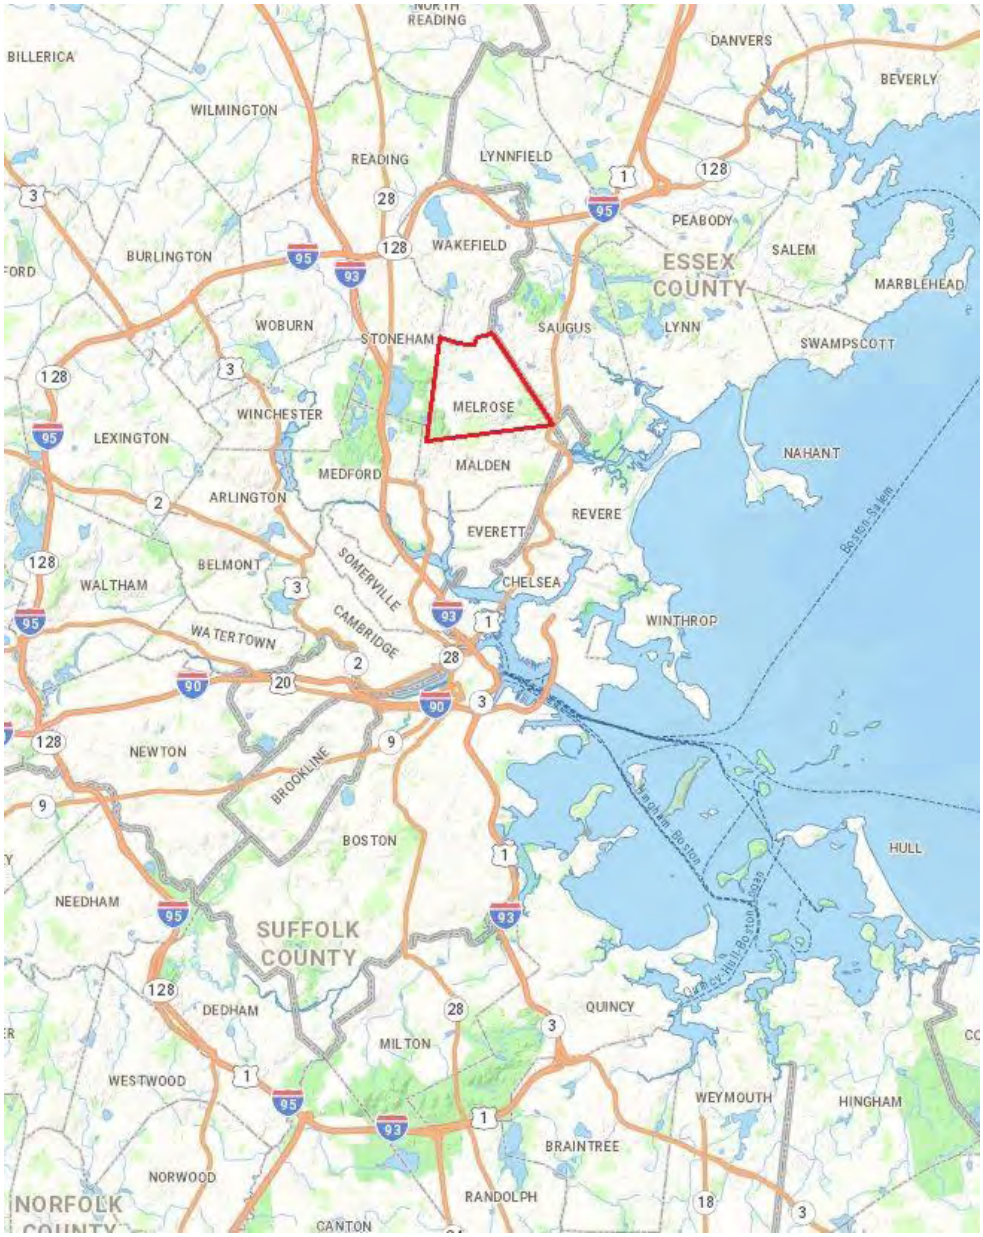
Melrose is a densely developed small city within a triangular region north of Boston formed by I-95, I-93, and Route 1. It is primarily a residential community with a good school system, an abundance of nearby open space, and a quaint Victorian era downtown featuring popular restaurants and stores.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The city has its own hospital; Melrose-Wakefield Hospital and its own cultural identity that includes the 100-year old *Melrose Symphony Orchestra.*

Another component of life in Melrose is its varied open space and recreation facilities. *Ell Pond* is a large natural feature in Melrose's center. Melrose's recreational facilities include two golf courses, *Pine Banks Park*, and *Morelli field*, a state-of-the-art baseball facility. The western portion of the city is comprised of portions of the massive, 2,575 acre *Middlesex Fells Reservation* which contains extensive trails, several ponds, and varying terrain that includes rock cliffs, dense forest and open meadows.

Region – Melrose is within a region just north of Boston bordered by I-93, I-95, and U.S. Route 1. Of the abutting communities Wakefield and Stoneham are perhaps most similar to Melrose in terms of character and demographics. Malden is a blue collar city connected to Boston via the Orange Line of the MBTA subway system. And Saugus is a unique community in which residential neighborhoods are bisected by Route 1, a four mile highway featuring extensive retail and restaurant opportunities and to many, representative of 'suburban sprawl' at its best/worst.



The following is breakdown of these communities by population, density, income, and real estate values:

Town	2020* Population	Area (sq mi)	Density (pers/sq mi)	2020* Median HH Income	Average ** SF Home $ Past Year
Melrose	**29,817**	**4.8**	**6,250.9**	**$ 106,955**	**$ 811,680**
Malden	66,263	5.1	13,043.9	$ 65,975	$ 611,907
Stoneham	23,244	6.7	3,469.3	$ 101,549	$ 733,245
Wakefield	27,090	7.9	3,429.1	$ 100,278	$ 742,986
Saugus	28,619	11.8	2,425.3	$ 88,667	$ 586,934
Massachusetts	7,029,917	10,565.0	665.4	$ 81,215	$ 666,607

Economic & Market Conditions: When completing an analysis of real property, it is necessary to have a proper perspective of economic conditions as of the date of valuation. Economic conditions play a significant role in the price paid for real estate at any given time.

As 2022 begins the economy continues to expand and rebound from a brief, but deep recession in 2020 caused by the COVID -19 pandemic and the shut-down of many economies world-wide for a 6-12 week period.

We will now look at several economic indicators to measure the current health of the economy.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ECONOMIC GROWTH (growth in the U.S. GDP)

	Annualized Growth Rate
2021 Q4	6.9%
2021 Q3	2.3%
2021 Annual	5.7%

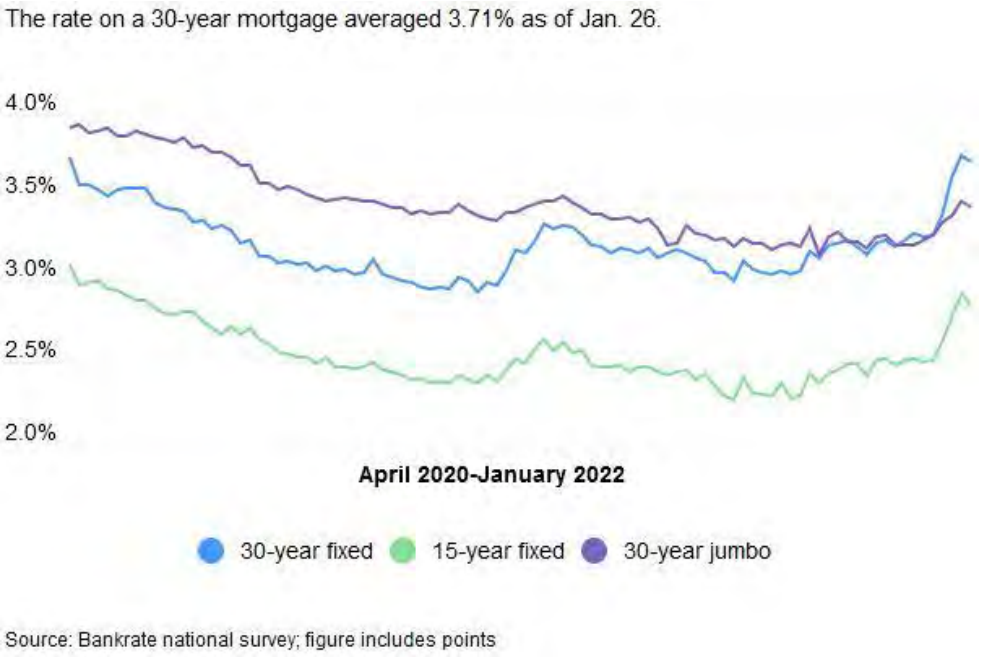
Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The growth* in the U.S. economy picked up in the 4th quarter of 2021 to an annualized rate of 6.9% after anemic growth in the 3rd quarter. (**GDP growth; the value of all goods and services produced here; the official 'scorecard' for the economy*). For the year, GDP growth was 5.7% in 2021. This comes after COVID-19 caused a decline in 2020. Growth was expected to be more robust in 2021. However, labor and raw materials shortages, combined with two different resurgences in infections of COVID-19, lessened growth versus initial forecasts. GDP growth in Massachusetts was a bit more robust, coming in at 8.2% in the 4th quarter and 3.7% in the 3rd quarter of 2021 respectively.

The **employment figures** show continued improvements in the employment market since the depths of the COVID-19 pandemic. The last months figure of +199,000 new jobs was positive, but a disappointment from economists projections. The employment market is in a unique position due to COVID-19. Lackluster job growth is not due to a lack of available jobs. Rather, open jobs are remaining unfilled as people are either reluctant to rejoin the workforce because of fears over COVID-19 or generous state unemployment benefits are encouraging workers to 'stay home' instead of taking the new job. As of December of 2021 a record 11 million open positions remained unfilled.

The **stock market** has been on a wild ride the past 3+ years. In 2018, the market *declined* 6.20% in terms of the S&P 500 Index, the largest annual decline in 10 years. But in 2019 the market rebounded sharply finishing up over 30% for the year. For 2020 the market rose +16.3% after having plunged over 30% in the 1st quarter of the year. For 2021 there was another robust increase, at 26.9%. Thus far in 2022 the market is off to a down start, with the S&P 500 off 7.01% as investors are being spooked by rising inflation and interest rates.

The *Conference Board* **Consumer Confidence Index** declined slightly in January after two straight increases in November and December. The rise of the *Omicron* variant of COVID-19 along with surging inflation and rising interest rates are beginning to take a toll on consumers psyche.



The Conference Board, who compiles the index, suggests a reading above 90 translates into an economy on solid footing while a reading above 100 reflects stronger economic growth. Consumer confidence numbers are considered a leading economic indicator, and they have historically been good predictors of consumer spending for the next three to six months. As consumer spending is roughly 70% of the U.S. economy that is no trivial matter. As of the date of valuation the index was near a record high at 130.4.

The **residential housing market** in Massachusetts has been quite strong over the past five to seven years. An index considered reliable by many market professionals is the Case-Shiller Home Price Index. This data includes only repeat sales of homes. The most recent data from the Case-Shiller Home Price Index listed on the previous page indicates that we are up 13.2% in terms of pricing from one year ago in Massachusetts, and an aggregate increase of 30.17% from three years ago. Extremely limited inventory of homes, yet strong demand is causing the price increases. It should be noted however, that the pace of increase is beginning to slow. The Case Shiller index is up 13.2% year over year, but has been stagnant since September of 2021.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Interest/Mortgage Rates: Mortgage rates fell this week following a surge in the first weeks of 2022. The average rate on 30-year mortgages fell to 3.71 percent from 3.75 percent last week, according to Bankrate's weekly survey of large lenders.

Mortgage experts expect rates to continue to climb from the all-time bottom achieved in January 2021. A year ago, the benchmark 30-year fixed-rate mortgage was at 2.93 percent. Four weeks ago, the rate was 3.4 percent. The 30-year fixed-rate average for this week is 0.78 percentage point higher than the 52-week low of 2.93 percent.

Fixed-rate mortgages follow the benchmark 10-year U.S. Treasury Bond. When bond prices fall, yields or rates rise. Bond prices typically fall when investors are *confident* in the economy and market conditions warrant them putting their money into investments like stocks, with higher risk but higher yield opportunities. The inverse is also true. When investors are nervous about global and economic conditions there is a flight to buy 10-year U.S. Treasury Bonds, which increases their price and lowers their interest rate.

Global concerns about the coronavirus and its impact on the economy *had* pushed investors to safe assets like treasuries, which in turn pushed long term rates to historic lows. However, with a surge in government spending surrounding the COVID-19 pandemic, along with supply and labor shortages in the economy, inflation has surged to 40 year highs and interest rates are under pressure to rise to contain it. The Federal Reserve has signaled that it will raise rates in a move to rein in inflation. The official inflation figure for December 2021 came in at 7%, its highest level since 1982 and a harbinger of higher mortgage rates. Mike Fratantoni, chief economist at the Mortgage Bankers Association, predicts the average rate on a 30-year mortgage will reach 4% by late 2022.

SOURCE: MLS Statistics;								

From a developers/seller's standpoint, the ideal results from these statistics would be *decreasing* inventory, *increasing* sales activity, both pending and closed, and rising prices.

The market at present is plagued by a lack of inventory and has been since 2019. This can be seen in the sharp decrease in listings presented above, and now is also showing up in the number of pending and closed sales. These figures are declining too. The decline in sales activity is certainly not due to a decline in demand. If this were the cases, then prices would be declining as well. However, prices are rising significantly as shown above and by looking back at the Case-Shiller Index.

The high demand, low inventory market is not what one would expect during a global pandemic. But the market at present, and for most of the past 24 months, has been characterized by a lack of inventory, strong demand and rising prices. The market had been aided by historically low mortgage rates. However, mortgage rates are now on the rise. It remains to be seen what this rise will have on the residential housing market.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Melrose Only Residential Market Snapshot: Below are the median house price trends for just Melrose over the past 10 years. The overall trend is for rising prices, at an annual average of 6.94%. The market struggled after the 2008 economic crisis and recession but has generally been on the rise consistently since 2014.

Melrose Median SF Home Price

SOURCE: MLS

Period	Median Price	% Change from Prior Year	Total 10 Year % Change	Average Annual % Change
2021	$ 775,000	6.30%	94.24%	6.94%
2020	$ 729,100	11.57%		
2019	$ 653,500	0.54%		
2018	$ 650,000	5.35%		
2017	$ 617,000	11.67%

2012	$ 400,000	0.25%		
2011	$ 399,000	-----		

Based upon a review of all of the data and indices, a +6% annualized appreciation rate has been applied in the valuation sections to follow.

COMMENTS/CONCLUSIONS: We draw the following conclusions from a review of the data presented above and a review of market activity:

- As of the date of valuation, the economy is recovering after experiencing a severe 'hit' during 2020 as a result of the closure of most economies due to the COVID-19 pandemic. While market and economic conditions are strong, resurgence in the disease at times have caused conditions to regress. A 'return to normal' is not yet at hand. Most downtown office buildings nationwide are still not at pre-COVID-19 capacity in terms of employees.
- Inflation has returned to the economy and is causing some concerns moving forward. Oil prices are up 13+% year to date after rising twice that amount in 2021. When inflation is present there is pressure for interest rates to rise to contain it. Rising interest rates tend to damper real estate markets. The annualized inflation rate for 2021 was 7.0%, the highest in 40 years.
- Consumer confidence remains at a solid level, slightly decreasing in January of 2022 from December. The current level suggests consumers are optimistic about the future but are concerned about growing inflation and the new *Omicron* variant of COVID-19.
- The stock market is negative for 2022 but rose 26.9% in terms of the S&P 500 Index for all of 2021.
- The residential housing market in Melrose and most Massachusetts communities is quite strong and in favor of sellers. This is not what one might expect during a global pandemic. However limited inventory and strong demand is causing rising prices. Extremely low mortgage rates *had* aided the market. However, these rates are beginning to rise to combat rising inflation.

Each of these factors has been taken into consideration with the valuation of the subject property.

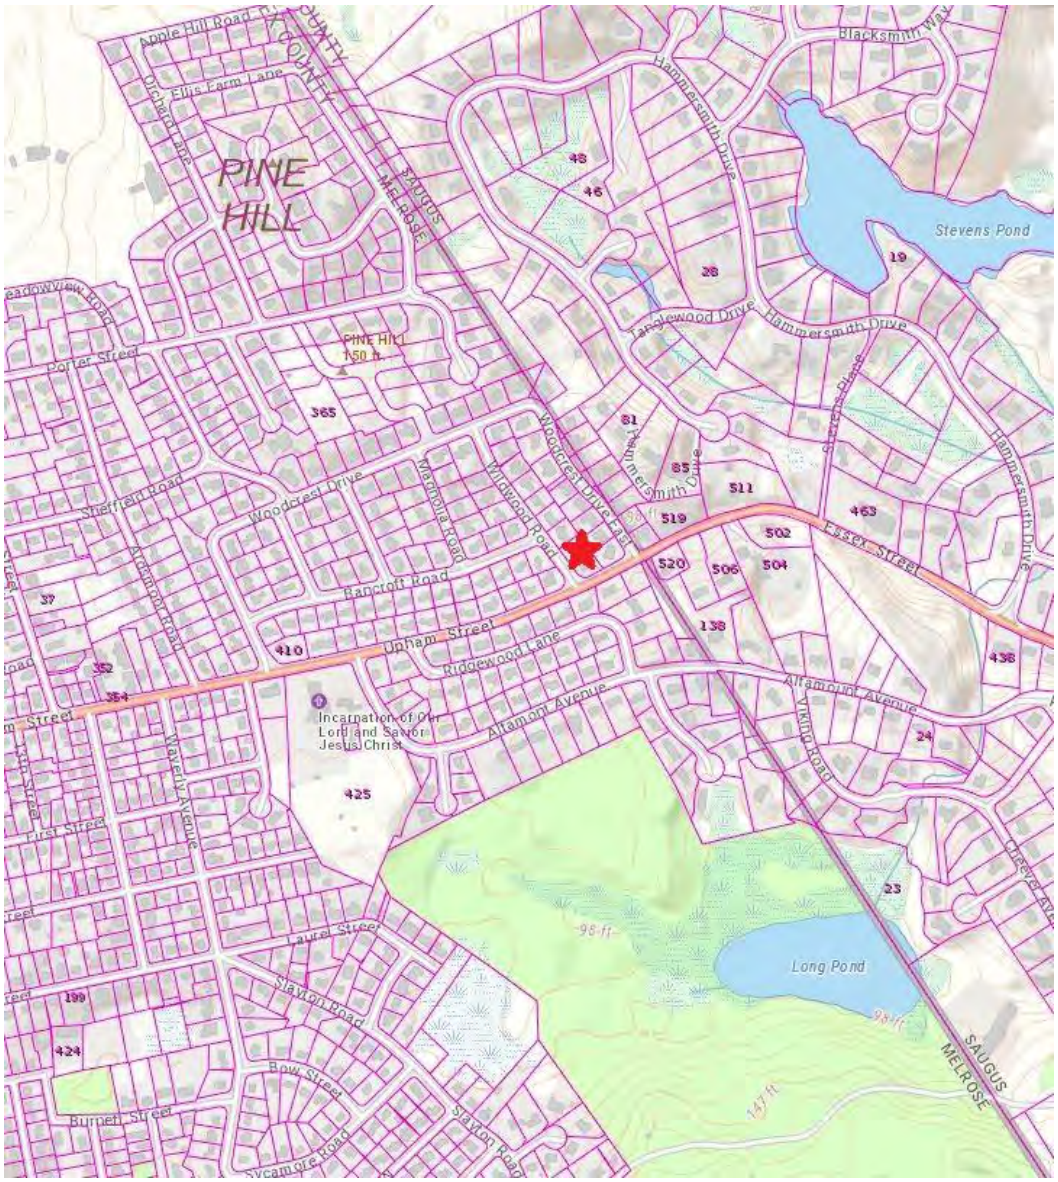
Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

NEIGHBORHOOD ANALYSIS

The larger parcel subject property is located on the easterly side of Wildwood Road in the *Upham Park* neighborhood of Melrose. *Upham Park* is on the eastern edge of the city. Its distance from key places and roadways are as follows:

- Downtown Melrose is 1.3 miles west.
- The Saugus line is 2 blocks or 1,000 feet east.
- Route 1 and the Square One Mall are 1 mile east.
- Melrose-Wakefield Hospital is 1.2 miles west.
- Access to I-93 is 4.5 miles west.
- The 2,575 acre Middlesex Fells Reservation conservation area is 3 miles to the west.

The subject, *Upham Park* neighborhood, is comprised of single family homes primarily built between 1950 and 1962 on lots ranging in size from 8,000 to 12,000 sq ft. Housing styles include cape-cod, ranch, colonial and split level. Recent prices range from $525,000 to $870,000. The higher prices are for homes that have typically been added onto since their original construction and have been recently renovated.



Homes and infrastructure in the subject neighborhood are generally well kept.

Favorable/Unfavorable Factors: *Favorable* factors for the subject location include its proximity to major highways and shopping; the Melrose-Wakefield Hospital; and the good condition of most properties in the neighborhood.

An unfavorable factor is that the subject is close to Upham Street, which is a major roadway in town connecting the Downtown area to Route 1 in Saugus. Upham Street can be busy at times and create traffic noise.

All features have been taken into consideration in the valuation of the subject property.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

TAX DATA

The following is the current assessment and tax burden for the subject property:

Address	Town	Assessors Map	Lot	Size of Site (ac)	Fiscal Year	Current Total Assessment	FY 2022 Tax Rate (per 1000)	FY 2022 Taxes
9 Wildwood Road	Melrose	H9	51	8,000	2022	$ 708,000	$10.57	$ 7,483.56

Based upon a review of comparable sales in Melrose, the current assessment by the town is resonable in our opinion. M.G.L. Chapter 59 calls for properties to be assessed at 100% of their fair market value.

The following are the assessments for the property for the previous two fiscal years:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Address	Town	Assessors Map	Lot	Size of Parcel (ac)	Fiscal Year	Current Total Assessment	FY 2021 Tax Rate (per 1000)	FY 2021 Taxes
9 Wildwood Road	Melrose	H9	51	8,000	2021	$ 643,900	$11.00	$ 7,082.90

Address	Town	Assessors Map	Lot	Size of Parcel (ac)	Fiscal Year	Current Total Assessment	FY 2020 Tax Rate (per 1000)	FY 2020 Taxes
9 Wildwood Road	Melrose	H9	51	8,000	2020	$ 644,000	$11.67	$ 7,515.48

ZONING DATA AND ANALYSIS

The subject is located within the *Single Residence B* Zoning District of the City of Melrose. Permitted uses in the SRB zone include agriculture, single family dwellings, daycare; religious; municipal; or governmental uses.

Dimensional requirements include a minimum lot size of 10,000 square feet, a minimum frontage of 80' and front, side, and rear setback requirements of 20, 12, and 30 feet respectively. The maximum building height is 35 feet or 2.5 stories.

Parking requirements call for two spaces per dwelling unit.

Note that the subject is a legal, but non-conforming property. It conforms to the use and some dimensional requirements of the Melrose Zoning Bylaw. However, it has only 8,000 sq ft of lot area in a district that requires 10,000 sq ft as the minimum lot area. This is allowed as the property was created prior to the adoption of current SRB dimensional requirements.

DESCRIPTION OF THE LAND & IMPROVEMENTS BEFORE ACQUISITIONS

The proposed easement will affect the single family residential property at 9 Wildwood Street in Melrose. This property consists of an 8,000 sq ft parcel of SRB zoned land improved with a two story, 2,133 sq ft cape style dwelling.

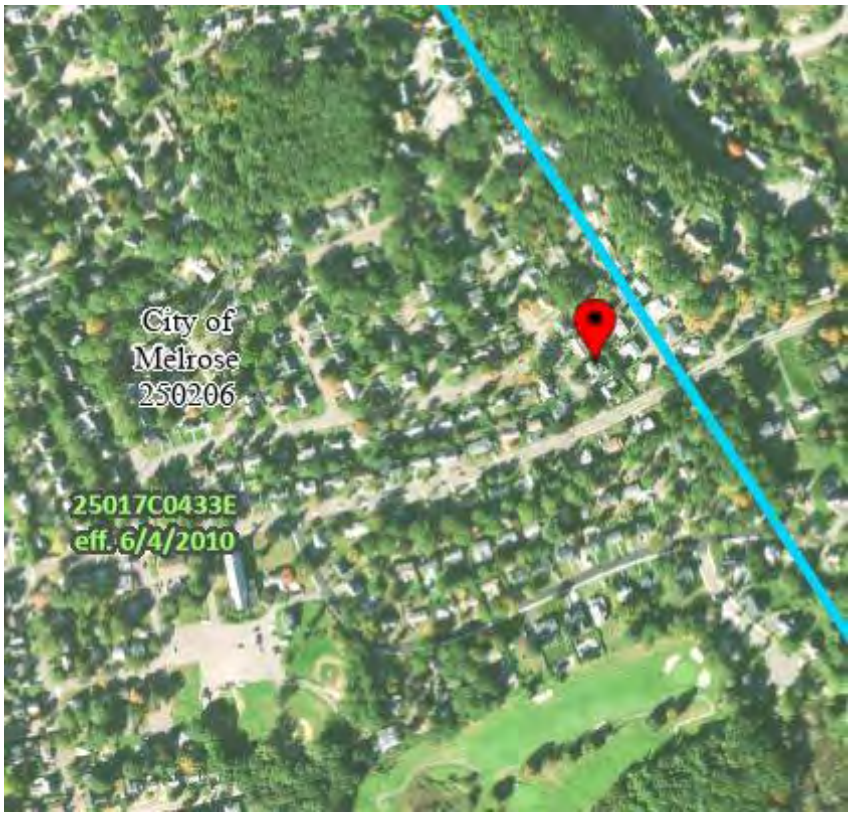
The following is a more detailed description of the property:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Site

The site contains 8,000 sq ft. It is rectangular in shape with 80' of frontage on Wildwood Road and a depth of 100'.

There are no wetlands on site and it is not within the boundaries of a flood hazard zone per FEMA Panel #250 17C 418E dated June 4, 2010.



The site is serviced by municipal water and sewer, electric, telephone and cable t.v. with high speed internet lines.

The front half of the site is generally level, with elevations at 93-94' above sea level. The rear ⅓ of the site dips down to 90-92 feet.

Rights of Way: There are no recorded easements/rights of way over the subject land. However, the appraiser was notified that there is an existing drainage pipe from Wildwood Road that extends underneath the existing driveway on site, through the rear yard and into the abutting property at 205 Woodcrest Drive East. The proposed easement will create a corridor along the southern boundary of the subject land under which a new drainage pipe will be installed.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Flood Map Panel

Building(s)/Improvements

There is a wood frame, cape style dwelling on site, built in 1950 per municipal records. The dwelling contains 2,133 sq ft of living area that includes 7 rooms, 3 bedrooms, and 1 full bath and 1 half bath.

The dwelling is heated by an oil fired boiler using a forced hot water baseboard distribution system. Assessors and recent MLS records indicate that there is a single fireplace inside the dwelling and that there is a full basement level that contains a laundry room and playroom. There is a 165 sq ft composite deck to the rear.

The exterior walls are vinyl. The roof is asphalt shingles.

As of the date of valuation a 1 car garage attached to the southside of the dwelling has been razed in preparation for a proposed 23' x 31' addition.

In addition to the dwelling and deck, there is a front lawn area with shrubbery, and an asphalt pavement driveway.

Comments/Conclusion: The larger property consists of a single family property that includes an 8,000 sq ft lot and a two story, 2,133 sq ft colonial style dwelling. The property is located in the Upham Park neighborhood in East Melrose approximately 1,000 feet west of the Saugus town line. It is served by municipal water and sewer.

PLAN OF LAND TO BE TAKEN; PROPOSED EASEMENT

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CLOSE IN VERSION OF PLAN

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

DESCRIPTION OF PARCELS TO BE ACQUIRED

The proposed easement will be used to install a drainage pipe below ground at 9 Wildwood Road in Melrose that will replace an older pipe that presently exists under the driveway on site. The proposed easement is permanent.

The following is a description of the easement and any improvements thereon:

Proposed Drainage Easement: This is a 1,200 sq ft strip of land of land extends along the southern boundary line of 9 Wildwood Road. It is to be 12' wide by 100' deep. In this section of the subject land there is a grass lawn and a single evergreen shrub, approximately 6' wide, 12' long, and 30 inches high.

Per the Town's information, the easement will be 'on, over, and under' the area taken. So the effect will be that the area of the easement will not be available for use to current ownership in perpetuity. However, given the setback requirements under current zoning, this area cannot be developed regardless, as the side setback requirement in the SRB zone is 12', whereas the easement width is 12'. The easement will be in this setback. .

Contract Work: As part of the contract work for this project, unless noted herein, all landscaping will be replaced by the Town's or State's contractor at no cost to the property owner. In the subject case it is assumed that after the pipe is installed the land will be backfilled and will be at the same level that exists today. The loam will be re-seeded and the evergreen bush will be replanted in the same proximity that exists today.

Effect of Proposed Takings/Easements on Remainder Property: No structures will be affected by the easement. After the construction is complete access to the site will be the same as before the easement. The site will have the same utility. The easement is within the setback requirements of the site, so no improvements could be constructed in that area regardless of the proposed easement.

The taking, in our opinion, will not result in permanent damages to the remainder property.

HIGHEST AND BEST USE BEFORE & AFTER ACQUISITIONS

The Dictionary of Real Estate Appraisal, Sixth Edition defines highest and best use as "the reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible and results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility and maximum productivity." The highest and best use is often referred to as the optimum use. Highest and best use must be analyzed from two perspectives: the highest and best use as vacant, and the highest and best use as improved. The following is a discussion of each:

Highest & Best Use "As Is", or "As Vacant": Given the uses allowed in the SRB zone, it is our opinion that the highest and best use of the 8,000 sq ft parcel is to construct a single family home on site that conforms to market demands and preferences. In the Melrose market, this

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

would likely be a colonial style home with 4 bedrooms, at least 2.5 baths with approximately 3,000 sq ft of living area.

Before Taking/Easement: It is our opinion that the highest and best use of the subject property is for its continued single family residential use.

After Taking/Easement: Overall, the easement will have only a minor impact on the use or utility of the subject property. It is our opinion that the highest and best use of the subject property "after" is for its continued single family residential use.

DESCRIPTION OF THE LAND & IMPROVEMENTS AFTER ACQUISITIONS

After the acquisition of the easement the property will remain the same in size. No trees or structures will have been altered. An evergreen bush is assumed to have been re-installed after construction.

VALUATION - APPRAISAL PROCESS

The methodology traditionally used for the valuation of real property is derived from three basic approaches to value; the Cost Approach, the Sales Comparison Approach and the Income Capitalization Approach. From the indicated values produced by each of these approaches and the weight accorded to each, an estimate of market value is made. The following is a brief summary of the method used in each approach to value.

COST APPROACH:

The Cost Approach is an analysis of the physical value of a property; that is the market value of the land, assuming it were vacant, to which is added the depreciated value of the improvements to the site. The latter is estimated to be the reproduction cost of the improvements less accrued depreciation from all causes.

SALES COMPARISON APPROACH:

The Sales comparison Approach is based upon the principle of substitution, that is, when a property is replaceable in the market, its value tends to be set at the cost of acquiring an equally desirable substitute property assuming no costly delay in making the substitution. Since few properties are ever identical, the necessary adjustments for differences between comparable properties and the subject property are, to a certain extent, a function of the appraiser's experience and judgment.

INCOME CAPITALIZATION APPROACH:

The Income Capitalization Approach is an analysis of the subject property in terms of its ability to produce an annual net income in dollars. This estimated net annual income is then capitalized at a rate commensurate with the relative certainty of its continuance and the risk involved in ownership of the property.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

VALUATION METHODS USED: We are estimating the effect on the value of the larger, 8,000 sq ft parcel of SRB zoned land at 9 Wildwood Road in Melrose, and any damages or benefits, as a result of the proposed easement.

In many cases, the best way to estimate the effect on value is a "before and after" technique estimating the value of the larger property both "before" and "after" acquisitions. The different between the two is the effect on value of the proposed acquisitions.

However, in the subject case, due to the easement involved a simple "before" and "after" method is not applicable and will not properly estimate the value of the acquisitions.

Because the easements will involve portions of the 8,000 sq ft site, we will begin first with an estimate of value of the underlying land using the Sales Comparison Approach and then allocate this value on a per sq ft basis to the acquisition component. These initial indications of value will then be adjusted for easement rights, cost to cure, severance damages, and special benefits resulting in an estimate of final damages resulting from each acquisition parcel.

As we begin the valuation portion of this appraisal report we'll repeat the definition of value being used and definitions of terms involved:

Under established law, the criterion for just compensation is the market value of the property taken. The courts in the Commonwealth of Massachusetts have defined market value, as used in eminent domain proceedings, as:

"The highest price, in terms of money, which a hypothetical willing buyer would pay a hypothetical willing seller in an assumed free and open market, with neither party being under any obligation or compulsion to buy or sell."[1]

We have completed our analysis under the 'State Rule.' Therefore, the methodology applied herein is summarized as:

Value of the Acquisition
(Plus) + Severance Damages
(Less) - Special Benefits
Value Difference

Severance damage is defined as "damages to the remainder property caused by a partial taking."[2] *Special Benefits are defined as "benefits that arise from the peculiar relation of the land in question to the public improvement, usually resulting in a change in its highest and best use.*[3]*" These are benefits that accrue to the property remaining after the acquisition.*

LAND VALUATION

We first completed a valuation of the underlying land for the 8,000 sq ft subject property.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

In order to estimate the value of the land-only, we searched for recent sales of residential land in Melrose for comparison to the subject property.

This search produced 7 sales considered as possible comparisons to the subject. The following is a summary of these sales and comparison to the subject site. Detailed sales sheets on each can be found in the Addenda to this report.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Land Sales Analysis (cont.)

We have compared each to the subject on a price per sq ft of *usable land area* basis. Builders and brokers have indicated to us that the usable land area is most important to buyers of land in Melrose. It's not important that a parcel has 2 acres, if only 1 is upland and the remainder is wetlands. The buyer is focused on the usable land area.

In the case of the 7 sales, most are 100% usable.

The sales have first been adjusted for time, to take into consideration the appreciating market conditions in the regional real estate market. We used a 6% annual adjustment based upon a review of the Case Shiller Index presented earlier and the MLS statistics. The time adjusted indications are shown in the **boldprint** column above.

The time adjusted prices per sq ft range from $23.51 to $76.74, with a mean of $45.83 and a median of $39.95.

Melrose is a fully built out town/small city with very little vacant land remaining. The 'land sales' that do occur are predominantly a result of 'tear downs' in which a property is purchased that contains improvements/homes that are at the end of their economic life and are torn down post sale to make way for a new dwelling. These are 'land sales' because the buyer purchased the property for the land only and gave no value to the improvements that were on site. Of the 7 sales 6 were 'tear down' sales and #2 was a sale of a vacant lot.

A review of the sales indicates that the factors that play the largest role in determining residential land prices in Melrose are; location, size, and utility of the site.

Larger sites tend to sell for less on a per sq ft basis than smaller sites, if all other factors are held equal. A comparison of the two small lot sales; #4 and #5, to any of the other sales, which are larger in size, are examples of the size factor. The biggest factor in the price per sq ft in theses comparisons is size. The smaller sales had a much higher price per sq ft.

No one sale was 'exactly' similar to the subject. And unfortunately, there were no recent sales in the subject, Upham Park neighborhood either. However, the 7 sales presented and analyzed do present a reasonable range for which the value of the subject site on a per sq ft basis should fall. The 'mean' time adjusted price from the 7 sales is $45.83. The mean 'usable land area' is 11,612. The subject is moderately smaller than the 'mean'.

Based upon this analysis and consideration of all sales, and recalling the 'size' factor discussed above, it is our opinion that the value of the underlying land for the subject property, as of January 28, 2022 is **$50.00 per sq ft of land area**. This would suggest an overall value for the subject site of $400,000 (rounded), which after review of the sales of the single family lots presented above, is reasonable.

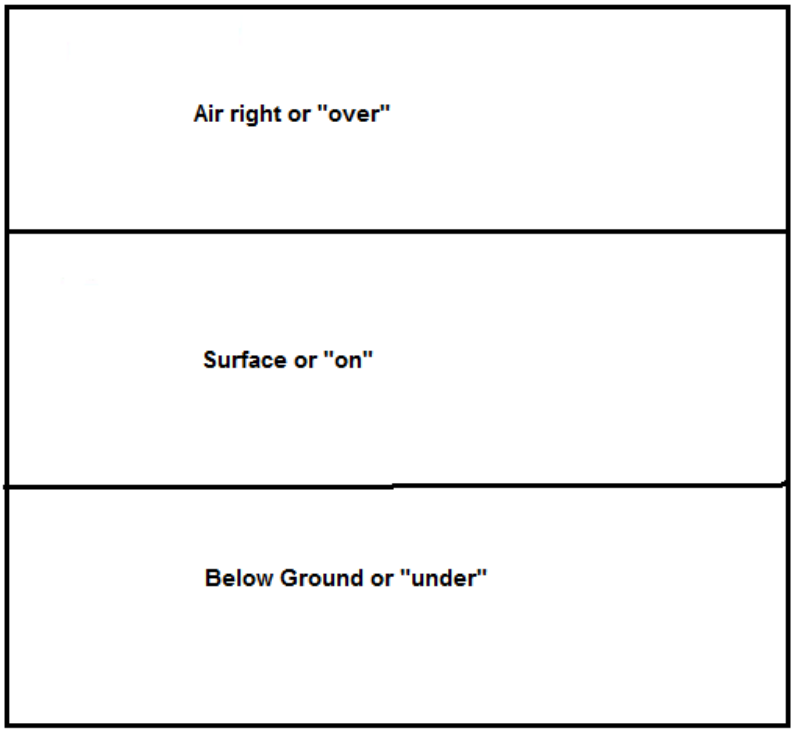
We will now begin with the valuation of the proposed easement:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

PERMANENT EASEMENT VALUATION

This is acquisition of a permanent easement of a 1,200 sq ft section of land along the larger property's southern boundary or side yard.

Encumbrance of the subject property with the permanent easement has an impact on the value of the fee ownership. The rights given up include:



- Owner's exclusive use of the property (quiet enjoyment) is restricted.
- Owner's ability to limit trespass on easement is restricted.
- Owner's ability to develop the easement is restricted.
- Owner's ability to place improvements on the easement is restricted.
- Owner's ability to change topography is restricted.
- Owner's ability to fence off the easement is restricted.
- Owner's ability to utilize the easement area for exclusive drainage is restricted.
- Owner's right of passage is allowed but no new access ways or driveways may be created over the easement.

The owner's retained rights include:

- Ownership of the property.
- Limited yard expansion over the term of the easement.
- Freedom from future liability because it is assumed by the easement holder.

The permanent easement acquisition will be a 'less than fee' acquisition. In terms of easements, the phrase "on, over, and under" is commonly used to describe what rights have been taken and what remains with a parcel. The following diagram illustrates the rights involved with one square foot of land:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1 SQUARE FOOT OF LAND

In terms of the proposed easement most of the exclusive surface or “on” rights will be taken, as will the “over” rights. And given that the easement will be used to install a municipal drainage pipe virtually all of the “under” rights will be taken. The owner will still be able to put temporary structures on the easement area, walk on it, and enjoy any landscaping that is on it. But the rights are not exclusive.

To estimate an adjustment needed to account for the rights given away, we have looked at the following matched pair sales.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

With each comparison the top sale is of land in which all fee simple rights were acquired. The land for the top sale could be developed in accordance with underlying zoning without any further restrictions. The bottom sale in each matched pair involves land in which less than the fee simple right were acquired. These sales were impaired in that the full development potential under zoning was not possible due to legal or physical restraints.

The examples showed between 73% and 97% diminution in value caused by the less than fee rights in comparison to the sale of the property in which all fee simple rights were acquired.

Looking back at our one sq ft of land diagram, it is our opinion that the fee simple rights for that land can be broken down into 50% for the surface rights extending up to approximately 10' above ground; 25% for the below ground rights; and 25% for the air rights.

Using the matched pair examples cited above and the diagram and analysis presented, it is our opinion that the proposed easement over the 1,200 sq ft section of the subject land will take 80% of the rights from the fee simple ownership. This figure will be used in the calculations to follow.

In terms of the contributory value of any existing improvements, there is none in our opinion. As stated earlier, as part of the contract work for this project, unless noted herein, all landscaping, shrubs, and pavement will be replaced by the Town's or State's contractor at no cost to the property owner unless otherwise noted.

In terms of the Cost to Cure there are no items to be considered here.

In terms of Severance Damages there are none in our opinion. The proposed taking of the 1,200 easement will not cause a loss in value to the remainder property in our opinion. There will be no loss in development potential in the future. The same (or improved) access to the property will be retained. There will be no change to the productive use of the property.

And in terms of Special Benefits, as defined previously, there are none created in our opinion as a result of these acquisitions.

Based upon a description of the permanent easement and the analysis completed, it is our conclusion that most of the rights will be transferred to the easement holder. As a result, we conclude the owner retains about 20% of the value while the easement holder gains 80% of the value. And we have previously estimated the value of the underlying land at $50 per sq ft.

The estimate of total damages as a result of the acquisition of permanent easement is calculated as follows:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Parcel #	# of Sq Ft		Price Per Sq Ft		Indication
Proposed 12' Wide Easement	1,200	x	$ 50.00	=	$60,000
Adjusted @	80%	for easement		=	$48,000
		Plus			
	Contributory Value of Improvements				$0.00
		Plus			
	Cost to Cure				$0.00
		Plus			
	Severance Damages				$0.00
		Less			
	Special Benefits				$0.00
			Total Damages		$48,000
			ROUNDED		**$48,000**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

RECONCILIATION AND FINAL ESTIMATE OF DAMAGES

The proposed acquisition parcel is a permanent easement of 1,200 sq ft encumbering the underlying 8,000 sq ft fee property known as 9 Wildwood Road in Melrose, MA.

The acquisition is part of a proposed drain relocation project proposed by the City of Melrose.

To complete this assignment, we first estimated the market value for the fee simple interest in the subject land based on a Sales Comparison Approach involving 7 sales of residential zoned land in Melrose. Next, the fee simple interests were discounted reflecting the retained and given up rights in the subject easements.

We considered the contributory value of any improvements on the parcels being acquired, and cost to cure items were considered as well.

For Severance Damages and Special Benefits, as defined herein, there were none in our opinion.

Based upon the methods of valuation utilized, it is our opinion that the total damages resulting from the proposed acquisition, as of January 28, 2022 is as follows:

Parcel #	Area (sf)	Acquisition Type	Final Estimate of Damages
Proposed 12' Wide Easement	1,200	Permanent Easement	**$ 48,000**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CERTIFICATE OF THE APPRAISER - USPAP Standards Rule 2-3

I hereby certify that, to the best of my knowledge and belief:

- That on January 24, 2022, I personally made a field inspection of the property herein appraised and afforded the owner the opportunity to accompany me on the inspection. I have also, on January 24, 2022 personally made field inspections of the individual comparable sales relied upon in making said appraisal. The property being appraised, and the comparable sales relied upon in making this appraisal, were as represented in this appraisal.

- The statements of fact contained in this report are true and correct, subject to the limiting conditions herein set forth.

- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.

- I have no present or prospective interest in the property that is the subject of this report and no personal interest or bias with respect to the parties involved. I will not directly or indirectly benefit from the acquisition of such property appraised.

- My engagement in this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the current Uniform Standards of Professional Appraisal Practice.

- No one provided significant real property appraisal assistance to the person signing this certification.

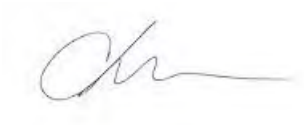
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and legal instructions, and are my personal, unbiased professional analyses, opinions and conclusions.

- That to the best of my knowledge no portion of the value assigned to the property appraised consists of items which are non compensable under the established law of the Commonwealth of Massachusetts.

- That I have no direct or indirect present or contemplated future personal interest in such property or in any benefit from the acquisition of such property appraised.

- That I have not revealed the findings and results of such appraisal to anyone other than the client and I will not do so until so authorized by said client, or until I am required to do so by due process of law, or until I am released from this obligation by having publicly testified as to such findings.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)



- I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three year period immediately preceding the acceptance of this assignment.

- That any decrease or increase in the market value of real property prior to the date of valuation caused by the public improvement for which such property is acquired, or by the likelihood that the property would be acquired for such improvement, other than that due to physical deterioration within the reasonable control of the owner, was disregarded in determining the compensation for the property.

- That I have collected and analyzed relevant data and applied appropriate valuation techniques and methods. As a result of my analysis, it is my opinion that the value of the property to be acquired and the damages to the remainder, if any, based upon my independent appraisal and the exercise of my professional judgment as of the effective date of appraisal (January 28, 2022) is as follows:

Parcel #	Area (sf)	Acquisition Type	Final Estimate of Damages
Proposed 12' Wide Easement	1,200	Permanent Easement	**$ 48,000**

April 26, 2022

To: Mayor Paul Brodeur

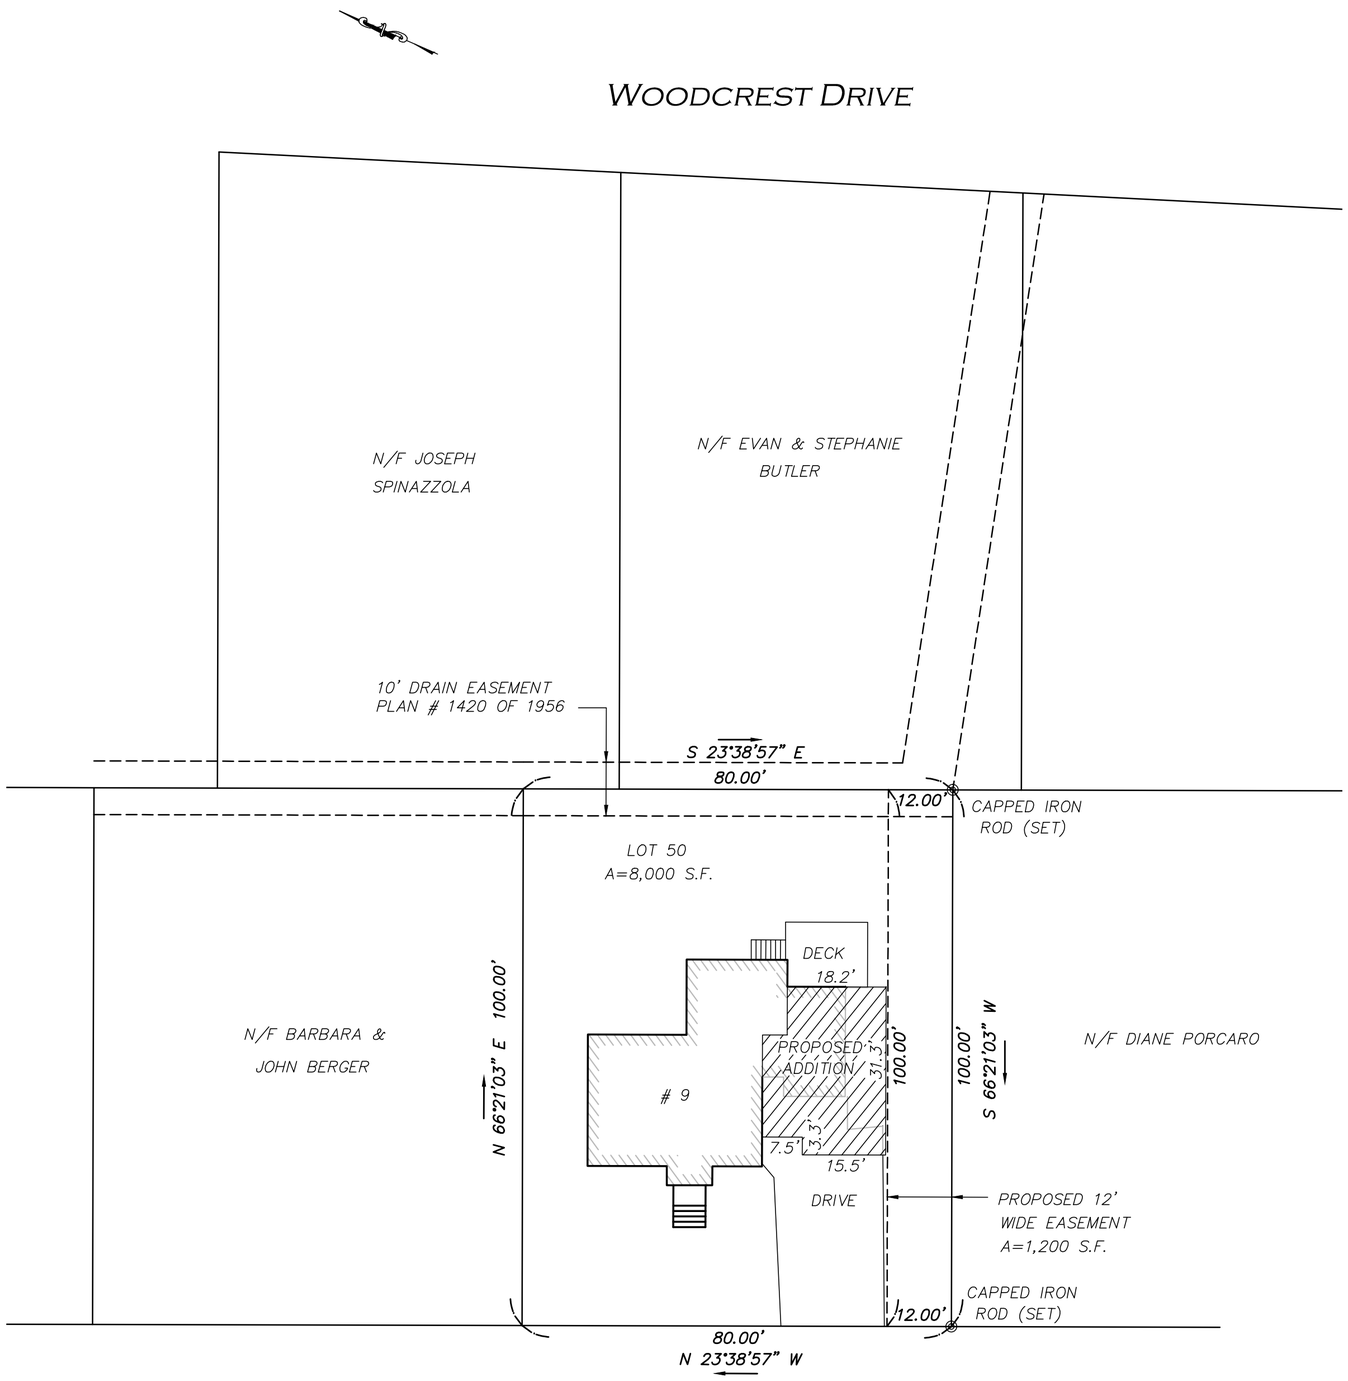
Re: Vote for approval of purchase of Drainage Easement and Appropriation of Funds to Purchase Easement at 9 Wildwood Rd in Melrose, MA.

Dear Mayor Brodeur,

In December 2021, the residents of 9 Wildwood Rd. in Melrose called the Engineering Division of the DPW because a city-owned drainage pipe was encountered during excavation related to an addition to their house. Engineering staff visited the site and confirmed that the 30-inch reinforced concrete pipe (RCP) was active and is owned by the City. The pipe was installed during the 1950's when the subdivision was developed. This structure is shown on the City's GIS mapping and was known to us, however an easement for the pipe was never recorded as part of the development project. There is also no evidence on the property or in any registry filings of the existence of this easement. As such, the owners of the property were previously unaware of the existence of the pipe.

This request is made pursuant to the requirements of state law which require City Council approval for this easement, and for City Council to appropriate the necessary funding to do so. The City engaged the services of Avery Associates to appraise the fair value of the easement. Avery's assessment of the value is $48,000. A copy of the assessment is attached to this memorandum as Exhibit A. The owners of the property have agreed to accept that amount and, in return will grant a drainage easement, in perpetuity, to the City in exchange for purchase of this easement.

A confirmatory record of the easement is necessary for the DPW to maintain the pipe which carries a significant amount of flow from the surrounding neighborhoods and is a critical piece of infrastructure.



The Engineering Division of the Department of Public Works recommends that the City Council vote to authorize you to accept and purchase on behalf of the City of Melrose a drainage easement from the property owners located at 9 Wildwood Rd. in Melrose, containing 1,200 square feet of land, more or less, as depicted on a plan entitled "Proposed Drainage Relocation, 9 Wildwood Road, Melrose, Mass", dated December 24, 2021, as amended and prepared by Edward J Farrell. This plan is attached as Exhibit B. We further request that the City Council vote to appropriate the sum of $48,000 for the purchase of this easement at 9 Wildwood Rd in Melrose from the current property owners as professionally assessed by Avery Associates in their report of January 28, 2022.

Sincerely;

Vonnie Reis

05 MAY 2022

MEMORANDUM FOR MELROSE CITY COUNCIL

FROM: Robert Driscoll
Melrose Veterans Advisory Board
33 Thurston Road
Melrose MA 02176

SUBJECT: An Order Relative to Property Tax Relief for Active Duty Members of the National Guard

1. Due to a previously planned out of state vacation I am unable to appear before the City Council tonight to express my endorsement of this order. The order is a strong message of support for our uniformed citizens and demonstrates to them the City of Melrose supports their service to our country.
2. A deployment is a difficult time for a military member and their family left behind. The strain on relationships, finances and mental health can be overwhelming. It requires the backing of relatives, neighbors, schools and communities to keep the family and household intact.
3. Melrose has consistently lead the Commonwealth in supporting and honoring our citizen soldiers and veterans. This is apparent with our dedicated monuments and buildings across the city (Soldiers and Sailors Memorial Hall & Melrose Veterans Memorial Middle School), our multiple veteran organizations (2 VFWs, American Legion, Veterans Advisory Board, Friday Veterans Club, Melrose Memory Project, etc.) as well as the various activities and ceremonies conducted throughout the year.
4. This order before you tonight is another brick in the wall of support for our deploying military citizens. I thank Councilor MacMaster and Councilor Karamcheti for bringing the order forward. I ask the Council to give this order the utmost support.

Respectfully.

Robert Driscoll
Chair
Melrose Veterans Advisory Board

CITY OF MELROSE

BOARD OF ASSESSORS

Sarah MacLellan
Chief Assessor
smaclellan@cityofmelrose.org

City Hall, 562 Main Street
Melrose, Massachusetts 02176
Telephone - (781) 979-4104

To: Margot Fleischman
Chief of Staff & Director of Strategic Initiatives & Communications
From: Sarah MacLellan
Meeting Date: April 25, 2022
Subject: Amendment of Revised Local Options for Property Tax Exemptions

Dear Margot:

It has come to my attention that Order No. 2021-83, (an Order to Amend Property Exemptions as Stated in M.G.L. Chapter 59, Clause 41C, 41A and 17D per local option) which was passed by the Melrose City Council on March 1, 2021, referenced clauses of M.G.L. Chapter 59, Section 5 that do not reflect the full intention and impact as described within the body of the Order. [See attached Exhibit A, documentation relative to Order No. 2021-83] In order to correct these administrative errors and to properly update the City of Melrose Code, I recommend that the City adopts the following clauses:

1. M.G.L Chapter 59, Section 5, **Clause 17E**, which automatically increases each year the amount of assets (whole estate) certain senior citizens and surviving spouses and minors may have in order to qualify for an exemption under M.G.L. c. 59, § 5, Clause 17D by the COLA determined by the Commissioner of Revenue. The asset limit increases resulting from adoption of this provision operate cumulatively.
2. M.G.L Chapter 59, Section 5, **Clause 41D**, which automatically increases each year the amount of the income (gross receipts) and assets (whole estate) certain senior citizens may have to qualify for an exemption under G.L. c. 59, § 5, Clause 41C by the COLA determined by the Commissioner of Revenue. The income and asset limit increases resulting from adoption of this provision operate cumulatively.

Best Regards,

Sarah MacLellan

Encls.

ORDER-2021-83

Clause 41C Senior Real Estate Exemption Local Options

Offered by Mayor Paul Brodeur

BE IT ORDERED

Amend Property Exemptions as stated in MGL Chapter 59 ~~Clause 41C~~, 41A, and ~~17D~~. Per Local option. → **Section 5, Clauses 41D, 17E (and 41A, per local option)**

1. Clause 41C Single - Age 65 or older-single
   a. Income: from $20,000 to $20,000 + COLA annually
   b. Assets: from $40,000 to $40,000 + COLA annually
   → **41D**

2. Clause 41C Married - Age 65 or older-single
   a. Income: from $30,000 to $30,000 + COLA annually
   b. Assets: from $55,000 to $55,000 + COLA annually
   → **41D**

3. 17D Surviving Spouse- 70 or older
   a. Assets: $40,000 + COLA
   → **17E**

4. Clause 41A- Senior Deferral
   a. Increase Max Income from $40,000 to $60,000 ✓

VIII. ADJOURNMENT

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ORDNC-2022-4

REVOCATION OF CHAPTER 59, SECTION 5, CLAUSE 57 TO ALLOW FOR QUALIFYING TAX RELIEF

Clause 57 limits the amount the Board of Assessors can grant in property tax exemptions, abatements, or "credits" to an amount not to exceed annually the amount of income tax credit set forth under subsection (k) of section 6 of chapter 62. (Amount of Senior Circuit Breaker Credit. For Calendar Year 2021, $1,170)

In the past, clause 57 has not impacted Melrose exemptions because exemption amounts have not exceeded $1,000. However, this clause may have an effect in the future as a result of recent and proposed local tax policy changes and other bills related to property tax that are pending at state level.

Impacts Clause 57 may have on our pending and current Exemptions:

- Clause 57 cannot co-exist with pending bill H3766 (Sr. Circuit Breaker Tax Exemption) currently before the state legislation for passage. Clause 57 is more restrictive than the pending bill, as it specifically states, the "The Board of Assessors may appropriate monies for and grant property tax rebates in an amount not to exceed annually…" The clause restricts the ability to grant property tax exemptions to 100% of 62/6(k) ($1,170 for 2021), whereas the new legislation H3766 (Sr. Circuit Breaker Credit) allows an exemption of up to 150% of 62/6(k).
- Clause 57 restricts the Board of Assessors from granting multiple exemptions to a single parcel. If clause 57 is revoked, the Board of Assessors could grant both a Senior Circuit Breaker Exemption AND a Clause 41C Exemption (Senior property tax exemption) to a single parcel, if an applicant meets the eligibility criteria for both.
- Should Clause 56 (Tax Relief for Active Duty National Guard Members) be adopted locally, Clause 57 would limit the abatement amount to the amount of income tax credit set forth under subsection (k) of section 6 of chapter 62. While the amount of tax abated under Clause 56 is at the discretion of the Board of Assessors, revoking clause 57 removes any limitation on that amount.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE

In City Council

June 6, 2022

AN ORDER

ORDER-2022-126

Acceptance of One Hundred and Fifty Thousand Dollars ($150,000) from An Act Relative to Immediate Covid-19 Recovery Needs for accessibility and safety improvements for the 2 elevators at the Melrose High School

Offered by Mayor Paul Brodeur

BE IT ORDERED

As a result of an Act relative to immediate COVID-19 recovery needs (Chapter 102, Section 2A), the City of Melrose has been awarded a State Earmark not less than One Hundred and Fifty Thousand Dollars ($150,000) which shall be expended for the accessibility and safety improvements for the two (2) elevators at the Melrose High School.

Syska Hennessy has worked to assess the conditions of the current elevators and has provided to the City a detailed scope of work to address accessibility and safety improvements necessary for the elevators to meet compliance and to pass inspections. This assessment was presented for consideration to utilize available ARPA funds for this project for systematic replacement of outdated elevators that have exceeded useful life and for the equitable provision of services in the facility. It specifically targets public safety in our school buildings. These criteria served as a basis for our request. The project estimates would most likely have been incurred by the City had it not been funded by available ARPA opportunities.

We formally request acceptance of this grant award of $150,000 from the Department of Elementary and Secondary Education (Massachusetts DOE). Funds will be deposited into a dedicated account set up by the City Auditor and designated specifically for the above-mentioned project. Additional funds necessary to complete this project have been approved through the City's ARPA Project process. There is no cost or encumbrance required to enter into this agreement. Upon completion of this project, necessary preventive maintenance costs will be incorporated into the Department of Public Works Operating Budget.

I. INTRODUCTION

This report encompasses field observations made of the two (2) hydraulic passenger elevators at Melrose High School, 360 Lynn Fells Parkway, Melrose, MA. Survey Conducted by Steve Connelly, Syska Hennessy Group, Inc., Vertical Transportation.

The Purpose of this study is to:

1. Evaluate the condition of the existing elevators by on-site observations.
2. Document our observations.
3. Indicate any safety and code violations or deficiencies.
4. Provide summary recommendations for upgrading or repairing the elevator equipment to best serve the immediate and future building needs and to meet new regulations.
5. Provide probable renovation costs and approximate schedule of elevator renovations.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

II. CODES, LAWS, AND REGULATIONS

Codes, laws, and regulations applying to this study are as follows:

1. MGL (Massachusetts General Laws) Chapter 143, sections 62 through 71G.
2. 524 CMR (Commonwealth of Massachusetts Elevator Board Regulations) latest edition
3. 521 CMR (Commonwealth of Massachusetts Architectural Access Board Regulations) latest edition.
4. American National Standard Institute ASME A17.1, 2004 and 2013 Safety Code for Elevators and Escalators) with Massachusetts Modifications as found in 524 CMR Section 35.00. (Latest edition).
5. American National Standard Institute ASME A17.1a-1997, ASME A17.1b-1998, ASME A17.1c-1999 and ASME A17.d-2000, Addenda to ASME A17.1-1996.
6. American National Standard Institute ASME A17.1 and ASME A17.1d-2002, Addenda to A17.1-2000.
7. American with Disabilities Act Accessibility Guidelines (AADAG) latest Edition.
8. 527 CMR 12.00 (Massachusetts State Electrical Code) promulgated by the Board of Fire Prevention Regulations.
9. NFPA 70 (National Electrical Code) latest Edition.
10. All related local and national codes.

Note: In every case the more stringent will apply.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

III. GENERAL COMMENTS

Please be advised that this office has concluded its review of the elevators located at the above referenced location. The elevators located in Melrose High School were installed in 1975 and many major components are original equipment.

The review conducted did not involve any testing of the elevator systems and is based on general operation as well as general condition of areas and equipment. No covers, fixtures or modules were removed during the review.

All equipment is showing wear consistent with the age and use of the elevators. Typical effective timeline of an elevator is typically 25 years.

The underground equipment for passenger elevator 1 and service elevator 2 were replaced in 2018 and contain protective PVC encasement. These systems meet current code.

A. General History – In Ground Hydraulic Elevator

As general history, the inception of the hydraulic elevator occurred prior to WW II; however, it was not until the late 1940s and early 1950s that the popularity of the hydraulic elevator soared. It was considered an economical alternative to the standard overhead or basement traction elevator. Direct acting hydraulic elevators are raised by forcing pressurized oil through a valve into a steel cylinder located underground. The pressure forces a piston to rise, lifting the elevator platform and car enclosure mounted on it. The car is lowered, braked, and stopped by opening the valve and allowing the weight of the car to force oil from the cylinder in a controlled manner. Since the weight of a hydraulic elevator car is borne by the piston, there is no need for structural framework or load-bearing rails as is necessary for the traction elevator.

A few major elevator companies apparently were initially reluctant to incorporate the hydraulic in-ground design due to the belief that the hydraulic elevator was not as inherently safe as a traction elevator since it contained no safety or braking device. Based on demand; however, the hydraulic elevator became very popular due to its very design and cost effectiveness.

B. Current Events – Hydraulic Elevators

Over the past thirty years and more specifically the last fifteen years it has been confirmed that the underground environment presents several potential problems to hydraulic cylinders. Alkalines, sulphur, salt, electric current, and other chemical agents contained in the soil and groundwater surrounding the cylinder may cause the cylinder to corrode. As the corrosive effects on underground cylinders have become known, elevator companies have been developing various methods and devices designed to control cylinder corrosion. Some cylinders have been covered with tapes and other coatings. Cathodic protection utilizing an anode or impressed current has been developed, and some cylinders have been enclosed by PVC (Polyvinyl Chloride). [Note: In 2003, PVC became a requirement under A17.1 national elevator code for all new installations and/or replacement of existing equipment. Prior to that time, the installation of PVC was not a mandated or common practice.]

The utilization of PVC potentially inhibits corrosion and deters rapid deterioration of the cylinder. While these improvements extend the useful life of hydraulic cylinders, it is, nevertheless, impossible to know with certainty the condition or remaining useful life of a hydraulic cylinder located beneath the ground.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The underground equipment for passenger elevator 1 and service elevator 2 were replaced in 2018 and contain protective PVC encasement.

Hydraulic jacks and buried piping of hydraulic elevators have the same inherent risks of corrosion from water or electrolysis that occurs to any metal that is underground. The inability to detect such corrosion prior to the development of leaks causes such a cylinder to carry with it certain risks associated with hydraulic fluid (oil). These risks include both environmental contamination and possible catastrophic failure by allowing the fluid to escape rapidly causing the elevator car to descend in an uncontrolled manner with a risk of injury as well as property damage and environmental problems.

Based on the 2018 replacement date, the integrity of these units may be intact and may not require replacement.

C. **Elevator Control Systems**

The elevator control system for service elevator 2 is original 1975 (based on drawing detail) relay Logic. The control system for passenger elevator 1 was installed in 1998 and is relay and microprocessor design. There have been considerable advancements in controller equipment since the design of these controllers both in safety as well as operability and response. Complete replacement of both controllers is recommended.

It is our understanding that the elevators do not operate on emergency power. With the new controller, the intent is a Battery Lowering control system which, upon loss of power, the elevator will lower to the bottom landing and open its doors to release any passengers. The doors will then shut. The elevator will remain at the landing until normal power is returned to the elevator. At that time the battery will recharge.

D. **Elevator Power Unit**

The power unit for service elevator 2 utilizes a V-Belt design which contains the motor and muffler under the tank. Due to age, the condition of the unit is poor. Replacement is required. Recommended is a submersible unit which typically runs quieter.

The power unit for passenger elevator 1 which contains the motor, valve, pump, muffler, and all related components was installed in 1998. As noted, typical effective timeline for a power unit is no more than 25 years. The entire power unit including the tank and oil should be replaced.

E. **Door Operation**

When attempting to provide better and more prompt elevator service for any building, it should be recognized, when an elevator system performs its task of vertically transporting passengers, that one-half of the time an elevator is actually standing still while it is opening and closing doors and transferring people.

The most frequent causes of elevator breakdown occur at the point where passengers are most frequently exposed to the system; that is, at or near the doors and associated mechanisms. Coupled with age of the systems, reliability cannot be expected on a long-term basis.

The entire door operating system on the elevators as a whole show wear and should be completely replaced. The existing door operating system on each of the elevators is no longer in

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

a reliable condition. It is recommended that complete new door operating systems be installed. This would include a high-speed door operator, new car door panels, new landing doors, new hangers and tracks, new interlocks, car door restrictor and door closer. Included also will be landing door retainers which are a new code requirement to prevent displacement of hoistway doors.

The elevators are equipped with an infra-red electronic door protection system. It is strongly recommended the car doors be upgraded with a curtain of direct infra-red beams which beam 'green' on open, 'flashing red' on closing and steady 'red' on close which generally reduces the potential of liability and provides the most enhanced doorway protection to the user. Nudging, which pushes the rider to either enter or exit the elevator, will not be activated on the elevators. Should a person be utilizing a walking device or crutches, nudging can prove to be a liability since it disables the electronic edge and proceeds to shut the door at slow speed. A buzzer is also available which will remain active for an alert to the passenger to proceed with entering or exiting the elevator.

The door system on the elevators have been in operation from original installation. Over the years due to wear and tear, the door welds have begun to wear. To attempt to reuse the doors as well as to refortify and redrill same to incorporate a new door operator and new related door equipment will result in an equally costly product were new doors actually installed. It is recommended that at the time of modernization all landing door panels and car door panels be replaced. These new landing doors shall be wrapped in satin stainless steel. The car door will be furnished in satin stainless steel. The existing frames will be cleaned and retained.

It is to be cautioned that earlier vintage 1970s elevator doors were typically constructed with an asbestos liner. Drilling into these doors to replace components is not recommended due to the potential risks involved. These landing doors will be replaced, and new doors will be wrapped in satin stainless steel.

Another cautionary matter in relation to these doors is the potential requirement for testing by a certified ACM firm for appropriate disposal. It is to be stated that during the removal of the doors, there is no disturbing of the interior liner of the doors; however, it may be the owner's intent that disposal may need to be specifically addressed. The testing and the disposal of the doors is typically the responsibility of the Owner. (Removal by elevator contractor; wrapping prior to removal by others.) In most cases the elevator contractor has been able to dispose of the doors without any issues. This will be a matter for further discussion. If there is to be any testing, access for testing to the hoistway side of the doors will need to be accommodated by the elevator contractor.

F. **Americans with Disabilities Act**

The United States Congress has passed landmark legislation designed to improve access to public accommodations and commercial facilities for people with disabilities. Known as the Americans with Disabilities Act, or ADA, it has potential for far reaching impact on building owners. The ADA is not a building code; rather it is a civil rights act. Building owners found to be in violation might be required to compensate an injured party, correct non-conformance, and be subjected to fines up to $50,000 for the first violation and $100,000 for subsequent violations.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG) was produced by the US Architectural & Transportation Barriers Compliance Board and originally published on July 26, 1991.

The elevators are not in general conformance with ADA regulations. Door operation due to wear and age of the equipment results in continual maintenance tasking of the doors to be adjusted to meet code established timing criteria. There was variation in compliance with the landing door speed and closing time.

Replacement of all door equipment, door operator and door panels will allow adjustments and door operation to be consistent and in conformance with code.

The hall fixtures are not mounted at MA ADA height. At completion of the project all fixtures shall be located at code compliance.

Both elevators do not contain phones. When the elevators are modernized, the car operating panel in the cabs will be replaced, and the emergency phone will be accessible by a push button directly on the panel.

It will be necessary for the building to provide a dedicated telephone line to each of the elevator machine rooms. Also required is a 24/7/365 live operator service. Code does not permit the phone to be programmed into a service that may place the call into a 'holding' pattern. There are various services that provide this function. One is Kings III Emergency Communications (Kingsiii.com). Typically, the elevator company does not provide this service due to the liability associated with same in relation to their standard answering service.

G. **Fire Emergency Requirements**

After several fire disasters occurred in high-rise buildings during the sixties with considerable loss of human life, the role of elevators in multi-storied buildings became a great concern to regulatory bodies. The emphasis being then, as well as today, that the public should not ride elevator equipment during fire emergencies, but rather be evacuated from the shaft (a natural flue for smoke and gases) as quickly as possible. A second concern was to enable the firefighter to reach a fire in a building promptly. With these objectives in mind, regulations and codes were created both locally and nationally to enable elevators, both high rise and low rise, to respond to this need.

As experience grew within the elevator industry, there were many changes that became necessary to ensure the safety of both the public and the firefighter. The intention of the changes listed in regulation was to standardize the many variations of fire emergency service and not to do this would jeopardize the life-safety of the firefighter.

The implementation of this regulation required a visual and audible signal in the elevator with a "Call Cancel" button, a "Door Open" and a "Door Close" button and a three-position key switch marked "OFF", "HOLD", and "ON". In addition, a three-position key switch was to be installed in the hall at the main floor marked "BYPASS", "OFF" and "ON".

Current national code was again revised in 2000 which includes a mandate for the hall key switch to be changed from "Bypass" to "RESET", "OFF" and "ON". This requires a mis-firing smoke detector to be repaired rather than being bypassed. A visual signal is also required at the hall key switch. Another change which occurred in 2004 National Code is the requirement of a

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Firefighters' locked panel in the car operating panel as well as specific instructions located within the cover of the box along with instructions located at the hall firefighters' key switch.

The service elevator does not have Firefighters' Service. There exists the potential, if a fire is present in the building, the riders could be delivered to an active fire floor. With the code safety requirements of Firefighters' operation, the elevator would automatically be returned to the main landing. Should the main landing be a fire floor, the elevator would automatically recall to a different, pre-assigned floor.

When the elevators are updated, they will contain all current Elevator Firefighters' Service features.

The Building Fire Alarm Panel is an addressable system: However, further verification is required to confirm capability for the service elevator requirements.

H. **Cab and Fixtures**

When such components as door operators are replaced along with car door operating parts including car door hangers, tracks, and clutches, it is necessary to completely remove the car doors. Since field labor is the same, or even sometimes less, when complete new car doors, pre-drilled and properly reinforced are installed, the actual additional material cost usually adds very little to the overall costs as compared to reusing existing car doors.

When work is performed on landing doors, hoistway landing control systems, hoistway wiring including traveling cables, terminal slowdown and other limit switches, labor is most efficient when an open platform is available as a working surface.

In consideration of this fact, it is most practical to entirely strip off the existing car enclosure including walls, returns and dome and install a new cab of practical materials, using comprehensive fixtures which combine all the accessibility, communication as well as emergency controls in a vandal resistant design.

With the cab removed from the platform, this platform can then be utilized as a working surface as the hoistway equipment and doors are replaced. This also allows easier access to all hoistway switches for full adjustments. This results in an efficiency in labor as well as greater safety for the elevator technicians.

It is recommended that new fixtures be incorporated in the new cab. These will be vandal resistant, ADA compliant car operating stations without any plastic buttons or plastic lenses. Digital car position indicators, compatible with the new car operating panel design, will be installed. All components will be serial linked to the new controller for full integration of systems.

New hall push button fixtures will be installed which will be heavy duty, vandal resistant, ADA compliant design.

I. **Elevator Pit**

There is a 'pit bucket' for each elevator which is utilized for the collection of oil seepage from the jack head packing. Recommended is an oil recovery unit which will automatically pump any oil residue directly from the jack head back to the hydraulic tank.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The underground equipment for passenger elevator 1 and service elevator 2 were replaced in 2018 and contain a pit rupture valve as well as protective PVC encasement. At this time no further action may be required. It is, of course, cautioned that condition of the underground equipment is an unknown variable.

J. **Miscellaneous**

Car Guide Assemblies: Both elevators are equipped with slide guides. This type of guide requires frequent lubrication of the rails for proper operation. This lubricant; unfortunately, collects any dirt or dust in the hoistway. Recommended are roller guide assemblies which require no lubrication. Also recommended is the full cleaning of the rails.

Car Top Inspection Station: This station allows the elevator technician to operate the car on Inspection Service while riding on the car top. This station is recommended to be replaced and all safety features be aligned with current code. The new station will be fully compatible with the new controller.

Hoistway wiring and traveling cable: All wiring and traveling cable will be replaced and serial linked to the new fixtures with the new controllers.

Included in the new traveling cable will be wiring provisions for future camera installation. This cable will be properly terminated and labeled.

K. **New Code Requirements**

The new landing doors will be equipped with the following:

1. Retaining devices which limit the potential of the doors being pushed into the hoistway.

2. Doors shall be equipped with emergency exit keyholes to be utilized by MA Elevator Licensed technicians and Firefighters as emergency evacuation of a person entrapped in the elevator. Access by way of the keyhole can be conducted at any landing.

Telephone line monitoring system: A device will be located at the main landing in the hall push button station which monitors the operability of the dedicated phone line. This function occurs automatically each day. Should there be a failure of the phone line, a buzzer shall sound, and the indicator jewel shall light. The buzzer can be temporarily keyed off but will reactivate upon continual failure of the phone line.

L. **Door Frames and Landing Doors**

The existing door frames and doors are painted. Prior practice was the option to electrostatically paint the landing doors and frames. Due to the odors involved, this method is not regularly utilized by the elevator industry. Also, based on prior painting types and the fact that all layers of paint are not removed from the frame prior to the electrostatic painting process, there have been instances, although limited, where the paint has chipped from the frames. Electrostatic painting as part of the elevator contractor's scope of work is no longer a preferred method.

The choice is to either wrap the frames in satin stainless steel (along with the new landing doors) or the Owner directly addresses the frames. It is recommended the frames be wrapped in satin stainless steel.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

M. **Conclusion**

The decision facing owners of older elevator systems is not an easy one. As a system ages and eventually becomes obsolete, parts are no longer available. The potential for failures and entrapments accelerates and modernization is the logical option.

It is further recommended, that the modernization project on each elevator not be completed in stages but be completed in the recommended entirety. The recommended approach is a full modernization to ensure full compatibility of all equipment.

In conclusion, most of the issues with the elevator are age related. A complete modernization is warranted.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

IV. EXISTING INSTALLATION CHARACTERISTICS

A. In the following table, general data is provided on the elevator system, as existing:

State I.D. #*:	Passenger Elevator 1: 178-P-35	Service Elevator 2: 178-P-36
Type:	Hydraulic	Hydraulic
Use:	Passenger	Passenger
Controller:	MCE	ESCO
Rated Capacity:	2000 Lbs.	3500 Lbs.
Date Installed:	1975	1975

VI. EXECUITVE SUMMARY AND MAJOR RECOMMENDATIONS

1. Elevator: General

   a. Passenger Elevator:

      1) New power unit and controller were installed in 1998

   b. Service Elevator:

      1) Equipment was installed in 1975

   c. A full replacement/refurbishment of all components of the elevators is warranted as indicated.

      1) This would include but not be limited to all machine room equipment including all hydraulic piping from machine room to pit, all fixtures, cab, hoistway switches, wiring, traveling cable as well as the in-the ground jack equipment.

2. Machine (Power Unit)

   a. The passenger elevator power unit was installed in 1998. As previously addressed, typical effective timeline for a power unit is no more than 25 years. Complete replacement is recommended.

   b. The service elevator power unit which is original installation is in poor condition. All equipment including the muffler, motor, tank, and all related equipment should be removed and replaced.

   c. The hydraulic oil will be removed and replaced with new hydraulic oil.

      1) Melrose High School is responsible to provide EPA manifest registration number.

3. Controller

   a. The existing controllers are dated: Service Elevator- 1975, passenger elevator -1998. Both control systems are considered obsolete as compared to today's standards for safety and efficiency.

   b. At the time of the upgrade, a new battery lowering system shall be incorporated on the elevators.

   c. New Firefighters' features will be also added to the control system and will be in conformance with current adopted 2013 Code.

      1) Further review required for capability of Building Fire Alarm Panel.

   d. A new solid-state motor starter is recommended to ensure maximum protection.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4. Selector

   a. The existing selector was also original equipment and is compatible with the existing control unit. This unit will be replaced when the controller is replaced.

   b. It is recommended at the time of the upgrade of each of the elevators that a complete new solid-state hoistway landing control system be installed in conjunction with the new solid-state controller to provide maximum reliability for leveling and operation of the car.

5. Door Equipment

   a. The door operator and all door components are showing wear due to age. The door system is another major condition for modernization of the elevators since it is one of the highest used components on an elevator. As the system continues to age, door failure becomes more prevalent and full upgrade and replacement rather than continual repair becomes the most viable option. It is our recommendation when the elevators are modernized, to replace the door operators and all related components.

   b. At the time of the upgrade the following is also recommended:

      1) New car and landing door hangers, door hanger rollers, new tracks and new gibs should be installed on all doors.

      2) New hoistway doors will also be equipped with new code retaining devices to limit the potential of the doors being pushed into the hoistway.

      3) Retain hoistway door frames and sills.

         i. The door frames are scratched but can be reused as existing.

         ii. Alternate is all frames can be wrapped in stain stainless steel to match the new doors.

      4) Car door shall be furnished in a satin stainless-steel finish.

      5) New landing doors will be wrapped in satin stainless steel.

6. Hoistway

   a. There are slide guide assemblies on both elevators. It is recommended they be replaced with new roller guides.

   b. Guide rails will be cleaned of all lint and lubrication.

   c. New traveling cable will be installed. Incorporated in the cable will be camera cable for future provisions.

7. Pit

   a. As previously addressed, both underground jack assemblies were replaced in 2018. Although underground equipment condition can not be verified or predicted, it is

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

anticipated that the underground jack units can be retained.

b. There are no pit ladders to access either pit. New pit ladders are required.

8. Cabs

a. The cabs are in poor condition.

1) The cabs for elevators should be considered for replacement. Further, an open working platform is the safest approach when hoistway equipment and doors are replaced.

b. The car door operator shows major signs of wear and should be replaced along with the hangers, interlocks, and related equipment.

c. New car door should be installed.

d. The car operating panel will be replaced and serial linked to the new controller.

1) New vandal proof buttons are recommended.

2) Updated Firefighters' Service will be included in the new car operating panel.

e. As noted, when the cab is replaced, it allows the platform to be utilized as an open area for the door and hoistway work. This allows an efficiency in labor as well as an additional safe working area for the elevator technicians.

f. Included in the car jambs will be traveling lanterns to show the direction of the elevator. This is an ADA code requirement.

9. Hall

a. The hall push button stations will also be replaced, and serial linked to the controller.

1) All Firefighters' Service features will be incorporated in the first-floor hall station.

2) New vandal resistant fixtures are recommended.

b. Hall Position and Direction Indicator is located at the main landing for the passenger elevator.

1) This will be replaced and serial linked to the controller.

2) Recommended is a new position and direction indicator at the main level for the service elevator. This feature will be located directly in the hall push button station.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

VII. OUTLINE SCOPE OF RELATED WORK

A. General Outline of Recommended and Required Related Work:

1. Electrical

a. New properly grounded 3-Phase heavy duty power disconnect.

1) The Mainline Disconnect for passenger elevator 1 is not in accordance with code. The operating handle shall be positioned on the side of the disconnect closest to the lock jamb side of the machine room door. The new mainline disconnect switch shall utilize a circuit breaker.

2) Contacts shall allow proper differentiation between manual power shut down and actual power loss. For proper battery lowering operation, an auxiliary contact is required in the main power disconnect.

a) Contacts shall be U.L. approved and located in the disconnect.

b. New fused heavy duty single phase disconnect for car lights and car fan.

c. New energy efficient LED lighting in machine rooms and pits is recommended.

d. New GFCI in machine rooms and pits.

e. Ensure dedicated telephone line in machine rooms for emergency telephone.

f. Machine room 115 VAC receptacle in proximity of tanks for new tank heater (tank heater by Elevator Contractor).

g. Machine rooms to maintain 50 to 90 degrees Fahrenheit as required by code.

1) Machine room split unit air conditioning system and condensing unit should be considered to ensure the machine room temperature never exceeds 90 degrees.

h. New fire alarm modules in the machine rooms for code required “flashing’ Firefighters’ hat.

1) An additional fire alarm module is also required in the Machine Room to power the new hoistway mechanical damper on building alarm.

2) There are no existing fire alarm modules in Service Elevator 2- machine room for code required Firefighters’ Service. Required will be:

a) Designated recall level.

b) Alternate recall level.

c) “Flashing “firefighters’ hat.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

d) An additional fire alarm module is also required in the Machine Room to power the new hoistway mechanical damper on building alarm.

3) As noted, further investigation required with Fire Alarm Company to confirm capability of addressable system in relation to the elevators.

2. Mechanical

a. Hoistway Ventilation

1) Existing hoistway vent will be eliminated and a new energy efficient damper system installed at the top of the hoistway.

a) Service elevator 2: Existing vent is not in accordance with code. The bottom of vent is to be no less than three (3) feet from the roof.

2) New Power closed ventilation is opened under the following conditions:

a) By an approved automatic thermostat designed to open at a temperature of not more than 90 degrees.

i. Thermostat shall be located in machine room.

b) By a building alarm system.

c) Upon building power loss.

b. Machine Room Ventilation

1) Properly locate the machine room vent for both elevators to be within 1' of machine room ceiling in accordance with code.

a) Service elevator 2: Remove metal duct to existing machine room vent.

3. Pit

a. There are no pit ladders in either pit for access. New Pit ladders are required.

4. Additional Matters

a. Remove smoke detector at top of hoistway, Passenger and Service elevator.

b. Eliminate circuitry in hoistway for car lights and fan, Passenger and Service elevator and properly relocate.

c. Bevel ledge in hoistway at third floor level, Right side looking in, Service elevator 2.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

VIII. Forecast of Probable Cost and Approximate Schedule

A. Modernization of Hydraulic Passenger Elevators

1. Costs and Schedules

a.	Budget Cost [1]	$470,000.00
2.	Engineering and submission of drawings, time for approvals, lead-time for fabrication & Delivery (Full Modernization)	32 Weeks
3.	Field installation – Approximate out of service time: [2]	
a.	Passenger Elevator 1:	10 Weeks
b.	Service Elevator 2:	10 Weeks
	Total Approximated Project Schedule:	52 Weeks

B. Related Work (General Estimation) [3]

1.	Electrical	$45,000.00
2.	Mechanical	$50,000.00
3.	Fire Alarm Integration for Elevator Firefighters' Service	TBD

1. *Budget cost includes interim maintenance prior to elevator modernization and one-year warranty maintenance after certification of elevator by the Department of Public Safety. Budget cost is based on comparable projects and most effective pricing strategy. It is to be used for discussion purposes only.*

2. *Time estimation includes each of the acceptance testing conducted by the Department of Public Safety being conducted on overtime.*

3. *Related Work budget is a general estimation. This is not the Vertical Transportation Division's direct area of expertise to calculate.*

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

IX. APPENDIX

A. Photographs

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SYSKA HENNESSY GROUP

Passenger Elevator I

New Jack Unit 2018. Contains PVC Protection. 	24-Year-Old Control System. Does Not Contain Current Code Safety Features. 
24-Year-Old Power Unit. Complete Replacement is Recommended. 	Existing Car Door Operator is Worn. New Car Door Operator is Recommended. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Entrance Frames and Sills Will be Retained. Recommend New Doors and Existing Frames to Be Wrapped in Stainless Steel. 	The Cab is in Poor Condition. Replacement is Recommended. 
Existing Slide Guide Assemblies. Require Lubrication. New Roller Guides are Recommended. 	Remove Smoke Detector at Top of Hoistway. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SYSKA HENNESSY GROUP

The Mainline Disconnect for The Elevator is Not in Accordance with Code. The Operating Handle Shall be Positioned on The Side of The Disconnect Closest to The Lock Jamb Side of The Machine Room Door. New Mainline Disconnect Switch Shall Utilize a Circuit Breaker. 	Properly Locate the Machine Room Vent to be Within 1' of Machine Room Ceiling in Accordance with Code. 
There is no Pit Ladder to Access Pit. New Ladder is Required. 	Eliminate Circuitry in Hoistway for Car Lights and Fan. Properly Relocate. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Service Elevator 2

New Jack Unit 2018. Contains PVC Protection. 	Controller is Original Equipment and Does Not Contain Current Code Safety Features. 
Original Power Unit. Leaking Oil. 	Existing Car Door Operator is Worn. New Car Door Operator is Recommended. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Entrance Frames and Sills Will be Retained. Recommend New Doors and Existing Frames Be Wrapped in Stainless Steel. 	The Cab is in Poor Condition. New Cab is Recommended. 
Existing Slide Guide Assemblies. Require Lubrication. New Roller Guides are Recommended. 	Fixtures are Not in Accordance With MAAB. Button to Be Center Lined at 42". 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

There is no Pit Ladder to Access Pit. New Ladder is Required. 	Remove Smoke Detector at Top of Hoistway. 
Eliminate Circuitry in Hoistway for Car Lights and Fan. 	Existing Hoistway Ventilation is Not 3 Feet from the Roof Line. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Bevel Ledge in Hoistway at Third Floor Level. Right Side Looking in. 	Properly Locate the Machine Room Vent to be Within 1' of Machine Room Ceiling. Remove Metal Duct. 

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Re: Earmark Funding for Accessibility and Safety Improvements – MHS Elevators

As a result of an Act relative to immediate COVID-19 recovery needs (Chapter 102, Section 2A), the City of Melrose has been awarded a State Earmark not less than One Hundred and Fifty Thousand Dollars ($150,000) which shall be expended for the accessibility and safety improvements for the two (2) elevators at the Melrose High School.

Syska Hennessy has worked to assess the conditions of the current elevators and has provided to the City a detailed scope of work to address accessibility and safety improvements necessary for the elevators to meet compliance and to pass inspections. This assessment was presented for consideration to utilize available ARPA funds for this project for systematic replacement of outdated elevators that have exceeded useful life and for the equitable provision of services in the facility. It specifically targets public safety in our school buildings. These criteria served as a basis for our request. The project estimates would most likely have been incurred by the City had it not been funded by available ARPA opportunities.

We formally request acceptance of this grant award of $150,000 from the Department of Elementary and Secondary Education (Massachusetts DOE). Funds will be deposited into a dedicated account set up by the City Auditor and designated specifically for the above-mentioned project. Additional funds necessary to complete this project have been approved through the City's ARPA Project process. There is no cost or encumbrance required to enter into this agreement. Upon completion of this project, necessary preventive maintenance costs will be incorporated into the Department of Public Works Operating Budget.

Additional backup documents shall be attached to this Order for your review and approval.

Thank you very much for your consideration and continued support of our efforts.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

COMMONWEALTH OF MASSACHUSETTS ~ STANDARD CONTRACT FORM

3.1

This form is jointly issued and published by the Office of the Comptroller (CTR), the Executive Office for Administration and Finance (ANF), and the Operational Services Division (OSD) as the default contract for all Commonwealth Departments when another form is not prescribed by regulation or policy. The Commonwealth deems void any changes made on or by attachment (in the form of addendum, engagement letters, contract forms or invoice terms) to the terms in this published form or to the **Standard Contract Form Instructions** and **Contractor Certifications**, the **Commonwealth Terms and Conditions**, the **Commonwealth Terms and Conditions for Human and Social Services** or the **Commonwealth IT Terms and Conditions** which are incorporated by reference herein. Additional non-conflicting terms may be added by Attachment. Contractors are required to access published forms at CTR Forms: https://www.macomptroller.org/forms. Forms are also posted at OSD Forms: https://www.mass.gov/lists/osd-forms.

CITY OF MELROSE

In City Council

June 6, 2022

AN ORDER

ORDER-2022-127

Acceptance of Three (3) MassDOT Shared Streets and Spaces Program Grants for various equipment and pedestrian safety measures funded at a total of $158,843.

Offered by Mayor Paul Brodeur

BE IT ORDERED

The Department of Public Works, in collaboration with the Mayor's Office, is pleased to request acceptance of three Massachusetts Department of Transportation Shared Streets and Spaces Program Grants for a total of One Hundred Fifty Eight Thousand Eight Hundred and Forty Three dollars ($158,843). The full details of each of the Grant Awards are found in the attachments to this Order, along with a memo explaining the expected use of the funds. In sum, the three awards will address specific safety measures with the purchase of equipment to remove snow from sidewalks in our City School properties, fund portable speed mitigation equipment to be deployed strategically to reduce speeds throughout the City, and to address safety concerns at the intersection of West Emerson and Vinton.

We formally request acceptance of these three MassDOT Shared Streets and Spaces Program Grants totaling One Hundred Fifty Eight Thousand Eight Hundred Forty Three Dollars ($158,843). Please note there is no match component. Thank you for your continued support and feel welcome to contact us with any questions you may have.

FINANCIAL IMPACT:

Acceptance of three MassDOT Shared Streets and Spaces Program Grants. The three awards are for West Emerson at Vinton Intersection Safety Improvements funded at $77,900, for Portable Speed Mitigation Equipment (equipment only) funded at $30,943, and for School Sidewalk Plow (equipment only) funded at $50,000.

massDOT
Massachusetts Department of Transportation

May 20, 2022

Vonnie Reis
562 Main Street
Melrose, MA 02176

Via email: VReis@CityofMelrose.org

Dear Vonnie Reis:

Thank you for your submission to the Shared Streets and Spaces Program during the Fiscal Year 2023 application solicitation. We received a record number of applications and had many creative projects from which to select. I am pleased to notify you that Melrose's application for "W Emerson at Vinton Intersection Safety Improvements" has been approved for $77,900.00.

Awarded municipalities must enter into a contract with MassDOT for the funding of the approved work. To initiate this contract, please review and sign the Project Funding Agreement provided to you with this award letter and return it to SharedStreets@dot.state.ma.us as soon as possible. It is anticipated that the Notice to Proceed (NTP) for this award will be issued by August 1, 2022 and that the deadline for construction will be December 31, 2023. MassDOT-funded work may not proceed until the NTP is issued. Your patience during the contracting process is appreciated as MassDOT works to execute contracts with a large volume of awardees.

This award is reimbursement-based, meaning that funds are provided after costs are incurred. Please note that this is different than previous funding years. Reimbursement requests are processed by your District State Aid Engineer in the same manner as Chapter 90 projects. Learn more about this process as well as other implementation details on the program website at: mass.gov/shared-streets-and-spaces-grant-program.

Please email SharedStreets@dot.state.ma.us with questions related to this award. Thank you for your commitment to improving safety, access, and mobility for all roadway users in your community and for your participation in the Shared Streets and Spaces Program.

Sincerely,

Jamey Tesler

Jamey Tesler

Shared Streets and Spaces Program
Project Funding Agreement

Agreement Number: _____

Date: _____

Municipality: Melrose

Project: W Emerson at Vinton Intersection Safety Improvements

---

This Project Funding Agreement ("Agreement") made and entered into by and between the MASSACHUSETTS DEPARTMENT OF TRANSPORTATION, hereinafter called "MassDOT", and the City/Town of Melrose, (hereinafter called the "MUNICIPALITY"), as set forth below:

WHEREAS, the MUNICIPALITY proposes to construct certain roadway improvements from its approved Shared Streets and Spaces Application ("Application"), attached hereto as Exhibit A, and

WHEREAS, the scope of work for said roadway improvements is described in Exhibit A, (the "Project") and is in accordance with the project approvals from the Shared Streets and Spaces Program, and

WHEREAS, the total estimated construction cost for the Project is $77,900.00, as described within Exhibit B, (the "Project Cost Estimate"), and

WHEREAS, the PROJECT is to be financed by funds provided by MassDOT in accordance with appropriation 6921-2109, and

WHEREAS, MassDOT has reviewed the Project's items of work described within Exhibit B to ensure they are commensurate with the Project's scope of work, Exhibit A, and

WHEREAS, the PROJECT shall be constructed by MUNICIPALITY'S

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

employees and/or a contractor approved by MassDOT's prequalification process, in accordance with M.G.L. c 81 subsection 8B, and

WHEREAS, all environmental permits and approvals must be obtained prior to construction. MassDOT's Environmental Punch list must be signed by the authorized municipal official, hereby attached and labeled as Exhibit C, and

WHEREAS, the parties hereto have reached an agreement as to the apportionment of work and expense necessary for the completion of the Project.

NOW THEREFORE, in consideration of the obligations contained herein and other good and valuable consideration, the receipt of which is hereby acknowledged, MassDOT and the MUNICIPALITY hereby agree, each with the other, as follows:

1.0 DIVISION OF WORK

1.1 MUNICIPALITY shall develop plans and specifications for the Project (collectively, "Specifications") in accordance with the attached scope of work (Exhibit A), and the Project Estimate (Exhibit B). The Specifications set forth by the MUNICIPALITY, shall be in conformance with, but not limited to the following current documents as amended: MassDOT's Project Development and Design Guide, MassDOT's Construction Standard Details, MassDOT's Separated Bike Lane Planning and Design Guide, MassDOT's Guidelines for the Planning and Design of Roundabouts, MassDOT's Bridge Manual, MassDOT's Standard Specifications for Highways and Bridges, MassDOT's Standard Drawings for Traffic Signals and Highway Lighting, the latest edition of American Standard for Nursery Stock, 521 CMR Rules and Regulations of the Architectural Access Board (AAB) and Americans with Disabilities Act(ADA), the Manual on Uniform Traffic Control Devices, and any and all state or federal regulations, and/or to the satisfaction of MassDOT – Highway Division, Chief Engineer. The Project shall be constructed in accordance with the Specifications.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.2 The MUNICIPALITY shall provide by its own municipal employees, contractors and/or subcontractors all necessary labor materials, equipment and other services to construct said Project pursuant to any and all applicable Specifications and in compliance with applicable local, state and federal laws and regulations. To be eligible to bid on said Project, the contractor shall be approved in accordance with MassDOT's prequalification process, the application forms for which are located on mass.gov, under Prequalification of Horizontal Construction Firms. In addition, any and all construction activities or related work required for the construction of said Project shall be in conformance with any and all MassDOT policies and procedures.

1.3 The MUNICIPALITY shall not commence construction work on the Project until MassDOT has issued a written Notice to Proceed to MUNICIPALITY. Prior to beginning construction, MUNICIPALITY shall, at its sole expense, obtain any and all easements, permits (including environmental permits), licenses, or other permissions to enter onto property required to complete the Project not otherwise owned or controlled by MUNICIPALITY. Upon MassDOT's request, MUNICIPALITY shall demonstrate such acquisitions and/or provide copies of all permits acquired.

1.4 The Municipality shall be solely responsible for the installation of adequate safety precautions for the protection of the travelling public and all project personnel. Municipality shall, at its sole expense, identify, furnish, and maintain adequate traffic control devices for the protection of the travelling public and working personnel during construction operations. The design, application, and installation of all devices shall conform to MassDOT's "Standard Drawing for the Development of Temporary Traffic Control Plans" and the Amendments to the Manual on Uniform Traffic Control Devices. In no event shall MassDOT be responsible for any failure of the Municipality's to provide adequate safety precautions and protections during construction operations.

1.5 The MUNICIPALITY shall complete the Project by the Agreement's Expiration Date unless an extension of time is granted by MassDOT pursuant to Subsection 5.2 below. Work performed after this Agreement's Expiration Date shall not be eligible for reimbursement.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.6 Upon the completion of the Project, MUNICIPALITY shall promptly complete the Post-Construction Report Form provided by MassDOT. MUNICIPALITY shall provide pre- and post- construction photos and all relevant construction metrics for bicycle, pedestrian, transit, and outdoor programming infrastructure requested by MASSDOT.

2.0 DIVISION OF EXPENSE

2.1 Except as provided in Section 2.2 below, MassDOT will reimburse MUNICIPALITY for the actual costs incurred to complete the Project up to, but not exceeding, the amount approved. All costs incurred must be approved by MassDOT prior to reimbursement. Any costs above this amount shall be borne by MUNICIPALITY.

2.2 MUNICIPALITY shall bear all costs and expenses associated with the acquisition of rights-of-way and permitting necessary to complete to perform its obligations hereunder ("Acquisition Costs"). MUNICIPALITY shall also be solely responsible for all costs and expenses associated with traffic control and safety measures in or around the construction work zone, including but not limited to, the use of uniformed law enforcement officers and provision of traffic control devices ("Traffic Control Costs.") Municipality agrees and acknowledges that Acquisition Costs and Traffic Control Costs are ineligible for reimbursement under this Agreement.

3.0 METHOD OF PAYMENT TO THE MUNICIPALITY

3.1 During the course of the Project, MUNICIPALITY may present monthly progress bills of the incurred costs for approval and reimbursement by MassDOT. All reimbursement requests by Municipality shall be made in accordance with MassDOT's procedures for Chapter 90 funded projects using the applicable Chapter 90 forms ("Forms") required by MassDOT. MUNICIPALITY shall electronically submit the completed Forms and supporting documentation to MassDOT's District State Aid Engineer after expenses are

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

incurred for review and processing.

3.2 Upon the completion of the PROJECT to the satisfaction of MassDOT and the MUNICIPALITY, written notification shall be given to MassDOT's District Highway Director by the MUNICIPALITY that said work has been completed and, within 120 days thereof, the MUNICIPALITY will submit to MassDOT a final detailed bill (in quintuplicate) as required, and final settlement will then be made between MassDOT and the MUNICIPALITY.

4.0 AUDIT

4.1 All reimbursable charges in connection with this Agreement will be subject to audit by representatives of MassDOT and the MUNICIPALITY will retain all records and documents pertaining to the Agreement charges until such audit is completed or until written approval to destroy the records is given by MassDOT.

4.2 The Governor or his designee, the Secretary of Administration and Finance, and the State Auditor or his designee shall have the right at reasonable times and upon reasonable notice to examine the books, records and other complications of data of the MUNICIPALITY which pertain to the performance of the provisions and requirements of this Agreement.

4.0 FUTURE MAINTENANCE

4.1 The MUNICIPALITY shall be solely responsible for the maintenance and upkeep of all property associated with the PROJECT and the costs thereof.

4.2 If the property is owned by an entity other than MUNICIPALITY, MUNICIPALITY shall enter into a separate agreement with the property owner that provides for the maintenance and upkeep of the property associated with the Project.

5.0 TERM AND TERMINATION

5.1 This agreement will expire on December 31, 2023 ("Expiration Date"),

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

unless extended as provided for in Subsection 5.2.

5.2 MUNICIPALY may request to extend this Agreement beyond that provided in Subsection 5.1. Any request for an extension must be made in writing to MassDOT soon as practicably possible, but no later than sixty (60) days prior to the Agreement's Expiration Date. MUNICPALITY's request shall include a justification for the requested extension, the requested new expiration date, and any other information deemed necessary by MASSDOT. MassDOT, in its sole and exclusive discretion, may agree to grant said request for an extension of time if it finds that sufficient justification has been provided by the MUNICIPALITY.

5.3 This Agreement may be terminated by mutual agreement of the Parties, upon such terms and conditions as the Parties may mutually agree upon. Such termination shall be effective in accordance with a written agreement by the Parties. Termination under this section shall not constitute a waiver of the rights of either Party to damages or other remedies related to this Agreement, except to the extent that the mutual agreement termination this Agreement so specifies.

5.4 MassDOT may, by written notice to the MUNICIPALITY, terminate this Agreement in any one of the following circumstances:

5.4.1 The MUNICIPALITY neglects or fails to comply with any provision of this Agreement in accordance with its terms or within the time specified for performance herein, and MUNICIPALITY fails to cure any such failure within thirty (30) calendar days after receipt of notice specifying such failure. In the event this Agreement is terminated pursuant to this provision, MassDOT shall not be liable to the Municipality for any costs incurred or burdens assumed upon or subsequent to, and associated with, such termination.

5.4.2 The applicable State or Federal funding source fails to appropriate or otherwise make available funds for the work contemplated herein. In the event this Agreement is

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

terminated pursuant to this provision, MassDOT shall not be liable to Municipality for any costs.

6.0 MISCELLANEOUS

6.1 Compliance with Law.

The work and services to be performed hereunder shall be done in compliance with applicable federal, state, and local laws, ordinances, rules and regulations.

6.2 Notices:

MASSDOT:

The MUNICIPALITY:

6.3 Indemnification:

To the extent permitted by the laws of the Commonwealth, the MUNICIPALITY hereby assumes and agrees to indemnify, defend (at the MUNICIPALITY's sole expense and with counsel reasonably acceptable to MassDOT) and hold harmless MassDOT and MassDOT's affiliates, contractors, employees and representatives from and against any and all losses suffered by MassDOT and any and all claims, liability or penalties asserted against MassDOT by or on behalf of any person on account of, based in, resulting from, arising out of (or which may be claimed to have arisen out of), in whole or in part, the acts or omissions of the MUNICIPALITY in its performance of the obligations set forth herein. This covenant shall survive the expiration of this Agreement.

6.4 Governing Law; Severability:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

This Agreement shall be governed by the laws of the Commonwealth of Massachusetts, without regard to principles of conflicts of law or choice of laws. In the event that any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be declared to be invalid or unenforceable, then the remainder of this Agreement or the application of such term or provision to other person or circumstances, other than those as to which it would become invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

6.5 No Third-Party Beneficiaries:

This Agreement shall not be construed to create any third-party beneficiary rights in favor of any other parties or any right or privilege for the benefit of any other parties.

6.6 No Agency:

In no event shall MUNICIPALITY or any of its employees, agents, contractors, subcontractors be considered agents or employees of MassDOT.

6.7 Amendments

This Agreement and each of its provisions may only be waived, modified, or altered in a writing signed by MassDOT and MUNICIPALITY

6.8 Counterparts:

This Agreement may be executed in multiple counterparts, each of which shall be an original and all of which shall constitute one and the same instrument.

[Remainder of page intentionally blank]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

IN WITNESS WHEREOF, the Parties have executed this Agreement as an instrument under seal as of the date first above written.

Formstack Submission For: Shared Streets and Spaces

Submitted at 02/28/22 10:08 AM

Part A: Applicant Information	
Date: (Required):	02/28/2022
Are you in a Municipality or Transit Authority? (Required):	Municipality
Municipality: (Required):	MELROSE
Name of official Municipal signatory: (Required):	Vonnie Reis
Contact person: (Required):	Vonnie Reis

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Address: (Required):	562 Main St Melrose, MA 02176
Email: (Required):	VReis@CityofMelrose.org
Telephone: (Required):	(781) 979-4171
Has your municipality previously received a MassDOT Shared Streets and Spaces grant? (Required):	Yes
If Yes, list amounts and status (Required):	Sidewalk extension, Slow Streets, Parklets - 2020 grant amount = $ 59,160 (complete); Central Terrace outside space - 2021 grant amount = $28,822.75 (complete)
	Part B: Project Information
Project Type(s) – see program website for project type descriptions and to ensure you select the correct option for your proposal. Please note: all selected types must be included in project description. Equipment Only may not be combined with other project types. (Required):	Bicycle and Pedestrian Infrastructure Speed Management

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Title:	W. Emerson at Vinton Intersection Safety Improvements
Project location (GPS coordinates): (Required):	42.459306, -71.071558
Amount requested from MassDOT: (Required):	77900.00
Project description (2-3 sentences): (Required):	The project includes design and implementation of intersection improvements at W. Emerson St and Vinton St. with a focus on pedestrian safety. This intersection is located in a busy area, with shops, a park, and the MBTA Cedar Park commuter rail station nearby. Cedar Park also hosts the weekly Farmers' Market for 6 months of the year.
Describe the project goals and benefits (1-2 sentences): (Required):	To implement traffic calming measures to make the intersection safer for all users.
Is the project intended to address a demonstrated need for Speed Management, according to local information, data, plans, or community concerns related to speed and safety? (Required):	Yes
If Yes, please describe the issue/need, including any/all data	Changes to curb lines, pavement marking, crosswalks, etc. will be designed with a goal of slowing speeds and improving safety.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

sources (Required):	
Is the project intended to provide improvements to infrastructure used by children to get to and from school (within two miles) or other youth destinations? If yes, please list schools or destinations. (Required):	Yes
Detail (Required):	This intersection is on a walking route to schools.
Is the proposed project intended to provide improvements to infrastructure used by seniors to reach senior destinations (within one mile)? If yes, please list destinations. (Required):	Yes
Detail (Required):	This intersection is within 1/2 mile of two senior living facilities. Additionally, the seniors frequent Cedar Park and the Farmers' market.
Is the proposed project intended to support safe walking and	

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

biking within one mile of a transit stop? If yes, please list the transit stop(s). (Required):	Yes
Detail (Required):	This intersection is located adjacent to Cedar Park T stop and is used by commuters daily.
Does the proposed project support safe routes to open space and/or parks? If yes, please list the name of the facilities. (Required):	Yes
Detail (Required):	This intersection is located next to Cedar Park and is within 1/2 mile from Ell Pond Park.
Is the proposed project located in the municipality's Housing Choice designation area, will the project benefit from an Opportunity Zone Fund investment, or has the municipality implemented economic development best practices through the Community Compact program? (Required):	Yes

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

If Yes, list which applies (Required):	Melrose belongs to the Community Compact program.
Will the proposed project be fully implemented by June 30, 2023? (Required):	Yes
Is this project intended to be a temporary or permanent improvement? (Required):	Permanent
Description of project implementation including staff roles and key milestones: (Required):	The City is currently conducting a traffic study with Stantec for this intersection, due to frequent complaints of speeding and crashes. Residents also report unsafe conditions for non-vehicular users. The study includes collection of limited traffic volume/speed data and analysis of crash data. The project to be conducted under this grant will make use of the recommendation from the study and, using technical assistance provided by MassDOT and City staff, will design intersection improvements. A small amount of effort will be required from Stantec to help develop plans and specifications. Potential improvements may include changes to curb locations, a center island, an expanded pedestrian refuge, new ADA ramps, and re-locating and striping of crosswalks. Key milestones are 1) evaluation of alternatives, 2) design of improvements, and 3) construction (using in house forces and on-call contractors). Construction would happen after the summer, due to high volume in this area during the warmer months.
List all materials required to implement the project, and how they will be obtained:	Will use state vendor list

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

(Required):	
The Shared Streets and Spaces Program requires municipalities to provide notice or opportunity for public engagement related to the proposed project. Please confirm whether this has occurred. If yes, please list engagement activities. (Required):	Yes
If yes, please list engagement activities (Required):	One public meeting will be held at the Alternatives Analysis stage to gather feedback.
Demonstration of compliance with safety and accessibility-related regulations (ADA and MAAB): (Required):	Yes

Part C: Site Information

Is this project entirely on muncipally-owned infrastructure? (Required):	Yes

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Indicate what, if any, MassDOT-owned infrastructure is integral to the proposed project. If improvements are proposed on MassDOT infrastructure, indicate whether the municipality has applied for an Access Permit. (Required):	No
Indicate what, if any, infrastructure owned by a state agency other than MassDOT is integral to the proposed project (i.e. the Department of Conservation & Recreation): (Required):	No
Demonstrate whether the proposed project is in a Census Block Group identified by the relevant Regional Planning Agency as an Environmental Justice area: (Required):	Yes

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Would the proposed project divert, detour, or otherwise impede current public transit service, even temporarily? (Required):	No
Attach Project Cost Estimate (Required - PDF file type allowed):	View File
Attach Locus Map(Optional - PDF file type allowed):	View File
Attach Illustrations of project (Optional - PDF, EXCEL, WORD, JPG, JPEG, PNG file types allowed):	View File
Attach Speed Management Data Form (Required - PDF and EXCEL file types allowed):	View File
Raw Speed Data (Optional - PDF, WORD, EXCEL file types allowed):	View File

ANTICIPATED START DATE: (Complete ONE option only) The Department and Contractor certify for this Contract, or Contract Amendment, that Contract obligations:

_X_ 1. may be incurred as of the Effective Date (latest signature date below) and **no** obligations have been incurred **prior** to the Effective Date.
__ 2. may be incurred as of ____, **20**__, a date **LATER** than the Effective Date below and **no** obligations have been incurred **prior** to the Effective Date.
__ 3. were incurred as of _____, **20**___ , a date **PRIOR** to the Effective Date below, and the parties agree that payments for any obligations incurred prior to the Effective Date are authorized to be made either as settlement payments or as authorized reimbursement payments, and that the details and circumstances of all obligations under this Contract are attached and incorporated into this Contract. Acceptance of payments forever releases the Commonwealth from further claims related to these obligations.

CONTRACT END DATE: Contract performance shall terminate as of **December 31 , 2023,** with no new obligations being incurred after this date unless the Contract is properly amended, provided that the terms of this Contract and performance expectations and obligations shall survive its termination for the purpose of resolving any claim or dispute, for completing any negotiated terms and warranties, to allow any close out or transition performance, reporting, invoicing or final payments, or during any lapse between amendments.

CERTIFICATIONS: Notwithstanding verbal or other representations by the parties, the **"Effective Date"** of this Contract or Amendment shall be the latest date that this Contract or Amendment has been executed by an authorized signatory of the Contractor, the Department, or a later Contract or Amendment Start Date specified above, subject to any required approvals. The Contractor certifies that they have accessed and reviewed all documents incorporated by reference as electronically published and the Contractor makes all certifications required under the Standard Contract Form Instructions and Contractor Certifications under the pains and penalties of perjury, and further agrees to provide any required documentation upon request to support compliance, and agrees that all terms governing performance of this Contract and doing business in Massachusetts are attached or incorporated by reference herein according to the following hierarchy of document precedence, the applicable Commonwealth Terms and Conditions, this Standard Contract Form, the Standard Contract Form Instructions and Contractor Certifications, the Request for Response (RFR) or other solicitation, the Contractor's Response (excluding any language stricken by a Department as unacceptable, and additional negotiated terms, provided that additional negotiated terms will take precedence over the relevant terms in the RFR and the Contractor's Response only if made using the process outlined in 801 CMR 21.07, incorporated herein, provided that any amended RFR or Response terms result in best value, lower costs, or a more cost effective Contract.

Via email: VReis@CityofMelrose.org

Dear Vonnie Reis:

Thank you for your submission to the Shared Streets and Spaces Program during the Fiscal Year 2023 application solicitation. We received a record number of applications and had many creative projects from which to select. I am pleased to notify you that Melrose's Equipment Only application for "Schools Sidewalk Plow" has been approved for $50,000.00.

Awarded municipalities must enter into a contract with MassDOT for the purchase of the approved equipment. To initiate this contract, please review and sign the Equipment Funding Agreement provided to you with this award letter and return it to SharedStreets@dot.state.ma.us as soon as possible. It is anticipated that the Notice to Proceed (NTP) for this award will be issued by October 1, 2022 and that the deadline for equipment purchases will be December 31, 2023. MassDOT-funded costs may not be incurred until the NTP is issued. Your patience during the contracting process is appreciated as MassDOT works to execute contracts with a large volume of awardees.

This award is reimbursement-based, meaning that funds are provided after costs are incurred. Please note that this is different than previous funding years. Reimbursement requests are processed by your District State Aid Engineer in the same manner as Chapter 90 projects. Learn more about this process as well as other implementation details on the program website at: mass.gov/shared-streets-and-spaces-grant-program.

Please email SharedStreets@dot.state.ma.us with questions related to this award. Thank you for your commitment to improving safety, access, and mobility for all roadway users in your community and for your participation in the Shared Streets and Spaces Program.

Sincerely,

Jamey Tesler

Shared Streets and Spaces Program
Equipment Funding Agreement

Agreement Number: _____

Date: _____

Municipality: Melrose

Project Name: Schools Sidewalk Plow

This Equipment Funding Agreement ("Agreement") is made and entered into by and between the MASSACHUSETTS DEPARTMENT OF TRANSPORTATION, hereinafter called "MassDOT", and the City/Town of Melrose, (hereinafter called the "MUNICIPALITY"), as set forth below:

WHEREAS, the MUNICIPALITY seeks to acquire certain item(s) of equipment (the "Equipment") described in its approved Shared Streets and Spaces Application ("Application"), attached hereto as Exhibit A, and

WHEREAS, MUNICIPALITY'S acquisition of and intended use of the Equipment will support public health, safe mobility, and strengthened commerce, and is in accordance with the project approvals from the Shared Streets and Spaces Program, and

WHEREAS, MassDOT has agreed to partially or wholly fund the Equipment in accordance with the terms, conditions and provisions set forth below.

NOW THEREFORE, in consideration of the obligations contained herein and other good and valuable consideration, the receipt of which is hereby acknowledged, MassDOT and the MUNICIPALITY hereby agree, each with the other, as follows:

1.0 EQUIPMENT

1.1 Procurement and Use of Equipment

MUNICIPALITY shall be solely responsible for the procurement of the Equipment. MUNICIPALITY shall comply with all laws, rules and regulations applicable to the acquisition, use, installation, and operation of the Equipment, including but not limited to procurement laws. MUNICIPALITY shall use the Equipment for its proposed and intended purpose as set forth in MUNICIPALITY's Application.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.2 Ownership

MUNICIPALITY shall have ownership and legal title to all Equipment acquired in whole or in part with the funds provided under this Agreement.

1.3 Maintenance

MUNICIPALITY shall be solely responsible for the maintenance and upkeep of the Equipment and the costs thereof. MUNICIPALITY shall maintain the Equipment in good condition and working order, ordinary wear and tear from proper use excepted. MassDOT shall have no responsibility for the use, maintenance, or fitness of the Equipment.

1.4 Equipment To Be Installed on MassDOT Property

If Municipality intends to install the Equipment on MassDOT property, Municipality agrees and acknowledges that it is solely responsible for obtaining all applicable permits and authorizations prior to performing any associated work. Receipt of grant funds shall not be construed as an authorization to perform work on MassDOT property.

2.0 GRANT FUNDING AND METHOD OF REIMURSEMENT

2.1 The maximum amount of funds available to MUNICIPALTY pursuant to this Agreement shall be $50,000.00 ("Grant Amount") as described within Exhibit B, (the "Project Cost Estimate").

2.2 MassDOT will reimburse MUNICIPALITY for the actual costs incurred for the purchase of the Equipment up to, but not exceeding, the Grant Amount. All costs incurred must be approved by MassDOT prior to reimbursement, and MassDOT's determination of eligible and approved costs shall be final in all cases. Any Equipment costs above the Grant Amount shall be borne by MUNICIPALITY.

2.3 Subsequent to the acquiring the Equipment, MUNICIPALITY may present an invoice of the incurred costs for approval and reimbursement by MassDOT. All reimbursement requests by Municipality shall be made in accordance with MassDOT's procedures for Chapter 90 funded projects using the applicable Chapter 90 forms ("Forms") required by MassDOT. MUNICIPALITY shall electronically submit the completed Forms and supporting documentation to MassDOT's District State Aid Engineer after expenses are incurred for review and processing. MUNICIPALITY shall provide MassDOT with any information MassDOT deems necessary to verify the accuracy of the invoice.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.0 AUDIT

3.1 All reimbursable charges in connection with this Agreement will be subject to audit by representatives of MassDOT and the MUNICIPALITY will retain all records and documents pertaining to the Agreement charges until such audit is completed or until written approval to destroy the records is given by MassDOT.

3.2 The Governor or his designee, the Secretary of Administration and Finance, and the State Auditor or his designee shall have the right at reasonable times and upon reasonable notice to examine the books, records and other complications of data of the MUNICIPALITY which pertain to the performance of the provisions and requirements of this Agreement.

4.0 TERM AND TERMINATION

4.1 This Agreement expire on December 31, 2023 ("Expiration Date"), unless extended as provided for in Subsection 4.2.

4.2 MUNICIPALITY may request to extend this Agreement beyond that provided in Subsection 5.1. Any request for an extension must be made in writing to MassDOT soon as practicably possible, but no later than sixty (60) days prior to the Agreement's Expiration Date. MUNICPALITY's request shall include a justification for the requested extension, the requested new expiration date, and any other information deemed necessary by MASSDOT. MassDOT, in its sole and exclusive discretion, may agree to grant said request for an extension of time if it finds that sufficient justification has been provided by the MUNICIPALITY.

4.3 This Agreement may be terminated by mutual agreement of the Parties, upon such terms and conditions as the Parties may mutually agree upon. Such termination shall be effective in accordance with a written agreement by the Parties. Termination under this section shall not constitute a waiver of the rights of either Party to damages or other remedies related to this Agreement, except to the extent that the mutual agreement termination this Agreement so specifies.

4.4 MassDOT may, by written notice to the MUNICIPALITY, terminate this Agreement in any one of the following circumstances:

4.4.1 The MUNICIPALITY neglects or fails to comply with any provision of this

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Agreement in accordance with its terms or within the time specified for performance herein, and MUNICIPALITY fails to cure any such failure within thirty (30) calendar days after receipt of notice specifying such failure. In the event this Agreement is terminated pursuant to this provision, MassDOT shall not be liable to the Municipality for any costs incurred or burdens assumed upon or subsequent to, and associated with, such termination.

4.4.2 The applicable State funding source fails to appropriate or otherwise make available funds for the Equipment. In the event this Agreement is terminated pursuant to this provision, MassDOT shall not be liable to Municipality for any costs.

5.0 MISCELLANEOUS

5.1 Notices:

MASSDOT:

The MUNICIPALITY:

5.2 Indemnification.

To the extent permitted by the laws of the Commonwealth, the MUNICIPALITY hereby assumes and agrees to indemnify, defend (at the MUNICIPALITY's sole expense and with counsel reasonably acceptable to MassDOT) and hold harmless MassDOT and MassDOT's affiliates, contractors, employees and representatives from and against any and all losses suffered by MassDOT and any and all claims, liability or penalties asserted against MassDOT by or on behalf of any person on account of, based in, resulting from, arising out of (or which may be claimed to have arisen out of), in whole or in part, the acts or omissions of the MUNICIPALITY in the use, operation, maintenance, installation, or repair of the Equipment. This covenant shall survive the termination of this Agreement.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

5.3 Governing Law; Severability.
This Agreement shall be governed by the laws of the Commonwealth of Massachusetts, without regard to principles of conflicts of law or choice of laws. In the event that any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be declared to be invalid or unenforceable, then the remainder of this Agreement or the application of such term or provision to other person or circumstances, other than those as to which it would become invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

5.4 No Third-Party Beneficiaries.
This Agreement shall not be construed to create any third-party beneficiary rights in favor of any other parties or any right or privilege for the benefit of any other parties.

5.5 No Agency.
In no event shall MUNICIPALITY or any of its employees, agents, contractors, subcontractors be considered agents or employees of MassDOT.

5.6 No Representations by MassDOT.
No representations, warranties or statements, expressed or implied, have been made by or on behalf of MassDOT with respect to the fitness of the Equipment for the use contemplated by MUNICIPALITY in its Application.

5.7 Amendments
This Agreement and each of its provisions may only be waived, modified, or altered in a writing signed by MassDOT and MUNICIPALITY.

5.8 Counterparts.
This Agreement may be executed in multiple counterparts, each of which shall be an original and all of which shall constitute one and the same instrument.

[Remainder of page intentionally blank]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

IN WITNESS WHEREOF, the Parties have executed this Agreement as an instrument under seal as of the date first above written.

Melrose, MA 02176

Via email: VReis@CityofMelrose.org

Dear Vonnie Reis:

Thank you for your submission to the Shared Streets and Spaces Program during the Fiscal Year 2023 application solicitation. We received a record number of applications and had many creative projects from which to select. I am pleased to notify you that Melrose's Equipment Only application for "Portable speed mitigation equipment" has been approved for $30,943.00.

Awarded municipalities must enter into a contract with MassDOT for the purchase of the approved equipment. To initiate this contract, please review and sign the Equipment Funding Agreement provided to you with this award letter and return it to SharedStreets@dot.state.ma.us as soon as possible. It is anticipated that the Notice to Proceed (NTP) for this award will be issued by November 1, 2022 and that the deadline for equipment purchases will be December 31, 2023. MassDOT-funded costs may not be incurred until the NTP is issued. Your patience during the contracting process is appreciated as MassDOT works to execute contracts with a large volume of awardees.

This award is reimbursement-based, meaning that funds are provided after costs are incurred. Please note that this is different than previous funding years. Reimbursement requests are processed by your District State Aid Engineer in the same manner as Chapter 90 projects. Learn more about this process as well as other implementation details on the program website at: mass.gov/shared-streets-and-spaces-grant-program.

Please email SharedStreets@dot.state.ma.us with questions related to this award. Thank you for your commitment to improving safety, access, and mobility for all roadway users in your community and for your participation in the Shared Streets and Spaces Program.

Sincerely,

Jamey Tesler

Municipality: Melrose

Project Name: Portable speed mitigation equipment

This Equipment Funding Agreement ("Agreement") is made and entered into by and between the MASSACHUSETTS DEPARTMENT OF TRANSPORTATION, hereinafter called "MassDOT", and the City/Town of Melrose, (hereinafter called the "MUNICIPALITY"), as set forth below:

WHEREAS, the MUNICIPALITY seeks to acquire certain item(s) of equipment (the "Equipment") described in its approved Shared Streets and Spaces Application ("Application"), attached hereto as Exhibit A, and

WHEREAS, MUNICIPALITY'S acquisition of and intended use of the Equipment will support public health, safe mobility, and strengthened commerce, and is in accordance with the project approvals from the Shared Streets and Spaces Program, and

WHEREAS, MassDOT has agreed to partially or wholly fund the Equipment in accordance with the terms, conditions and provisions set forth below.

NOW THEREFORE, in consideration of the obligations contained herein and other good and valuable consideration, the receipt of which is hereby acknowledged, MassDOT and the MUNICIPALITY hereby agree, each with the other, as follows:

1.0 EQUIPMENT

1.1 Procurement and Use of Equipment

MUNICIPALITY shall be solely responsible for the procurement of the Equipment. MUNICIPALITY shall comply with all laws, rules and regulations applicable to the acquisition, use, installation, and operation of the Equipment, including but not limited to procurement laws. MUNICIPALITY shall use the Equipment for its proposed and intended purpose as set forth in MUNICIPALITY's Application.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.2 Ownership

MUNICIPALITY shall have ownership and legal title to all Equipment acquired in whole or in part with the funds provided under this Agreement.

1.3 Maintenance

MUNICIPALITY shall be solely responsible for the maintenance and upkeep of the Equipment and the costs thereof. MUNICIPALITY shall maintain the Equipment in good condition and working order, ordinary wear and tear from proper use excepted. MassDOT shall have no responsibility for the use, maintenance, or fitness of the Equipment.

1.4 Equipment To Be Installed on MassDOT Property

If Municipality intends to install the Equipment on MassDOT property, Municipality agrees and acknowledges that it is solely responsible for obtaining all applicable permits and authorizations prior to performing any associated work. Receipt of grant funds shall not be construed as an authorization to perform work on MassDOT property.

2.0 GRANT FUNDING AND METHOD OF REIMURSEMENT

2.1 The maximum amount of funds available to MUNICIPALTY pursuant to this Agreement shall be $30,943.00 ("Grant Amount") as described within Exhibit B, (the "Project Cost Estimate").

2.2 MassDOT will reimburse MUNICIPALITY for the actual costs incurred for the purchase of the Equipment up to, but not exceeding, the Grant Amount. All costs incurred must be approved by MassDOT prior to reimbursement, and MassDOT's determination of eligible and approved costs shall be final in all cases. Any Equipment costs above the Grant Amount shall be borne by MUNICIPALITY.

2.3 Subsequent to the acquiring the Equipment, MUNICIPALITY may present an invoice of the incurred costs for approval and reimbursement by MassDOT. All reimbursement requests by Municipality shall be made in accordance with MassDOT's procedures for Chapter 90 funded projects using the applicable Chapter 90 forms ("Forms") required by MassDOT. MUNICIPALITY shall electronically submit the completed Forms and supporting documentation to MassDOT's District State Aid Engineer after expenses are incurred for review and processing. MUNICIPALITY shall provide MassDOT with any information MassDOT deems necessary to verify the accuracy of the invoice.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.0 AUDIT

3.1 All reimbursable charges in connection with this Agreement will be subject to audit by representatives of MassDOT and the MUNICIPALITY will retain all records and documents pertaining to the Agreement charges until such audit is completed or until written approval to destroy the records is given by MassDOT.

3.2 The Governor or his designee, the Secretary of Administration and Finance, and the State Auditor or his designee shall have the right at reasonable times and upon reasonable notice to examine the books, records and other complications of data of the MUNICIPALITY which pertain to the performance of the provisions and requirements of this Agreement.

4.0 TERM AND TERMINATION

4.1 This Agreement expire on December 31, 2023 ("Expiration Date"), unless extended as provided for in Subsection 4.2.

4.2 MUNICIPALITY may request to extend this Agreement beyond that provided in Subsection 5.1. Any request for an extension must be made in writing to MassDOT soon as practicably possible, but no later than sixty (60) days prior to the Agreement's Expiration Date. MUNICPALITY's request shall include a justification for the requested extension, the requested new expiration date, and any other information deemed necessary by MASSDOT. MassDOT, in its sole and exclusive discretion, may agree to grant said request for an extension of time if it finds that sufficient justification has been provided by the MUNICIPALITY.

4.3 This Agreement may be terminated by mutual agreement of the Parties, upon such terms and conditions as the Parties may mutually agree upon. Such termination shall be effective in accordance with a written agreement by the Parties. Termination under this section shall not constitute a waiver of the rights of either Party to damages or other remedies related to this Agreement, except to the extent that the mutual agreement termination this Agreement so specifies.

4.4 MassDOT may, by written notice to the MUNICIPALITY, terminate this Agreement in any one of the following circumstances:

4.4.1 The MUNICIPALITY neglects or fails to comply with any provision of this

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Agreement in accordance with its terms or within the time specified for performance herein, and MUNICIPALITY fails to cure any such failure within thirty (30) calendar days after receipt of notice specifying such failure. In the event this Agreement is terminated pursuant to this provision, MassDOT shall not be liable to the Municipality for any costs incurred or burdens assumed upon or subsequent to, and associated with, such termination.

4.4.2 The applicable State funding source fails to appropriate or otherwise make available funds for the Equipment. In the event this Agreement is terminated pursuant to this provision, MassDOT shall not be liable to Municipality for any costs.

5.0 MISCELLANEOUS

5.1 Notices:

MASSDOT:

The MUNICIPALITY:

5.2 Indemnification.

To the extent permitted by the laws of the Commonwealth, the MUNICIPALITY hereby assumes and agrees to indemnify, defend (at the MUNICIPALITY's sole expense and with counsel reasonably acceptable to MassDOT) and hold harmless MassDOT and MassDOT's affiliates, contractors, employees and representatives from and against any and all losses suffered by MassDOT and any and all claims, liability or penalties asserted against MassDOT by or on behalf of any person on account of, based in, resulting from, arising out of (or which may be claimed to have arisen out of), in whole or in part, the acts or omissions of the MUNICIPALITY in the use, operation, maintenance, installation, or repair of the Equipment. This covenant shall survive the termination of this Agreement.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

5.3 Governing Law; Severability.
This Agreement shall be governed by the laws of the Commonwealth of Massachusetts, without regard to principles of conflicts of law or choice of laws. In the event that any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be declared to be invalid or unenforceable, then the remainder of this Agreement or the application of such term or provision to other person or circumstances, other than those as to which it would become invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

5.4 No Third-Party Beneficiaries.
This Agreement shall not be construed to create any third-party beneficiary rights in favor of any other parties or any right or privilege for the benefit of any other parties.

5.5 No Agency.
In no event shall MUNICIPALITY or any of its employees, agents, contractors, subcontractors be considered agents or employees of MassDOT.

5.6 No Representations by MassDOT.
No representations, warranties or statements, expressed or implied, have been made by or on behalf of MassDOT with respect to the fitness of the Equipment for the use contemplated by MUNICIPALITY in its Application.

5.7 Amendments
This Agreement and each of its provisions may only be waived, modified, or altered in a writing signed by MassDOT and MUNICIPALITY.

5.8 Counterparts.
This Agreement may be executed in multiple counterparts, each of which shall be an original and all of which shall constitute one and the same instrument.

[Remainder of page intentionally blank]

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

IN WITNESS WHEREOF, the Parties have executed this Agreement as an instrument under seal as of the date first above written.

Formstack Submission For: Shared Streets and Spaces

Submitted at 02/28/22 9:35 AM

Part A: Applicant Information	
Date: (Required):	02/28/2022
Are you in a Municipality or Transit Authority? (Required):	Municipality
Municipality: (Required):	MELROSE
Name of official Municipal signatory: (Required):	Vonnie Reis
Contact person: (Required):	Vonnie Reis
Address: (Required):	562 Main St Melrose, MA 02176
Email: (Required):	VReis@CityofMelrose.org
Telephone: (Required):	(781) 979-4171
Has your municipality previously received a MassDOT Shared Streets and Spaces grant? (Required):	Yes

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

If Yes, list amounts and status (Required):	Sidewalk extension, Slow Streets, Parklets - 2020 grant amount = $ 59,160 (complete); Central Terrace outside space - 2021 grant amount = $28,822.75 (complete)
Part B: Project Information	
Project Type(s) – see program website for project type descriptions and to ensure you select the correct option for your proposal. Please note: all selected types must be included in project description. Equipment Only may not be combined with other project types. (Required):	Equipment Only
Project Title:	Portable speed mitigation equipment
Project location (GPS coordinates): (Required):	42.469826, -71.073892 & 42.452016, -71.066992
Amount requested from MassDOT: (Required):	30943.00
Project description (2-3 sentences): (Required):	Purchase of portable speed mitigation equipment for use throughout the City. Will be piloted in two specific locations in 2022.
Describe the project goals and benefits (1-2 sentences): (Required):	To train drivers to reduce speeds on residential streets
Is the project intended to address a demonstrated need for Speed Management, according to local information, data, plans, or community concerns related to speed and safety? (Required):	Yes
If Yes, please describe the issue/need,	Pilot projects will be used to evaluate the effectiveness of

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

including any/all data sources (Required):	traffic calming devices in specific neighborhoods. Pilot area chosen based on feedback from residents.
Is the project intended to provide improvements to infrastructure used by children to get to and from school (within two miles) or other youth destinations? If yes, please list schools or destinations. (Required):	Yes
Detail (Required):	Traffic calming devices will be installed on school walking routes.
Is the proposed project intended to provide improvements to infrastructure used by seniors to reach senior destinations (within one mile)? If yes, please list destinations. (Required):	Yes
Detail (Required):	Pilot project will benefit seniors in specific neighborhoods, including in and around retail, restaurants, and transit.
Is the proposed project intended to support safe walking and biking within one mile of a transit stop? If yes, please list the transit stop(s). (Required):	Yes
Detail (Required):	The pilot projects are both located within 1/2 mile of an MBTA station
Does the proposed project support safe routes to open space and/or parks? If yes, please list the name of the facilities. (Required):	Yes
Detail (Required):	The pilot projects are both located within 1/2 mile of a park or walking path

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Is the proposed project located in the municipality's Housing Choice designation area, will the project benefit from an Opportunity Zone Fund investment, or has the municipality implemented economic development best practices through the Community Compact program? (Required):	Yes
If Yes, list which applies (Required):	Melrose belongs to the Community Compact program.
Will the proposed project be fully implemented by June 30, 2023? (Required):	Yes
Is this project intended to be a temporary or permanent improvement? (Required):	Potentially Permanent
Description of project implementation including staff roles and key milestones: (Required):	Speed controls will be deployed by DPW staff in areas where residents have complained of unsafe vehicle speeds. Plan to pilot in two specific locations in 2022, but will use Citywide based on feedback and requests from residents.
List all materials required to implement the project, and how they will be obtained: (Required):	See cost estimate - this is an equipment request.
The Shared Streets and Spaces Program requires municipalities to provide notice or opportunity for public engagement related to the proposed project. Please confirm whether this has occurred. If yes, please list engagement activities. (Required):	Yes
If yes, please list engagement	Melrose Ped/Bike committee has met with resdients in these neighborhood several

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

activities (Required):	times in 2020 and 2021. Resdients have requested this type of project.
Demonstration of compliance with safety and accessibility-related regulations (ADA and MAAB): (Required):	Yes
Part C: Site Information	
Is this project entirely on muncipally-owned infrastructure? (Required):	Yes
Indicate what, if any, MassDOT-owned infrastructure is integral to the proposed project. If improvements are proposed on MassDOT infrastructure, indicate whether the municipality has applied for an Access Permit. (Required):	N/A
Indicate what, if any, infrastructure owned by a state agency other than MassDOT is integral to the proposed project (i.e. the Department of Conservation & Recreation): (Required):	N/A
Demonstrate whether the proposed project is in a Census Block Group identified by the relevant Regional Planning Agency as an Environmental Justice area: (Required):	Yes
Would the proposed project divert, detour, or otherwise impede current public transit service, even temporarily? (Required):	No
Attach Project Cost Estimate (Required - PDF file type allowed):	View File
Attach Locus Map(Optional - PDF file type allowed):	View File

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Attach Illustrations of project (Optional - PDF, EXCEL, WORD, JPG, JPEG, PNG file types allowed):	View File

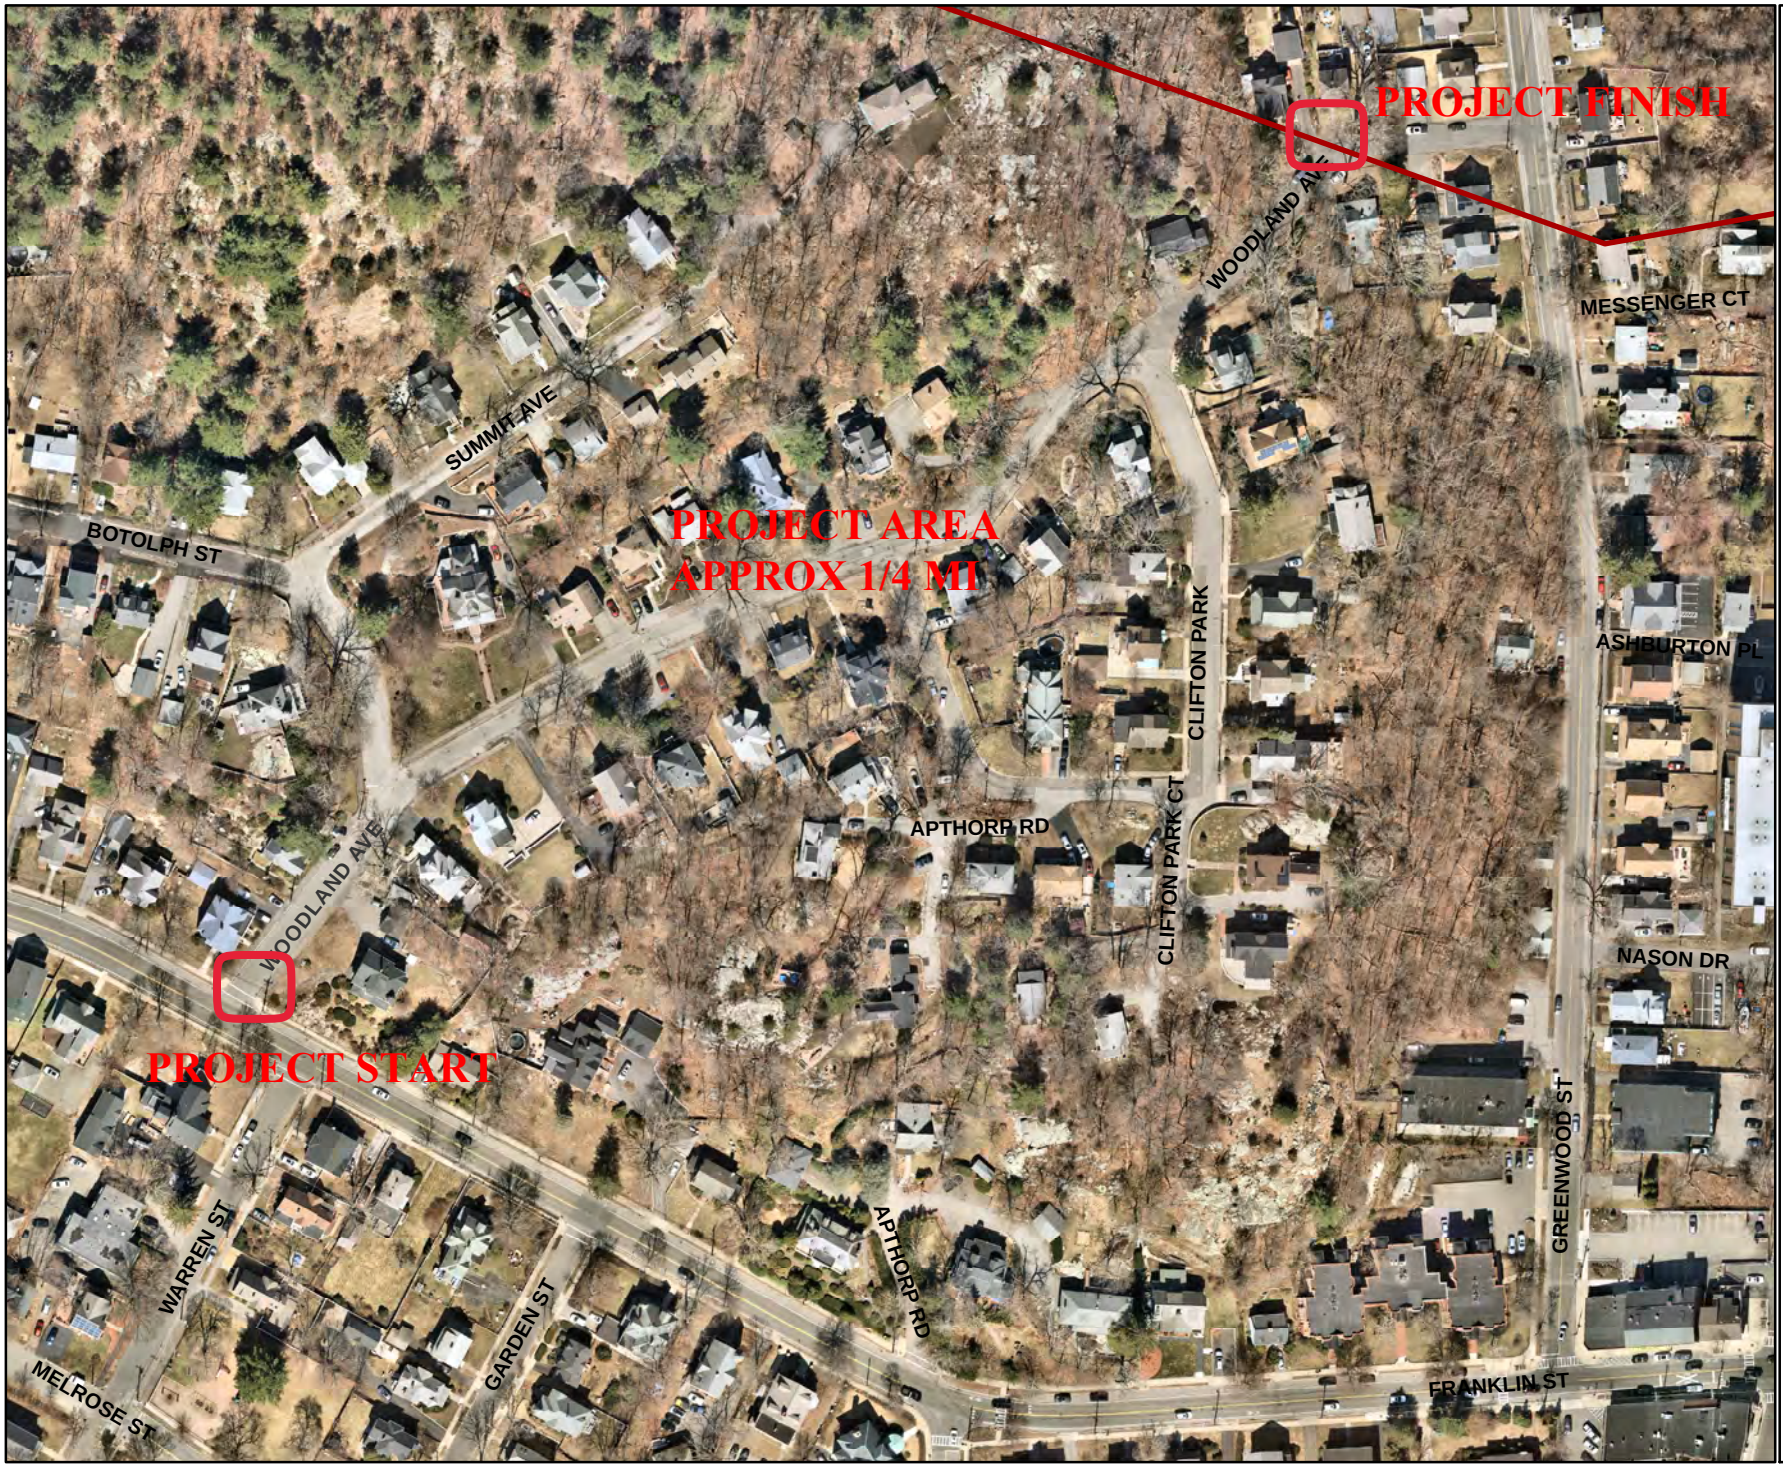
CITY OF MELROSE, MA DPW
SHARED STREETS GRANT APPLICATION
EQUIPMENT – PORTABLE TRAFFIC CALMING DEVICES



Project Narrative:

The City is applying for this grant to purchase portable traffic calming devices. Two pilot project locations have already been identified to pilot the devices. The two locations were chosen based on requests from residents related to traffic speed and safety concerns for pedestrians and cyclists. The first location is Woodland Ave. from Franklin St. to the Wakefield Town line. The project area is approximately ¼ mile. This residential street is used as a cut through and is especially busy due to morning and afternoon school traffic. The DPW plans to pilot portable speed bumps, "Slow Street" signs, and potentially temporary curb bump outs. This street was piloted as a Slow Street location in 2021 with cones and this project is the next step in determining what traffic calming measures will be most effective.

The second location is Lynde St., from Main St. to Summer St. The project area is approximately ¼ mile. Residents on this street are primarily concerned about speeds. The pilot will potentially include barrels and cones to simulate chicanes, portable speed bumps, and signage. This street was piloted as a Slow Street location in 2021 with cones and this project is the next step in determining what traffic calming measures will be most effective.

All of the equipment under this request will be used on these project or other projects Citywide, as more locations for traffic calming are identified.

MEMORANDUM

Date: May 27, 2022

To: Melrose City Council

From: Vonnie Reis, City Engineer
James Troup, Asst. Director DPW Admin and Finance

cc: Mayor Paul Brodeur
Patrick Dello Russo, CFO
Margot Fleischman, Chief of Staff
Elena Proakis Ellis, DPW Director

The MADOT Shared Streets program was launched in 2020 in response to COVID-19 to support projects that promote public health, safe mobility, and renewed commerce by providing spaces for walking, cycling, dining, and retail. The 2022 grant is focused on projects that will promote reduction in vehicle speeds and improve safety for all roadway users. The Engineering Division of the DPW submitted three grant applications and all three were approved for funding (see attached notification letters). This grant program does not require matching funds or in-kind contributions. A total of $158,843 in grants will be awarded to the City under this program. A summary of the projects for which grants were awarded is as follows:

1. The implementation of intersection improvements to the intersection at Vinton St. and West Emerson to slow vehicle speeds and enhance safety for pedestrians and bicycles. This busy intersection is located next to a park, a commuter rail station, residences, and businesses. Speed data has been collected and will be used in the design. The grant will fund evaluation of alternatives, including improvements to intersection geometry and changes to curbing and sidewalks. Field design/build of the final improvements with one of our on-call contractors. The grant amount is for $77,900.

2. Purchase of portable traffic calming devices to be used to pilot changes to residential streets. Devices to be purchased include portable speed bumps and cushions, flexible posts, “Slow Street” signs, traffic barrels, and both steel and water filled barricades. The DPW plans to implement pilot projects on Woodland Ave. and Lynde St. as soon as the equipment is acquired. The grant amount is $30,943.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3. Acquisition of a sidewalk plow dedicated to the schools. Improving safe winter access for children (and parents) at our school properties is a goal of the DPW and having this new piece of equipment will help achieve that goal. The recent reduction in contractors and their specialized equipment during the winter seasons has challenged the DPW, and the acquisition of this small plow will help to fill that gap. The amount of this grant is $50,000.

These grants will enable the DPW to continue making our streets and sidewalks safer so that all users can enjoy everything that Melrose has to offer. Community feedback is key to making these projects successful and residents will be able to provide comments to the DPW through a dedicated email address – sharedstreets@cityofmelrose.org.

The DPW requests immediate consideration of acceptance of the three grants in order to meet the timeline for the grant awards. Thank you for your consideration of this request.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE

In City Council

June 6, 2022

AN ORDER

ORDER-2022-128

Proposed FY23 Sewer Rates

Offered by Mayor Paul Brodeur

BE IT ORDERED

The Water and Sewer Rate Review Committee, pursuant to the language in Melrose Revised Ordinances, Chapter 228, Article II Section 228-15 (Rates Set by Mayor and Council: Water Rate Review Committee) and Article IV, Section 228-30 (Sewer Service Rates; Minimum Charges), respectfully requests updates to water and sewer rates as set forth herein.

By unanimous vote, the Water and Sewer Rate Review Committee proposes the below for your consideration.

The combined rate impact across water and sewer is a 5.17% increase over FY22 rates. In an effort to mitigate impacts to customers during the pandemic, when many people had financial hardships, Melrose did not increase water or sewer volumetric rates or base fees the last two years. In fact, we have not increased water volumetric rates since FY18 and water base fees since FY17, meaning that water rates have been level for the last five years. For sewer, we have not increased volumetric rates since FY17, and increases in FY18, FY19, and FY20 were limited to base fee increases only.

As water usage rebounds from pandemic level increases, rate adjustments are required to meet our FY23 financial obligations to operate the water and sewer systems. The proposed rates, as shown herein, would appear on water bills beginning on October 1, 2022, since earlier bills would not consist entirely of water used within FY23. This decision was made several years ago and has been consistent since that time. We recommend continuing this practice in FY23.

Proposed FY23 Water and Sewer Rates

Proposed FY23 Volumetric Rates	**Water (per 100 cf)**	**Sewer (per 100 cf)**
Tier 1	$7.20	$11.78
Tier 2	$9.65	$14.84
Proposed FY23 Base Fees (meter size)	**Water (per meter)**	**Sewer (per meter)**
5/8”	$17.65	$25.39
3/4”	$17.65	$25.39

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1”	$17.65	$25.39
1.5”	$67.29	$99.55
2”	$104.52	$155.17
3”	$191.39	$284.95
4”	$315.49	$470.35
6”	$625.74	$933.85
2nd Meter Fee	$17.65 ($50.00 if not upgraded)	--

We appreciate your consideration and are happy to answer any questions you may have. We look forward to continuing the important work of our committee in FY23 to provide fiscally responsible and sustainable water and sewer rates for our community.

MEMORANDUM

To: Melrose City Council

From: Water and Sewer Rate Advisory Committee

cc. Mayor Paul Brodeur
James Troup, DPW
Donna Cardillo, DPW
Lisa Patterson, DPW

Date: May 17, 2022

Re: Summary of FY23 Water and Sewer Rate Orders

The Water and Sewer Rate Advisory Committee, consisting of the members listed above, respectfully submits the following proposed water and sewer rate adjustments, enterprise fund budgets, and free cash requests for FY23. They are recommended by unanimous vote of the committee.

The combined rate impact across water and sewer is a 5.17% increase over FY22 rates. In an effort to mitigate impacts to customers during the pandemic, when many people had financial hardships, Melrose did not increase water or sewer volumetric rates or base fees the last two years. In fact, we have not increased water volumetric rates since FY18 and water base fees since FY17, meaning that water rates have been level for the last five years. For sewer, we have not increased volumetric rates since FY17, and increases in FY18, FY19, and FY20 were limited to base fee increases only.

As water usage rebounds from pandemic level increases, rate adjustments are required to meet our FY23 financial obligations to operate the water and sewer systems. The proposed rates, as shown on the next page, will appear on water bills beginning on October 1, 2022, since earlier bills would not consist entirely of water used within FY23. This decision was made several years ago and has been consistent since that time. We recommend continuing this practice in FY23.

Proposed FY23 Water and Sewer Rates

Proposed FY23 Volumetric Rates	Water (per 100 cf)	Sewer (per 100 cf)
Tier 1	$7.20	$11.78
Tier 2	$9.65	$14.84
Proposed FY23 Base Fees (meter size)	**Water (per meter)**	**Sewer (per meter)**
5/8"	$17.65	$25.39
3/4"	$17.65	$25.39
1"	$17.65	$25.39
1.5"	$67.29	$99.55
2"	$104.52	$155.17
3"	$191.39	$284.95
4"	$315.49	$470.35
6"	$625.74	$933.85
2nd Meter Fee	$17.65 ($50.00 if not upgraded)	--

In addition to these rates, the Committee respectfully recommends the following requests:

1. Approval of the Department of Public Works' Water Enterprise Operating Budget for Fiscal Year 2023 in the amount of $6,119,429, as shown in the budget document submitted under separate cover to the City Council.

2. Approval of the Department of Public Works' Sewer Enterprise Operating Budget for Fiscal Year 2023 in the amount of $8,793,909, as shown in the budget document submitted under separate cover to the City Council.

3. Approval of the MWRA Local Water Assistance Loan funding in the amount of $685,000, as submitted previously to the Council. The terms of this loan include payback over 10 years with 0% interest.

4. Approval of free cash from the Water Enterprise Fund consisting of the following items, for a total request of $570,098.10 (compared to a current balance of $870,241, or approximately 65% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Water Enterprise Fund budget due largely to lower than projected water usage

    b. $28,298.10 to the Water Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential water related emergencies that may arise during the upcoming fiscal year

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

c. $91,800 toward the design of water main capital improvements for the next two years, to have shovel-ready projects for potential infrastructure bill funding should the opportunity arise
d. $250,000 to supplement the water main construction project for calendar year 2022 (with the remainder to be paid using the MWRA loan funds noted above). The CY2022 projects include water main and service replacement on Appleton Street, Irving Street, Elliott Street, and Frost Avenue.

5. Approval of free cash from the Sewer Enterprise Fund consisting of the following items, for a total request of $1,123,629.51 (compared to a current balance of $1,675,926, or approximately 67% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Sewer Enterprise Fund budget due largely to lower than projected water usage

    b. $400,000 to mitigate customer impacts from the FY23 rates (similar to what was done last year from the water fund)

    c. $33,629.51 to the Sewer Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential sewer related emergencies that may arise during the upcoming fiscal year

    d. $400,000 for the design and construction of backup power generators at the Upham Street and Fellsway sewer pump stations, our two largest stations representing critical city infrastructure

    e. $90,000 for the purchase of a dump truck to replace Truck #55, a 17-year-old truck actively used by the Sewer Division with rotted-out floors, a rotted bed, and a recent failed state inspection.

We appreciate your consideration of these items and are happy to answer any questions you may have. We look forward to continuing the important work of our committee in FY23 to provide fiscally responsible and sustainable water and sewer rates for our community.

Re: FY2022 Snow and Ice Commitment

In consideration of the commitments of the Snow and Ice Budget for Fiscal Year 2022, the Department of Public Works is requesting a Free Cash transfer in the amount of $341,621.03 to make each category whole and to avoid financing the deficit.

Overall, the winter season proved challenging in many ways. The number of storms that required plowing were fewer than average, however there were several salting events that contributed to the cost effect on the snow budget. A historic blizzard and a twenty-four-hour storm were two of the three major snow events this past winter. The aging fleet is proving to be a challenge to maintain and costs to keep our equipment operable are unfortunately rising. We also suffered from a reduced number of contractors and contractors' equipment coupled with rising hourly costs.

Please noted that our 5-year average spent on Snow and Ice operations is $996,049. Although the budget has been adjusted each year, the average budgeted amount in the same period has been $574,103. Thus, the average deficit over the 5-year period is $421,946. As you can see, we face a less than average challenge in FY22. The allocation to cover this deficit includes $61,809.19 for Overtime, $128,607.51 for Hired Equipment/Contractors, $70,615.85 for Salt and Chemicals, $50,395.75 for Fleet repairs, and $30,192.73 for Gas and Oil.

Fiscal controls including purchasing from State Contracts and competitive bidding for supplies and materials continue to positively impact the spending in this category.

Thank you for your consideration and continued support.

AN ORDER

ORDER-2022-131

Authorizing a Bond for the replacement of the Salt Shed.

Offered by Mayor Paul Brodeur

BE IT ORDERED

BE IT ORDERED

That the City appropriates $1,757,000.00 to pay costs of constructing a new salt shed, including all costs incidental and related thereto; that to meet this appropriation, the Treasurer, with the approval of the Mayor, is authorized to borrow said amount pursuant to Chapter 44, Section 7(1) of the General Laws, or pursuant to any other enabling authority, and to issue bonds or notes of the City therefore; that the Mayor is authorized to take any other action necessary to carry out this project; and that any premium received upon the sale of any bonds or notes approved by this order, less any such premium applied to the payment of the costs of issuance of such bonds or notes, may be applied to the payment of costs approved by this order in accordance with Chapter 44, Section 20 of the General Laws, thereby reducing the amount authorized to be borrowed to pay such costs by a like amount.

Pursuant to Section 56-14 of the City Ordinances, attached is a projection of the principal and interest costs on the bonds proposed to be authorized by the following loan order under consideration by the City Council. The payment schedule attached assumes a 30-year borrowing term, an interest rate assumption of 5% over the life of the borrowing, and a level debt service payment schedule. The debt service on these bonds will not be paid from an enterprise fund and will have no impact on any enterprise fund rates.

Date: May 10, 2022

Re: **Proposing a Free Cash Appropriation for $1,225,000 or 22.68% of the Certified Free Cash available (balances as of 5/2/2022).**

As the CFO/City Auditor, I submit this summary of Financial Management Strategies for your review, information, and consideration.

Reserves/Stabilization Funds & Management

The City of Melrose has established a number of Financially Strategic Stabilization Funds, with a collective balance exceeding $7.1 million dollars. This provides assurance to the community that we can meet a negative downturn in the economy or unanticipated costs, which could disrupt the delivery of services and negatively impact our operating budget at any given time within a fiscal year. There is "tremendous value here" and in our collective decision to safeguard the assets of the community through the establishment of these funds. There is no greater priority from a financial perspective.

1. We have developed a **"Foundation Stabilization Fund" # 8401**, with a balance just under $3.7 million dollars. The request before you is to add the sum of $200,000 thousand dollars to this fund for a total of over $3.9 million dollars. The city's goal is to have the fund equate to 5% of the operating budget. In Fiscal 2022 that amount would be just over $4.5 million dollars. If approved, this would be a positive move in our efforts to reach that goal. The Massachusetts Municipal Association "best practice" includes adopting reserve funding targets of 5% or more based on the specifics of the municipal budget and consideration of spending and revenue risks. There is also a standing

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

City Council Ordinance (Section 48-5) that speaks to the funding of the Stabilization Fund annually. We have also budgeted $50,000 to go into this fund as part of the standard annual operating budget request.

2. We have established a **"Contract Stabilization Fund" #8404,** with a balance of just over $838,000 thousand dollars. The request before you is to add the sum of $460,000 thousand dollars to this fund in order to insure that the city can fund negotiated collective bargaining agreements when settled, and non – union compensation obligations for example. This includes any retroactive payments relative to the respective contracts and non-union salary adjustments. To date, going into FY2023, the Police Superiors and Patrol are out of contract as of June 30, 2021. In addition, the Clerical and Laborer's Unions are out of contract commencing June 30th, 2022. The target balance for this fund is $1.3 million dollars.

3. We have established a **Capital Stabilization Fund # 8405,** with a balance of approx. $547,000 thousand dollars, and we are not seeking any funding at this time as it mirrors our targeted amount of $550,000 at this time. Capital purchases in excess of $25,000 thousand dollars are funded from this source. This enables the city added flexibility in addressing its' capital needs (pay as you go financing) for items that are not advantageous to issue debt on (departmental equipment, for example) and may be needed at any time during a fiscal year.

4. We have established a **Suits and Claims Stabilization Fund # 8406,** with a balance of over $502,000 thousand dollars. The city uses this fund to address costs associated with legal claims and suits that arise throughout the fiscal year. We are not seeking any funding at this time as it meets our targeted amount of $500,000 thousand dollars.

5. We have established a **"Special Education Stabilization Fund" #8408,** which is used to fund special education costs realized by the School Department that exceed its budgeted funds. The request is to add the sum of $465,000 thousand dollars to this fund. We currently have just over $34,000 thousand dollars in this fund. Our target allocation is a standing balance of $500,000 thousand dollars.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

6. We have established a Statutory Fund under Chapter 32b, Section 20; called the **" OPEB Fund" #8407,** (Other Post Employment Benefits), with a balance of $1,048,000 thousand dollars. We are requesting the sum of $50,000 thousand dollars be added to this fund. The continued funding of this significant liability plays a "key" role in the determination of our Bond Rating by Standard and Poor's Rating Agency (please see most recent S & P report dated September 15, 2020). We have also incorporated a request for $50,000 thousand dollars as part of the standard annual operating budget request.

7. We have established an **"OSHA" Fund # 8409,** (Occupational Safety and Health Administration), stabilization fund with a current balance of over $155,000 thousand dollars. We are requesting the sum of $50,000 thousand dollars be added to this fund which would bring the balance to just over $205,000 thousand dollars. The city's target amount for this fund is $250,000 thousand dollars.

Your support and consideration is most appreciated.

Cc: Honorable Mayor Paul Brodeur

Statutory Excerpt: St. 1905 Chapter 393; amended by St. 1906 Chapter 162

Section 6.

Said Board of trustees shall have the absolute control and management of the property, and shall have power to make rules and regulations regarding its use and management, in such manner as it shall deem best.

The board shall annually in the month of January make a full report to the cities of Malden and Melrose of its receipts and expenditures, with its estimate of the amount required for maintenance for the ensuing year. Its expenditures in any year shall not exceed the sum of the appropriations for that year and the income at the disposal of said trustees by reason of any gifts received under the authority of section two of this act.

Section 7.

The cities of Malden and Melrose shall in their annual appropriation bills each appropriate and place at the disposal of said board one half of the amount determined by said board to be necessary for the maintenance of said property for that year, and set forth in its annual report as provided in section six.

If either of said cities shall in any year fail to make such appropriation, the said board shall upon the written request of said donors or their heirs or devisees who may then hold their estate, reconvey said property to said heirs or devisees free from all trusts;

but the amount required of each city by said board to work a forfeiture shall not in any year exceed one one hundred and fiftieth part of one per cent of the assessed valuation for the preceding year of the city having the smaller assessed valuation.

Said cities may, if in their judgment the proper maintenance or improvement of said property shall require it, appropriate in equal amounts and place at the disposal of said board sums in excess of the amount which said board is hereby authorized to require of said cities.

45

46 *Notes:*

47 Administered through and with current payments made through the City of Melrose HR Department.

48 Reimbursements from the City of Malden - estimated quarterly --> **$ 49,033.44**

49 Annualized Increase o/ prior yr --> **-1.56%**

50 Active employee pension cost based on per capita cost over all Melrose Employees.

51 H Unemployment Insurance funded semi-annually and if a PB employee is laid off Malden will contribute 1/2 actual cost.

52 I Melrose self insures Workingman's Compensation and Malden will pay 1/2 of claims as they actually occur.

53 Cost might change if employees or retirees change their benefits during Open Enrollment with effective date of change July 1.

Re: Free Cash Order 2022-133

In the Fiscal Year 2023 Budget attached to order 2022-133, the Pine Banks Foundation under new initiatives is requesting to pave the parking lot by the lodge/playground. The amount requested of $34,010.35 represents the City of Melrose 50% share of the project.

	Eqpmt/Captl Purch	Budget	Budget	$ increase	% increase	/City	Increase/City		
44	*Last Year & Continuing*								
45	Ballfield Project Amortization	$ 202,588.36	$ 202,588.36	$0.00	0.00%	$101,294.18	$0.00	58539	551044

Memorandum

To: Patrick Dello Russo

CC: Kerriann Golden

From: Neal Ellis

Date: 05/31/2022

Subject: Free cash appropriations

Free cash in the amount of $200,000 – Hardware Replacement

This free cash appropriation continues the ability of the IT Department to replace crucial systems on a replacement cycle. Currently, these funds will go toward a new telephone system at MHS, MVMMS, Horace Mann, Franklin, Hoover and Winthrop schools. Additionally, a project to replace all of the networking backbone equipment will be funded by this appropriation.

Free cash in the amount of $50,000 – MVMMS Security Cameras

Last year, the Superintendent of Schools Dr. Kukenberger identified the security camera system at the MVMMS as a priority for replacement. Since that time I have worked to find funds for this purpose. Mr. Dello Russo and Mayor Brodeur worked with State Representative Kate Lipper Garabedian to obtain state funds for this project. A $100,000 proposal was made however, the state voted to approve $50,000 for this project. Since the project was estimated to cost approximately $100,000, the Mayor's Office decided to put forth $50,000 in matching funds to fill out the project.

The system at the MVMMS is the original one installed when the building was built and opened in 2006. They are either failed, working improperly and not adequate. They are all cable-connected black and white units.

Free Cash in the amount of $20,000 – Social Media Archiving

The city and schools are in need of a system to archive the social media accounts being used by staff. To be in compliance with the Freedom of Information Act, we require a system that will archive and make retrievable, content posted and collected on our various social media. Additionally, this system will archive chat conversations taking place in the new M365 solution just implemented in the city. The content and search capabilities will be made accessible to the Solicitor's office for faster retrieval.

FY 2022

CAPITAL IMPROVEMENT PROGRAM

FINAL COMMITTEE REPORT

Paul Brodeur, Mayor

Denise Gaffey, CIP Chair, OPCD

April 2022

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CAPITAL IMPROVEMENT PROGRAM

EXECUTIVE SUMMARY

Since 1995, the Capital Improvement Program (CIP) Committee has reviewed and recommended funding for capital projects on an annual basis. Capital projects are major, non-recurring expenditures that typically cost $25,000 or more and have a useful life of five or more years.

In the past 27 years, roughly 220 projects have been funded at an estimated cost of over $166 million. Projects have ranged from the construction of two new elementary schools and funding for a new middle school to updating the city website. The projects have impacted a variety of city services including Schools, Public Works, Police, Fire, Parks, Library, Council on Aging, Inspectional Services, Information Technology, and Memorial Hall.

Projects are reviewed according to eight evaluation criteria: risk to public safety or health, deteriorated facility, systematic replacement, improvement of operating efficiency, coordination, equitable provision of services and facilities, protection and conservation of resources, and new or substantially expanded facility. Committee members then assign each project a priority group. These range from Priority Group A – "urgent, high-priority projects that should be done if at all possible" to Priority Group E – "very-low priority and/or not desirable." Committee members then rank the projects in priority order.

For FY2022, the CIP Committee received applications for 96 proposed projects from seven departments. Fifteen (15) projects fell into Priority Group A, 54 projects received a Priority Group B ranking and 27 projects received a Priority Group C ranking. No projects received a Priority Group D or E ranking, which means that the CIP Committee determined that all of the projects were worthwhile, as funding becomes available.

The CIP Committee recommends funding all Group A projects in FY2022 except for the Public Safety Building Upgrades as the original feasibility study is under review by a newly formed Public Safety Building Committee and the final plan and project cost is not yet known. This CIP Report includes a summary and project description form for each of the Group A projects along with a list in ranked order of the other 81 worthwhile projects recommended for funding in subsequent years.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

FY2022 RECOMMENDED
CAPITAL IMIPROVEMENT PROGRAM PROJECTS

Rank	Priority Group A Projects	Estimated Cost
1	Salt Shed Replacement	$1,700,000
2	High School Elevator Rehabilitation	$350,000
3	Fire Dept. SCBA Packs and Cylinders	$71,850
4	Memorial Hall Building Envelope Restoration Phase 2	$1,500,000
5	Lead Water Service Inventory	$50,000
6	Fred Green Athletic Field Turf Fabric Replacement	$600,000
7	Public Safety Building Upgrades	$32,558,000
8	High School Bathroom Upgrades	$1,350,000
9	Fiber Optic Network Upgrade	$360,000
10	Sewer Pump Station Emergency Backup Generators	$400,000
11	Fire Station HVAC Upgrade	$35,000
12	School Facilities Master Plan Study	$125,000
13	Fire Department Pumper Apparatus Replacement	$720,000
14	IT Network Switch Refresh	$414,000
15	Ashland Street Water Main Replacement	$40,000
	Total	**$40,273,850**

I. CAPITAL IMPROVEMENT PROGRAM

The Capital Improvement Program (CIP) provides a mechanism to analyze a five-year projection of public physical improvements needs. The CIP sets out proposed expenditures for systematically constructing, maintaining, upgrading, and replacing the City's physical plant. Planning for capital improvements requires communication between City departments, and a successful CIP will coordinate physical development with fiscal capacity.

What is a "Capital Improvement?"

A capital improvement project is generally defined as a major, non-recurring expenditure that includes one or more of the following:

- A non-recurring rehabilitation (i.e., something which is infrequent and would not be considered annual or other recurrent maintenance) or major repair of all or a part of a building, its grounds, or a facility, or of equipment, provided that the cost is $25,000 or more and the improvement will have a useful life of five years or more.

- Purchase of major equipment (i.e., items with a cost, individually or in total, of $25,000 or more, which has a useful life of five years or more).

- Any construction of a new facility (e.g., a public building, or water lines, playing field, or the like) or an addition to, or extension of, such a facility.

- Any planning, feasibility, engineering, or design study related to an individual capital improvement project or to a program that is implemented through individual capital improvement projects.

- Any acquisition of land for a public purpose, and any costs associated with the acquisition.

While the type of improvement is the basic criterion, a project costing at least $25,000 and with a life expectancy of five years or more is generally considered to be a capital improvement. Note that capital needs concerning water and sewer projects generally are not included in this plan, as they must be addressed through the City's Sewer and Water Enterprise Fund.

Why Plan for Capital Improvements?

The potential benefits of developing a thorough Capital Improvement Program are significant. In addition to keeping the public informed about future needs and projects, a CIP may facilitate coordination between capital needs and operating budgets, enhance the City's credit rating, control its tax rate, and increase opportunities for obtaining federal and state aid. As more attention is focused on community objectives and fiscal capacity in the CIP process, goals are achieved via thoughtful, cooperative planning.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

II. PREVIOUS CIP FUNDING: FY1995 – FY2022

The current CIP program, which was developed in FY95, has been very successful in helping the City to recognize where it most needs to allocate capital funds by prioritizing projects. In the past 27 years, roughly 220 projects have been funded at an estimated cost of over $166 million. Projects have ranged from the construction of two new elementary schools and funding for a new middle school to updating the city website. The projects have impacted a variety of city services including Schools, Public Works, Police, Fire, Parks, Library, Council on Aging, Inspectional Services, Information Technology, and Memorial Hall. Capital projects are funded in a variety of ways including from the city's operating budget, bonds, tax-exempt municipal leases, grants, and from the annual Free Cash line item. Projects funded through the CIP program since FY95 are listed below.

Capital Improvement Program Investments through FY22 (to date)

FY95	Water Street Repairs		$65,000
	Public Works Department (Highway) Truck with Sander		$58,000
	Fire Department Self-Contained Breathing Apparatus		$49,894
	Library Roof Replacement		$45,000
	Public Works Department Backhoe		$38,000
	City Hall Improvements		$30,000
	Public Works Department Pickup Truck		$29,000
	Public Works Department Compressor and Tools		$25,000
		TOTAL	**$339,894**
FY96	High School Roof		$195,800
	Computerization		$160,000
	City Hall HVAC		$95,000
	Boiler Replacement - Roosevelt School		$89,500
	PWD Dump Truck & Sander		$82,000
	Memorial Hall Weatherproofing		$76,000
	Asbestos Removal - Roosevelt School		$61,000
	Police/Fire Needs Assessment/Design Study		$60,000
	Fire Department Turn Out Gear		$50,000
	PWD Sign Maintenance Truck		$48,000
	Fire Station Exhaust Capture System		$36,000
	Council on Aging Accessible Van		$30,300
		TOTAL	**$983,600**
FY97	Memorial Hall - Handicapped Access		$405,000
	Schools Technology Improvements		$325,000
	Network & Office Automation		$201,713
	Front End Loader w/Plow		$152,500
	G.I.S. System		$123,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

	School Roof Replacements	$120,354
	Fire Department - Alarm Desk	$112,412
	City Yard Design/City Hall Stair Repair	$105,000
	Parks - Common Field	$100,000
	Play Area Rehabilitation	$100,000
	Consolidated Fueling Station	$97,400
	Municipal Software	$90,000
	Sidewalk Tractor w/Plow	$75,500
	Schools - Boiler Gas Conversion	$72,800
	Schools - Oil Tank Conversion	$62,321
	Asbestos Removal - Roosevelt	$62,000
	Contingency/Bonding Fees	$50,000
	School Furniture	$45,000
	TOTAL	**$2,300,000**
FY98	Memorial Hall - Electrical improvements	$250,000
	School's -Barry Auditorium	$161,000
	Fire - Fire Pumper (lease purchase)	$40,000
	PWD - Dump Truck w/Sander (2 units) (lease purchase)	$40,000
	TOTAL	**$491,000**
FY99	Lincoln School (Design and Construction)	$10,300,000
	City Hall Renovations - Phase 1 (Waterproofing/Ventilation)	$850,000
	Oil Tank Removal	$313,790
	Memorial Hall - Roofing Replacement	$188,370
	Central Fire Station Doors	$179,000
	City Yard Consolidated Fueling Station and Pumping Stations	$157,500
	Franklin Field Reconstruction	$125,000
	City Match FEMA - Ell Pond Brook	$117,840
	Horace Mann Window Replacement	$112,200
	PWD - Sidewalk Rehabilitation Program	$100,000
	Schools - Technology Improvements	$90,000
	Middle School Annex Roof Work	$81,900
	Schools – Elementary School Furniture	$59,400
	Inspect. Services - Fire Alarm Bucket Truck	$55,000
	Municipal Software	$35,000
	Bond Fees	$35,000
	TOTAL	**$12,800,000**
FY00	Technology Improvements (MHS language lab; computers at MHS and MMS)	$120,000
	Middle School Study	$25,000
	Roosevelt Schools Study	$25,000
	TOTAL	**$170,000**

	TOTAL	**$2,860,961**
FY21	DPW Asphalt Hot Box	$31,430
	DPW Citywide Sidewalk Repairs	$100,000
	DPW Citywide Tree Planting	$156,000
	DPW Crosswalk Safety Improvements	$80,000
	DPW Paving	$1,500,000
	Fire: Front Line Fire Apparatus	$2,169,000
	Fire: Self-Contained Breathing Apparatus	$110,000
	IT City PC Upgrade	$170,000
	IT School PC Upgrade	$488,700
	MHS/MVMMS Kitchen Equipment	$36,735
	Pole-Mounted Electric Vehicle Chargers (15)	$130,000
	Steamtrap Replacement and Repairs (five buildings)	$51,979
	TOTAL	**$5,023,844**
FY22	Beebe School Feasibility Study	$50,000
to date	City Hall Generator and Heat Pump	$341,000
	City Hall Window Repairs	$40,000
	Ell Pond Park Feasibility Study	$59,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Hoover and Horace Mann Roof Replacement Feasibility Studies	$75,000
Inspection Department Vehicles	$89,415
IT MVMMS Security	$50,000
IT Projectors	$120,000
IT School Chromebook Cart Replacement	$1,030,000
IT School Security Upgrades	$350,000
LED Upgrades (six schools)	$504,539
Library Renovation and Expansion Project	$21,000,000
Memorial Hall Envelope Upgrades Phase II	$1,500,000
MHS DHW Replacement	$35,345
Milano Center HVAC	$206,000
Milano Center Lighting Upgrade	$32,963
MVMMS and Lincoln VFD Replacements	$55,420
Parks: Pickleball Court	$75,000
Parks: Softball Field (Lebanon Park) Upgrades	$200,000
Parks: Volunteer Inclusive Playground	$200,000
Police: Chief Admin Vehicle and EV charger	$75,000
Roosevelt Lincoln School Telephone System Upgrades	$37,500
Roosevelt Slope and Erosion Repair	$110,000
Winthrop Furnace Replacement	$60,000
TOTAL	**$26,296,182**
GRAND TOTAL	**$166,214,451**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

III. FY2022 CIP ANALYSIS & RECOMMENDATIONS

The FY22 Capital Improvement Program (CIP) process began in November 2021 with a request to department heads to submit capital needs for the next five years. Ninety-six CIP project proposals were submitted by seven departments for a total estimated cost of $96,983,025. The CIP Committee first met in December to review the CIP process, timeline, and funding approach and concluded its work in March 2022.

CIP Committee Members

The CIP Committee is comprised of the following members:

Office of Planning & Community Development Director and CIP Chair, Denise Gaffey
CFO/City Auditor, Patrick Dello Russo
City Treasurer/Collector, Kathryn Armata
Department of Public Works Director, Elena Proakis Ellis
Director of Strategic Initiatives, Margot Fleischman
Melrose Public Schools Finance Director, Leia DiLorenzo-Secor
School Committee representative, Ed O'Connell
City Council representative, Mark Garipay
Community representative, Peter Bowman
Sustainability Manager, Martha Grover

Evaluation Criteria

The CIP Committee reviewed the projects for capital funding using the evaluation criteria below:

Risk to Public Safety or Health To protect against a clear and immediate risk to public safety or public health.

Deteriorated Facility An investment that deals with a deteriorated facility or piece of equipment. The action taken may be either: 1) reconstruction or extensive rehabilitation to extend its useful life to avoid or to postpone replacing it with a new and more costly one; or 2) replacement of the facility or piece of equipment with a new one.

Systematic Replacement An investment that replaces or upgrades a facility or piece of equipment as part of a systematic replacement program. This investment assumes the equipment will be replaced at approximately the same level of service. Some increase in size to allow for normal growth or increased demand is anticipated.

Improvement of Operating Efficiency An investment that substantially and significantly improves the operating efficiency of a department. Or, an expenditure that has a very favorable return on investment with a promise of reducing existing, or future, increases in operating expenses (e.g., introduction of a new or improved technology).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Coordination 1) An expenditure that is necessary to insure coordination with another CIP project (e.g., scheduling a sewer project to coincide with a street reconstruction project so that the street is not dug up a year after it is completed); 2) A project that is necessary to comply with requirements imposed by others (e.g., a court order, a change in federal or state law or administrative ruling, an agreement with another city or governmental agency); or 3) A project that meets established goals or objectives of the City Council or the Mayor.

Equitable Provision of Services, Facilities 1) An investment that serves the special needs of a segment of the City's population identified by public policy as deserving of special attention (e.g., those with ADA-accessibility issues, the elderly, or low- and moderate-income persons); or 2) An investment that, considering existing services or facilities, makes equivalent facilities or services available to neighborhoods or population groups that are now under served in comparison with people in the City, generally.

Protection and Conservation of Resources 1) A project that protects natural resources that are at risk of being reduced in amount or quality; or 2) A project that protects the investment in existing infrastructure against excessive demand or overload that threatens the capacity or useful life of a facility or piece of equipment.

New or Substantially Expanded Facility Construction, or acquisition, of a new facility (including land) or new equipment, or major expansion thereof, that provides a service, or a level of service, not now available.

Determination of Rank

Each Committee member also assigned one of the following priority groups to each request:

Group A: Urgent, high-priority projects that should be done if at all possible; a special effort should be made to find sufficient funding for all of the projects in this group.

Group B: High-priority projects that should be done as funding becomes available.

Group C: Worthwhile projects to be considered if funding becomes available; may be deferred to a subsequent year.

Group D: Low-priority projects; desirable but not essential.

Group E: Very-low priority and/or not desirable.

Finally, in addition to the above letter rankings, Committee members were asked to rank each project numerically, from highest to lowest priority (i.e. 1 to 96). The Committee's overall ranking was computed using the average ranks of all committee members. The Committee then met to further discuss projects in the collective groups and develop a final ranked list and a set of recommended projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Final Recommendations

In order for CIP planning efforts to be of maximum benefit to the City, funds should be restricted to recommended items only. Unspent monies due to high estimates and/or costs which come in under budget will revert to the CIP program and be used as contingency to fund projects which come in over the estimate. For all unfunded projects, a list of ranked projects should be maintained to guide future funding decisions. Some projects, due to safety concerns, external grant deadlines, or other factors, may need to occur out of order. Other projects can wait until a later date. The CIP Committee recommends to the Mayor funding the 15 top-ranked projects (listed below and described on the following pages), subject to availability of funds.

FY2022 RECOMMENDED
CAPITAL IMIPROVEMENT PROGRAM PROJECTS

Rank	Priority Group A Projects	Estimated Cost
1	Salt Shed Replacement	$1,700,000
2	High School Elevator Rehabilitation	$350,000
3	Fire Dept. SCBA Packs and Cylinders	$71,850
4	Memorial Hall Building Envelope Restorations 2	$1,500,000
5	Lead Water Service Inventory	$50,000
6	Fred Green Athletic Field Turf Fabric Replacement	$600,000
7	Public Safety Building Upgrades	$32,558,000
8	High School Bathroom Upgrades	$1,350,000
9	Fiber Optic Network Upgrade	$360,000
10	Sewer Pump Station Emergency Backup Generators	$400,000
11	Fire Station HVAC Upgrade	$35,000
12	School Facilities Master Plan Study	$125,000
13	Fire Dept. Pumper Apparatus Replacement	$720,000
14	IT Network Switch Refresh	$414,000
15	Ashland Street Water Main Replacement	$40,000
	Total	**$40,273,850**

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Priority Group A Project Descriptions

The CIP Committee recommends funding all Priority Group A projects in FY2022 with the exception of the Public Safety Building Upgrades. The original Public Safety Building feasibility study is under review by a newly formed Public Safety Building Committee and the final plan and project cost is not yet known. Department project request forms submitted for all projects are attached in the Appendix. The rankings of the remaining CIP projects are shown on pages 15 - 17 in ranked order and should be funded as further capital funding becomes available.

The CIP program will continue to take place annually with projects resubmitted and re-ranked each year. If funding becomes available during the year, the CIP ranking list is a guide as to what should be funded next.

Below is a brief summary of all CIP projects recommended for funding consideration in FY2022 in final ranked order.

1. SALT SHED REPLACEMENT $1,700,000
Department of Public Works, Facilities

The Salt Shed located next to the Public Works Operations Facility on Tremont Street plays a critical role all winter and especially during snow events. It was built in 1974 and has been repaired a number of times. Most recently the roof was damaged by strong winds in March 2018 but the wooden walls have also rotted and are warped, contributing to unsafe conditions for staff. It now needs to be replaced with a structure that will withstand the impacts of storing salt for road treatment for the next 40-50 years.

2. HIGH SCHOOL ELEVATOR REHABILITATION $350,000
Department of Public Works, Facilities

There are two failing elevators at the high school that require significant rehabilitation beyond the usual annual maintenance and repairs.

3. SCBA PACKS AND CYLINDERS $71,850
Fire Department

Self-Contained Breathing Apparatus (SCBA) equipment is critical equipment for the Fire Department. The air packs are used for a variety of emergency incidents including fire-fighting, hazardous materials, elevated carbon monoxide levels, and confined space events. In 2021 the Fire Department replaced 20 air cylinders and the SCBA compressor. To complete the equipment upgrade, replace aging equipment, and stay in compliance with OSHA regulations, they need 10 new air packs and 20 new cylinders.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4. MEMORIAL HALL ENVELOPE REPAIRS 2 $1,500,000

Office of Planning and Community Development

Repairing the building envelope at Memorial Hall is a high priority in order to protect the historic features and interior upgrade investments made over the years. A renovation project is currently underway to make the building weather tight and prevent further water damage to the building interior. However, a comprehensive analysis of the building envelope, completed by Gale Associates as part of this project, identified additional building envelope components needing repair that were not included in the original scope of work. The additional scope of work includes replacing the entire roof, repointing all brick and granite mortar joints, restoring all of the windows and miscellaneous related items.

5. LEAD WATER SERVICE INVENTORY $50,000

Department of Public Works, Engineering

This project includes the identification of lead water services which pose a public health threat. The goal of the program is to catalog all lead service pipe on both the private and public side of the service in a database of locations. This is phase one of a subsequent Lead Water Service Replacement Program targeted for FY2023 and FY2024.

6. FRED GREEN ATHLETIC FIELD TURF FABRIC REPLACEMENT $600,000

Parks Department

The turf fabric at Fred Green Athletic Field has a ten year life expectancy and is overdue for replacement.

7. PUBLIC SAFETY BUILDING UPGRADES $32,558,000

Departments of Public Works, Fire, Police

The condition of the City's public safety facilities, including the police station and three fire stations, has been a concern for many years. All four facilities have reached the limit of their program and useful space to accommodate the needs of the departments they currently house. They are outdated, undersized, non-code compliant, not energy efficient, and in need of numerous repairs. In 2016 the City hired an architectural firm to provide a comprehensive assessment of existing conditions, an analysis of space needs for both the Fire and Police Department, and to develop options for renovation and/or replacement. A Public Safety Study finalized in 2017 is under review by a newly formed Public Safety Building Committee to guide the future decision-making process. The project cost indicated here is in 2017 dollars based on the previous recommendation and is likely to change.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

8. HIGH SCHOOL BATHROOM UPGRADES $1,350,000
Department of Public Works, Facilities

Significant investments have been made to renovate and update portions of Melrose High School over the years including the Science Wing, HVAC system, and the Learning Commons. The School Department and DPW have identified bathroom renovations as the next priority. The bathrooms haven't been comprehensively updated since the high school was built in 1974 and are in very poor condition. Upgrades are needed to reflect the needs for gender neutral bathrooms, stall separations, accessibility, efficiency, and modernization. With over one thousand building occupants daily, the bathrooms get constant use. The project cost includes design and estimated construction costs.

9. FIBER OPTIC NETWORK UPGRADE $360,000
Information Technology

This project is necessary in order to sustain radio communications for the police and fire departments and was submitted by the IT department in conjunction with public safety. Currently, several radio towers are fed by copper lines that Verizon is in the process of terminating. The replacement solution is to expand and build out the city's existing fiber optic network to include new locations that the radio towers can connect to. In addition, the upgrade would create redundant loop paths through Melrose to ensure public safety uptime and would resolve "dead zone" areas where the radios don't fully function.

10. SEWER PUMP STATIONS EMERGENCY BACKUP GENERATORS $400,000
Department of Public Works, Engineering

The existing emergency generators at the Upham Street and Fellsway pump stations were installed in the 1960-70s and are not functional today. In the event of a power outage, pump station operations must be maintained to prevent sewer backups which makes this project a high priority, as indicated in a 2020 evaluation of all pump stations. The estimated project cost includes design and installation of backup generators at each station.

11. CENTRAL FIRE STATION HVAC UPGRADE $35,000
Department of Public Works, Facilities

The Engine 1 HVAC system for the second floor, which includes offices and living quarters, has failed and needs to be replaced with a new system.

12. SCHOOL FACILITIES MASTER PLAN STUDY $125,000
Department of Public Works, Facilities

The last comprehensive district-wide facility evaluation was done in 1997 by HMFH Architects. That study was instrumental at the time in positioning the city and school department to embark on a capital campaign for new school facilities and resulted in the

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Lincoln Elementary School Renovation and Addition (2000), the new Roosevelt Elementary School (2002) and the new Melrose Veterans Memorial Middle School (2007). Other important capital projects in school facilities that have been performed in recent years include the series of investments in the Melrose High School (Science Labs, Learning Commons, Guidance and Admin upgrades, Roof replacements and HVAC upgrades), the upgrades to the Horace Mann Elementary School and the Modular Classroom additions at the Winthrop and Hoover Elementary School. These projects addressed enrollment challenges and obsolete facility needs at the time, but the needs and challenges that confront the district today - 25 years after the last Facility Master Plan Study - require a new, comprehensive evaluation. This study will assess existing physical conditions at each school facility, review their adequacy to house anticipated student enrollment over the next 20 years and make recommendations for necessary renovations and reconfigurations in line with desired educational outcomes. The study will also help identify the priorities for pursuing grant funding for capital construction projects through the Mass School Building Authority.

13. PUMPER APPARATUS REPLACEMENT $720,000

Fire Department

The Fire Department's Seagrave pumper truck, purchased in 2007, is nearing the end of its useful life. Typically, pumper trucks stay in service for 10-12 years. Maintenance costs are very high and will continue to increase as the reliability of the apparatus declines.

14. NETWORK SWITCH REFRESH $414,000

Information Technology

This project would proactively replace the network switches throughout the city and schools. The current fleet of networking gear is six years old which is nearing the seven-year mark when switch gear begins to fail. Failures are usually seen in the fans which run continuously and when they fail, the equipment overheats and then stops functioning. It's recommended to start this project in FY22 and complete it in phases over three years.

15. ASHLAND STREET WATER MAIN REPLACEMENT $40,000

Department of Public Works, Engineering

The cast iron main on Ashland Street between Melrose and Franklin Streets needs to be replaced with 8-inch ductile iron water pipe in order to prevent unexpected water main breaks and water quality issues. This project was an Add Alternate on a much larger water main replacement project that has been included in the overall scope because the bids were favorable, but a separate funding source (not MWRA) needs to be identified.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

PRIORITY GROUPS B AND C PROJECTS

The following projects are not recommended for immediate funding but should be reconsidered for funding in subsequent years. Priority Group B projects were deemed by the Committee to be high priority to be addressed as funding becomes available. Priority Group C projects are worthwhile but they may be deferred to subsequent years.

Final Rank	Dept. Priority	Project Title	TOTAL
	Priority Group B		
16	DPW ENG-14	Lead Water Service Replacement	$2,500,000
17	FIRE-3	Fire Chief Command Vehicle	$60,000
18	IT-11	High and Middle School Telephones	$90,000
19	DPW FAC-3	Facilities CMMS	$100,000
20	IT-4	Printer Replacement - Schools	$151,300
21	IT-2	Camera Replacement - MVMMS	$100,000
22	DPW FAC-16	School District HVAC Evaluation	$250,000
23	DPW ENG-9	Annual Road Program	$2,700,000
24	PARKS-1	Ell Pond Park Improvements	$10,000,000
25	DPW ENG-5	Design Water Main Improvements	$60,000
26	DPW FAC-8	School Asbestos Abatement	$500,000
27	DPW FAC-13	Ripley School Roof Replacement	$350,000
28	DPW ENG-2	Lebanon St Survey	$144,910
29	DPW ENG-12	Crosswalk Safety/Accessibility Improvements	$400,000
30	IT-21	Cybersecurity Plan	$60,000
31	DPW FAC-21	Lincoln/Roosevelt Fire Panel Replacements	$100,000
32	IT-10	Lab Upgrade - Middle School	$77,000
33	DPW ENG-7	Penney Road Sewer PS Replacement	$500,000
34	FIRE-4	Fire Captain/Fire Prevention Vehicle	$60,000
35	IT-9	HS Lab PC Upgrade	$116,000
36	IT-6	PD Internal Camera Replacement	$25,000
37	IT-8	Lab Upgrade - HS Science Rooms	$115,000
38	DPW FAC-10	Milano Center Exterior Repairs	$35,000
39	IT-13	Wireless Upgrade	$183,000
40	DPW ENG-10	Citywide Sidewalk Repairs	$500,000
41	REC-1	Ford F-150 Lightening Pickup	$40,000
42	DPW FAC-11	Winthrop School Flooding Mitigation	$30,000
43	DPW FAC-7	MHS Courtyard Rear Stairs	$65,000
44	FIRE-5	Fire Alarm Bucket Utility Truck	$132,748
45	DPW FAC-27	Franklin School Windows/Roof	$2,500,000
46	DPW ENG-13	Fleet Upgrades	$2,500,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

47	PARKS-3	Hoover Playground Upgrades	$170,000
48	DPW FAC-24	MVMMS Generator	TBD
49	DPW FAC-9	MVMMS Settling Study	$150,000
50	DPW FAC-15	Fire - Engine 2 Plumbing/HVAC	TBD
51	DPW FAC-20	MHS Electric Heater Controllers/Contactors	$80,000
52	PARKS-4	Foss Park Basketball Court	$60,000
53	DPW ENG-4	Various Drainage Studies	$150,000
54	IT-3	Timeclock Upgrade DPW	$21,567
55	DPW FAC-17	Roosevelt HVAC Controls	$325,000
56	DPW FAC-26	Beebe School Renovation	$14,000,000
57	DPW FAC-18	Lincoln HVAC Controls	$300,000
58	IT-17	Document Management Project	$200,000
59	MEM HALL-2	Stair Repairs and Restoration	$625,000
60	IT-15	School UPS Replacement Project 2024	$40,000
61	DPW FAC-19	MVMMS Air Conditioning	$800,000
62	IT-5	Camera Replacement - Roosevelt	$25,000
63	DPW ENG-11	Citywide Tree Planting	$350,000
64	DPW ENG-17	I/I Investigations and Improvements	$250,000
65	IT-18	Camera Replacement - High School	$70,500
66	DPW FAC-6	MHS Loading Dock Repairs	$45,000
67	FIRE-6	Forestry-Brush Fire Pick Up Truck	$50,000
68	IT-12	Projector Replacement - District	$704,000
69	DPW ENG-18	Ell Pond Drain Relocation	$481,000
		Subtotal	**$43,342,025**

Priority Group C

70	DPW ENG-8	Replace Swains Pond Headwall	$60,000
71	DPW ENG-15	City Hall Parking Lot Upgrades	$300,000
72	PARKS-5	Crystal Street Tennis Court Repairs	$175,000
73	IT-14	Teacher Laptop Replacement	$694,400
74	IT-16	Chromebook Replacements	$600,000
75	IT-19	Security Cameras - DPW & Franklin	$45,750
76	DPW FAC-23	Masonry Repairs - Schools and City Hall	$400,000
77	DPW FAC-22	Milano Center Driveway Lighting	$40,000
78	DPW FAC-14	MHS 3rd Floor Renovation	$5,100,000
79	DPW FAC-29	Winthrop and Franklin Electrical Upgrades	$250,000
80	DPW FAC-30	Heating Projects - Hoover/Winthrop/Franklin	$900,000
81	PARKS-6	Conant Park Back Field	$20,000
82	DPW FAC-25	LED Lighting Upgrades - Schools	$600,000
83	DPW FAC-33	Lincoln School Chiller	$325,000
84	DPW ENG-21	Lebanon TIP Construction	$100,000
85	DPW FAC-28	City Yard Renovation	$1,650,000
86	DPW FAC-34	Roosevelt Roof Recoating	$300,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

87	DPW FAC-35	Fire - Engine 3 Roof Replacement	TBD
88	DPW FAC-31	School Window Treatments	$350,000
89	DPW ENG-16	Drainage Utility GIS Improvements	$100,000
90	DPW FAC-32	Lincoln Recoat Roof and Reglaze Skylights	$300,000
91	DPW ENG-19	Cemetery Digitization Completion	$80,000
92	DPW ENG-22	Friends Parking Lot Rehab	$150,000
93	DPW ENG-20	Water Bottle Filling Stations at Parks	$40,000
94	DPW FAC-36	MHS/MVMMS Pkg Lot Paving/Reconfiguration	$400,000
95	IT-20	Laptop Refresh Project - City	$162,000
96	PARKS-7	Lewis Monk Field Lights	$225,000
		Subtotal	**$13,367,150**

APPENDIX

On the following pages are the project descriptions, completed by Department Heads, for all projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Memorial Hall **Prepared By:** Denise Gaffey, OPCD

Project Title: Building Envelope Restoration Phase 2 **Date Prepared:** December 1, 2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project represents a future phase of Building Envelope Restoration Work that will be needed in approximately five years. A project is currently underway to implement a first phase of building envelope restoration work which will make the building weather tight and prevent further water damage to the building interior. However, a comprehensive analysis of the building envelope, completed by Gale Associates as part of this project, has identified building envelope components that are currently intact but will need to be addressed in five years to continue to maintain weather tight conditions. The future phase will include replacing the portions of the roof that are not being replaced during phase one, repointing the brick and granite mortar joints that are not repointed during phase one, rebuilding the front stairs and miscellaneous related items.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility, Improvement to Operating Efficiency, Protection and Conservation of Resources

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Building Envelope Evaluation Report prepared by Gale Associates dated September 24, 2021

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is an important project that should be planned for in approximately five years.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Construction estimate in 2021 dollars is $1,600,000. With soft costs estimated at approximately 25% of construction, the total cost without escalation is $2 Million.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

It is anticipated that the City would issue a bond to fund this project.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

This project is linked to the FY20 CIP Project that was funded by the City in the amount of $2,311,205 and is currently underway, representing the first phase of building restoration work to create a weather tight condition. A plan for building interior restoration and repairs should be developed for CIP consideration as well.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Memorial Hall **Prepared By:** Denise Gaffey, OPCD

Project Title: Memorial Hall Stair Restoration **Date Prepared:** February 24, 2022

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project involves rebuilding the front entrance stairs with new piles and a new concrete foundation to address the significant settling, cracking and displacement of the front stairs. A geotechnical analysis undertaken as part of the Building Envelope Project has documented the poor condition of the front stairs, including open and delaminated mortar joints, some cracks in the granite steps and movement in the wing walls away from the stairs. The front entrance is not used by the public but it is a prominent feature of the building and should be addressed soon to prevent further deterioration. This project includes rebuilding the concrete stair at the rear of the building and rebuilding the granite step at the north egress door. These stairs show signs of deterioration and the rear stair repairs would include regrading the area around the stairs to improve drainage.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility, Protection and Conservation of Resources

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Building Envelope Evaluation Report prepared by Gale Associates dated September 24, 2021

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is an important project that should be accomplished in approximately five years.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

These three project elements are estimated to cost $625,000, including soft costs and based on an estimate provided by PM&C, a cost estimating firm retained as part of the Building Envelope Project. Cost escalation is not built in to this cost.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Funding source to be determined

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

This project is linked to the Building Envelope Project but not dependent on it. The existing condition evaluation was included in the evaluation of the building envelope performed by Gale Associates.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Recreation

Prepared By: Frank Olivieri

Project Title: Recreation Vehicle Request

Date Prepared: November 15, 2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Recreation Department is requesting the purchase of a Ford F-150 Lightning Electric Truck.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

The Recreation Department will be in desperate need of a pickup truck within the next 1-3 years. Our current Rec pickup truck is used to transport equipment and supplies year round for programming and events. It is also needed to roam between programs during the days, evenings, and weekends as we travel from program to program. It is a vital part of our operations. Our current vehicle is a 2002 Chevrolet Silverado which was purchased by the Rec Dept. in 2017 for $5,300 (top of our budget). The current mileage is 107,000 miles and the vehicle is in below average condition at best. We typically have to jump the pickup truck two or three times per month. Safety is a concern when driving the vehicle as it has the tendency to shut off while driving locking the steering wheel in place. DPW has been of great assistance with trying to keep it running for us. We know it is only a matter of time before we will be in need of another pickup truck and we would like to make a real investment in an electric vehicle to meet the City's energy initiatives.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The vehicle has been included in the recent City Fleet survey.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is our priority project. We have no other CIP requests at this time.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The MSRP price range is $38,000 - $40,000 for the Ford F-150 Lightning EV.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Project funding will be in the range of $30,000 - $40,000. This will depend on rebates and other government / dealership incentives. Rebates can sometimes range from $5,000 - $12,500 off the MSRP. Funding would most likely need to be secured from the general fund budget or other sources. The Rec Dept. would find a way to contribute up to $5,000 if absolutely needed to help this project.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

This project is not liked to any other CIP projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Lead Water Service Inventory Program **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The project includes the identification of lead water services. Work would employ both in-house and contract personnel to develop a database of locations. The goal of the program is to catalogue all lead service pipe on both the private and public side of the service.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

EPA has required the identification and removal of lead water service pipes as lead from the pipes can leach into the drinking water.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?
N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority as lead in drinking water poses a public health hazard.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The project cost is estimated at $50,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$50,000 from Water Enterprise Fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Work to preceded the Lead Water Service Replacement Program.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Lebanon St. Survey **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Scope of Work includes the collection of elevation data on Lebanon Street, from Sylvan Street to the Malden town line, to be used for the 25% design effort for a federal Transportation improvement Project (TIP) application. The survey will be conducted using vehicle mounted LIDAR equipment and the data will be used to develop base mapping in AutoCAD. Inclusion for TIP funding required the completion of a 25% design by the applicant. Once approved, the TIP will cover the construction of the project.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Effort will support a federal funding application

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The proposed roadway improvements align with the City's Complete Streets Plan, including improvements for pedestrians and cyclists.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Completion of the 25% design is required to be considered by the TIP program. This request is the first step towards developing a 25% design.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The mapping and survey effort is estimated to cost $44,910. (see attached)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This funding is being requested from general fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

The work under this project will be coordinated with the request for additional funding during construction of the TIP project on Lebanon St.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Ashland Street Water Main Replacement **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The work under this project included the replacement of old, cast iron water main on Ashland Street, between Melrose Street and Franklin Street, with new 8-inch ductile iron water pipe.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This work was included in the larger Water Main Replacement, Contract 7, as an Add Alternate because the pricing on the contract bids came in favorably. Including this section with the larger project was financially advantageous for the City. The work was not eligible for funding through the MWRA water program.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The City's Asset Management Plan identifies upgrading of cast iron pipes to ductile iron to prevent unexpected emergency breaks and water quality issues.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Funding of this project is a high priority.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The estimated cost is $40,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$40,000 to be requested from Water Fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Various Drainage Studies **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

There are several areas in Melrose where property owners experience flooding during heavy storms that may originate from the public right-of-way. Most of the issues are localized, so it makes sense to group 5-6 small projects into one larger drainage study. The work will include an analysis of existing drainage patterns and structures, and recommendations or preliminary design of recommended improvements to mitigate flooding. Construction of some improvements may be implemented, if funding allows.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Due to climate change, larger storms are happening more frequently. Mitigation of these drainage issues will help prevent damage to public and private property.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

While these projects are small, the potential impact to the residents of not designing improvements could be quite large.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Preliminary design of improvements is estimated at $150,000. If funds remain after initial evaluation, some improvements may be constructed as funds allow.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

The funding request for this work is $150,000 from general fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Design of Water Main Improvements, Contracts 8 & 9 **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Design of water main improvements to include replacement of mains, services, hydrants, and other appurtenances to improve water quality and pressure in locations throughout the City.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Much of the water infrastructure in Melrose is past, or approaching, the end of its useful life. In anticipation of federal funding for "shovel ready" projects in the Infrastructure Bill, design of the next two phases of the DPW's ongoing water main improvement program is proposed, for a total of approximately 8,000 linear feet of water main replacement.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The City's Asset Management plan identifies replacement of aging water pipes to prevent emergencies and improve service to customers.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

As federal funding for construction may become available, having "shovel ready" projects is a high priority.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$60,000 is estimated. The resulting construction projects are estimated to cost approximately $2M.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$60,000 from Water Enterprise Fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Sewer PS Emergency Backup Generators **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Design and installation of an emergency backup generator at the 1) Upham St. sewer pump station and 2) the Fellsway sewer pump station.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

The existing emergency generators were installed in the 1960-70's and are not functional. In the event of a power outage, pump station operation must be maintained to prevent sewer backups.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

An evaluation of the pumps stations was conducted for the City in 2020. The report recommends replacement of the generators at these two pump stations.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority, as operation of the stations during a power outage is critical.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Estimated $400,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Funds will be requested from Sewer Enterprise Fund free cash for either one at a time or both.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Penney Road Sewer PS Replacement **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Design of the Penney Road sewer pump station project.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

The existing sewer pump station is in poor condition, The wetwell, pumps, and associated piping needs to be replaced.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

An evaluation of the pumps stations was conducted for the City in 2020. The report recommends replacement of the wetwell, pumps, and associated piping at this pump station with a new submersible pump station.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority, as operation of the pump stations is critical.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Estimated $100,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$100,000 to be requested from Sewer Enterprise Fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

A future funding request for $400,000 from free cash to construct the pump station improvements is anticipate

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Replacement of Swains Pond Headwall **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

An outlet structure into Swains Pond from an upgradient drainage system, just off of Swains Pond Avenue, was damaged during a storm in 2015 and requires replacement with a new headwall.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Risk to public health and safety (collapsing structure)
- Deteriorated facility
- Protection and conservation of natural resources

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

No

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority – this problem needs to be fixed before further deterioration or collapse occurs.

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

A guesstimate for this project is $60,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This project would be entirely funded through the general fund. We are not aware of applicable grant funding. We may be able to fund some portion through operating budget but would likely need a supplement from free cash to have adequate funds.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering Division **Prepared By:** Vonnie Reis

Project Title: Annual Road Program **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Annual Road Program includes the repair, rehabilitation, and re-paving of roads throughout the City. The streets to be included in the program are chosen based on a road ranking system developed in-house and maintained by the Engineering Division. In addition to road condition, other factors such as utility work and drainage repairs are considered when determining which roads will be paved each year.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Many of Melrose's streets are in Poor-Very Poor condition and require repaving under this program. The roadway ranking program identified over three miles of roadway with a condition score of 70 or less. Our annual Chapter 90 allocation of roughly $540,000 is not sufficient to keep pace with the replacement needs of our roadways.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The roadway ranking is a long term plan for maintaining the City's streets.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This project is a high priority as roadway conditions will continue to deteriorate if maintenance and repairs are deferred.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$3.75 million over the next 5 years ($750,000 per year).

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

All funding to be provided from Road Bonds.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Citywide Sidewalk Repairs **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The City uses eGov as our work order management system. Routinely, eGov requests for sidewalk repairs, both asphalt and concrete, date back several years. In FY21, a portion of free cash at the end of the fiscal year was allocated to catch up on the large backlog of eGov requests for sidewalk repairs. This is an ongoing need but is typically funded through free cash rather than the operating budget. If this practice continues, this becomes a CIP item. This project would use the City's on-call roadway and sidewalk contractor and would bring the eGov list up-to-date.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Risk to public safety or health – this project would repair damages that pose tripping hazards and prevent safe sidewalk use by disabled individuals.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Yes, the Melrose Forward master plan discusses the need to continue providing funding for sidewalks repairs and upgrades.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

It is estimated that approximately $100,000 will be needed each year in addition to operating funds to keep up with the sidewalk repair request lists.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This project is proposed to be entirely funded through general fund, likely via free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Not applicable.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW

Prepared By: Elena Proakis Ellis

Project Title: Citywide Tree Planting

Date Prepared: 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The City uses the eGov work order system to track requests for new trees or replacement trees. When a tree is taken down, the City automatically enters a replacement request. In addition, residents may request new street trees. The eGov system currently has a backlog of tree requests back to 2019. The operating budget does not allow for enough tree installations to keep up with the eGov requests. In addition, trees are planted through special project funds such as Chapter 90 when roadways are rehabilitated. In FY21, $150,000 was allocated to tree installation, which will allow us to catch up on our request list. Since there is no operating budget line item for tree planting, we will need an additional approximately $70,000 per year to keep up on the list moving forward.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Protection and conservation of natural resources – planting trees is important to our goals of greenhouse gas reduction and climate resiliency due to their reduction in heat island impacts

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Planting trees, especially resilient tree species, was identified in the City's Master Plan, the Natural Hazards Mitigation Plan (NHMP), and the Municipal Vulnerability Preparedness (MVP) report, all of which were approved by the Aldermen and the Mayor.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$70,000 annually

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

The proposed amount would be funded through the general fund (free cash), unless grant funding can be obtained. This would supplement the current budget, to allow the City to catch up on the eGov planting list.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

No.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Crosswalk Safety and Accessibility Improvements **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The City has been working toward completing projects in the Complete Streets Prioritization Plan and supplementing state grant funding with local funding sources when available. We continue to install rectangular rapid flashing beacons, new crosswalks and curb ramps, and solar speed feedback signs in locations where deemed appropriate. These expenditures have typically been funded through free cash for traffic calming.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Risk to public health and safety – these improvements would improve traffic and pedestrian safety.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

These types of upgrades were identified in the City's Complete Streets Prioritization Plan, which was approved by the Mayor.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

A proposed budget of $80,000 is recommended to continue these efforts.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Funding would be from the general fund for items where Complete Streets funds are either not available or would not be obtained soon enough for the level of need at particular locations.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Not applicable.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Public Works

Prepared By: Elena Proakis Ellis

Project Title: Fleet Upgrades

Date Prepared: 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The average age of the DPW Fleet is 17 years old. Emergency response is key to our success. We are in the process of updating the five year plan to replace older and not repairable equipment vehicles and equipment. The updated plan will be provided as soon as it is completed.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Health and Safety (not immediate)
Deteriorating Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$2.5M over five years

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

No money is allocated in the operating budgets for fleet vehicles. Last year we managed to purchase a new vehicle for Inspectional Services which was a high priority on the CIP list out of operating funds, but this is the exception rather than the rule and does not account for a planned replacement program.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Lead Water Service Replacement Program **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The project includes the replacement of lead water services at up to 500 properties. Work would include the excavation and removal of lead services and replacement with new copper pipe and all associated site restoration. The goal of the program is to eliminate all lead service pipe on both the private and public side of the service. Private side replacement would likely be partially funded through an incentive payment to property owners who willingly participate in the program.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

EPA has required the identification and removal of lead water service pipes as lead from the pipes can leach into the drinking water.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?
N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority as lead in drinking water poses a public health hazard.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The project cost is estimated at $2.5 million, over at least two construction contracts.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$2.5 million from the federal Infrastructure Bill funding and possibly some component from ARPA.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

To be coordinated with the results of the Lead Water Service Inventory program.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: City Hall Parking Lot Upgrades **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The municipal parking lot located behind City Hall is deteriorating and routinely floods. The proposed project would add a green infrastructure component by providing natural stormwater treatment, while remedying the current flooding and providing improved pavement conditions and drainage structures. The parking lot is approximately 77,000 square feet.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Risk to public health and safety (flooding)
- Deteriorated facility (parking lot pavement and drainage structures are deteriorating)
- Protection and Conservation of Resources (improvements to stormwater quality)

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Yes, it was included in the Natural Hazards Mitigation Plan (NHMP) and the Municipal Vulnerability Preparedness (MVP) plan, both of which received approval from the City Council and the Mayor.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium-high

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The cost is estimated at roughly $300,000. The paving component is being funded through a recent road bond, so this cost would just be for the drainage/green infrastructure components.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

The City will continue to seek grant funding for portions of this project but has not been successful to date.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Drainage Utility GIS Upgrades **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

As part of the National Pollutant Discharge Elimination System stormwater permit, the City is required to improve its GIS database to facilitate the work associated with meeting the permit's requirements. The current GIS layers are fairly accurate, but changes have been made to the system that have not been captured in the GIS. Furthermore, better flyover data provides a better basis for confirming data accuracy.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Improvement of operating efficiency

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

No.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium/low

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

A guesstimate for this project is $100,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This would likely be funded via the general fund (free cash), unless grant sources became available.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Not applicable.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: I/I Investigations and Improvements **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The project request includes funding for I/I investigations or improvements not funded under the MWRA Local Financial Assistance Program. Work may include, but not be limited to, additional CCTV, smoke testing, dye testing, building inspections, CIPP lining, short lining, and open cut pipe repairs.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Excessive infiltration and inflow (I/I) into the City's sewer system increases sewer rates. The MWRA LFAP for I/I work provides some funding, but in order to continue the identification and reduction of I/I, additional funding is required.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The City's sewer asset management plan includes the reduction of I/I.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This funding is a priority to help reduce sewer rates for customers.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Estimated $250,000 to supplement MWRA grant/loan funding

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$250,000 from the Sewer Enterprise fund free cash.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Ell Pond Drain Relocation **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The old drain outlet from Ell Pond presently goes under buildings on public and private property, including the former Caruso's Pizza building at the corner of Main Street and East Emerson Street. Relocation of this drain would make the currently vacant property more attractive and feasible for redevelopment.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Improvement of operating efficiency – this project promotes redevelopment, thus increasing tax revenue

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

A study was conducted by CDM Smith pertaining to this project. This project has the support of the Mayor's office due to the economic development benefits of being able to redevelop the subject property.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority given present interest in the property

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The CDM Smith report identified the planning level cost to be $481,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

The funding source for this project is uncertain. It's possible it could be funded through a public-private partnership with future owners of the vacant building noted above, to allow for redevelopment. Grant funding is also being sought and may require a City match.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Not applicable

CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Cemetery Digitization Completion **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The City has been undertaking a data digitization project at Wyoming Cemetery through which all hard copy burial cards are being scanned and attached via GIS to their respective parcels. This will eventually facilitate cemetery operations and also allow for a public interface whereby people can find burial information and locations easily online. This project has been ongoing for the past couple of years but will require additional funding for completion and implementation into day-to-day operations.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Improvement of operating efficiency – this project will substantially improve the operating efficiency of the Cemetery Division both now and in the future.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

This project is not part of a formal study but has been an ongoing initiative that has had enthusiastic support from the Cemetery Comission.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This project is a medium priority.

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$80,000 estimate to complete the project

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This project is proposed to be funded via the general fund (free cash), unless applicable grant funding be obtained.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE

Project Title: Water Bottle Filling Stations at Parks **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would fund the addition of water bottle filling stations at select parks and playgrounds.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Protection and conservation of natural resources – reduces single-use bottle use by providing locations to fill reusable water bottles, and also promotes public health by providing access to water in place of other drinks.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

The Mass in Motion program has identified the desire to have water bottle filling stations at parks and playgrounds, to promote health and wellbeing.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

This project is guesstimated at $40,000 to provide five water bottle filling stations, based on the need to tap water mains and bring service to the desired locations.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This project could be funded by the general fund (free cash), or grant funding could be sought.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Not applicable.

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Engineering **Prepared By:** Vonnie Reis

Project Title: Lebanon St. TIP Construction **Date Prepared:** 12/01/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Scope of Work includes any ineligible costs incurred during construction of the Transportation Improvement Program (TIP) funded Lebanon Street Complete Streets Improvements.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Funding supplements construction costs paid by federal program.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The proposed roadway improvements align with the City's Complete Streets Plan, including improvements for pedestrians and cyclists.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Some minor improvements may be considered ineligible under the TIP program. In the interest of cost effectiveness, the City may choose to construct those improvements as part of the larger project.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

This funding request is for $100,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

This request could be funded from Free Cash and would not be needed until the project is under construction. At the earliest, construction would start in FY2024.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW **Prepared By:** Elena Proakis Ellis

Project Title: Friends Parking Lot Rehabilitation **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Friends municipal parking lot is in need of repaving. The lot is approximately 47,000 square feet and contains approximately 90 parking spaces. A green infrastructure component could be considered to improve the treatment of stormwater from the lot as part of this project. The parking lot has recently been restriped to create more even parking spaces. This striping would be painted again if the lot was freshly paved.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

- Deteriorated facility
- Protection and conservation of natural resources (green infrastructure – improvements to stormwater quality)

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

Green infrastructure was identified as a priority in the Natural Hazards Mitigation Plan and the Municipal Vulnerability Preparedness program, both of which were approved by the Mayor and BOA.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Based on the current bid prices with our on-call paving and sidewalks contractor, this project is very roughly estimated at $150,000 without the green infrastructure component, or $250,000 with stormwater treatment incorporated.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

There was some discussion of possible state earmark funding for this project, although these funds do not seem to have been received.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Project Title: Salt Shed **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The salt shed located at the City Yard needs to be replaced. It was built in 1974. It has been repaired numerous times over the years. Most recently it was damaged by strong winds in March 2018. Wind damaged a large portion of the roof. The wooden sides of the buildings are rotted and warped. This building is critical to snow operations. The building is unsafe and requires immediate attention. Solar panels are also proposed to be added following replacement.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Health and Safety
Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

This building was identified as a top priority in the last CIP process.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Highest

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$1,700,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.
Bonding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Project Title: High School Elevator Rehab **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

We have two failing elevators at the high school that require rehabilitation. The design and construction is estimated to cost roughly $340,000 including design services.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Safety and Health
Deteriorated Facility
Systematic Replacement
Equitable Provision of Services, Facilities

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

No

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Highest

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$350,000, based on estimated $50K design and $300K construction with knowledge of current construction market for this type of work

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Possibly free cash; seeking earmark funds for some portion as well

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW-Facilities/Schools **Prepared By:** Proakis Ellis, Elena

Project Title: Facilities Computerized Maintenance Management System (CMMS) **Date Prepared:** 12/7/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The facilities division of DPW needs to have a system to track maintenance and repairs of equipment throughout all municipal buildings and schools. With all of the added HVAC equipment (e.g., HEPA filters) and other recent facility upgrades, we need a systematic way to track preventative maintenance and repairs and to catalog what equipment we have and where.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Operating Efficiency

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

No

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$100K

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
It would be helpful to have this in place before we continue with major rehabilitation projects in facilities, to enable us to track all new equipment and preventative maintenance schedules from the beginning.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Engine 1 HVAC system replacement for the second floor.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$35,000 based on quotes

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Requesting ARPA funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None (needs to be completed now, in advance of any larger public safety building changes)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/POLICE/FIRE **Prepared By:** DPW/OPCD

Project Title: PUBLIC SAFETY FACILITY UPGRADES **Date Prepared:** 11/30/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

All four public safety facilities, including the police station and three fire stations have reached the limit of their program and useful space to accommodate the needs of the departments they currently house. The facilities have become outdated, unsafe, non-code compliant, not energy efficient, undersized, and require repairs. As such, the Public Safety Building Committee commissioned a feasibility study of the current facilities and options for renovation and/or replacement.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Safety and Health
Deteriorated Facility
Improvement of Operating Efficiency
Coordination of Police and Fire Department functions
Protection and Conservation of Resources
New or Substantially Expanded Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

The Public Safety Building Committee commissioned a Feasibility Study and Assessment that was completed in June 2017 by Dore & Whittier Architects. This initiative is being continued with a new committee formed by the Mayor's office in FY22 which will guide the future decision-making process.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$32,558,000 in 2017 dollars

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match. Borrowing/debt exclusion vote anticipated to be needed

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Title: MHS Loading Dock Lot Repairs **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Repaving of the deteriorated loading dock parking lot at the high school, adjustment of the curb cut, and repainting of lines to accommodate more parking spaces.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$45K

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Repair concrete stairs and railings in the MHS/MVMMS courtyard on the Melrose Street side due to significant deterioration.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$65K, based on similar work performed recently in the front of the school

---

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Proakis Ellis, Elena

Project Title: School Asbestos Tile Remediation/Removal **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Franklin, Horace Mann, Winthrop, Hoover, and possibly MHS have asbestos floor tiles that require frequent attention and abatement when they become disturbed. It is important to replace tiles that could become friable, releasing asbestos particles. The DPW would prefer an annual capital outlay to chip away at this issue each summer in the highest needs areas.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Safety and Health
Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

Abatement of hazardous materials is a priority in the City's planning documents.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$100K/year for five years ($500K total), based on pricing during summer 2021

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This project would not apply if a larger renovation was scheduled for a school, such as the Winthrop.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Proakis Ellis, Elena

Project Title: MVMMS Settling Study and Associated Interior Repairs **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Fund an engineering/architectural firm to review the settling issues at MVMMS in the main lobby, gym floor, boiler room hallway, exterior front steps and walkways. Proceed with select repairs in most critical areas.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Health and Safety
Deteriorated Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium-High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$150K

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Proakis Ellis, Elena

Project Title: High School Bathroom Renovations **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The high school bathrooms were built in 1974 and many have original fixtures. Upgrades are needed to reflect the needs for gender neutral bathrooms, separation of stalls, accessibility, efficiency, and modernization. With 1,000+ people in the building on a daily basis, the bathrooms get constant use.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement
Equitable Provision of Services

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

The HS bathrooms have been identified as a need by the Mayor on many occasions.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$150K final design/bidding, $1.2M construction (rough estimate)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Elena Proakis Ellis

Project Title: Lincoln & Roosevelt Fire Panel Replacements **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The fire panels at the Lincoln and Roosevelt are approximately 17 -20 years old. The Simplex system is outdated and parts are difficult to find.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement
Risk to Public Health and Safety – communication to Fire Department.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium-High

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$100,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/COA **Prepared By:** Proakis Ellis, Elena

Project Title: Milano Center Driveway Lighting **Date Prepared:** 12/14/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The COA is interested in having street lights installed along the driveway into the Milano Center, to make it easier to see for drivers and pedestrians coming to events at the Milano and the Beebe. This requires underground conduit, light posts, and connection to existing electrical utilities.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Expanded facility (never had lights in this location before)

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

None known

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$40,000 guesstimate based on similar work performed by our street light contractor and excavation contractor

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Elena Proakis Ellis

Project Title: Winthrop/High School/City Hall Exterior Masonry Project **Date Prepared:** 11/30/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Winthrop School, High School and City Hall are in need of extensive amount of exterior masonry work – repointing joints and exterior façade. In 2019 our masonry contractor repointed the Ashcroft entrance to the Winthrop School, the cost was $60,000. ($30,000 from FY19 and $30,000 from FY20.) These types of expenditures are too large for our facilities operating budgets. Some work was accomplished with free cash at the HS in summer 2021, but there is more work to be done at these locations.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Safety or Health

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$400,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Project Title: MVMMS Backup Generator **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Providing emergency backup power for the Middle School.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

New or Substantially Expanded Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

Identified in the Hazard Mitigation Plan approved by the Mayor and Council since the school can be used as a shelter

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

TBD

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Title: School LED Lighting Upgrades **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

We have performed some LED lighting upgrades but need to do more. The High School, Middle School, Hoover, and Franklin have not yet been completed. All other schools are done.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Systematic Replacement
Improvement of Operating Efficiency
Protection and Conservation of Resources

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

Energy efficiency is a goal of the City's master plan and Net Zero energy planning, supported by the Mayor's office

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$200,000 per year for 3 years ($600,000 total)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

We have used a combination of Green Communities and other grant funding along with City funds. We should continue to explore outside funding sources in addition to City sources.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM
Capital Improvement Project Request Form

Department: DPW/OPCD **Prepared By:** Elena Proakis Ellis

Project Title: Beebe School Renovations **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Based on the 2021 work performed by Tappe Architects, this project involves renovation of the Beebe School to create a functional and code-compliant learning environment, as well as exterior improvements.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

The project meets essentially all CIP Evaluation Criteria, particularly Deteriorated Facility, Improvement of Operating Efficiency, Coordination, Equitable Provision of Services/Facilities, and Protection and Conservation of Resources.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

The project was endorsed by the community overwhelmingly through the approval of the general tax override in 2019, although the needs have changed with the completion of the modular kindergarten classrooms and present enrollment numbers. The project need is now being driven by the need for expanded accommodations at the elementary level and will be discussed further.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium-high

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$9M - $14M based on evaluation by Tappe and detailed cost estimate at 2021 prices

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Would require bonding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Public Works/School Buildings **Prepared By:** Elena Proakis Ellis

Project Title: Franklin School Windows and Roof **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The Franklin School windows are in similar if not worse condition as the windows that were replaced at the Hoover School in 2016. The roof requires replacement, and design money was allocated via free cash in 2021.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk to Public Health and Safety
Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$2,500,000, rough estimate

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

We hope to apply for MSBA Accelerated Repair funding for windows and roof at the Franklin School, which would require a City match of approximately 50%.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Public Works **Prepared By:** Elena Proakis Ellis

Project Title: City Yard Renovations **Date Prepared:** 11/30/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The two buildings in the rear of the City Yard need to be renovated or rebuilt. The old fleet garage roof has failed and has structural damage. There is a need for storage, parking and a larger recycling area. The entire site would benefit from a master plan to guide future decisions and phase improvements to protect assets within the buildings.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium priority for master plan, long-term need for construction

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$150,000 master plan & preliminary design; $1.5M final design & first phase of construction guesstimate

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/Schools **Prepared By:** Elena Proakis Ellis

Project Title: Winthrop & Franklin Electrical Upgrades **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

With the increasing amount of electronics (Smartboards/phones/chromebooks/air conditioners), the Winthrop and Franklin will need the electrical panels upgraded or added.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$250,000 per building, $500,000 total (guesstimate)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

A larger renovation at the Winthrop would eliminate the need for this project. This project also requires for the HVAC studies to have been completed in advance, to identify electrical needs.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Public Works/School Buildings **Prepared By:** Elena Proakis Ellis

Project Title: Heating Projects **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The boilers and unit ventilators at the Hoover, Winthrop and Franklin are very old and will need to be replaced in the near future. The Hoover's boilers were installed in 1963. The Franklin's boilers were installed in 1964 and the Winthrop boiler was installed 1999. The second boiler at the Winthrop was replaced in 2021 using operating funds.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$900,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

If a large scale project is undertaken to upgrade a school, such as the Winthrop, this project would not be undertaken as a separate initiative.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Public Works/School Buildings **Prepared By:** Elena Proakis Ellis

Project Title: School Window Treatments **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The High School, Franklin, Winthrop, and Horace Mann need window treatments/shades. The window treatments are needed to shade the sunlight, temperature control, and security and safety protocols.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.
$350,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Small amounts can be paid thru the yearly budget, but larger expenditures would need a different funding source.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Department: Public Works/School **Prepared By:** Elena Proakis Ellis

Project Title: HS/MVMMS Parking Lot Reconfrig **Date Prepared:** 11/30/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The High School and Middle School parking lots need to be expanded and reconfigured. There is a need for more spaces for students and staff. The back parking lot, Knoll, loading dock and front parking lots need to be expanded. Reconfiguring and paving of the knoll has been moved into the Ell Pond Park Rehabilitation project. The parking lot projects may also ultimately be connected to solar canopy projects if they ever become viable.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
New or Substantially Expanded Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

None

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Low

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$400,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

TBD

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: DPW/OPCD/Schools **Prepared By:** Denise Gaffey OPCD

Project Title: School Facilities Master Plan Study **Date Prepared:** 2/24/2022

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The recent Feasibility Study effort around the Beebe Elementary School has highlighted the need to perform a comprehensive assessment of all school facilities to better understand how existing facilities can be used in an optimal way to best serve the current and future needs of Melrose students. A comprehensive district-wide evaluation was last performed in 1997 by HMFH Architects. That study was instrumental at the time in positioning the City and School Department to embark on a capital campaign for new school facilities, and resulted in the Lincoln Elementary School Renovation and Addition (2000), the new Roosevelt Elementary School (2002) and the new Melrose Veterans Memorial Middle School (2007). Other important capital projects in school facilities that have been performed in recent years include the series of investments in the Melrose High School (Science Labs, Learning Commons, Guidance and Admin upgrades, Roof replacements and HVAC upgrades), the upgrades to the Horace Mann Elementary School and the Modular Classroom additions at the Winthrop and Hoover Elementary School. These projects addressed enrollment challenges and obsolete facility needs at the time, but the needs and challenges that confront the district today—25 years after the last Facility Master Plan Study--require a new, comprehensive evaluation. This study will assess existing physical conditions at each of the City's eight school facilities, review their adequacy to house anticipated student enrollment over the next 20 years and make recommendations for necessary renovations and reconfigurations in line with desired educational outcomes. The study will also help identify the priorities for pursuing grant funding for capital construction projects through the Mass School Building Authority.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Deteriorated Facility
Improvement of Operating Efficiency
Coordination with other School Facility Projects
Protection and Conservation of Resources
New or Substantially Expanded Facility

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$125,000.00 Estimate based on review of similar efforts and discussion with architect familiar with these projects.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

To be determined

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

This Study is linked to several CIP Projects including the Beebe School Renovations, the High School Third Floor Renovations and several miscellaneous school facility repair projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Fire **Prepared By:** Chief Collina

Project Title: Front-Line Firefighting Apparatus **Date Prepared:** 11/16/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Replace 2010 Seagrave Pumper. This piece is 3 years past the useful life as front line firefighting apparatus, and should be placed into reserve apparatus which will extend its usefulness, not running on an everyday basis. According to NFPA standards, replacement of front line apparatus is recommended to be 10-12 years of front line service, with a good preventative maintenance program. If we continue to run this piece at the pace that it is currently running as, we know from past experience that we will expect increased maintenance costs on it.

Replace 1999 Ford F-350 Pickup Truck. This vehicle is used as the Fire Department's forestry/brush-truck. It is used to fight fires deep into the wooded areas of Melrose as well as plowing the Fire Station ramps in the winter.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk of Public Safety or Health
Systematic Replacement
Improvement of Operating Efficiency
Protection and Conservation of Resources

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High Priority

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Quoted:
$720,000 – Seagrave Pumper
Guesstimate:
$50,000 – Ford F-350 Pickup Truck + $5,000 – Front End Plow + $? Emergency Lights

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

No grants are available at this moment for funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Fire **Prepared By:** Chief Collina

Project Title: Fire Command/Staff Vehicles **Date Prepared:** 11/16/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Replacement of the Fire Chief's car & Fire Prevention vehicle. These two vehicles play a crucial role in establishing mobile command posts at a variety of incidents in the City of Melrose.

The unreliability of the Fire Chief's car has become a chronic issue and impacts safety at emergency incidents. If the Fire Chief is unable to arrive at the scene of an emergency in a timely fashion, this potential delay could impact the safety of firefighters and civilians. The roof still leaks when it rains and continues to have transmission issues. The vehicle is not large enough to store fire protective gear and accommodate a proper command work station in the rear of the vehicle. A dependable, larger vehicle will allow the Chief to arrive on scene with the fire apparatus, set up and operate a proper command post, and direct and coordinate the activities of emergency incidents, increasing the overall efficiency of the operation.

The Fire Prevention vehicle serves as a multi-purpose vehicle; code enforcement, fire investigation unit, and safety officer at fire scenes. This vehicle carries tools used in investigations and canisters for collecting evidence. The current vehicle is 9 years old and has over 205,000 miles.

Replacement of the Fire Alarm Bucket/Utility Truck.

This vehicle is used to maintain our municipal fire alarm system, street lighting, and traffic signals throughout the City. The current vehicle is 23 years old and has been plagued in the past with significant mechanical issues. In addition, the vehicles body and framework is starting to rot/rust due to the age of the vehicle.

The unreliability of our aged and unreliable vehicles has the potential to affect firefighter and public safety.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Systematic Replacement

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High Priority

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Previously Quoted:
$60,000 per vehicle x 2 = $120,000 – Fire Chief and Fire Prevention Vehicles
$132,748.00 – Fire Alarm Bucket/Utility Truck

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

No grants are available at this moment for funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: Fire **Prepared By:** Chief Collina

Project Title: Self Contained Breathing Apparatus **Date Prepared:** 11/16/21

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

SCBA Equipment Replacement.

Our current Self Contained Breathing Apparatus (SCBA) Paks are aged out and no longer covered by warranty. Our air packs are used for firefighting incidents, hazardous material incidents, elevated carbon monoxide incidents and confined space incidents. The air packs are failing annual flow testing which requires repairs/maintenance multiple times a year. The Fire Department is spending thousands of dollars annually to repair/maintain our aged air packs.

The Fire Department also needs to replace and purchase 20 air cylinders (30 minute 4500 psi air cylinders). The cylinders the department currently holds have a useful life of 15 years, manufactured in 2008. These cylinders were tested for the last time this year and cannot be re-tested or repaired if needed. We are required under OSHA to Bench Test and re-certify all SCBA annually as well as Hydro Test all SCBA cylinders every five years.

This equipment is critical to the successful execution of our jobs.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Risk of Public Safety or Health

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

N/A

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High Priority

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Quoted:
10 SCBA air packs @ $5,395.00ea. = $53,950.00

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

20 SCBA cylinders @ $895.00ea. = $17,900.00

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

No grants are available at this moment for funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

N/A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Fiber Optic Network Upgrade Project **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project is being submitted on behalf of the IT, Fire and Police Departments.

This project is absolutely necessary to sustaining radio communication for public safety. Verizon is terminating all copper lines in Melrose as they have done in other communities in favor of their fiber optic network. Several of our radio towers are fed by these copper lines and need to be replaced. This is easily done by connecting them to our existing fiber optic infrastructure however, we would need to extend some fiber out to new locations such as the M/W Hospital, 2 Washington Street, 1 Nason Dr and 101 Cottage St. For the City, this project would connect the Wyoming Cemetery building and Pine Banks Office building In addition to these new locations, this upgrade would create redundant loop paths through the City which is needed for public safety to ensure uptime. For example, with our current system, data that goes to a radio tower would be disconnected if a car takes down a pole on the street and breaks our fiber optic line. With a loop, that data can get to the tower through the loop fiber that is run on different poles.

Currently, there is no tower on Washington St. causing a "Dead Zone" where Police and Fire and hear radio but not call into the station. This is near the Oak Grove area.

We need to do this prior to purchasing the radio equipment needed for the upgrade needed this year.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This project is a non-recurring rehabilitation of an existing asset over $25,000

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This project is part of a study to analyze the Fiber Optic Network connecting all city and school building and a fiber design by Comm-Tract, a state contract vendor for Fiber Optic Installs.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The budgetary cost we received from Comm-Tract includes some sites that we will not need to connect. Once these are removed and an additional site added (Cottage St), the total cost of the project will be approximately $270,000.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$120,000 from Capital and $150,000 from already allocated budgetary IT Capital funds in ORG 019303 and held FY2021 POs

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This is a stand-alone project but could be combined with a Police and Fire Radio upgrade project. This project would need to be done before the radio project otherwise you would run into a "cart before the horse" scenario.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT/Schools **Prepared By:** Ellis, Neal

Project Title: Camera Replacement - MVMMS **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the B&W cameras that were installed when the building was constructed. These cameras are old, their quality has diminished and they are dying. The external cameras are in the worst shape. Most of the images retrieved from these cameras is blurred or non-existent. They no longer function as intended. This causes many problems for the principal or police if they need to monitor or retrieve camera footage

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This project is a non-recurring rehabilitation (i.e., something which is infrequent and would not be considered annual or other recurrent maintenance) or major repair of all or a part of abuilding, its grounds, or a facility, or of equipment, provided that the cost is $25,000 or more and the improvement will have a useful life of five years or more. These cameras would last about 8 years before needing to be replaced again.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a prepared study and cost evaluation however, a new quote would be needed given the rising cost of equipment and the length of time since the quote was given.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This project is a medium priority in overall IT projects but a high priority of the Superintendent.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$100,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$100,000 from enterprise funds unless there is a way to pay for this through Infrastructure bill or a grant.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This could be combined with a camera replacement project at the High School however, this project is a much higher priority.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Timeclock Upgrade **Date Prepared:** 11/24/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would upgrade our current timeclock system at the City Yard to a new system. The current system has been having problems recently due to its age. It is running on a Windows XP virtual desktop which has not been supported since April of 2014 and no longer receives critical security patches.

The current software simply logs the clock-in and clock-out of each employee and is not sophisticated enough to program in more complex time scenarios. Additionally, all of the data clocked-in is not immediately transferred over to Munis for payroll. It is taken out and printed out then manually entered into Munis. All of this can be automated by recording the time straight into Munis and calculated simplifying the whole process. The new software would have the capability of seamlessly moving this data within Munis instead of faxing or scanning paper timesheets around. Also, it would allow any employee to see their time in the Employee ESS web console on a daily basis.

This timeclock project is a dual-effort with DPW and is being submitted on behalf of both IT and the DPW by Neal Ellis and Jim Troup

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a one-time cost that is rehabilitating a current asset. It will be above $25,000.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is not part of a study but is addressing an immediate need of the DPW

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority and should be placed in a manner to replace this equipment in the coming year. There are a lot of people who depend on this system and we don't want to be left without it if it fails.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$40,000 - Estimate based on prior software modules from Tyler

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$40,000 from General Fund or Capital

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
No

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Title: Printer Replacement - Schools **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace all of the printers in the School District.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

The average printer in the school district is over 13 years old. They are at their end-of-life and are currently costing us more on our printer maintenance contract due to their age. I have more information on an analysis of the printers in the District.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a quarterly study we do of the printers in our fleet which are maintained by Toshiba.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High, we need to get these printers swapped out

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$151,300 - Franklin - 6 Printers (6 x $850), Horace Mann - 9 Printers (9 x $850), Winthrop - 8 Printers (8 x $850), Hoover - 12 Printers (12 x $850), Lincoln - 10 Printers (10 x $850), Roosevelt - 16 Printers (16 x $850), High School - 51 Printers (51 x $850), Middle School - 66 Printers (66 x $850)

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$151,300 from unknown funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
None

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** ELLIS, NEAL

Project Title: Camera Replacement - Roosevelt School **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace approximately 4 cameras and possibly install 1 or two aditional in and around the Roosevelt School and replace the cabling to each camera with network cable. These would be run back to the server room.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This project is a non-recurring rehabilitation of existing equipment in the Roosevelt

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is based on former prices I have received for cabling and camera installation in similar circumstances.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a medium priority

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$25,000 from unknown

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$25,000

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This project could be linked to the MVMMS camera project

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** ELLIS, NEAL

Project Title: PD Internal Cameras Replacement **Date Prepared:** 11/30/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would be to replace the current 10+ year-old equipment currently at the Police station.

These cameras are analog and grainy. Several of them are black and white and the resolution was not good when they were installed. Improving this picture would be crucial to operations within, and for monitoring parts of, the station.

There are currently two internal camera systems in the Police Station that are not tied together nor is one system tied to the City camera system through the network. One system is tied to the network via analog to digital streamers which fail regularly and need to be rebooted. The other system is for cell monitoring is works on a closed circuit camera box. This project would bring both of those systems into our city-wide system for camera video footage recall and backup. Also, this would allow for one window through which dispatch could view operations.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a one-time cost to rehab an existing asset or assets. It is $25,000 and will not recur within 5 years. It will need to be replaced within and estimated 10-year period.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This project is part of a study of all camera and security systems within the City.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a medium to high importance project. It is possible that one of these systems could die soon. It also standardizes camera access throughout the city.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$25,000 estimated cost is from past projects of this type and the cost of the kind of cameras that would be needed for the installation. This would also include software licensing for the recording server and labor to install the cameras.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$25,000

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This project could be linked to any of the other camera replacement or new installation projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Title: Switch Refresh **Date Prepared:** 11/24/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the network switches throughout the city and schools. Our current fleet of networking gear is 6 years old. Most networking gear is made to be run for 7 years at a maximum before failures in the equipment begin. They all having running fans which run continuously for the time that they have been in operation. They will fail and the equipment will overheat and no longer work. We could split this into 2 phases where we do all of the school buildings in 2022 and the city buildings in 2023 or vice versa. This could be pushed to 2023 and 2024 but that is the latest we could get these units swapped out.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This project is a non-recurring cost that will take place in more than 5 years.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This project is part of a study of IT equipment as a whole and when it needs to be replaced as part of an ongoing replacement cycle.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority next to all of the projects since this is the backbone of our infrastructure. If it fails, everything that depends on it will fail i.e., computers, wireless servers, vpn etc.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

The project is estimated to cost roughly $414,000 based on the current price of switches times the number of switches we have. We may need some switches that are more expensive in some places or less expensive in some which is to be determined.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$414,000 from unknown funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This could be on its own or split into two projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Lab Upgrade - HS Science Rooms - 115 PCs **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the 115 PCs in the Science classrooms at the High School. It is a little unclear at this time whether or not all of the PCs would need to be replaced.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

These PCs are 8 years old and no longer able to run a modern Operating system such as Windows 10 or 11 and no longer receive security updates from Microsoft making them vulnerable to cybersecurity attack

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of an overall study of computer equipment lifecycles in the City and Schools

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$115,000 (115 PCs x $1000/PC). This may be less as indicated above.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$115,000 from unknown funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This can be tied into the replacement of PCs in the Middle School and/or High School labs.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis`, Neal

Project Title: HS Lab PC Upgrade Project **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Replacement of the PCs in HS Room 312 CAD computer lab (PCs are 8 years old) 30 Units
Replacement of the PCs in HS Room 302 computer lab (PCs are 8 years old) 30 units
Replacement of HS LC PC Lab 10 units.
Replacement of HS Laptop Science Cart 30 Units
Replacement of the Apple Macs in the Video Editing Lab and Studio: 9 x $2,000/iMac
All of the computers except for the iMacs are depended on to teach classes in these labs. Currently, they are running Windows 7 which is no longer supported and does not get security updates any longer making it vulnerable to attack by malware. These PCs are far too old to be updated and are between 6-9 yrs old. The iMac lab is running several iMacs that will no longer have updates in a year and a few that have already reached their end-of-life for support and are a cybersecurity risk. The laptops in the science cart will be 7 years old at the end of this school year

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This project is over $25,000, is not recurring within 5 years and a rehab of an existing asset.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This project is part of a study of the entire school and city computer assets and replacement cycle.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is very important

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$116,000 based on equipment general prices and quotes from the manufacturer in the case of the iMacs. There would be 100 PCs at $1,000/PC and 9 iMacs at $1,949-$2,000 These are based on an outright purchase but could be rolled into a lease.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Capital funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This can be linked to the purchase of the MS Lab replacement project or the HS Science room PC Replacement Project

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Project Title: Lab Upgrade - Middle School **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Woodshop PC Replacement 27 PCs
4th Fl Computer Lab - Jodi Miles 25 PCs
Library Lab 3rd Fl 25 PCs

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

These labs have PCs that are past their end-of-life and need to be replaced in order to allow them to function with modern applications and run Windows 10 or 11 which include security fixes needed to ensure cybersecurity/

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a study of all computer equipment in the City and Schools.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$77,000 based on the number of PCs * $1000/unit

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$77,000 unknown funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This could be combined with the project to replace the lab machines at the High School

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT Schools **Prepared By:** Ellis, Neal

Project Title: High and Middle School Telephone Project **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace all of the phones, phone servers and phone routing equipment at MHS and MVMMS. The current Cisco VoIP telephone maintenance contract costs more than it would cost to replace the system. We no longer have a maintenance contract for the phones because of the cost. Additionally, the servers that run the system are now 8 years old and cannot be relied on to keep running. The equipment routing the calls at the two buildings is also that same age and none of it is supported any longer.

This change would give a significant savings in phone line consolidation and move to a much cheaper phone connection. I would estimate that the new phone bill with long distance would be under $700/month.

Additionally, Verizon has been unable to correct the location of the 911 calls being made from each building. We worked with them for years to try to get this fixed and it was never fixed. We spent enough time that we could have replaced the system. This problem would also be corrected at the Hoover, Franklin, Winthrop and Horace Mann schools.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a replacement of a current asset that is non-recurring over $25,000

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a study of the entire school and city telephone systems.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a High priority since it impacts student safety

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$70,000 based on previous VoIP work completed using the same equipment.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$70,000 from Captial

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This is a stand-alone project

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Projector Replacement - District-wide **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the remaining projectors throughout the school district with wall-mounted ultra-short-throw projectors with interactivity and wireless connection.
The projectors in these buildings are over 12 years old and reached end-of-life 5-8 years ago. We are replacing bulbs in them but many are dim. Additionally, this project would replace the SmartBoards that are in the classrooms with the interactivity of the new projector. All of the SmartBoard features are now built into the projector so we can use a standard whiteboard with them.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This would be a non-recurring project for capital rehab.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This project is part of a study of the school district to consider the age of all projectors and equipment and determine a lifecycle and replacement schedule.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

High

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$704,000 based on the current cost of outfitting a room with a projector, a new whiteboard in place of the old whiteboard and a soundbar or speakers. Sometimes this will include a replacement amplifier to replace the current models which are bulky and around 15 years old and purchased with the building in the case of the Middle School

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$704,000 from free cash?

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
No

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Wireless Upgrade Project **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

Our current wireless system, throughout the city and schools is a Cisco system with 358 Cisco Wireless Access Points (APs). These APs (these are the ceiling units), will no longer get security fixes in 04/2021 at which point they will be 8 years old. With wireless technology evolving at a rapid pace, we are already behind in the wireless technology needs of the schools and city. I am looking to upgrade the system by the summer of 2023.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring purchase within 5 years. It is a rehab of an existing critical asset over $25k

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of an overall plan and study of current IT assets throughout the city and schools.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a very High importance for the end of the FY2023 and the beginning of FY2024

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Total cost of the project is $305,000. The source of the estimate is a budgetary quote from a vendor for the equipment and licensing. This is based on an outright purchase. We can lease this equipment over 3-5 years if necessary.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$305,000 from available free cash. All of the School wireless hardware is ERate reimbursable at 40% for a total of $122,000

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This would not need to be combined with another project however, it would help to have this done in conjunction to the switch refresh project.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Ellis, Neal

Project Title: Laptop replacement - 2025 District-wide 460 x $1,300 **Date Prepared:** 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace all of the current fleet of teacher and staff laptops at the school district. The current fleet was deployed in 2020 using CARES Act funding but will need to be replaced.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring rehab of an existing asset that will occur every 5 to 6 years.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a study that considers all of the IT equipment in the City and Schools and when it should be replaced

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Medium right now but High when approaching the deadline. This could be done in 2025 or 2026. I would worry about the battery life in the machines by 2026.

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$694,000 - 496 Laptops x $1400/laptop (volume discount and would include 1 monitor per laptop

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$694,000 from unknown funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
We can break this one down into 3 years of upgrades

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT/Schools **Prepared By:** Ellis, Neal

Project Title: School UPS (battery backups) Replacement Project 2024 **Date Prepared:** 11/24/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the Uninterrupted Power Supplies (UPS) that were first installed in 2018. They will be at their End Of Life (EOL) in 2024 and will need to be replaced around the school district. These UPSs are in every building and are used to regulate power into all of the equipment we have in Intermediate Data Feed (IDF) closets and Main Data Feed (MDF) rooms. they also provide battery backup power to the equipment in the event of a power outage. When equipment is powered off by loss of power (hard shutdown) and then powered back on, they can malfunction and/or be permanently damaged which is why we install UPSs between the wall outlet and the equipment.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring rehabiliation

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a study of all equipment in the schools and city to form a reliable replacement cycle.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This will be a high priority in 2024

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

Capital

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$40,000 from Capital however 40% of this cost ($16,000) is reimbursable under ERate but we would have to spend the money upfront.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
Could be combined with the work to replace the switch gear in every school.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** ELLIS, NEAL

Project Title: Chromebook Replacement 2024-2025 - 800 CBs (800 x $250)

Date Prepared: 11/22/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would begin replacement of the current new fleet of Chromebooks in a phased approach where we replace the current fleet over three years. This would be the first year of replacement.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring capital improvement however, we will need to begin this process every 4-5 years and a cycle of replacement lasts 3 years. this would be the first year of a 3-yr phased replacement at the schools.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is based on the Chromebook support lifecycle. The current fleet of Chromebooks purchased last year will be end of life and no longer obtain needed updates from Google and the manufacturer in Sept of 2026. At this time, they will no longer be able to run all web software that they will need to run, become increasingly more dangerous for cybersecurity, and no longer can be used for MCAS or WIDA online testing.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is a high priority as a project however, it will not be a high priority until 2024

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$200,000. This is based on 800 Chromebooks at $250/CB. This is assuming that 400-500 student will be using Chromebooks that they have purchased themselves.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$200,000 may be able to be obtained from a DESE grant. I have written grants for over $400,000 of Chromebooks in the last year and a half but those were mostly in response to the pandemic. It would be prudent to build this into an ongoing replacement budget. Otherwise we could lease the equipment for 6 years and purchase all of the equipment at once in the summer before the 2026-2027 school year.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$200,000. This is based on 800 Chromebooks at $250/CB. This is assuming that 400-500 student will be using Chromebooks that they have purchased themselves.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$200,000 may be able to be obtained from a DESE grant. I have written grants for over $400,000 of Chromebooks in the last year and a half but those were mostly in response to the pandemic. It would be prudent to build this into an ongoing replacement budget. Otherwise we could lease the equipment for 6 years and purchase all of the equipment at once in the summer before the 2026-2027 school year.

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT DPW Auditor's Inspectional Services Assessors Clerks **Prepared By:** Ellis, Neal

Project Title: Document Management Project **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would analyze the storage of documentation, help to organize it into material to be shredded, saved or scanned then scan the needed items. The scanned docs would then be housed in a cloud-based storage solution and software.

This is critical in the Inspectional Services department where they have run out of physical space to store plans and documents and retrieval is cumbersome. Their solution would be combined with an online submission form in order to submit plans electronically directly into the system without having to scan them from paper.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring project that costs over $25,000. There would be an annual cost for use of the software and storage of the scanned items

---

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This was part of a budgetary quote given to us by Ricoh. Their price was very high and I think we could do better than the proposed price with another vendor. From what I can see, we would have at least $200,000 in material to scan but we could do a piece and pay for the software and do a little year after year.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

This is an important project. It is High given the state of the paper storage in the basement but it could wait a year

---

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$200,000 from budgetary quote from Ricoh.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$200,000 from Capital

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This would be a stand-alone project

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT Schools **Prepared By:** Ellis, Neal

Project Title: Camera Replacement - High School **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the 45 existing cameras at the High School and install two additional cameras. The cameras will be at the end of their useable lifespan at that time and will need to be replaced. They will be over 10 years old at that time

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a replacement of an existing asset costing more than $25,000

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of an overall study of IT equipment through the schools and City

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Low

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$70,500 for new equipment, labor to replace each unit and adjust + programming and then attachment to the server and test. Given past quotes for similar work, I would estimate the average cost/unit to be $1,500/unit x 47 units.

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$70,500 from Capital

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This project could be combined with the MVMMS Camera Replacement Project and/or the Roosevelt Camera Replacement Project.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT-DPW-Schools **Prepared By:** ELLIS, NEAL

Project Title: Security Camera project - City Yard and Franklin **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would bring the existing stand-alone camera system at the City Yard into the City System allowing for backup of data and recovery of the operating system if corrupt. We are also paying a lot of money for maintenance and repair of the separate system so this would make the system more stable. The police also do not have access to these cameras if there is an incident or to monitor. Additionally, the Franklin is the only school without network cameras. There is a small camera that is used to verify a person through the intercom but this is not recorded video nor does it have backup and recall or the ability for the Police to monitor it.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is a non-recurring purchase over $25,000 that is a rehab of an existing asset

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of a study of current IT assets within the city and schools.

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Low

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$45,750 for cameras, software licenses and labor to install. This is based on an outright purchase, baby!

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$45,750 from Capital funding

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This could be combined with the camera replacement at the Roosevelt School and/or the MVMMS camera replacement projects.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** ELLIS, NEAL

Project Title: Laptop Refresh Project - City Laptops **Date Prepared:** 12/1/2021

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

This project would replace the current laptop fleet in the City. These will need to begin being replaced in 2025.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

This is for a non-recurring replacement of a current asset over $25,000. This will need to be funded every 5-6 years.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, City Council)?

This is part of an IT Study of equipment and replacement cycles

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Low right now

Project Estimated Cost and Source: List the total cost of the project in year 2021 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

$ 162,000.00 Source of the estimate is the going cost for a laptop when purchased in this number of units. If this was combined with the purchase of laptops from another laptop refresh project like for the schools

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

$ 162,000.00 from Capital funds

Project Coordination: If the project is dependent upon or should be linked to one or more CIP projects, identify them and indicate what the relationship among the projects is.
This project could be combined with the purchase of laptops for the Schools for one of the fiscal years.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

CITY OF MELROSE
CAPITAL IMPROVEMENT PROGRAM

Capital Improvement Project Request Form

Department: IT **Prepared By:** Neal Ellis

Project Title: Cybersecurity Plan **Date Prepared:** 2-22-22

Project Description: Give a brief description of what the project includes. Provide basic information, such as location, size, acreage, floor area, capacity, etc. Attach brochures and plans of new equipment or photos of equipment to be replaced.

The goal of this project is to create a solid set of cybersecurity policies and implement them. Find best management practices that we can use given our network and infrastructure. Ultimately create less of an attack surface throughout the City and Schools.

This project would allow for the hiring of a cybersecurity consulting firm to review our policies and practices and make recommendations for new policies and help us create them. This would be a proactive step toward mitigating potential cyber threats as they increase globally. $65,000 would be enough for the consultation and policy creation as well as an investigation and recommendations. Actual penetration testing and a deep dive into the network/protocols/technology, wifi penetration and social testing would not be included in this kind of assessment. We have had those assessments about 3-4 years ago but we do not have the staff to implement those changes.

Project Justification: Write a brief description of how the project meets as many of the project evaluation criteria as set forth in the Capital Improvement Program Information Packet.

Required for insurance and by rating agencies.

Planning Context: Is the project part of a prepared plan or study? If so, when was the plan or study prepared and by whom did it receive its highest level of approval (e.g., department head, committee, Mayor, Board of Aldermen)?

NA

Project Priority: Describe the importance of this project in relation to all other proposed projects in your department, and whether they are scheduled for current or future FY budgets.

Project Estimated Cost and Source: List the total cost of the project in year 2019 dollars, the source of the estimate (e.g., comparable facility, unit costs, engineer/architect, bids, guesstimate, etc.), and if it is based on an outright purchase or lease.

FY23: $65,000

Financing: Indicate the amount to be obtained from the project's funding source (e.g., general budget fund, enterprise funds, specific accounts, local aid, grants, private funding, combination, etc.). Note reimbursable funds and local cash match.

Possibly ARPA funds

Budget Estimate

Melrose Little League Field
Melrose, MA
December 1, 2021
Joan Bell

Budget Estimate – Materials & Installation

Musco's Light-Structure™ System as described below and delivered to the job site:

Baseball Field *(Materials Only – LED Light Source):*	**$115,000 - $125,000**
Estimated cost for electrical contractor to install:	**$90,000 - $100,000**

Equipment Description

Light-Structure™ System in 5 Easy Pieces™

- Pre-Cast concrete bases
- Galvanized steel poles
- Remote electrical component enclosures
- Pole length wire harnesses
- Factory-aimed and assembled luminaries

Benefits of the Light-Structure System with TLC for LED™ Total Light Control

- Reduction of energy and maintenance costs by 50% to 85% over typical 1500w HID equipment
- Reduction of spill light and glare by 50% or more
- Guaranteed light levels of 50 footcandles on the infield and 30 footcandles in the outfield
- An unmatched warranty for up to 25 years that includes onsite maintenance
- Includes our Control-Link® System for remote on/off control and performance monitoring with 24/7 customer support

Notes

- Requires confirmation of field dimensions, pole locations and a Musco lighting design prior to providing quote(s)
- Based upon projects similar in scope and is intended for **preliminary planning purposes only**
- Estimate is based on **December 2021** pricing and is subject to change
- Getting electrical power to the site, coordination with the utility and any power company fees are the responsibility of the owner
- Assumes standard soil conditions - rock, bottomless, wet, or unsuitable soil may require additional engineering, special installation methods and additional cost
- Assumes building code IBC 2015 and 130 mph wind speed

Thank you for considering Musco for your sports lighting needs. Please feel free to contact us with any questions you may have.

MEMORANDUM

Date: June 2, 2022

To: Mayor Paul Brodeur

From: Elena Proakis Ellis, Director of Public Works

cc: Patrick Dello Russo, CFO/Auditor
Margot Fleishmann, Director of Strategic Initiatives

Subject: Free Cash Request – Traffic Calming

The Department of Public Works respectfully requests $70,404.57 of free cash to put toward traffic calming/traffic control devices. We have had many additional requests for Rectangular Rapid Flashing Beacon (RRFB) pushbutton crosswalk devices and solar speed feedback signs. We also make traffic safety improvements on our capital projects when the opportunities arise, such as reconfiguring intersections to narrow crossing distances or to improve compliance with speed regulations. The requested free cash will be used to fund additional requests that have not yet been met. Requests will be prioritized based on feedback from the police department and available speed and volume data.

Status Update on Past Traffic Calming Measures

Over the last several years, the City has accepted mitigation money related to rideshare services, in addition to allocating free cash funds to traffic calming measures. These funds, oftentimes in combination with other grant funding and roadway improvement allocations such as Chapter 90 funds, Complete Streets grants, and road bonds, have been used to implement a variety of traffic calming and safety improvement measures. The information below summarizes the notable achievements to date through these programs.

Rectangular Rapid Flashing Beacons

Crosswalk pushbutton signals provide additional visual queues to drivers of pedestrians entering a crosswalk. These signals have now been installed in the following locations:

- Howard Street at Nelson/Ruggles (2 sets)
- Grove at Larrabee/Whitman
- West Wyoming at Berwick
- Main Street just north of Lynn Fells Parkway near Linden
- Main Street near McCarthy House, south of Franklin Street
- Main Street at Boardman Ave.
- Main Street at Highland Ave.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Upham at Gooch
- Upham near Simonds/gas station
- Franklin near Ashcroft
- Wyoming Ave. at Lincoln School
- Franklin Street at Vinton Street
- Vinton Street at Orris Street
- Franklin Street at Botolph Street

Solar Speed Feedback Signs
These signs show drivers their speeds and provide messages such as “too fast” or “thank you” depending on the vehicle’s speed. They have been installed at the following 12 locations to date:

- Upham Street westbound
- Howard Street eastbound
- Grove Street between Main and Lebanon
- Main Street north side coming in from Wakefield
- Lebanon Street northbound across from Wyoming Cemetery
- Washington Street coming in from Malden
- Forest Street between coming in from Malden before Lebanon Street
- Warwick Road heading south
- Franklin Street coming in from Stoneham
- West Wyoming Avenue coming in from Stoneham
- South Main Street northbound
- South Main Street southbound

Accessible Curb Ramps
New accessible curb ramps have been added at all locations where sidewalk work was done as part of our capital roadway improvements program. In addition to those locations, new accessible ramps were added at individual locations around the City where a new crosswalk was being added (after approval by the Melrose Traffic Commission) or at high pedestrian volume locations where ramps were previously missing. The following curb ramps have been added in the past several years:

- Upham at gas station (pre-existing crosswalk missing ramps)
- Washington Street at Little Sprouts (new crosswalk)
- Sylvan Street at Mount Vernon (new crosswalk)
- Lebanon Street at Appleton (new crosswalk)
- Lebanon Street at Beech (new crosswalk)
- Howard Street at Carlida (new crosswalk)
- Upham Street at all cross streets on westbound side (existing crossings)
- Warwick Road at Maple (new crosswalk)
- Warwick Road at Stevens (new crosswalk)
- Upham Street at Dell (new crosswalk)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Grove Street at Dell (new crosswalk)
- Pleasant Street at Everett (new crosswalk)
- Pleasant Street at Converse Lane (new crosswalk)
- Sylvan Street at Ryder (new crosswalk)
- Shadow Street at Washington (existing crossing)

In addition, the following locations were previously approved for ramp work and some are partially complete. These will be completed during the 2022 construction season:

- Grove Street at Linwood (new crosswalk)
- Franklin Street near Warren (new crosswalk)
- Sunset Street at Howard (existing crossing)

Intersection Modifications
Intersections that were deemed to pose safety concerns due to their being either too large or having unclear or unsafe traffic patterns have been modified in the following locations:

- Howard Street at Green (roundabout location)
- Howard Street at Elm
- Poplar Street at Prospect
- Poplar Street at Emerson
- Warwick Road at Dyer
- Warwick Road at Sears
- Warwick Road at Stevens
- Foster Street at Cottage
- Echo Street at Whitman
- Glendower Road at Whitman

Sidewalk Additions
Lastly, sidewalks have been added in locations where they were previously lacking or incomplete on the following streets:

- Altamont Avenue
- Spear Street
- Hancock Street
- Whitman Avenue
- Echo Street
- Glendower Road
- Park Street
- Woodland Avenue (partially completed; to be finished this construction season)

These locations are in addition to sidewalk repairs or improvements on roads included in our capital program.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

We appreciate the funding that has been allocated by the Council to these programs in the past to supplement our grant and bond-funded projects. We are hopeful that traffic calming funds will continue to be allocated to assist with additional requests that have not yet been met.

Thank you for your consideration of this request.

Subject: Street Trees – Free Cash Request

Planting street trees is a priority for the Department of Public Works, both for aesthetics and for the positive environmental benefits of trees, such as reducing heat island impacts and furthering uptake of greenhouse gases contributing to climate change. The City does not have a line item in our budget for tree planting, and we rely on the allocation of retained earnings to keep up with our annual planting program.

Each time we remove a tree because it is unhealthy or has been damaged in a storm, we log in a work order for a replacement. On average, we record about 125 removal work orders per year. In addition, residents contact the City year round and request trees in front of their homes. Using the free cash allocated to trees last year, we have addressed requests up through April 2021 and are working on completing the remainder of 2021 requests.

The proposed $70,000 allocation will allow us to meet the 2022 requests, to continue to stay caught up with our tree request list. At an average cost of approximately $550/tree, we will be able to plant approximately 125 trees using these funds. This covers the cost of our on-call planting contractor to provide and plant a tree, along with the costs of police details and gator bags.

We respectfully request your consideration of this request. Thank you.

From: Elena Proakis Ellis, Director of Public Works

cc: Patrick Dello Russo, CFO/Auditor
Julie Kukenberger, Superintendent
Leia DiLorenzo-Secor, Melrose Schools Business Manager
Jim Troup, Deputy Director Admin & Finance
Jay McNeil, DPW Facilities Manager
Denise Gaffey, OPCD Director

Subject: School Facility Capital Project – Free Cash Request

The Department of Public Works is hereby requesting $150,000 in free cash to advance the design of upgrades to the Melrose High School bathrooms.

The high school bathrooms were built in 1974 and many have original fixtures. Upgrades are sorely needed to reflect the needs for separation of stalls, gender neutral bathrooms, accessibility, efficiency, and modernization. With over 1,000 people in the building daily, these bathrooms get constant use.

During the recent Capital Improvement Plan process, the high school bathroom renovations were ranked in the highest priority category (Group A). The project met the criteria of deteriorated facilities, systematic replacement, and equitable provision of services. The proposed $150,000 allocation would fund final design and bidding of the bathroom renovation project. A future request would be made to fund the construction costs once the architect has developed a detailed construction cost estimate.

The DPW has worked closely with the school department to identify and prioritize facility needs, and this project is a high need that requires this design phase before any further work can be advanced. The first step in the process would be putting out a Request for Qualifications to hire a qualified design firm to perform this final design, cost estimating, and bidding of the project.

Thank you for your consideration of this request.

RE: Vehicle Condition and Replacement Request

The Department of Public Works has assessed the current condition of an aging fleet to identify specific vehicles and equipment that should be targeted for replacement. Included in the criteria to assess the fleet were age, miles, body condition, and services the vehicle is used to provide. Of note, we utilize most of our fleet to deliver snow removal and emergency response services. In the current state, we are in jeopardy of compromising the services we deliver in such instances. Please see the below list of vehicles that should be targeted for replacement in the immediate and short-term future. The vehicles are grouped by type.

Roll-off Vehicle

Truck 17 – 1999 International 4900 – 116,098 Miles – Sanitation Division

Conditions: Cracked frame in several locations has been welded and plated. Hydraulics in need of replacement. Passed most recent inspection but is not expected to pass in the future.
Replacement Cost: $200,000

Additional Notes: This vehicle is used to transport roll-off containers from the City Yard to the recycling and yard waste facilities. It is critical to the day-to-day operations of the City Yard's recycling and yard waste facility and is the only vehicle in our fleet of this type. Thus its replacement is a very high priority.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Trash Packers

Truck 26 - 2004 International Packer - 115,623 Miles - Sanitation Division (public barrels and yard waste)

Conditions: Rotted body. Hydraulic lines in need of replacement. Rotted hopper.
Replacement Cost: $305,000

Additional Notes: This vehicle is critical to the department's day-to-day operations. It is used for curbside yard waste pickup and for municipal barrel collection. If this vehicle is not replaced within the next couple of years, we will need to look at outsourcing our curbside yard waste program and municipal barrel collection.

Truck 18 – 2010 International Packer – 130,549 Miles – Sanitation Division (public barrels and yard waste)

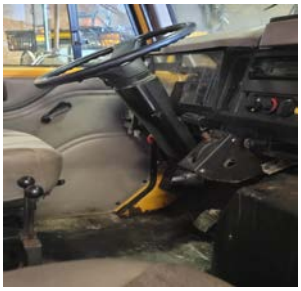
Conditions: Rotted body. Recently invested $22K to rebuild engine (temporary repair).
Replacement Cost: $285,000

Additional Notes: This vehicle is in full-time use for public barrels and school trash disposal and is also used to supplement peak yard waste operations. It is also used to collect curbside solid waste and recycling from a handful of streets that JRM's larger collection vehicles cannot access.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Heavy Duty Trucks

Truck 21 - 1998 International Dump - 77,894 Miles - Highway Division (snow operations)



Conditions: Cracked frame. Rotted floor. Failed inspection.
Replacement Cost: $225,000

Truck 29 - 1997 International - 33,995 Miles - Highway Division (snow operations)

Conditions: Rotted floor. Failing frame. Failed inspection.
Replacement Cost: $225,000

Light Dump Trucks

Truck 33 - 2012 Chevy 3500 Dump w/Liftgate - 63,810 Miles - Parks & Forestry Division (snow operations)

Conditions: Rotted holes in floor. Failed inspection. Primary vehicle for pulling landscape trailers and parks maintenance.
Replacement Cost: $88,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Truck 35 - 2011 Chevy 3500 Dump - 50,263 Miles - Parks & Forestry Division (snow operations)

Conditions: Rotted floor. Failed inspection.
Replacement Cost: $96,000

Truck 38 - 2012 Chevy 3500 Dump - 66,930 Miles - Parks & Forestry Division (snow operations)

Conditions: Rotted Floor. Failed inspection.
Replacement Cost: $88,000

Truck 47 - 2012 Chevy 3500 - 56,000 Miles – Cemetery Division (snow operations)

Conditions: Rotted bed.
Replacement Cost: $88,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Truck 48 - 2010 Chevy 3500 - 60,000 Miles – Cemetery Division (snow operations)

Conditions: Rotted body and bed. Failed inspection.
Replacement Cost: $88,000

Truck 55 - 2005 Chevy 3500 Dump - 76,158 Miles - Sewer Division (snow operations)

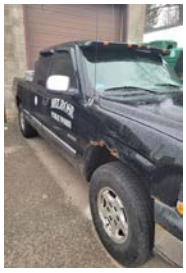
Conditions: Rotted floors and bed. Failed inspection.
Replacement Cost: $90,000

Truck 57 - 2001 Ford F350 - 76,121 – Facilities Division (snow operations)

Conditions: Inoperable. Fire damage from recent vehicle fire during use. Rotted floor. Transmission overhaul needed.
Replacement Cost: $88,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Truck 65 - 2010 Chevy 350 Dump - 89,797 Miles – Highway Division (snow operations)



Conditions: Rotted floor and bed. Failed inspection. Primary vehicle to respond to pothole work orders.
Replacement Cost: $96,000

Pickup Trucks

Truck 10 - 2000 Chevy Pick-up - 119,611 Miles - Highway Division (snow operations)

Conditions: Rotted Floor. Failed inspection.
Replacement Cost: $53,000

Truck 8 - 2004 Chevy Pick-up - 125,450 Miles - Water/Sewer Divisions (snow operations)

Conditions: Rotted floor. Exhaust system leaks. Failed inspection.
Replacement Cost: $53,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Truck 39 - 1999 Chevy 1500 Pick-Up - 132,002 Miles – Highway Division (snow operations)

Conditions: Engine replacement needed (parked). Rotted floor. Rotted bed.
Replacement Cost: $53,000

Truck 46 - 1999 Ford F150 - 99,000 Miles – Cemetery Division

Conditions: Rotted floor. 2 wheel drive (not available for snow operations). Failed inspection
Replacement Cost: $53,000

Specialty Equipment

Truck 50 - 1997 Case Backhoe – Cemetery Division (snow operations)

Conditions: Rotted floors. Primary vehicle for all cemetery operations.
Replacement Cost: $150,000

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Truck 77 - 1997 Volvo L90 C Loader - Highway Division (snow operations)

Conditions: Rotted body and in need of tires. Hydraulic hoses in need of replacement. Engine overhaul needed.
Replacement Cost: $190,000

Summary

As shown above, the conditions of the vehicles compromise the safety of our staff and jeopardize the levels of services that our residents have come to expect from the DPW. We have exceeded the expected life of these vehicles on both miles and age. Fleet Counselor Services, a nationally recognized consulting firm, recommends replacement of fleet vehicles at intervals shown below.

Vehicle Type	Recommended Useful Life (Fleet Counselor Services Data)	Age of City Vehicles	Estimated Replacement Cost
Roll-off	12 years or 9,000 hours	#17 – 23 years	$200,000
Packer	7 years or 9,000 hours	#26 – 18 years #18 – 12 years	$305,000 $285,000
Heavy Dump Truck	12 years or 120,000 miles	#21 – 24 years #29 – 25 years	$225,000
Light Dump Truck	12 years or 120,000 miles	#33 – 20 years #35 – 11 years #38 – 10 years #47 – 10 years #48 – 12 years #55 – 17 years #57 – 21 years #65 – 12 years	$88,000 to $96,000
Pickup Trucks	12 years or 120,000 miles	#10 – 22 years #8 – 18 years #39 – 23 years #46 – 23 years	$53,000
Backhoe	12 years or 9,000 hours	#50 – 25 years	$150,000
Loader	12 years or 10,000 hours	#77 – 25 years	$190,000

The Melrose DPW fleet vehicles shown above represent approximately $2.5M in short-term need. Vehicles over 20 years old are shown in red. Please note that this does not include non-DPW fleet needs, such as the Fire Department and Recreation Department, who have also requested new vehicles which should be considered for funding.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

For this year's free cash request, we recommend replacing the following DPW vehicles:

- Roll-off (Truck #17) - $200,000
- Light Dump Trucks (#33, #55 and #57) - $176,000 general fund; $90,000 sewer fund
- Pickup Trucks (#39 and #46) - $106,000

This results in a total free cash request of $482,000 from the general fund and $90,000 from the sewer fund. All purchases will be discussed in advance with the Sustainability Manager to explore sustainable options. We would be happy to discuss alternative approaches to funding and strategies different from or in addition to the vehicles selected for this year's request. We appreciate all your consideration. Please feel welcome to reach out with any questions you may have.

We thank you for your continued support as we serve the City and our residents.

Re: FY2022 Free Cash Appropriation for Cemetery Equipment

In collaboration with the City of Melrose Cemetery Commission, the Department of Public Works requests your consideration for an appropriation of $10,620.65.

After meeting with stakeholders, it was determined that specific equipment was in dire need of replacement at the Wyoming Cemetery. This request is accompanied by a quote for a Stainless Steel Lowering Device, which includes a Strap Set and a Placer Set. The complete set includes a tow bar with long channels and decorative draping. This equipment is vital to the funeral process and to the services delivered by the Cemetery Division of the Department of Public Works.

We specifically want to thank the Melrose Cemetery Commission and Mr. Daniel O'Neill, as well as DPW employees Jack Rossi and Angela Pisacreta for their contributions to identifying this equipment. Thank you to the City Council for your continued support and for your consideration of this appropriation.

Feel welcome to contact us with any further questions.

MEMORANDUM

To: Honorable City Council
Date: December 16, 2021
Re: FY22 Free Cash Request

Capital Outlay – Recreation Vehicle

The Recreation Department is respectfully requesting an appropriation of $47,077.40 for the purchase of a new electric vehicle pick-up truck. Our department relies heavily on our current truck to move equipment, supplies, and staff to different parks and facilities in and around Melrose year-round. Our current vehicle is a 2001 Chevy Silverado that is barely functioning. On a daily basis we need to jump the vehicle to get it started. It is not equipped to handle driving more than a few miles at a time and there are many reoccurring safety concerns. Our current pick-up truck does not have much time remaining, and we project that within the next year it will need to be decommissioned. Our pickup truck plays a major role in our operations and allows us to deliver quality programs and events to the Melrose community. We are asking for your support to purchase a new vehicle so we can continue to offer our services without any major interruption.

Recreation Registration Software

The Recreation Department is respectfully requesting an appropriation of $10,000 for the purchase of professional registration software. At this time our department uses a product called Sports Connect. Sports Connect was originally owned by Dicks Sporting Goods and was offered as a safe and free software platform for non-profit agencies and recreation departments to use for participant registrations, website management, and record keeping. Three years ago the software platform was sold to Stack Sports and repackaged as Sports Connect. Since that time changes continue to be implemented that are very concerning including charging additional fees to residents to use the

system, the raising of credit card transaction fees on our department, and most recently the unsolicited marketing of promotions to Melrose residents without consent from the Recreation Department. These recent policies and actions by Sports Connect are unacceptable and we feel strongly that it is in the best interest of the City, the Recreation Department, and our residents to purchase and implement a new recreation registration system immediately that meets the standards of the City and also surrounding municipalities. After extensive research, almost all known recreation departments in the Commonwealth of Massachusetts are using three main vendors as their contracted company (Civic Rec, MyRec, and Active Network). If approved, it is our goal to move quickly, demo all three products, go under contract, and to implement the new software within the next few months to bring our department up to standard with surrounding communities. On an annual basis we have 4,000+ participant registrations and over $400,000+ in revenue pass through our system. It is our responsibility to provide a safe, secure, and stable way for our residents to continue to register for recreation programs and events.

Closing Statement

We kindly ask for your support with these very important endeavors. It is our department's goal to always strive to provide the highest quality services, programs, and events for our residents. We respectfully ask for the following resources to try and keep to our standards and best practices at the highest levels possible.

Thank you for your consideration,

Sincerely,

Frank Olivieri

MELROSE COUNCIL ON AGING
MILANO CENTER
Live Well ~ Age Well

781 665-4304
sminchello@cityofmelrose.org

June 2, 2022

Dear City Councilors:

Please accept this correspondence as a thank you for your consideration of a free cash appropriation for the Council on Aging in the amount of Thirteen Thousand Eight Hundred and Ninety dollars ($13,890).

This appropriation will allow us to install a fob access system to the Milano Center. This not only provides us a more secure access system; it also allows us to easily control access to the building on evenings and weekends. A fob system gives us the ability to open the center for community meetings, commissions, and renters.

Additionally, within this appropriation, we will repair the existing media equipment set up so the hall speakers are all operational. We will add listening devices to accommodate those with hearing issues, and seek media options for additional accessibility, i.e. conference room wireless speakers/cameras to enhance virtual programs.

Much appreciation for your support, consideration, and especially your understanding of how important it is for the Milano Center to be a community partner..

Thank you.

Please feel free to contact me if you have any questions.

Sincerely,

Stacey A. Minchello

MEMORANDUM

TO: The Honorable Melrose City Council
FR: Kathy Pigott-Brodeur, Executive Director/Operations Manager, Memorial Hall
DATE: May 30, 2022
RE: Memorial Hall (693) Elevator Software Upgrade

The elevator at Memorial Hall will need a software upgrade for the controller. The controller will be reprogrammed so it can enable the Emergency Phase 2 Car Operation when tested. This is a code mandated by the State and must be installed by the end of 2022 or the elevator will be deemed inoperable. As this upgrade is being done statewide on a large majority of elevators, our vendor's upgrade appointment schedule will run June through December 2022. The estimated cost for the software upgrade as of today is $5000, (elevator maintenance line item of the Memorial Hall budget 016932-527303).

Thank you for your time and consideration.

Re: Free Cash Approval

Cc: Mayor Brodeur, Patrick Dello Russo, *Chief Financial Officer/Auditor*

The School Department recognizes and appreciates the investment of operating and capital monies allocated by the City every year in the interest of teaching and learning. It is evident that each and every child is in some way a beneficiary of those investments.

The below request will greatly assist the teaching and learning of the district. The funds will be used to purchase a new elementary literacy curriculum, new microscopes for the science department at the middle and high school, a new utility vehicle and new uniforms for the athletic department. Thank you for your consideration.

Medicaid Reimbursement:	$ 75,000
Literacy Curriculum (Savvas):	$100,000
Microscopes:	$ 30,000
Utility Vehicle:	$ 12,000
Uniform Replacement:	$ 50,000

RE: Equipment Request

I respectfully request an appropriation of $3,393.94 to purchase retractable banner signs/stands (image below). This request is made in response to feedback **consistently** received from voters and staff alike regarding identification of the appropriate Ward/Precinct. Overwhelmingly it has been reported that clear signage is a key element in reducing precinct confusion and these banners provide a bold visual. The vendor quote Is attached for reference as is a list of surrounding communities using them. I contacted other municipal users and have received positive feedback.

These 6-foot-high banners will replace the approximately 4-foot white plastic sandwich boards previously used at the polls. We will be repurposing the boards to outside as additional visual signage for voters. Thank you for your consideration

Re: Free Cash Order 2022-138

The free cash appropriation requested in the amount of $10,000 to line item 019302-537500 is for upgrades to office equipment. There is currently no line item specific to this item in the Fiscal 2022 or Fiscal 2023 budget for all departments. This money would allow us to purchase office equipment needs as they arise with departments.
The City tries to recycle and reuse equipment in most circumstances. However, there are situations where the office equipment is no longer functional and needs to be replaced.

Thank you for your consideration of this request.

Estimate #	001147
Date	05/01/2022
Business / Tax #	[redacted]

Description	Total
	$21,960.00
R.A.T.S. Rat Action Tunnel System	$10,980.00

North Shore Wildlife (NSW) will take an integrated pest management (IPM) approach using mechanical, cultural, and prevention techniques. NSW will set trap(s) at the three locations identified by health director as problem areas in Melrose and Wakefield Ma.
NSW will monitor, service, re-set, re-bait, and re-position all traps as necessary.

NSW will inspect D.P.W. buildings during each visit and complete a full exclusion as necessary using steel galvanized mesh, Pur Black foam, copper mesh "Stuff It", ASI 502 Silicone Sealant and any other materials needed.

NSW will report the following data to the health director bi-weekly:

-Number of rodents trapped

-Suggestions and implementation of environmental changes to help decrease rodent population

-Dates and times technicians service, re-bait and re-set traps

-Pictures of each trap so location can be determined

-Pictures of any exclusion work performed to prevent rodents from entering D.P.W. buildings

WEEKLY ITEMIZED COSTS

-Labor, Fuel & Materials (Steel galvanized mesh, Pur Black foam, ASI 502 Silicone Sealant $175/day x 3/days = $525/wk x 12/wks = $6300

-Trap Rental $195/wk (Per Trap) (1 traps per site 2 traps total) = $780/wk x 12/wks = $4,680

-Bi-Monthly Report (No additional cost)

-One time (Snap Trap) set up fee $120 (Waived)

-Exclusion work on both D.P.W. buildings during the three month period.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

This cost will cover the Months of July, August and September.

R.A.T.S. (Rat Action Tunnel System) $10,980.00

Re: **Legal Department Budget – Funds**

Date: **June 2, 2022**

---

151 City Solicitor's Office

Appropriation from Free Cash to Professional Services: $25,000.00 (2022-138)

Transfer to Professional Services: $30,000.00 (2022-141)

These amounts relate to costs for arbitration of an ongoing labor matter, cost of outside counsel for ongoing labor matters and contract negotiations, & Cable Contract Negotiations.

Transfer to Property and Casualty Insurance: $85,000.00 (2022-141)
This transfer in Property Insurance coverage reflects the costs of new Pole chargers that were not part of the FY22 budget due to timing, capital acquisitions in process on a regular basis, and higher than estimated premium increases.

Transfer to Suits and Claims: $40,000.00 (2022-141)
This relates to two pending legal matters for which the City needs to pay insurance deductibles for work on litigation.

Janet M. Nevin
415 East Foster Street, Melrose, MA 02176

Objective: Seeking a position in a dynamic and collaborative environment, where my experience and talents will contribute to the growth and success of the organization.

Skills: Flexible, resourceful, detail oriented, with exceptional communication skills. Focused, dependable, a solid team player and consensus-builder. Proven expertise in writing, editing and proofreading, as well as experience with grant administration support.

Education:
University of Vermont
Mass Communications & Theater Major

Professional:

SDM Foundation
Associate
Worked as a team member to provide administrative and marketing support for a non-profit focused on teaching people to use technology to enrich their lives. Our services were tailored to individual needs and were available free of charge. Responsibilities included the overall customer experience and community outreach. Also set-up the monthly Shop Talks Speaker Series with local experts on a variety of technical topics. Assisted with scheduling and publishing monthly newsletters.

City of Melrose | Health Department
Grant Administrator
Provided administrative support to Melrose Substance Abuse Prevention Coalition. Assisted with production and dissemination of all Coalition materials, including Annual Report, meeting minutes and press releases. Coordinated staffing for off-site events. Worked from grant inception to build relationships with community groups, schools, police and local businesses in support of Coalition mission.

Continental Cablevision, Inc.
Office Manager and Executive Assistant to the Chairman & CEO
Hired, trained and managed office staff, maintained office systems and acted as liaison to corporate vendors through office relocation process; represented company at corporate sponsored events.

Volunteer / Community Development:

The Bridge | A School/Community Partnership
Former Board Member and Bee Committee Member
Developed policies and goals for organization and represented Board at community and school district events; assisted with planning yearly fundraiser as member of raffle committee.

Melrose Alliance Against Violence
Supporter and Current Walk Committee Member
Assist in planning annual walk for an organization whose mission is to raise community awareness of domestic and teen dating violence and to promote programs to reduce violence and encourage healthy relationships.

Community Coalition of Melrose
Former Member
Served as community representative for group comprised of local businesses and organizations, which was formed to promote quality of life within Melrose.

Common Ground Teen Center
Founding Member & Former Volunteer
In response to community need, helped to establish drop-in center for community youth. Assisted with strategic planning, staffing and fundraising.

Volunteer:
Melrose Schools – Former volunteer at a variety of levels, most recently in the community reading program
Meals on Wheels Program – Former delivery team member
Melrose Parent Workshop – Former member – developed and co-chaired parent & community speaker series.
The Food Drive, Melrose – Current volunteer

Award: **City of Melrose** – Volunteer of the Year - 2007

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Council on Aging Board Appointment
Date: May 31, 2022

I respectfully request the Honorable City Council confirm the appointment of Janet Nevin, of 415 East Foster Street, to the City of Melrose Council on Aging Board, for a one-year term, said term to expire the last day of February 2023. Nevin's appointment would replace Sue Doherty Fernandez's position on the board, whose term would expire on the last day of February of 2023, and who has elected to step down.

With an extensive background in event planning, community outreach, and administrative support, as well as noteworthy volunteerism, it is my strong recommendation that Janet Nevin be appointed to the Melrose Council on Aging Board. Nevin's track record of capably collaborating with individuals and community groups to ensure events are successful achieved would provide the board with the event planning support and skills they need to continue to make progress for our older adults.

Finally, as Nevin has been previously named the City of Melrose Volunteer of the Year (2007) and currently volunteers with The Food Drive in Melrose, I have completely confidence that she would above and beyond to ensure our older adults live within our community with dignity and with access to the services and resources they need to thrive.

Thank you for your consideration.

KRISTIN B. THORP

77 Wentworth Rd Melrose, MA 02176 | [redacted]

OBJECTIVE

In a highly focused manner, I am interested in using my business and technical experience in a volunteer position. The Melrose Council on Aging works closely with SDM Foundation, and the opportunity to build on that relationship is of interest to me.

EXPERIENCE

2016 - Present Executive Director, *SDM Foundation, Inc*

- Created, direct and manage the foundation based on the mission of helping non-technical people use technology.

1988 - 2016 Self employed

- Software development field focusing on making complex software easier for non-technical people to use.

EDUCATION

1976 - 1980 BS Business Administration, Minneapolis, MN, *University of Minnesota*

SKILLS AND ABILITIES

Extremely organized and focused
Excellent interpersonal skills
Strong business skills
Knowledgeable in many areas of technology

LEADERSHIP

2021 - Present Board of Directors Farm Direct Coop, 2022 President

2021 – Present Board of Directors Melrose Chamber of Commerce

2004 – 2015 Melrose School Committee

Honorable Mayor, Paul Brodeur
562 Main Street
Melrose, MA 02176

Dear Mayor,

On behalf of the Melrose Council on Aging Board, please accept this recommendation to appoint Kristin Thorp to the Melrose Council on Aging Board. Kristin brings a long history of volunteering in many Melrose capacities and an immense portfolio of skills and experience that align with the Council's strategic plan and initiatives.

Thank you for your consideration.

Please feel free to contact me if you have any questions.

Sincerely,

Stacey A. Minchello

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Council on Aging Board Appointment
Date: May 31, 2022

I respectfully request the Honorable City Council confirm the appointment of Kristin Thorp, of 77 Wentworth Road, to the City of Melrose Council on Aging Board, for a three-year term, said term to expire the last day of February 2025. Thorp's appointment would fill a vacancy.

In addition to Thorp's volunteer experiences, which include over a decade serving on the Melrose School Committee, she has dedicated her career to making online information and technology more accessible to all, including older adults who live in Melrose. Her role as the Executive Director of the Melrose-based SDM Foundation has provided her with the opportunity to work closely with the Melrose Council on Aging. Through this partnership, she has helped older adults adapt to our technologically advanced world, and have equal access to the opportunities, resources, and information that is available to them online.

I am assured that Thorp's appointment will further both her mission to support technology literacy, and the mission of the Council on Aging to help our older adults live with dignity in our community. Thank you for your consideration.

Re: **Legal Department Budget – Funds**

Date: **June 2, 2022**

---

151 City Solicitor's Office

Appropriation from Free Cash to Professional Services: $25,000.00 (2022-138)

Transfer to Professional Services: $30,000.00 (2022-141)

These amounts relate to costs for arbitration of an ongoing labor matter, cost of outside counsel for ongoing labor matters and contract negotiations, & Cable Contract Negotiations.

Transfer to Property and Casualty Insurance: $85,000.00 (2022-141)
This transfer in Property Insurance coverage reflects the costs of new Pole chargers that were not part of the FY22 budget due to timing, capital acquisitions in process on a regular basis, and higher than estimated premium increases.

Transfer to Suits and Claims: $40,000.00 (2022-141)
This relates to two pending legal matters for which the City needs to pay insurance deductibles for work on litigation.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Dear members of the Commission on Women,

I would like to bring to the Commission on Women my professional background in helping, empowering, and creating opportunities for people who face systemic disadvantages in society, especially girls and women.

I earned a Bachelor of Social Work and a Bachelor of Science in Political Science from Salem State University in 2014, and a Data Analytics Certificate from Bunker Hill Community College in 2021.

As a former social worker at a non-profit at Waltham, I have over five years of experience providing community-based mental health services. I also have experience in community organizing and activism, particularly around immigration reform, labor rights, and services for victims of domestic violence.

In the winter and spring of 2021, I was a Research Assistant Intern at a non-profit in Boston, where I became involved in public policy research with a special focus on finding solutions to advancing economic opportunities for women and minorities.

Finally, in my most recent position as a Research Associate at Cambridge Health Alliance, I conducted research and program evaluation to promote community health, especially for those most vulnerable in our society.

I appreciate you taking the time to review my interest in joining the Commission on Women, and I look forward to hearing from you soon.

Sincerely,

Ana Vasconcelos

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

From: Mayor Paul Brodeur
Re: Commission on Women Appointment
Date: May 31, 2022

I respectfully request the Honorable City Council confirm the appointment of Ana Vasconcelos, of 37 Washington Street Apt 106, to the City of Melrose Commission on Women, for a three-year term, said term to expire the last day of February 2025. Vasconcelos' appointment would replace Kristina Pechulis, whose term expired on the last day of February 2022.

Vasconcelos' extensive experience in community organizing, activism, and serving, empowering, and creating opportunities for girls and women, as well as other vulnerable and systemically disadvantaged populations, would greatly strengthen the Commission on Women.

Finally, her time serving on the Massachusetts Immigrant and Refugee Advocacy Coalition and within the Boston Mayor's Office for Immigrant Advancement, has provided her with the knowledge and networks necessary to drive positive change in our community.

Thank you for your consideration.

Re: Summary of FY23 Water and Sewer Rate Orders

The Water and Sewer Rate Advisory Committee, consisting of the members listed above, respectfully submits the following proposed water and sewer rate adjustments, enterprise fund budgets, and free cash requests for FY23. They are recommended by unanimous vote of the committee.

The combined rate impact across water and sewer is a 5.17% increase over FY22 rates. In an effort to mitigate impacts to customers during the pandemic, when many people had financial hardships, Melrose did not increase water or sewer volumetric rates or base fees the last two years. In fact, we have not increased water volumetric rates since FY18 and water base fees since FY17, meaning that water rates have been level for the last five years. For sewer, we have not increased volumetric rates since FY17, and increases in FY18, FY19, and FY20 were limited to base fee increases only.

As water usage rebounds from pandemic level increases, rate adjustments are required to meet our FY23 financial obligations to operate the water and sewer systems. The proposed rates, as shown on the next page, will appear on water bills beginning on October 1, 2022, since earlier bills would not consist entirely of water used within FY23. This decision was made several years ago and has been consistent since that time. We recommend continuing this practice in FY23.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Proposed FY23 Water and Sewer Rates

Proposed FY23 Volumetric Rates	Water (per 100 cf)	Sewer (per 100 cf)
Tier 1	$7.20	$11.78
Tier 2	$9.65	$14.84
Proposed FY23 Base Fees (meter size)	**Water (per meter)**	**Sewer (per meter)**
5/8"	$17.65	$25.39
3/4"	$17.65	$25.39
1"	$17.65	$25.39
1.5"	$67.29	$99.55
2"	$104.52	$155.17
3"	$191.39	$284.95
4"	$315.49	$470.35
6"	$625.74	$933.85
2nd Meter Fee	$17.65 ($50.00 if not upgraded)	--

In addition to these rates, the Committee respectfully recommends the following requests:

1. Approval of the Department of Public Works' Water Enterprise Operating Budget for Fiscal Year 2023 in the amount of $6,119,429, as shown in the budget document submitted under separate cover to the City Council.

2. Approval of the Department of Public Works' Sewer Enterprise Operating Budget for Fiscal Year 2023 in the amount of $8,793,909, as shown in the budget document submitted under separate cover to the City Council.

3. Approval of the MWRA Local Water Assistance Loan funding in the amount of $685,000, as submitted previously to the Council. The terms of this loan include payback over 10 years with 0% interest.

4. Approval of free cash from the Water Enterprise Fund consisting of the following items, for a total request of $570,098.10 (compared to a current balance of $870,241, or approximately 65% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Water Enterprise Fund budget due largely to lower than projected water usage

    b. $28,298.10 to the Water Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential water related emergencies that may arise during the upcoming fiscal year

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

c. $91,800 toward the design of water main capital improvements for the next two years, to have shovel-ready projects for potential infrastructure bill funding should the opportunity arise
d. $250,000 to supplement the water main construction project for calendar year 2022 (with the remainder to be paid using the MWRA loan funds noted above). The CY2022 projects include water main and service replacement on Appleton Street, Irving Street, Elliott Street, and Frost Avenue.

5. Approval of free cash from the Sewer Enterprise Fund consisting of the following items, for a total request of $1,123,629.51 (compared to a current balance of $1,675,926, or approximately 67% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Sewer Enterprise Fund budget due largely to lower than projected water usage

    b. $400,000 to mitigate customer impacts from the FY23 rates (similar to what was done last year from the water fund)

    c. $33,629.51 to the Sewer Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential sewer related emergencies that may arise during the upcoming fiscal year

    d. $400,000 for the design and construction of backup power generators at the Upham Street and Fellsway sewer pump stations, our two largest stations representing critical city infrastructure

    e. $90,000 for the purchase of a dump truck to replace Truck #55, a 17-year-old truck actively used by the Sewer Division with rotted-out floors, a rotted bed, and a recent failed state inspection.

We appreciate your consideration of these items and are happy to answer any questions you may have. We look forward to continuing the important work of our committee in FY23 to provide fiscally responsible and sustainable water and sewer rates for our community.

Tier 1	$7.20	$11.78
Tier 2	$9.65	$14.84
Proposed FY23 Base Fees (meter size)	**Water (per meter)**	**Sewer (per meter)**
5/8"	$17.65	$25.39
3/4"	$17.65	$25.39
1"	$17.65	$25.39
1.5"	$67.29	$99.55
2"	$104.52	$155.17
3"	$191.39	$284.95
4"	$315.49	$470.35
6"	$625.74	$933.85
2nd Meter Fee	$17.65 ($50.00 if not upgraded)	--

In addition to these rates, the Committee respectfully recommends the following requests:

1. Approval of the Department of Public Works' Water Enterprise Operating Budget for Fiscal Year 2023 in the amount of $6,119,429, as shown in the budget document submitted under separate cover to the City Council.

2. Approval of the Department of Public Works' Sewer Enterprise Operating Budget for Fiscal Year 2023 in the amount of $8,793,909, as shown in the budget document submitted under separate cover to the City Council.

3. Approval of the MWRA Local Water Assistance Loan funding in the amount of $685,000, as submitted previously to the Council. The terms of this loan include payback over 10 years with 0% interest.

4. Approval of free cash from the Water Enterprise Fund consisting of the following items, for a total request of $570,098.10 (compared to a current balance of $870,241, or approximately 65% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Water Enterprise Fund budget due largely to lower than projected water usage

    b. $28,298.10 to the Water Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential water related emergencies that may arise during the upcoming fiscal year

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

c. $91,800 toward the design of water main capital improvements for the next two years, to have shovel-ready projects for potential infrastructure bill funding should the opportunity arise
d. $250,000 to supplement the water main construction project for calendar year 2022 (with the remainder to be paid using the MWRA loan funds noted above). The CY2022 projects include water main and service replacement on Appleton Street, Irving Street, Elliott Street, and Frost Avenue.

5. Approval of free cash from the Sewer Enterprise Fund consisting of the following items, for a total request of $1,123,629.51 (compared to a current balance of $1,675,926, or approximately 67% of the available retained earnings):

    a. $200,000 to cover any potential revenue shortfalls in the FY22 Sewer Enterprise Fund budget due largely to lower than projected water usage

    b. $400,000 to mitigate customer impacts from the FY23 rates (similar to what was done last year from the water fund)

    c. $33,629.51 to the Sewer Enterprise Fund Reserves, to achieve the goal of having 10% of the value of the operating budget available in reserves to maintain adherence to sound fiscal policy and to address potential sewer related emergencies that may arise during the upcoming fiscal year

    d. $400,000 for the design and construction of backup power generators at the Upham Street and Fellsway sewer pump stations, our two largest stations representing critical city infrastructure

    e. $90,000 for the purchase of a dump truck to replace Truck #55, a 17-year-old truck actively used by the Sewer Division with rotted-out floors, a rotted bed, and a recent failed state inspection.

We appreciate your consideration of these items and are happy to answer any questions you may have. We look forward to continuing the important work of our committee in FY23 to provide fiscally responsible and sustainable water and sewer rates for our community.

MEMORANDUM

To: City Council

Cc: Mayor Paul Brodeur

Date: June 1, 2022

Re: Free Cash Funds – LifePak 15

I respectfully request an appropriation of $31,000.00 to purchase a LifePak 15 which is a critical piece of equipment on an ALS (Advanced Life Support) ambulance.

The LifePak 15 monitor/defibrillator has six main operating modes:

-AED mode: for automated ECG analysis and a prompted treatment protocol for patients in cardiac arrest.
-Manual mode: for performing manual defibrillation, synchronized cardioversion, noninvasive pacing, and ECG and vital sign monitoring.
-Archive mode: for accessing stored patient information.
-Setup mode: for changing default settings of the operating functions.
-Service mode: for authorized personnel to perform diagnostic tests and calibrations.
-Demo mode: for simulated waveforms and trend graphs for demonstration purposes.

The purchase of a new LifePak 15 will replace our original monitor which is 10+ years old.

I appreciate your consideration.

Respectfully Submitted,

Edward J. Collina
Chief of Department

Re: Free Cash Order 2022-146

An appropriation in the amount of $42,355.98 from Ambulance Retained Earnings[1], account 6500-319000 to Ambulance, Reserve for Retained Earnings, account 8418-490000[2]. The City's goal for the Ambulance Enterprise Fund is to keep a balance of Reserve for Retained Earnings of $150,000. The current balance in the fund as of 6/1/2022 is $107,644.02. The requested appropriation will replenish the fund back to $150,000.

Thank you for your consideration.

[1] Retained Earnings – is the certified free cash for an enterprise fund.

[2] Reserve for Retained Earnings – is the reserve fund for an enterprise fund.

STABILIZATION FUNDS

(G.L. c. 40, § 5B and G.L. c. 59, § 21C(g))

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SUMMARY:

These guidelines inform local officials about amendments made to G.L. c. 40, § 5B, which establishes city, town and district stabilization funds, by the Municipal Modernization Act statute that took effect on November 7, 2016. St. 2016, c. 218, § 22.

Under G.L. c. 40, § 5B, municipalities and districts may create one or more stabilization funds, which are special reserves into which monies may be appropriated and reserved for later appropriation for any lawful municipal purpose. Voters may also approve a Proposition 2½ override in order to fund appropriations for a particular stabilization fund. Monies accumulated in a stabilization fund carry over from one fiscal year to another, and interest remains with that fund.

The Municipal Modernization Act made four significant changes to G.L. c. 40, § 5B. First, it eliminated caps on the amount that could be appropriated into the fund in any year and the aggregate balances of all stabilization funds. Previously, municipalities and districts could not appropriate into a stabilization fund in any year an amount exceeding 10 percent of the prior year's tax levy, or a larger amount, without the approval of the Director of Accounts, and the total reserved in all funds could not exceed 10 percent of the equalized valuation of the municipality or district. Second, appropriations made into the fund may now be approved by a majority vote, instead of a two-thirds vote. Appropriations from a stabilization fund must still be approved by a two-thirds vote. Likewise, a two-thirds vote is still needed to create a stabilization fund and to change its purpose. Third, the local treasurer has a broader range of investment options consistent with the 2014 amendments to municipal and district trust fund investments under G.L. c. 44, § 54 and banking laws governing the Commissioner of Bank's authority to establish a list of sound investments for banking institutions. St. 2014, c. 343. Finally, a new local acceptance provision was added as the fourth paragraph of G.L. c. 40, § 5B. If accepted, the local legislative body, by a two-thirds vote, may dedicate to a stabilization fund certain revenue streams, including revenue from fees and charges, except revenues already reserved by law for particular purposes and locally assessed taxes and excises.

These guidelines are in effect and supersede Informational Guideline Release No. 04-201, *Creation of Multiple Stabilization Funds and Proposition 2½ Overrides for Stabilization Funds*, and any inconsistent prior written statements or documents.

MUNICIPAL FINANCE LAW BUREAU **KATHLEEN COLLEARY, CHIEF**

GUIDELINES:

I. MULTIPLE STABILIZATION FUNDS

A. Creation of Funds

Stabilization funds may be created for one or more different purposes. G.L. c. 40, § 5B. A fund may be created for a broad category of spending purposes, such as any lawful purpose, capital budget purposes or purposes for which the community may borrow money. Stabilization funds may also be created for a specific purpose or project, for example, to acquire a new fire truck or undertake a particular school construction project.

Creation of a fund requires a two-thirds vote of the legislative body of the city, town or district. The vote must clearly define the purpose(s) of the fund.

B. Changing Fund Purpose

The purpose of a stabilization fund may be changed at any later time by a two-thirds vote of the legislative body. For example, if a community had established a fund in order to reserve monies to acquire a new fire truck and a balance remains after the purchase, the legislative body could vote to change the purpose to meet some new savings objective.

If the legislative body votes to change the purpose of a stabilization fund for which revenue has been dedicated, the vote should also state whether the dedication continues after the purpose changes. See Section II-C-1 below regarding the minimum period a dedication is effective.

If a Proposition 2½ levy limit override was approved for the purpose of funding the particular stabilization fund, however, the city or town must also follow the election procedure explained in Section III-C below to be able to change the fund purpose and then continue using the additional levy capacity resulting from that override in future years.

C. Appropriations and Transfers

Appropriations into any stabilization fund require a majority vote of the legislative body. Appropriations from a stabilization fund require a two-thirds vote of the legislative body.

Monies may also be transferred from one stabilization fund to another by two-thirds vote. When monies in the fund from which the transfer is made cannot be appropriated directly for the purpose of the fund receiving the transfer, for example, a transfer of $50,000 from a fund for a particular school construction project to a fund to construct a new senior center, the vote also serves as a change in purpose to the extent of the amount appropriated.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

D. Investment and Interest

The treasurer may deposit stabilization funds in (1) a trust company, co-operative bank, or savings bank, if the trust company or bank is organized or exists under either the laws of the Commonwealth of Massachusetts, or of any other state, or may transact business in the Commonwealth, and has its main office or a branch office in the Commonwealth; and (2) a national bank, federal savings bank or federal savings and loan association, if the bank or association may transact business and has its main office or a branch office in the Commonwealth. Any state-chartered or federally-chartered bank used to deposit stabilization funds must be insured by the Federal Deposit Insurance Corporation (or its successor).

The treasurer may also invest stabilization funds in (1) participation units under G.L. c. 29, § 38A (Massachusetts Municipal Depository Trust established by the State Treasurer); or (2) securities that are legal investments for savings banks under Massachusetts law. Savings banks may legally invest in securities included in the annual legal list of investments established by the Commissioner of Banks under G.L. c. 167, §§ 15A-15K, and permitted by G.L. c. 167F, § 3. All investments in securities that are legal investments for savings banks must still meet the investment standard in G.L. c. 44, § 55B governing a treasurer's investment of public funds generally, which means those investments must be prudent.

All interest earned on the deposit and investment of stabilization funds belongs to the funds. The treasurer may pool monies from all stabilization funds for investment purposes, but the accounting officer must account for them separately in the general ledger and allocate interest earned on the pooled monies proportionately to each stabilization fund.

II. DEDICATION OF REVENUES TO STABILIZATION FUND

A. Purpose

Cities, towns and districts that accept the fourth paragraph of G.L. c. 40, § 5B may dedicate, without further appropriation, all, or a percentage of not less than 25 percent, of a particular fee, charge or other receipt to any stabilization fund established under G.L. c. 40, § 5B.

B. Acceptance Procedure

Acceptance of the fourth paragraph of G.L. c. 40, § 5B is by majority vote of the legislative body of the city, town or district, subject to charter. G.L. c. 4, § 4. (See attached sample acceptance vote.)

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

C. Dedication of Revenue Stream to a Stabilization Fund

1. Dedication Vote

After a city, town or district has accepted the fourth paragraph of G.L. c. 40, § 5B, its legislative body may vote to dedicate a revenue source to a stabilization fund by a two-thirds vote. The vote must include the (1) specific revenue source being dedicated; (2) the percentage of that revenue source being dedicated, which must be at least 25 percent of the source; and (3) the fund into which the revenue source is being dedicated. A separate vote should be taken for each dedication. (See attached sample dedication vote.)

The vote must take place before July 1 of the fiscal year in which the dedication is to begin. A dedication may be terminated in the same manner, i.e., by a two-thirds vote of the legislative body, but cannot terminate unless it has been in effect for at least three fiscal years.

2. Dedicated Revenue Streams

Any fee, charge or other receipt may be dedicated to a stabilization fund, except:

a. Locally Assessed Taxes, Excises and Property Tax Surcharges

Real and personal property taxes, motor vehicle excises, boat excises, farm animal and machinery excises, classified forest, farm and recreational land and penalty taxes, community preservation surcharges and municipal water infrastructure surcharges cannot be dedicated to a stabilization fund.

b. Revenues Reserved by Law for Particular Purposes

Fees, charges or other receipts already reserved by law for expenditure for a particular purpose cannot be dedicated to a stabilization fund. This includes revenues dedicated by general laws or special acts and revenues dedicated because the city, town or district accepted a statute or otherwise acted under a statute to dedicate them.

For example, the legislative body could not dedicate those betterments and special assessment revenues reserved for debt service under G.L. c. 44, § 53J, parking meter receipts reserved for certain parking related purposes if the city or town had accepted G.L. c. 40, § 22A or ambulance receipts if the city or town was reserving them for appropriation under G.L. c. 40, § 5F.

This exception means that the fees, charges or other receipts that may be dedicated are revenues that would belong to the general fund. G.L. c. 44, § 53.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3. Dedicated Revenue Accounting

Upon receipt of dedicated revenue, the accounting officer must credit the voted percentage to the designated stabilization fund and the remaining percentage, if any, to the general fund. No appropriation or other action is required.

4. Balance Available for Appropriation

The stabilization fund balance available for appropriation includes only the amount of the dedicated revenue actually received and credited to the fund.

D. Revocation of Acceptance

Acceptance may be revoked, but the city, town or district must wait until at least three years after acceptance. G.L. c. 4, § 4B. Revocation is also by vote of the legislative body of the city, town or district, subject to charter.

Revocation terminates all dedications at the end of the fiscal year in which the revocation takes effect. See II-E below.

E. Effective Date of Acceptance or Revocation

Acceptance or revocation of the fourth paragraph of G.L. c. 40, § 5B is effective for the fiscal year that begins the next July 1, unless a later fiscal year is designated in the acceptance or revocation vote.

F. Notification of Acceptance or Revocation/Revenue Dedication or Termination

The city, town or district clerk must notify the Municipal Databank if the fourth paragraph of G.L. c. 40, § 5B is accepted or revoked, and if a revenue source is dedicated to a stabilization fund. (See "Notification of Acceptance or Revocation/Revenue Dedication or Termination.") The notification should be made **as soon as possible** after the vote.

III. STABILIZATION FUND OVERRIDES

A. Presentation and Approval of Override Ballot Question

Cities and towns may ask voters to approve a Proposition 2½ levy limit override ballot question for the purpose of funding any of the stabilization funds it establishes.

If approved, the additional levy capacity is earmarked for the same stabilization fund in the fiscal year the override is effective and subsequent years. G.L. c. 59, § 21C(g).

Therefore, the amount of any override for a stabilization fund must be clearly identified, preferably by presenting a separate override question for each stabilization fund being funded. For example:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Shall the city/town of _____ be allowed to assess an additional $100,000 in real estate and personal property taxes for the purposes of funding the municipal capital stabilization fund for the fiscal year beginning July 1, ____?

Shall the city/town of _____ be allowed to assess an additional $100,000 in real estate and personal property taxes for the purposes of funding the school capital stabilization fund for the fiscal year beginning July 1, ____?

If the amount is included in an override for multiple purposes, however, the exact amount allocated to the particular stabilization fund must be stated. For example:

Shall the city/town of _____ be allowed to assess an additional $1,000,000 in real estate and personal property taxes for the purposes of funding the town and school operating budgets, the municipal capital stabilization fund ($100,000) and the school capital stabilization fund ($100,000) for the fiscal year beginning July 1, ____?

B. Appropriation of Override in Future Years

1. Annual Appropriation Procedure

In the fiscal year the override is effective, the appropriation of the funds generated by the override into the particular stabilization fund is made by the usual appropriation procedure for stabilization funds under G.L. c. 40, § 5B, i.e., a majority vote of the legislative body.

Each year thereafter, however, the selectboard, town council or city council, with the mayor's approval if required by law, must decide whether to "appropriate" any of the additional capacity resulting from the override for the same stabilization fund purpose. A two-thirds vote is required to make any subsequent fiscal year "appropriation" into a stabilization fund. G.L. c. 59, § 21C(g),

2. Appropriation Amount

All or some of the additional levy capacity may be "appropriated." In the first year after the override is effective, the additional levy capacity that may be appropriated is 102.5 percent of the override amount. In subsequent years, it is 102.5 percent of the amount of additional levy capacity appropriated in the last year it was appropriated.

Example

A $100,000 override is approved for a school capital project stabilization fund for fiscal year 2017 and the legislative body appropriates the same amount from that year's tax levy for that purpose.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

In FY2018, $102,500 is available for "appropriation" by the selectmen, town council or city council, with the mayor's approval if required by law. That entire amount is "appropriated."

In FY2019, $105,062 (1.025 x FY2018 appropriation of $102,500) is available, but only $80,000 is "appropriated."

The amount available in FY2020 now becomes $82,000 (1.025 x FY2019 appropriation of $80,000). However, no appropriation is made in FY2020.

The amount available in FY2021 is $82,000 (1.025 x last appropriation made, i.e., FY2019 appropriation of $80,000).

3. Tax Rate

The assessors must raise the amount “appropriated” in the tax rate. This “appropriation” is reported on page two of the tax rate recapitulation under “Other Amounts to Be Raised” and documented by a certified copy of the “appropriation” vote, as explained in the annual tax rate recapitulation instructions issued by the Bureau of Accounts.

4. Levy Limit Calculation

The municipality’s levy limit for any year is increased by the amount of additional levy capacity that is appropriated for the stabilization fund purpose. The new limit must still be within overall levy ceiling of 2½ percent of the full and fair cash value of taxable property.

C. Change in Override Purpose

1. Presenting Ballot Question

The selectboard, town council or city council, with the mayor’s approval if required by law, may ask the voters to approve a change in the purpose of the override. This change can result in the additional levy capacity being allocated to another stabilization fund or to any other municipal purpose. A two-thirds vote is required to place the ballot question before the voters.

2. Question Form

The following question form should be used to ask voters to change the override purpose:

Shall the city/town of _____ be allowed to change the purpose of a Proposition 2½ override question approved at an election held on _____, ____ for the (capital stabilization fund) to the following new purpose(s): _____ for the fiscal year beginning July 1, ____?

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3. Question Approval

The question is approved if a majority of those voting on the question vote "yes."

4. Appropriation in Future Years

If the purpose of the override is changed to another stabilization fund, or other purpose, the additional levy capacity would have to be "appropriated" to the new purpose each year or the levy limit would not be increased. See Section III-B above.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SAMPLES
(Samples should not be used without the advice of municipal or district counsel.)

DEDICATION OF REVENUES TO A STABILIZATION FUND

ACCEPTANCE

Legislative Body Vote

ARTICLE/ORDER. To see if the city/town/district will vote to accept the fourth paragraph of Massachusetts General Laws Chapter 40, Section 5B, which allows the dedication, without further appropriation, of all, or a percentage not less than 25 percent, of particular fees, charges or receipts to a stabilization fund established under Massachusetts General Laws Chapter 40, Section 5B, to be effective for the fiscal year beginning on July 1, _____, or take any other action relative thereto.

MOTION. Moved/ordered that the city/town/district accept the fourth paragraph of Massachusetts General Laws Chapter 40, Section 5B, which provides for the dedication, without further appropriation, of all, or a percentage not less than 25 percent, of particular fees, charges or receipts to a stabilization fund established under Massachusetts General Laws Chapter 40, Section 5B, to be effective for the fiscal year beginning on July 1, _____.

REVOCATION

Legislative Body Vote

ARTICLE/ORDER: To see if the city/town/district will vote to revoke its acceptance of the fourth paragraph of Massachusetts General Laws Chapter 40, Section 5B, which allows the dedication, without further appropriation, of all, or a percentage not less than 25 percent, of particular fees, charges or receipts to a stabilization fund established under Massachusetts General Laws Chapter 40, Section 5B, to be effective for the fiscal year beginning on July 1, _____, or take any other action relative thereto.

MOTION: Moved/ordered that the city/town/district revoke its acceptance of the fourth paragraph of Massachusetts General Laws Chapter 40, Section 5B, which provides for the dedication, without further appropriation, of all, or a percentage not less than 25 percent, of particular fees, charges or receipts to a stabilization fund established under Massachusetts General Laws Chapter 40, Section 5B, to be effective for the fiscal year beginning on July 1, _____.

Local Finance Opinion

LFO-2018-3
September 24, 2018

TOPIC: Money from Marijuana Establishments and Medical Marijuana Treatment Centers

ISSUE: Accounting treatment of local option excises on retail sales of marijuana for adult use and impact fees and any other payments required or received from marijuana establishments and medical marijuana treatment centers in connection with their operation

This LFO addresses questions and provides guidance regarding the municipal finance law and accounting treatment of money from marijuana establishments and medical marijuana treatment centers. It does not address how payments by those establishments or treatment centers are treated for purposes of host community agreements.

1. What is the general rule about accounting for money received by a city, town or district officer or department?

All money received or collected by a city, town or district from any source is credited to its general fund and can only be spent after appropriation unless a general or special law provides for an exception and different treatment, *i.e.*, a general or special law expressly reserves the revenue stream for expenditure for a particular purpose or allows expenditure by a municipal or district department or officer without appropriation. G.L. c. 44 § 53.

2. What money could a marijuana establishment or a medical marijuana treatment center generate for a municipality?

Municipalities may (1) impose a local excise on the retail sales of marijuana for adult use and (2) negotiate impact fees or other payments under a community host or other agreement with a marijuana establishment or medical marijuana treatment center in connection with its siting and operation in the municipality.

3. How does a municipality impose a local excise on retail sales of marijuana for adult use?

A city or town may impose a local excise on the retail sale of marijuana for adult use by accepting G.L. c. 64N, § 3. Acceptance is by majority vote of the community's legislative body, subject to charter. The maximum excise rate communities may impose is 3%. If a city or town in which a marijuana retailer is located accepts G.L. c. 64N, § 3, all sales by the marijuana retailer that are subject to the state excise on marijuana retail sales will also be subject to the host community's local excise. The excise does not apply to the sale of marijuana or marijuana products by a medical marijuana treatment center. G.L. c. 64N, § 4. See Bulletin 2018-3, *Local Excise on Retail Sales of Marijuana for Adult Use*.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4. How does a municipality obtain impact fees or other payments from a marijuana establishment or medical marijuana treatment center?

A marijuana establishment or a medical marijuana treatment center that wants to operate or continue to operate in a municipality must execute a community host agreement with the municipality. G.L. c. 94G, § 3(d). The community host agreement must include, but is not limited to, all responsibilities of both parties with respect to the operation of the establishment or center within the municipality. The agreement may include payment of a community impact fee by the marijuana establishment or medical marijuana treatment center in order to mitigate the costs imposed upon the municipality by the operation of the establishment or treatment center within its borders. G.L. c. 94G, § 3(d).

5. Is there an exception to the general rule for money related to the operation of a marijuana establishment or medical marijuana treatment center?

No. There is no general law that establishes a different accounting treatment for (1) revenues generated by the local sales excise on retail sales of marijuana for adult use or (2) payments made under community host or other agreements with marijuana establishments or medical marijuana treatment centers. Therefore, the money belongs to the general fund and can only be spent by appropriation. G.L. c. 44 § 53.

6. How do accounting officers treat money related to the operation of a marijuana establishment or medical marijuana treatment center?

Accounting officers must credit all of the following to the general fund:
1. Collections from local option excises on retail sales of marijuana for adult use and
2. Payments made by a marijuana establishment or medical marijuana treatment center regardless of the characterization of the payments by the parties.

State law governs the municipal finance and accounting treatment of payments made by a marijuana establishment or medical marijuana treatment center, not a host community or other agreement between the municipality and the establishment or treatment center. It is not within our regulatory purview to determine the nature of those payments for purposes of G.L. c. 94G, § 3(d). For municipal finance law purposes, however, payments made by an establishment or treatment center under a host community or other agreement in connection with, or to mitigate the costs imposed by, the location and operation of the establishment or treatment center within the municipality are in the nature of exactions or mitigation payments that belong to the general fund. They cannot be reserved in or credited to a separate gift or grant account, trust fund, revolving fund or other special revenue fund and cannot be spent without appropriation or appropriated as an available fund. They belong to the general fund because no general law establishes a different accounting treatment for money related to the operation of these establishments or treatment centers specifically or from exactions or mitigation payments generally.

We understand that some of these agreements have characterized all or some of the payments as gifts or gifts in the nature of trusts. However, a payment made by a private party to a municipality in connection with a regulated activity, contract or other municipal action is not a gift, donation or grant within the meaning of and for the purposes of G.L. c. 44, § 53A. Therefore, it may not be accounted for in a separate account and spent without appropriation. These payments lack the donative intent that is an essential characteristic of the genuine gift required by that statute. A gift is ordinarily defined as a

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

voluntary payment of money or transfer of property made without consideration. Although a private party's decision to engage in a regulated activity or contract with a municipality may be one of choice, it is doing so with the expectation of receiving valuable consideration in return, *i.e.*, a privilege or benefit, or some municipal action or authorization. In this case, the execution of a host agreement is a condition precedent to being able to operate or continue to operate as a licensed marijuana establishment or registered medical marijuana treatment center. It is doubtful that any payments the establishment or treatment center agree to make are for a purpose other than to obtain the necessary host agreement. "[T]he nature of a monetary exaction must be determined by its operation rather than its specially descriptive phrase." Emerson College v. Boston, 391 Mass. 415, at 424 (1984), quoting Thomson Electric Welding Company v. Commonwealth, 275 Mass. 426, at 429 (1931).

7. Is there a way under state law that a municipality may dedicate payments made by a marijuana establishment or medical marijuana treatment center for later appropriation for particular purposes?

Yes. A municipality may use a local acceptance option to dedicate all, or a portion of at least 25%, of the collections of the excise on retail sales of marijuana or payments from a community host and other agreement payments to a general or special purpose stabilization fund established under G.L. c. 40 § 5B. For the procedure that must be followed to accept and use this local option, see Section II of Informational Guideline Release (IGR) No. 17-20, *Stabilization Funds*. Under this option, these collections and payments may be dedicated to stabilization funds because they are not earmarked for a particular purpose under current state law. In addition, the excise on marijuana retail sales is not a locally assessed tax or excise specifically excluded from dedication.

8. How will the Bureau of Accounts treat balance sheet reservations of payments from a marijuana establishment or medical marijuana treatment center when certifying free cash?

The Bureau of Accounts will close balance sheet reservations of payments from marijuana establishments or medical marijuana treatment centers when calculating the available funds of a municipality (free cash). G.L. c. 59, § 23. This is consistent with its policy with respect to similar payments made under host, development or other agreements with other private parties that also belong to the general fund.

9. What agency has regulatory jurisdiction over issues related to the operation of marijuana establishments or medical marijuana treatment centers?

The state's Cannabis Control Commission determines whether marijuana establishments or medical marijuana treatment centers meet licensing or registration standards required to operate. Questions regarding the interpretation of the statute, regulations and other guidance related to the implementation of marijuana for adult use or medical purposes should be directed to the Commission.

Kathleen Colleary, Chief
Bureau of Municipal Finance Law

Part I ADMINISTRATION OF THE GOVERNMENT

Title VII CITIES, TOWNS AND DISTRICTS

Chapter 40 POWERS AND DUTIES OF CITIES AND TOWNS

Section 5B STABILIZATION FUNDS; ESTABLISHMENT

[Text of section effective until November 7, 2016. For text effective November 7, 2016, see below.]

Section 5B. For the purpose of creating 1 or more stabilization funds, cities, towns and districts may appropriate in any year an amount not exceeding, in the aggregate, 10 per cent of the amount raised in the preceding fiscal year by taxation of real estate and tangible personal property or such larger amount as may be approved by the director of accounts. The aggregate amount in such funds at any time shall not exceed 10 per cent of the equalized valuation of the city or town as defined in section 1 of chapter 44. Any interest shall be added to and become part of the fund.

The treasurer shall be the custodian of all such funds and may deposit the proceeds in national banks or invest the proceeds by deposit in savings banks, co-operative banks or trust companies organized under the laws of the commonwealth, or invest the same in such securities as are

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

legal for the investment of funds of savings banks under the laws of the commonwealth or in federal savings and loans associations situated in the commonwealth.

At the time of creating any such fund the city, town or district shall specify, and at any later time may alter, the purpose of the fund, which may be for any lawful purpose, including without limitation an approved school project under chapter 70B or any other purpose for which the city, town or district may lawfully borrow money. Such specification and any such alteration of purpose, and any appropriation of funds into or out of any such fund, shall be approved by two-thirds vote, except as provided in paragraph (g) of section 21C of chapter 59 for a majority referendum vote. Subject to said section 21C, in a town or district any such vote shall be taken at an annual or special town meeting, and in a city any such vote shall be taken by city council.

Chapter 40: Section 5B. Stabilization funds; establishment

[Text of section as amended by 2016, 218, Sec. 22 effective November 7, 2016. For text effective until November 7, 2016, see above.]

Section 5B. Cities, towns and districts may create 1 or more stabilization funds and appropriate any amount into the funds. Any interest shall be added to and become part of the fund.

The treasurer shall be the custodian of all stabilization funds and may deposit the proceeds in a trust company, co-operative bank or savings bank, if the trust company or bank is organized or exists pursuant to the laws of the commonwealth or any other state or may transact business in the commonwealth and has its main office or a branch office in the commonwealth; a national bank, federal savings bank or federal savings and loan association, if the bank or association may transact business and

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

has its main office or a branch office in the commonwealth; provided, however, that a state-chartered or federally-chartered bank shall be insured by the Federal Deposit Insurance Corporation or its successor; or may invest the funds in participation units in a combined investment fund pursuant to section 38A of chapter 29 or in securities that are legal investments for savings banks.

At the time of creating any stabilization fund the city, town or district shall specify, and at any later time may alter, the purpose of the fund, which may be for any lawful purpose, including without limitation, an approved school project pursuant to chapter 70B or any other purpose for which the city, town or district may lawfully borrow money. The specification and any alteration of purpose, and any appropriation of funds from any such fund, shall be approved by a two-thirds vote, except as provided in paragraph (g) of section 21C of chapter 59 for a majority referendum vote. Subject to said section 21C of said chapter 59, any such vote shall be of the legislative body of the city, town or district, subject to charter.

Notwithstanding section 53 of chapter 44 or any other general or special law to the contrary, a city, town or district that accepts this paragraph may dedicate, without further appropriation, all, or a percentage not less than 25 per cent, of a particular fee, charge or other receipt to any stabilization fund established pursuant to this section; provided, however, that the receipt is not reserved by law for expenditure for a particular purpose. For purposes of this paragraph, a receipt shall not include taxes or excises assessed pursuant to chapter 59, 60A, 60B, 61, 61A or 61B or surcharges assessed pursuant to section 39M or chapter 44B. A dedication shall be approved by a two-thirds vote of the legislative body of the city, town or district, subject to charter, and may be terminated in the same manner. A

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

vote to dedicate or terminate a dedication shall be made before the fiscal year in which the dedication or termination is to commence and shall be effective at least for 3 fiscal years.

Title VII CITIES, TOWNS AND DISTRICTS

Chapter 44 MUNICIPAL FINANCE

Section 53 CITY, TOWN OR DISTRICT FUNDS; USE AND DISPOSITION

[Text of section effective until November 7, 2016. For text effective November 7, 2016, see below.]

Section 53. All moneys received by any city, town or district officer or department, except as otherwise provided by special acts and except fees provided for by statute, shall be paid by such officers or department upon their receipt into the city, town or district treasury. Any sums so paid into the city, town or district treasury shall not later be used by such officer or department without specific appropriation thereof; provided, however, that (1) sums allotted by the commonwealth or a county to cities or towns for highway purposes and sums allotted by the commonwealth to cities, towns or districts for water pollution control purposes shall be available therefor without specific appropriation, but shall be used only for the purposes for which the allotment is made or to meet temporary loans issued in anticipation of such allotment as provided in section six or six A, (2) sums not in excess of twenty thousand dollars recovered under the terms of fire or physical damage insurance policy and sums not in excess of twenty thousand dollars received in restitution for damage done to

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

such city, town or district property may be used by the officer or department having control of the city, town or district property for the restoration or replacement of such property without specific appropriation and (3) sums recovered from pupils in the public schools for loss of school books or paid by pupils for materials used in the industrial arts projects may be used by the school committee for the replacement of such books or materials without specific appropriation.

Chapter 44: Section 53. City, town or district funds; use and disposition

[Text of section as amended by 2016, 218, Sec. 84 effective November 7, 2016. For text effective until November 7, 2016, see above.]

Section 53. All moneys received by any city, town or district officer or department, except as otherwise provided by special acts and except fees provided for by statute, shall be paid by such officers or department upon their receipt into the city, town or district treasury. Any sums so paid into the city, town or district treasury shall not later be used by such officer or department without specific appropriation thereof; provided, however, that (1) sums allotted by the commonwealth or a county to cities or towns for highway purposes and sums allotted by the commonwealth to cities, towns or districts for water pollution control purposes shall be available therefor without specific appropriation, but shall be used only for the purposes for which the allotment is made or to meet temporary loans issued in anticipation of such allotment as provided in section six or six A, (2) sums not in excess of $150,000 recovered under the terms of a fire or physical damage insurance policy or received in restitution for damage done to such city, town or district property may, with the approval of the chief executive officer, be used by the officer or department having

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

control of the city, town or district property for the restoration or replacement of such property without specific appropriation during the fiscal year in which they are received or 120 days after receipt, whichever is later, and (3) sums recovered from pupils in the public schools for loss of or damage to school books, materials, electronic devices or other learning aids provided by the school committee, or paid by pupils for materials used in the industrial arts projects, may be used by the school committee for the restoration or replacement of such books or materials without specific appropriation.

License: Application for Madison Ave of Melrose (MAOM Holding Company)

Pursuant to the City of Melrose Administrative Code, Article II, Chapter 143 Junk, Secondhand and Precious Metals Dealers, please find an application for Madison Ave of Melrose, 531 Main Street, Melrose.

COMMENTS - Current Meeting:

Attorney Gill representing the secondhand apparel shop proprietor, Ms. Murphy, provides a statement. He feels the proprietor has been slandered and maligned. States Ms. Wright has been in business since 2017 and he questions the secondhand dealer licensing process. Says issues like these are usually handled in court or resolved by the parties. Business complaints should be resolved in court by evidence and witness cross-examined. He describes meeting with Chief Lyle for more details regarding five complaints and the investigation by Melrose police. Says there was a finding of no criminal involvement. Investigating officer advised complainants they could pursue civil complaints. Says Detective McNamara found no criminal finding and texted Ms. Murphy that no issues were found.

Gill met with Chief Lyle to determine how to resolve the issues and was advised to make complainants whole. Questions if the council was in the business of deciding what a jury or judge should decide - effectively denying a license and thus putting someone out of business? Says the proper forum to adjudicate this matter would be civil court. Says emotions need to be tempered and asks for consideration from the council. Gill agrees the proprietor could improve her business practices, policies and procedures and references a consignment policy in Massachusetts - not in the law - that if unsold goods are not picked up within 90 days, then the goods belong to the store. Indicates contracts aren't required by law. Indicates the prom dresses (referred to by a resident at public comment) were donated to DCF as the proprietor is product of the foster care system with close ties to the DCFS adolescent program. Proprietor has an online business. Gill asks for opportunity to seek a resolution with the complainants and adds that he has never seen a business dragged into oblivion due to unhappy customers.

Questions from Council:

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Councilor Jamaleddine says there is a big difference between unhappy clients and the experiences relayed during public comment. This is not about someone walking into the store unhappy with what they purchased; it is about family not given time to grieve. Apologizes for the city not handling the matter appropriately and notes to the Buckalews proprietor (in attendance) that the council supports good businesses. Asks the applicant how this will be fixed? Attorney Gill says he can try but this may not be fixable.

Point of order by Councilor MacMaster -this is not a back-and-forth discussion with Attorney Gill. This is the council's opportunity to ask questions and notes Councilor Jamaleddine hasn't been able to complete her questions because the attorney has interjected twice.

Councilor MacMaster. Confirms the council is not here because someone came to the City Clerk or Police Department but rather because they are the licensing authority reviewing the application. He asks how many formal complaints have been filed regarding the business practices of Madison Ave, either by phone, or in person? Chief Lyle says several including one on Sunday. Councilor MacMaster asks if all the complainants know the application is being reviewed? Chief Lyle says he doesn't know if they are aware but believes some audience members picked it up on social media. Councilor MacMaster questions whether the Chief has any reason to believe, based on filed reports, that complainants are coordinating with each other as Attorney Gill suggested. Chief Lyle states social media seems to be how individuals are made aware. Councilor MacMaster reviews the Chief's employment history (chief for 15 years and an officer for a total of 36 years). Asks if based on his experience whether it is unusual for a crime victim to delay filing a report and asks if it is possible there are others that choose not to report what happened. What concerns Councilor MacMaster, based on information provided by multiple people, is that this is not an isolated allegation. There is probable cause to believe there was an intent to defraud members of the public by false pretenses. He asks the Chief if there a reason this wasn't brought before a clerk magistrate in Malden District Court? Chief Lyle responds there was a complaint before the district attorney's office and that was denied. Councilor MacMaster asks if the district attorney was made aware of the other complaints? Chief said he does not know - most of the complaints are one and done. Councilor encourages referring this to the district attorney's office based on multiple incidents beginning in 2019 up through this past Sunday.

Councilor MacMaster agrees with Attorney Gill that this is not a court of law,

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

the councilors aren't judges or a jury but there is a consumer protection matter that is of public interest. Takes exception to the characterization of a witch hunt with torches and pitchforks because what is before council is a business application and members of the public raising concerns of consumer protection. He was deferential to the request for immediate consideration and notes that the council did not have to allow the matter this evening. He objects to the characterization that council has no jurisdiction - the council has jurisdiction over licenses. There is a level of oversight at the municipal level.

Councilor Migliorelli feels horrible for this situation. Is irritated that matter was brought forth necessitating characterizations of a business owner and members of the public sharing painful stories since the council can't offer anything in return. The council is not a judge or a jury. This is not a court, and this is not the appropriate avenue. These complaints need to be handled through appropriate channels. Disagrees with Councilor MacMaster that this is the appropriate venue.

Councilor Grigoraitis says this process is unfair to everyone present. Concerned with level of decision making without thought to the consequences. Notes most of this council has been in place since 2019 and in reading the city code (providing direction for licensing) this is an annual May license to be presented to council. She says this is the first time most of the body has seen this type of license and is taken aback by the city solicitor's decision to issue a cease and desist on a license the municipality has not been consistently tracking or reissuing. The council is not able to make any of the complainants whole. The police chief's decision was to treat the complaints singularly rather than as a pattern of crime filed with D. A's office. Chief Lyle indicates he is in attendance solely on the license denial. Councilor Grigoraitis notes criminal matters are pursued by the D.A. versus civil complaints and chapter 93A attorney general/small claims court matters. She is does not want emotions to rule a licensing decision and recognizes that through no fault its own, the council has not been doing their job because for the past couple of years licenses have not been brought forward.

Councilor Eccles asks Chief Lyle whether he has petitioned for suspension or revocation of this applicants' license. Chief Lyle says the business never had a license to revoke.

Councilor Garipay feels frustrated that the administration did not sit down with the business and try to work it out and instead it was brought to council. Questions where do we stop? Must be careful where we (council) fall on this

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

issue.

Councilor Migliorelli asks how were attendees notified of matter? Chief Lyle states he called the five complainants to determine if the issues were resolved and they asked.

Councilor Stewart asks if the parties were able to resolve the issues would that change the denial. Chief Lyle explains he told Attorney Gill if the parties were made whole it would be resolved. Councilor Stewart continues that it is difficult to decide tonight so to allow time for resolution he moves to hold in council. This is seconded by Councilor MacMaster. On discussion Councilor Grigoraitis indicates the business has been closed since April and to hold would be unfair. Recognizes there are ongoing concerns including her own about how an Attorney and the Chief work out situations that usually involve a court. If there was a willingness to withdraw the motion, the council could issue a temporary 90-day license bringing the matter through the summer so the business could participate in events held on Main Street. Gives the applicant ample time to resolve matters.

Councilor Stewart withdraws. Councilor MacMaster does not withdraw. On discussion, he has no concerns with issuing a temporary 90-day decision, but he has questions for city solicitor regarding cease and desist. Not comfortable without opportunity to ask questions. Councilor Eccles is favorable for 90-day temporary license but believes there may be cause for revocation. Councilor Grigoraitis moves for a temporary license and requests the presence of the City Solicitor at the September 12th council meeting. Councilor Karamcheti feels for the complainants but notes that the council is not looking to shut down businesses. Pursue the appropriate avenue. She hopes involved parties look at business policies and consider positive ways forward. Councilor Jamaleddine hopes applicant will reflect on what was heard and will improve business decisions. She is very support of Melrose businesses. Councilor Eccles notes something to consider is what a resolution of the issue looks like after 90 days -what does council want done in 90 days?

Request for Special License to house four (4) dogs at 58 Trenton Street, Melrose, MA

In accordance with Article II, section 93-5 of the City of Melrose Administrative Code, A request for a special license to house four (4) dogs at the residence of Leonard and Claudia Bertoli, 58 Trenton Street, Melrose, MA

COMMENTS - Current Meeting:

Ward 3 Councilor Stewart advises there are no concerns expressed by abutters/residents in the neighborhood and that the applicant has completed all required paperwork noted in Article 93 section 5 of the city ordinances. These small dogs are between 10-15 years old. Councilor MacMaster asks if the applicant intends to breed the dogs. Councilor Stewart advises there is no intent to breed.

RESULT:	**GRANTED [UNANIMOUS]**
MOVER:	Robb Stewart, Ward 3
SECONDER:	Manjula Karamcheti, Ward 1
AYES:	Eccles, Garipay, Grigoraitis, Jamaleddine, Karamcheti, MacMaster, Migliorelli, Obremski, Stewart, Williams, Cinella

RE: 2022 Annual Dog Registration – special license

Dear Mr and Mrs Bertoli,

The city clerk's office received your 2022 application for dog registration for Pixel, Chico, Zuzu and Frizz along with their corresponding rabies certificates. I am writing to inform you of a provision in the General Code of the City of Melrose that you may not be aware of entitled *Article II, Dogs § 93-5 Special license required in certain cases* (enclosed for reference).

Since you are registering more than 3 dogs to be housed at one premises, this Ordinance requires you to obtain a special license from the City Council. Such license can only be granted after public hearing in front of the City Council, notice of which must be given seven days prior.

The clerk's office will provide the public hearing notice to the newspaper as well as the notice to the dwelling abutters (any premises within 500 feet of your residence). We will subsequently provide you with an invoice for these costs with supporting payment documentation.

It is anticipated that the City Council will review your application for special license on Monday, June 6, 2022. Please let me know if you have any questions.

Best,

Kristin Foote

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

§ 93-5. Special license required in certain cases.

A. No dog shall be kept for breeding purposes, nor shall more than three dogs be kept for any purpose, except such dogs as are under the age of six months, on any premises situated in the City unless a special license therefor shall have been obtained from the City Council.

B. Every special license referred to in Subsection A shall specify the premises on which dogs may be kept under its authority, shall remain in force until the 31st day of March next following and shall be expressly made revocable by vote of the City Council after hearing. No license to keep dogs on any premises in the City situated within 500 feet of any dwelling house shall be granted except after a public hearing, notice of the time and place of which shall be given, not less than seven days prior thereto, by publication in a newspaper published in the City and by mail to all owners and occupants of real estate abutting such premises or directly opposite such premises on any public or private way as they appear on the most recent tax list at the time the application for such license is filed.

Subject: Bertoli - Photo of pups and a question
Date: Thursday, May 26, 2022 3:22:15 PM

Hi Kristin,

I'm sending a photo of the pups for your records.

Two neighbors called regarding the notices they got. They asked if someone reported my pups because I've had them forever and if they need to go to the hearing in support, I told them no one reported me.

Do I need to be at the hearing?
Please let me know when you have a chance.

Many thanks,
Claudia

Photo: Chico (15), Frizz (10), Pixel (15), Zuzu (8) - (Draco (16) the black merle Chihuahua passed away in April)

RE: Grant for Streetscape Infrastructure Upgrades & Wayfinding Update

---

The City of Melrose has been awarded $50,000 from the Executive Office of Administration and Finance for Streetscape Infrastructure Upgrades. The City intends to combine these funds with the free cash allocation authorized by the Council last year to expand on our successful Wayfinding and Creative Placement Initiative.

Specifically, these funds will allow for the purchase of ten new trash and recycling containers that will be installed in key locations across the community. These containers have been selected by the Public Works Department in consultation with Zero Waste Melrose and Keep Melrose Beautiful. They will provide a more organized method for collecting trash and recycling, keep litter off the streets and playgrounds and minimize the opportunity for large bags of household trash overflowing onto the city playgrounds and other locations, which has been identified as a problem across the city. We will explore the opportunity to apply public art to these containers, and the remaining funds will be allocated toward the fabrication and installation of wayfinding signs that will be identified through a community engagement process.

We have recently completed the procurement process for the design consultant who will work with us to finalize the Wayfinding System and oversee this Streetscape Improvement Initiative. Over the next two months, in addition to purchasing the trash and recycling containers, we will:

- Conduct a community survey to assess the community's opinion on the three placemaking and wayfinding signage concept options that have been developed.
- Meet with the Placemaking & Wayfinding Committee to finalize the signage concept and prioritize locations where signage will be installed based on what was heard at the open house meeting on this topic and the survey results.
- Revise the sign location plan and update the quantities of desired signage elements.
- Revise the Master Plan Document incorporating final comments and feedback from staff, the Placemaking & Wayfinding Committee and the results of the community survey and produce the Final Report
- Create Design Development drawings for wayfinding signage specifying dimensions, materials, colors, installation notes, etc.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

- Fabricate wayfinding signs and install them in the prioritized locations.

We are pleased to be able to leverage additional enhancements to benefit the community, while addressing the need for more trash and recycling containers that better serve the city's needs, and we look forward to re-engaging with the community on the wayfinding effort. We appreciate your past support and respectfully request your favorable consideration of this grant.

MEMORANDUM

To: Melrose City Council
From: Mayor Paul Brodeur
Re: Melrose Liquor License Commission Re-appointment
Date: May 11, 2022

I respectfully request the Honorable City Council confirm the re-appointment of Joseph Nevin, of 415 East Foster Street, to the City of Melrose Liquor License Commission for another six-year term, said term to expire the first day of June 2028. Nevin's current appointment as Chair for the Commission expired on the first day of June 2022.

For over a decade, Nevin has exceeded expectations in his capacity Chair of the Commission – going above and beyond to build relationships with the Melrose community, routinely visiting every establishment, and operating as Chair in a fair and diplomatic nature. Outside of the Commission, Nevin's professional experience with the hospitality industry as an architect has lent the commission a unique perspective, helped foster these relationships with our local businesses, and more.

I am eager for Nevin to continue his work supporting the local business community and the residents of Melrose through his service, and I look forward to having the opportunity to discuss my confidence in Nevin with you.

Thank you for your consideration.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Re: Reappointment to Liquor Licensing Commission

Dear Mayor Brodeur,

I am writing you to let you know that I would like to continue my work on the City of Melrose's Liquor Licensing Commission in my current role as Chair. I respectfully request your consideration for reappointment.

It is a privilege to serve the City of Melrose in this volunteer capacity as a special municipal employee and I look forward to continuing the work of the commission and serving the people of Melrose, the Administration, and our local businesses.

If you have any questions or comments, please do not hesitate to contact me.

Warm regards,

Joseph P. Nevin, Jr.

MEMORANDUM

Date: May 10, 2022

To: Melrose City Council

From: Elena Proakis Ellis, P.E., Director of Public Works
Sponsored by Mayor Paul Brodeur

Subject: Salt Shed Informational Order

The Melrose Department of Public Works' salt shed, constructed in the 1970s, is well beyond the end of its useful life and presents substantial hazards to both employees and to the public in its present shape. As discussed previously with the City Council in 2021 and 2020, the City needs to determine an alternative that allows us to demolish the existing salt shed as soon as possible with a plan in place for its replacement or a suitable alternative.

The DPW had bid our recommended design in 2021 with a construction bid price of approximately $1.44 million. The City Council did not approve the related borrowing order in 2021. Since the time has now elapsed for awarding that contract, we have put the design documents back out to bid, to obtain new pricing. Given the uncertainty in the construction industry, we did not feel confident that a bid price from 2021 could be used to accurately estimate the current construction costs. The bid opening is scheduled for late-May, and the contract would need to be executed within 30 days under the present bid language if we decide to proceed with seeking approval for that option.

We are simultaneously investigating other options, which we would like to present to the Council via this informational order, to allow the Council to ask questions and obtain additional information from both City staff and our consultants from Weston and Sampson. Based on the outcome of this discussion and the bid results, we will then determine whether to submit a borrowing order for consideration in early June.

Additional information will be submitted prior to the discussion before the Council for your consideration. We appreciate the opportunity to reopen this discussion and hopefully arrive at a preferred option that meets the needs of all involved.

MEMORANDUM

Date: May 18, 2022

To: Melrose City Council

From: Elena Proakis Ellis, P.E., Director of Public Works

Subject: Salt Shed Additional Information

As described in my memorandum dated May 11, 2022 accompanying the Informational Order to the Melrose City Council, the Melrose Department of Public Works' salt shed, constructed in the 1970s, is well beyond the end of its useful life and presents substantial hazards to both employees and to the public in its present shape. The City needs to arrive at a viable alternative that allows us to demolish the existing salt shed as soon as possible with a plan in place for its replacement.

The attached documentation provides additional information to assist in the discussion at the upcoming Appropriations Committee meeting. The following items are included herein:

1. Photographs of the salt shed showing the conditions, which have worsened since 2019. There are many holes in the roof and walls, and critical supports are failing.

2. Salt Shed Assessment Report dated November 2020. After selecting Weston & Sampson (W&S) as our consultant through a competitive procurement process (resumes of key personnel and consultant evaluation attached), they were tasked with evaluating alternatives prior to selecting a proposed design option. Three alternatives were evaluated in detail:

    a. A gable end structure similar to the existing salt shed;
    b. A fabric topped structure; and
    c. A high-arch gambrel style structure.

    This report was made available to the City Council for comment prior to proceeding with a selected design option. Ultimately, the City found the high-arch gambrel design to best meet our needs. This option provides the same salt storage capacity, with a slightly smaller footprint. It offers the advantages of covered vehicle storage space behind the salt shed in the newly freed up space, and it allows us to install solar panels on the roof.

    Following this decision, the consultants began designing the replacement salt shed for bidding in spring 2021.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3. As materials costs began to rise as the impacts of COVID started to severely impact the construction market, W&S provided the City with a final 'opinion of probable construction cost' based on the completed design documents, prior to obtaining contractor bids. They also updated the cost estimates for the other two options that had been evaluated. These cost estimates, dated 5/7/2021, are attached. The price of our selected option rose about 40% when comparing apples to apples between the preliminary design phase and the bidding phase due primarily to COVID-related factors.

4. Bid were opened in May 2021, with a low bid of $1,436,000 from Construction Dynamics. The project was brought to the Council at that time for approval of a loan to fund construction, which was not approved. The associated memo to Council is attached.

5. In November 2021, in an effort to again determine if any lower cost options truly existed, the City requested that W&S look again at two approaches to building a fabric salt shed – one with a poured concrete foundation and the other with a block wall foundation, which would minimize some of the need to excavate the soils with known contamination. New cost estimates were developed for these options. These cost estimates are attached. While the block wall option saves approximately $240,000, the total estimated project cost is still $1.46M, which was not deemed to have adequate cost-benefit. The fabric would require replacement over time, and the building could not accommodate solar panels. Also, the additional storage would not be available as with the previously selected option. It did not seem reasonable to spend $1.46M on a fabric structure.

6. In order to verify the pricing we were obtaining through the cost estimators, I contacted a fabric dome vendor for a direct quote. The quote provided is attached and includes only the costs to provide and install the metal frame and fabric dome on top of a concrete block wall that would be installed by others. The quoted price is $229,750. Applying all of the ancillary costs from W&S's estimate, the price is comparable to the $1.46M estimate, since the fabric structure itself in W&S's estimate was $172,000 plus markups and contingencies.

7. Based on all of this information, the City decided to put the originally designed project back out to bid. The plan set showing the salt shed as designed is attached. Bids are scheduled to be opened in late-May, and, if the City decides to proceed with that project, contracts should be signed within 30 days of the bid opening. This would allow construction to begin immediately with the goal of having a completed project by late 2022.

   Please note that this design shows the City's proposed brine system on Sheet C-6 of the drawings, which is consistent with our current practice of using a brine to minimize the total volume of salt used. We treat our salt with a product called Magic-0, which cuts down on the bounce/scatter of salt as it is applied, is effective for pre-treatment, and works to melt ice at even lower temperatures than untreated salt. The City has standard operating procedures for salt application that strive to minimize the total volume of salt used and meet the requirements of the City's National Pollutant Discharge Elimination System (NPDES) stormwater permit issued by the US EPA. We are cognizant of the impact that salt can have on environmental resources and carefully calibrate our spreaders to strike the balance between public safety and environmental impacts during storm events.

As seen in the information provided, the City has tried to identify viable alternatives to cost effectively replace the existing salt shed. Other alternatives discussed included the option of putting a new salt shed at the City's Route 99 facility, or collaborating with the Department of Conservation and Recreation to build a joint salt shed at their Woodland Road site. The former option was ruled out as impractical due to the distance from the

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

Route 99 facility to many parts of Melrose, especially should salt be needed during rush hour. The need to travel on Route 1 to get to and from that facility during storm conditions makes it impractical at best, and potentially catastrophic if salters could not be dispatched to neighborhoods in Melrose quickly enough during an icing event, especially an unpredicted one. The collaboration with DCR was seriously considered, but their timeline did not match with the City's need, as they are still early in the design process, with construction of a new salt shed several years out. Furthermore, the shed they presently have and the one they intend to replace it with only holds 800 tons of salt, and they share the salt with MassDOT. Melrose's shed has a capacity of 1,200 tons for Melrose alone. Therefore, in order to share a salt shed, they would need to more than double the size of what they had intended to build, which would also have substantial cost implications. Lastly, construction of a shed offsite does not eliminate all costs associated with the 72 Tremont Street site, since demolition of the existing salt shed and closing of the contaminated area would still be required.

Ultimately, while we would all prefer to spend less money on salt storage, there would need to be a viable lower cost option to consider, especially given the condition and hazards of our current facility. We look forward to answering additional questions from the Council at the upcoming meeting along with our consultants.

If you wish to visit the existing salt shed or to submit any questions in advance so that our consultant can come prepared to answer them, please feel free to contact me at 781-507-5952 in advance of the May 23rd meeting. Thank you.

EPA Certified Third-Party Inspector

James has over 20 years of environmental engineering experience, including industrial design services for numerous public works facilities. He also has provided engineering services for environmental assessment and remediation projects, including system testing, repair, design, and construction for storage tank projects. In addition, James has worked on landfill, water, and wastewater projects.

SPECIFIC PROJECT EXPERIENCE

Salt Shed Design, Raynham, Massachusetts. Project manager for design, bidding, and construction administration services for a DPW salt shed for the Town of Raynham. The design included a 50' wide X 72' long building with 12' tall pressure treated wood side walls and architectural shingle roof. The scope included site surveys, geotechnical investigations, permitting services, electrical designs for the new salt shed, canopy lighting, and liquid de-icing chemical pumping systems, along with the relocation of the existing flare duct bank to make room for the new structure.

Design Services for Salt Storage Building, Shrewsbury, Massachusetts. Project manager for evaluation, design, and construction administration services for the development of a new salt storage building. Scope included an evaluation report of existing facility, planning level cost estimates, geotechnical and permitting services at the project site, construction administration, and field observation.

Design Services for Salt Storage Building, Burlington, Massachusetts. Project manager for salt shed design, bidding, and construction administration services to replace the town's existing salt shed with a new Hi-Arch Gambrel salt shed. Scope included zoning analysis, planning board and conservation commission permitting, site design, construction cost estimates, construction administration, and field observations.

Consolidated DPW and Natural Resources Facility, Orleans, Massachusetts. Industrial engineer responsible for the planning, design, and construction administration of vehicle maintenance, trade shops, and wash bay. Work included meeting with the end user to identify specific equipment needs, preparing shop layouts, preparing and designing industrial specialty equipment, and providing construction oversight for all equipment.

Industrial Engineering for New Department of Public Works Facility, Hopkinton, Massachusetts. Industrial engineer for design and construction administration services for fleet maintenance, wash bay, and trade shop equipment. Services included meeting with DPW staff to identify equipment options, review of contractor shop drawings during construction, and final inspection of installed equipment. Equipment included, but was not limited to, vehicle lifts, tailpipe exhaust removal systems, fluid storage and distribution systems, trade shop equipment (drill presses, grinder, table saws, etc.), vehicle wash system, vehicle fueling system, and overhead bridge cranes.

Tyler is an engineer with experience in field and office duties related to facilities, wastewater, water, and environmental engineering projects, including data analysis, cost estimations, permitting, client interactions, and field work. His technical skills include AutoCAD, HyrdoCAD, MATLAB, ArcView, and Argus ONE.

SPECIFIC PROJECT EXPERIENCE

Design Services for Salt Storage Building, Burlington, Massachusetts. Assisted with project management and client communication tasks. Performed zoning analysis and compiled planning board and conservation commission permitting applications. Performed civil site design, which included grading and drainage, site layout, stormwater and cut and fill calculations. Was involved with planning level construction cost estimates, construction administration, and field observations. The project scope included the replacement of the town's existing salt shed with a new Hi-Arch Gambrel salt shed. The project also included site grading, providing new catch basins, new retaining walls, infiltration trenches and site paving.

Salt Shed Design, Raynham, Massachusetts. Performed the zoning analysis, prepared and submitted the site plan application, and appeared as the town's representative during the planning board hearing. Performed the civil site, grading, and drainage, cut and fill analysis, and the stormwater design for the project. Was involved with planning level construction cost estimates, construction administration and field observations. The project was to replace the town's existing salt shed with a new 50' wide X 72' long Hi-Arch Gambrel salt shed. The project included earthwork, updating grading and drainage patterns, paving and analysis for reuse of the existing catch basins and infiltration basin system.

Design Services for Salt Storage Building, Shrewsbury, Massachusetts. Responsible for the project design schedule and managing the design team, which included geotechnical engineers, architects, and electrical engineers, for the replacement of the town's existing salt shed with a new Hi-Arch Gambrel salt shed. Performed civil site design, which included grading and drainage, site layout, stormwater, and cut and fill calculations. Was involved with planning level construction cost estimates, construction administration, and field observations. The project included earthwork, updating grading and drainage patterns, paving, and providing new stormwater management features, including infiltration trenches, deep sump hooded catch basins, oil water separators, and grass swales.

New Fueling Facility, Orleans, Massachusetts. Assisted with the design of a new vehicle fueling system for town, which included a 10,000-gallon double-walled above ground storage tank with interstitial monitoring. Designed the fueling facility to allow remote monitoring of the fuel management system and tank monitoring system from the town's Police Department at a separate site.

New DPW Facility, Mansfield, Massachusetts. Assisted with the DPW industrial equipment design for the new facility, which included a 5-ton capacity bridge crane, a new lubrication distribution system, and multiple vehicle lifting systems.

MEMORANDUM

Date: **July 13, 2020**

To: **File**

From: **Elena Proakis Ellis, P.E.**

Subject: **Recommendation for Salt Shed Design Consultant**

The City put out a Request for Qualifications (RFQ) in spring 2020 to procure a design consultant for the City's salt shed project. Statements of Qualifications and fee proposals were due on June 3, 2020. Three consultants submitted their qualifications for consideration:

- Bayside Engineering (with Fitzemeyer & Tocci)
- DiGiorgio Associates
- Weston & Sampson Engineers

After reviewing the proposals individually, the selection committee met on Wednesday, July 8, 2020 in order to discuss the final selection. The selection committee consisted of myself along with Jim Troup, Jay McNeil, and Peter Pietrantonio. Three of the members of the selection committee assigned numerical rankings, as shown below, and the fourth provided general feedback.

SELECTION CRITERIA
The selection criteria as specified in the Request for Qualifications were as follows:

Threshold Criteria

1. *In order for proposals to be considered, they must comply with all submission requirements.*
2. *Proposals that lack experience working with municipalities or other government/public agencies will not be considered.*
3. *The proposal must clearly demonstrate that the consultant understands the required scope and schedule and is capable of providing all services described herein in a timely manner.*

Performance Criteria - Proposals will be preferred which give evidence of:

1. *Understanding of the goals of the City;*
2. *Quality of the project approach and its ability provide the maximum benefit to advance project objectives;*
3. *Experience with similar projects;*

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4. *Quality and experience of the consultant's core team;*
5. *History of completing projects on schedule and within budget;*
6. *Positive feedback from references provided; and*
7. *Capacity to complete the job on schedule, including: office location, appropriate and available staffing, computer equipment, financial stability of the firm, current projects, and other major project commitments.*

VI. AWARD

A. The Contract shall be awarded to the consultant that the City deems to be the best fit for the project, using the evaluation criteria noted above.

B. The City reserves the right to reject any and all proposals, in part or in whole, if it deems it to be in the best interest of the City.

RANKING OF PROPOSALS

The proposals received were reviewed in detail and were ranked according to the criteria listed above on a scale of 1 to 5, with 5 being "Highly Advantageous" and 1 being "Not Advantageous." The table below presents the results.

Selection Criteria	Bayside	DAI	Weston & Sampson
Compliance with Submission Requirements	✓	✓	✓
Municipal Experience	✓	✓	✓
Understanding of Scope/Ability to Perform	✓	✓	✓
Understanding of City's Goals	5+3+4 = 12	3+3+4 = 10	5+4+4 = 13
Project Approach – Quality	5+3+4 = 12	3+3+4 = 10	5+4+4 = 13
Experience with Similar Projects	5+3+4 = 12	4+2+4 = 10	4+4+4 = 12
Experience of Team	5+4+4 = 13	4+4+4 = 12	5+4+5 = 14
Project Completion History	4+3+4 = 11	5+3+4 = 12	5+4+5 = 14
Feedback from References	3+3+3 = 12	*	5+5+5 = 15
Capacity to Complete Project	4+3+5 = 12	5+3+4 = 12	4+4+5 = 13
TOTAL QUALIFICATIONS RANKING	**28**	**22**	**31.3**

* References for DAI were not called based on their aggregate ranking in other categories.

Based on the qualifications rankings, Weston and Sampson ranked the highest. The price proposals received were as follows:

- Bayside/Fitzemeyer & Tocci: $77,705 (an additional price was provided for construction administration, but that was not requested in the RFQ so is not included herein)
- DiGiorgio: $65,000 (survey services were not included)
- Weston & Sampson: $98,918

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The selection committee recommends that the value-added for selection of the highest ranked firm is consistent with the price proposal. Advantages of the highest ranked firm include:

- Greater breadth of salt shed design types, with more flexibility
- The project team has extensive experience with the design of whole DPW complexes, including considerations for circulation, vehicle storage needs, treatment of salt using pump systems to minimize salt usage, etc., which may be useful in making decisions about the salt shed and its interaction with the other site elements
- Exceptional references from other cities and towns
- Excellent quality proposal that met every request from the RFQ

The proposal from DiGiorgio Associates was lacking some of the requested information, such as the original and final design fees from past projects. It was also not well-organized, it exceeded the page limit, and the fee proposal excluded items specifically requested in the RFQ scope of work. The fee also excluded other elements that would be components of a complete engineering design project.

Bayside Engineers were a close second to Weston and Sampson and also submitted a well-organized and thorough proposal. Their project team was determined to be less versatile than Weston and Sampson's, although possessing many of the same skills. References, however, were challenging because two of the four references provided were not able to be reached due to an old phone number and another employee no longer working for the town for which they were listed. The references who were reached gave good reviews of their work, but not nearly to the degree that Weston and Sampson's references spoke highly of their projects.

RECOMMENDATION

Based on the information included herein, the selection committee recommends awarding the design contract to Weston and Sampson Engineers.

RE: **Weston and Sampson Salt Shed Assessment Report**

For your information, the City of Melrose DPW has attached Weston and Sampson's Salt Shed Assessment Report to Order-2020-76 ID#7886 for the previously approved loan for the Department of Public Works' Salt Shed design. This order originally appeared in front of the Council and Appropriations Committee in the spring of 2020.

In summary, the report identifies the current conditions, proposes a variety structures for consideration, presents cost estimates for each of the replacement shed options, proposes value added features that maximize the efficiency of the winter operations, includes photographs of current conditions, provides site plan and zoning maps of the property and surrounding area, and offers recommendations.

The report reinforces the priority that the salt shed be fully replaced and is beyond repair. Weston and Sampson continues to work with the City and the DPW toward the final design in hopes that construction will be complete before the winter of 2021.

Please feel welcome to contact me with any questions you may have.

Thank you for your consideration and continued support.

Appendix D ..... Melrose Zoning Map

Appendix E ..... FEMA Flood Map

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.0 INTRODUCTION

Within the following report, Weston & Sampson provides an assessment of the City's existing salt shed located at 72 Tremont Street, and performs an alternatives analysis that describes and compares the benefits and disadvantages between three different salt shed designs. Weston & Sampson also investigates the possible addition of salt shed accessories that include a portable loading ramp, brine spray system, and lean-to canopy, which all provide potential benefits to the DPW snow fighting operations.

After observing the existing salt shed, it was determined the re-use or renovation of the existing salt shed is not recommended due to the amount and nature of the deficiencies needed to be addressed. Additional details on the Structural Engineer's existing salt shed assessment are provided in the existing conditions memo, found in Appendix A.

The DPW yard is located approximately 200 ft west of Ell Pond and falls within the 100-year flood plain as defined by the most recent FEMA Flood Insurance Rate Map. Since the City may construct a new salt shed to replace the existing salt shed, Weston & Sampson reviewed the applicable regulations regarding the construction of new structures within a flood hazard area, and provides a summary describing how these regulations may affect the replacement of the existing salt shed. The summary of Weston & Sampson's findings can be found in Section 2 of this report.

To date, Weston & Sampson has conducted multiple meetings and site visits with the City and has performed observations, wetland delineation, and site survey at the City Yard. The alternatives selected for analysis herein are based on the information gathered at the Melrose site, along with extensive experience by the Weston & Sampson project team with salt sheds, DPW operations and facility design.

The three salt shed replacement alternatives that were considered include a new gable salt shed, fabric salt shed, and a high arch gambrel style salt shed structure. Each option would meet the property line setbacks and height restrictions for the Rail Corridor Overlay District as described in the Melrose Zoning Ordinance, and as shown on the zoning map found in Appendix D. Summaries and estimated construction costs for each alternative are provided in Section 3 below. The costs that are provided in this report are preliminary concept level estimates and will need to be verified through the ongoing design process and geotechnical evaluation.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

2.0 FLOOD PLAIN ASSESSMENT

The Melrose DPW yard is located at 72 Tremont Street, which is approximately 200 ft West of Ell Pond. The land around Ell Pond is associated with a 100-year flood plain with an elevation of 49.9 ft according to the most recent FEMA Flood Insurance Rate Map dated 2018. A copy of the flood map can be found in Appendix E.

According to the current Massachusetts Building Code, 780 CMR 9th edition, the design and construction of buildings located within flood hazard areas shall be in accordance with ASCE 24-14. ASCE provides minimum elevations for the lowest floor of buildings relative to the base flood elevation corresponding to the flood class design of the building.

Flood Design Class 1 applies to buildings or structures that normally are unoccupied and pose minimal risk to the public or minimal disruption to the community should they be damaged or fail due to flooding. Examples include temporary structures, accessory storage buildings and minor storage facilities. It is Weston & Sampson's opinion that the Melrose salt shed falls under the above definition of a Flood Design Class 1, allowing the new salt shed to match the existing finished floor elevation of approximately 47.75 ft, which is below the 100 year flood elevation of 49.9 ft, provided that the salt shed is constructed from flood damage-resistant materials such as concrete or pressure treated wood. An existing conditions plan showing the location of the existing salt shed relative to the 49.9 ft flood plain elevation can be found in Appendix B.

All three of the following salt shed options are designed with flood damage-resistant materials that meet the requirement for new structures built within flood hazard zones. It is recommended that the city pursues additional measures to address a potential flood, such as the deployment of sandbags or a water-gate flood barrier to provide protection for the salt shed end entrance.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.0 SALT SHED REPLACEMENT COMPARISON

For the replacement of the existing salt shed, three distinctive design options were considered. Below are descriptions and summaries for each option.

3.1 Option 1 - Gable End Salt Shed

The gable end structure is a wood building with a metal roof similar in design to the existing salt shed. The structure would match the 100 ft by 40 ft footprint of the existing salt shed with an overall building height of approximately 30 ft. The front of the shed will have a 16 ft wide by 20 ft tall opening in the front of the shed matching the existing salt shed. The structure includes 6 ft tall pressure treated wood push walls and provides a storage capacity of approximately 1,200 tons of salt when fully loaded. The estimated initial capital costs for this structure is approximately $1,008,600 which includes construction contingency. For a detailed breakdown of the estimated concept level costs see Appendix C. The expected useful life span for this salt shed design is approximately 35 years based on information provided by the salt shed supplier and industry standards.

The gable end salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options, as described below:

Benefits

- Provides a solid wood structure with a metal roof which is more durable than the fabric structure.

Disadvantages

- Roof trusses are more prone to damage by loaders due to low height, which will lead to more maintenance costs associated with the ownership of this style of salt shed throughout the life of the shed. Similar damage can be seen in the existing salt shed.
- The 6 ft tall wood push walls require the building footprint to be larger than the high arch gambrel salt shed to achieve the minimum storage capacity of 1,200 tons of salt.
- Requires the highest initial capital cost.
- Requires salt deliveries to be dumped outside of the salt shed, which requires double handling of the product to load it into the salt shed. This also increases the possibility of residual salt being left behind outside the structure, which can enter the stormwater system.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.2 Option 2 - Fabric Structure

The fabric structure salt shed is made from a galvanized steel frame wrapped in a heavy-duty fabric that sits on top of a 6 ft tall concrete block wall. To provide additional protection from the salt environment, the entire steel framework is galvanized after fabrication, providing a stronger zinc coating that prevents the steel frame from rusting in the corrosive environment of the salt shed. The fabric salt shed would have a 16 ft wide by 20 ft tall opening in the front to match the existing shed. The fabric salt shed would match the 100 ft by 40 ft footprint of the existing shed with an overall height of approximately 31 ft. The fabric salt shed structure would hold approximately 1,200 tons of salt when fully loaded. The estimated initial capital cost for this structure is approximately $705,900. For a detailed breakdown of the estimated conceptual costs see Appendix C. The expected useful life span for steel frame and concrete block wall is approximately 35 years, with periodic replacement of the fabric cover, based on information provided by the salt shed supplier.

The fabric structure salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options:

Benefits

- Lowest initial capital cost.
- Requires less soil excavation because the concrete block walls do not require a full depth foundation.
- The sidewalls are constructed with concrete block walls which are very durable.

Disadvantages

- The steel superstructure is more prone to damage from equipment due to the low height, which will lead to more maintenance costs associated with the ownership of this style of salt shed. Small rips in the salt shed fabric, if gone unnoticed, can lead to extensive damage causing the need for the replacement of the entire fabric cover.
- The fabric cover of the salt shed will need periodic replacement. The manufacturer states that the cover may need to be replaced every 15-20 years if it is not accidentally damaged earlier from DPW operations. The manufacturer estimates that the replacement of the fabric cover would cost around $10,000 which includes materials and labor.
- The 6 ft tall concrete block push walls require the building footprint to be larger than the high arch gambrel salt shed to achieve the minimum storage capacity of 1,200 tons of salt.
- The fabric salt shed could be designed to accommodate solar panels in the future, however every time the fabric cover needs to be replaced the solar panels would need to be taken down to allow the cover to be removed and replaced, which would add additional costs above the $10,000 replacement cost for the fabric cover.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.3 Option 3 - High Arch Gambrel Salt Shed

A high-arch gambrel salt shed is a wood structure with a metal roof provided with 12 ft tall pressure treated wood push walls with an overall building height of approximately 40 ft. The high arch gambrel salt shed would have a footprint of 72 ft by 40 ft, which is approximately 28 ft shorter than the existing salt shed building, with a salt storage capacity of approximately 1,300 tons when fully loaded. The high arch gambrel would provide an interior vertical clearance of 30 ft including a 16 ft wide and 30 ft tall entrance way. The estimated initial capital cost for this structure is approximately $911,800. For a detailed breakdown of the estimated conceptual costs see Appendix C. The expected useful life span for this salt shed design is greater than 35 years, based on information from the salt shed supplier and industry standards.

The high arch gambrel salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options:

Benefits

- The 30 ft interior clearance provided by the high arch gambrel greatly reduces the risk of damage to interior roof trusses, which minimizes the potential for future maintenance due to damage throughout the life span of the structure.
- The 30 ft interior clearance allows salt deliveries to be dumped directly into the salt shed, which would lead to annual savings by eliminating the need for double handling of product, and reduces the potential for salt run-off leaving the site.
- The 12 ft tall push walls allow the structure to store the required 1,200 tons of salt within a much smaller building footprint. The reduced footprint would provide approximately 1,100 square feet of additional yard area that the DPW could allocate for another purpose, which would help alleviate some of the operational constraints that are associated with having a crowded yard area.
- The reduced footprint would allow for the possible addition of a lean-to canopy off the rear of the salt shed, which would provide an additional covered storage area to be utilized by the DPW. The addition of the rear lean-to is estimated to cost approximately $65,000.

Disadvantages

- The high arch gambrel salt shed would require a more expensive initial capital cost compared to the fabric structure.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4.0 SALT SHED ASSESSORIES

4.1 Brine Spray System - $50,200

In discussions with the DPW, a product called Magic Minus Zero is used to treat the salt stored in the salt shed. Treating the salt with this product allows the DPW to reduce the amount of salt applied to the roads during a snow storm, as this product allows the salt to stay on the road better by reducing bounce and scatter. The product also helps to melt the ice at lower temperatures. The addition of a brine spray system would reduce the amount of time it takes to treat the salt with the Magic Minus product.

4.2 Portable Loading Ramp - $52,700

Loading ramps allow operators to see into the back of plow trucks, allowing them to load salt more accurately into the sander bodies, reducing the potential for losing salt during the loading process.

Currently the Melrose DPW yard does not have a loading ramp. Due to the tight working areas on the site, it does not make sense to install a permanent loading ramp, as it would not be used during the non-snow fighting season and would take up valuable space. Weston & Sampson investigated the possibility of providing a portable loading ramp that could be installed at the beginning of the snow fighting season and taken down during the rest of the year. A possible solution was found in a product sold by Nation Ramps, as shown in the picture to the right. The addition of this ramp would be beneficial to the salt loading operations performed by the DPW.

4.3 Lean-to Canopy - $65,100

With the high arch gambrel option there is the possibility to install a rear facing lean-to canopy like what is shown in the picture on the right. The addition of the canopy would allow the additional space, provided by the reduced footprint of the high arch gambrel, to be under a roof that would provide protection from the elements for equipment or materials.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

5.0 CONCLUSION

After analyzing and discussing the various salt shed replacement options with the DPW, it is recommended that the City replace the existing salt shed with a high-arch gambrel style salt shed, as this design provides the most benefits for the City and DPW operations. This design requires the least amount of maintenance, reduces operational costs, and provides additional yard space which allows flexibility for the use and operation of the DPW yard. The estimated total base project cost for the high arch gambrel salt shed is approximately $986,800, excluding the addition of a portable loading ramp, brine spray system, and a rear canopy lean-too. This cost includes the approximate $911,800 construction cost mentioned above, along with additional design, construction administration services, and contingency as detailed in Appendix C. The additional design costs would only apply if ground improvements are required on the site. During our site walk it was mentioned that the facility was built over a buried peat layer associated with former wetlands in the area, which would require the design and installation of ground improvements, such as rammed aggregate piers. This will be verified during the geotechnical investigation. For early planning purposes, an allowance for a ground improvement program is included in the concept level cost estimates for all structures.

In addition to the salt shed structure itself, the additional options discussed above should be considered to optimize operations. The loading ramp would provide better visibility to the loader operator, minimizing the potential for losing salt while transferring into the back of plow trucks. The brine spray system would allow the City to mix the Magic Minus Plus product with the salt more efficiently, saving on operational costs. The lean-to canopy would allow the DPW to store additional equipment under cover, which provides protection from the weather for equipment currently stored outdoors. With the addition of these recommended accessories, the total estimated project cost would be approximately $1,154,700, which is in addition to the design cost already allocated. (see Appendix C for more details).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

APPENDIX A

Existing Salt Shed Assessment Memo

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

November 13, 2020

Jamie Fair, P.E.
Facilities Senior Team Leader
55 Walker Brook Drive, Reading, MA

Dear Jamie,

The Melrose DPW Salt Shed is a timber framed structure with timber columns, walls, and prefabricated trusses. The building is approximately 40ft Wide by 100ft Long and approximately 30ft High. The structure was built in 1974 and is used is to store and treat salt. The structure appears to have gone through a number of repairs throughout its lifetime. The following structural deficiencies were identified.

1. Damaged Metal Roofing (A number of holes leading to water intrusion)
2. Damaged Louvers at front and rear of the building
3. Checking/splitting in timber siding, holes in siding
4. Painted timber siding is peeling/chipping
5. Bowing of timber siding at base of walls
6. Trim at roof level is deteriorating or missing (Some trim has been replaced)
7. Corrosion in steel connections at that joining the timber columns to the foundation
8. Minor spalling in concrete foundations
9. Damaged prefabricated timber trusses (Some chords of the trusses have been sistered)
10. Damaged/missing truss bracing
11. Timber push wall are significantly deteriorated
12. Rotting/abrasion damage to interior wall panels
13. Abrasion damage to exterior kickers
14. Entire backwall of building is bowing and/or had completely failed.
15. Damaged exterior lights
16. Damaged Lintel at front of building

The list above outlines structural items that should be addressed as soon as practical and the trusses and bracing shall be investigated further as this is potentially a hazardous condition. Note that the evaluation is based on visual observation from the ground level. No structural calculations were performed. Photos outlining some of these deficiencies are attached below. Considering the amount and nature of the deficiencies, it is our recommendation to completely replace the structure in lieu of trying to repair/address all these issues. We recommend follow-up site visits by a design professional every three to six months to monitor deterioration.

Please reach out with any questions, westernc@wseinc.com, 508-698-3034 x7427.

Thanks,

Connor Western, P.E.
Senior Project Engineer

Total Design, Permitting, Special Services, Const. Admin.	$	65,000	

Owners Contingency	$	10,000	Additional funding for testing/engineering/permitting services, if needed

Total Project Cost	**$**	**1,083,578**	**See assumptions below**

Including Brine Spray System	**$**	**1,133,778**
Including loading ramp	**$**	**1,136,288**
Including both Spray System and Loading Ramp	**$**	**1,186,488**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 6' tall pressure treated heavy duty timber framed salt shed side walls.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed will occupy the footprint of the existing salt shed, and will be a gable end structure, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. Assumes no additional measures are required to protect salt shed from 100 year flood

Melrose Salt Shed Conceptual Total Project Cost Estimate
11/20/2020
New Fabric Salt Shed - 6' Tall Concrete Block Push Walls
(40' x 100' / 4000 SF , Stores Approx. 1,200 Tons of Salt Completely Full)

CONSTRUCTION			
Item		**Cost**	**Source**
SALT SHED BUILDING COSTS			
Salt Shed Structure	$	190,000	Estimate provided by Iron Horse Structure
Salt Shed Building Sub Total	$	190,000	
ADDITIONAL CONSTRUCTION COSTS			
Demo Existing Salt Shed	$	28,000	Shrewsbury Bid results
Soil Disposal Allowance	$	47,100	Assumes soil disposed at off site as daily cover at landfill, not contaminated
Dewatering	$	-	Not required based on not having to dig foundations
Additional site development/grading allowance	$	20,000	Allowance
Subbase Preparation	$	10,000	From Raynham
Pavement	$	30,000	Assumes 9,000 sqft of paving, 5-inches thick (3" base, 2" top), $110 per tor
Gravel Borrow	$	14,000	Assumes 14-inches beneath pavement at 35$ CY
Ground Improvements	$	120,000	Shrewsbury Bid results
Electrical Work (FSB)	$	24,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	293,100	
Subtotal Construction Cost	$	483,100	
MARK UPS			
Bonds & Insurance	$	12,899	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	27,585	Assume 5.71% (based from Raynham
Contractor Overhead and Profit	$	53,141	Assume 11% (based from Raynham)
Design and Estimating Contingency 10%	$	48,310	Allowance to account for items that may come up during design
ENR Adjusted 1.51% (October 2020 - April 2021)	$	9,438	One year of inflation estimate
Subtotal of Mark Ups	$	151,373	
Subtotal Construction Cost with Mark Ups	$	634,473	Excludes Construction Contingency
10% Construction Contingency	$	63,447	Allowance for unexpected items that may come up during construction
Electrical Back Charge By Power Company	$	8,000	(if needed)
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**705,920**	**Includes Contingency and Back Charge**

Add Brine Spray System			
Ceiling Mounted Brine Spray System	$	40,000	Allowance based on quoted from GVM Calcote
Project mark up (25.5%)	$	10,200	
Total for Brine system	$	50,200	

Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (25.5%)	$	10,710	
Total for Loading Ramp	$	52,710	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Construction Admin	$	36,000	Allowance (excludes ground improvements and soil contamination issues)
Geotechnical Ground Improvements Design and Construction Services	$	24,000	Allowance
Brine System Ceiling Spray Design	$	5,000	Allowance
Total Design, Permitting, Special Services, Const. Admin.	$	65,000	

Owners Contingency	$	10,000	Additional funding for testing/engineering/permitting services, if needed

Total Project Cost	**$**	**780,920**	**See assumptions below**

Including the Brine Spray System	**$**	**831,120**
Including the loading Ramp	**$**	**833,630**
Including both the Brine Spray System and Loading ramp	**$**	**883,830**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, lights and electrical FSB work (filed sub bid contractor)
4. Assumes 12' tall pressure treated heavy duty timber framed salt shed side walls and cast in-place concrete front wall; approx. 30' clearance at end entrance to allow salt trailers to exit with trailer in and allows dumping of salt deliveries inside the salt shed.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed be located in same location as the existing salt shed, and will be a fabric style salt shed, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
11. Assumes no additional measures are required to protect salt shed from 100 year flooc

Design and Estimating Contingency 10%	$	62,560	Allowance to account for items that may come up during design
ENR Adjusted 1.51% (October 2020 - April 2021)	$	12,222	One year of inflation estimate
Subtotal of Mark Ups	$	196,023	
Subtotal Construction Cost with Mark Ups	$	821,623	Excludes Construction Contingency
10% Construction Contingency	$	82,162	Allowance for unexpected items that may come up during construction
Electrical Back Charge By Power Company	$	8,000	(if needed)
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**911,786**	**Includes Contingency and Back Charge**

Add Brine Spray System			
Ceiling Mounted Brine Spray System	$	40,000	Allowance based on quoted from GVM Calcote
Project mark up (25.5%)	$	10,200	
Total for Brine System	$	50,200	

Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (25.5%)	$	10,710	
Total for Loading Ramp	$	52,710	

Add Lean-to off Rear of Canopy			
Rear canopy	$	65,050	Base on Raynham Bid results (includes GC mark up, metal roof, inflation and electrical)
Total for Canopy	$	65,050	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Construction Admin	$	36,000	Allowance (excludes ground improvements and soil contamination issues)
Geotechnical Ground Improvements Design and Construction Services	$	24,000	Allowance
Brine System Ceiling Spray Design	$	5,000	Allowance
Total Design, Permitting, Special Services, Const. Admin.	$	65,000	

Owners Contingency	$	10,000	for additional testing/engineering/environmental services if needed

Total Project Cost	**$**	**986,786**	**See assumptions below (excludes Brine system, loading ramp and canopy)**

Including Brine Spray System	**$**	**1,036,986**
Including loading ramp	**$**	**1,039,496**
Including Lean-to canopy	**$**	**1,051,836**
Including Spray System, Loading Ramp and Canopy	**$**	**1,154,696**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 12' tall pressure treated heavy duty timber framed salt shed side walls , approx. 30' clearance at end entrance to allow salt trailers to exit with trailer in up position and allows dumping of salt deliveries inside the salt shed.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed will occupy the footprint of the existing salt shed, and will be high arch gambrel style, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. Assumes no additional measures are required to protect salt shed from 100 year flood

Excerpt from Melrose Zoning Ordinance

(7) Building and structure height.

(a) The maximum permitted height for buildings and structures in an RCOD project shall be four stories and 50 feet, except as follows:

[1] Buildings may be permitted up to five stories and 62 feet in height at the Planning Board's discretion, when appropriate, given site constraints and/or unusual site characteristics and provided that all portions of the building above 50 feet are set back at least 20 feet from all property boundaries and shall be stepped back a minimum of 10 feet from each facade of the floor below, except for those facades which face the commuter rail right-of-way where no upper level step back is required.

[2] Rail Corridor Overlay District projects that exceed four stories and 50 feet in height shall provide additional public amenities in excess of the minimum 10% open space requirement for the RCOD. In the additional public amenity area, projects shall incorporate a courtyard or sitting area that adjoins and is open on one or more sides to the public sidewalk; is open to the public; contains pedestrian amenities such as seating; and is landscaped/ hardscaped to create a separation from the street, to provide shade, to reduce noise, and to mitigate fumes.

TABLE OF DIMENSIONAL AND DENSITY REGULATIONS

Notes:
1. One side only for side-by-side two-family dwelling units; outside only for semi-detached row unit.
2. Where off-street parking spaces required by Article VIII of this ordinance are located underground and under the building served by the parking, the maximum building coverage may be increased above the percentage limit set forth in this table. This increase shall represent an increase in building area up to the area of the parking spaces which are put underground.
3. For mixed uses, the minimum lot area shall be increased by 1,000 sq.ft. for each dwelling unit.
4. The maximum front yard shall be 5 feet.

Melrose Salt Shed Conceptual Total Project Cost Estimate
5/7/2021
New Fabric Salt Shed - 6' Tall Concrete Block Push Walls
(40' x 100' / 4000 SF , Stores Approx. 1,200 Tons of Salt Completely Full)

CONSTRUCTION			
Item		**Cost**	**Source**
SALT SHED BUILDING COSTS			
Salt Shed Structure	$	209,000	Estimate provided by Iron Horse Structure
Salt Shed Building Sub Total	$	209,000	
ADDITIONAL CONSTRUCTION COSTS			
Demo Existing Salt Shed	$	23,000	Based on quote provided by RSG Contracting on 1/6/21
Soil Disposal Allowance	$	130,000	Assumes contaminated soil disposed at out of state landfill
Dewatering	$	-	Not required based on not having to dig foundations
Additional site development/grading allowance	$	25,000	Allowance
Excavation and Backfill Foundations	$	-	Foundations not required
Subbase Preparation	$	15,000	From Raynham
Pavement	$	27,000	Assumes 7,900 sqft of paving, 5-inches thick (3" base, 2" top), $110 per ton
Dust Monitoring	$	45,000	Allowance
Dense Grade Crushed Stone	$	18,000	Assumes 12-inches beneath pavement at 50$ CY
Ground Improvements	$	161,000	Budgetary estimate from ground improvement contractor
Floodgate at Salt Shed Entrance	$	20,000	Includes material, freight, concrete strip and installation
Electrical Work (FSB)	$	28,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	492,000	
Subtotal Construction Cost	$	701,000	
MARK UPS			
Bonds & Insurance	$	18,717	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	41,096	Assume 5.71% (based from Raynham)
Contractor Overhead and Profit	$	83,689	Assume 11% (based from Raynham)
ENR Adjusted 1.51% (October 2020 - May 2021)	$	12,752	One year of inflation estimate
Subtotal of Mark Ups	$	156,254	
Subtotal Construction Cost with Mark Ups	$	857,254	Excludes Construction Contingency
10% Construction Contingency	$	85,725	Allowance for unexpected items that may come up during construction
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**942,979**	**Includes Contingency**

Add Brine System			
Brine System	$	30,000	Allowance based on quoted from GVM Calcote
Project mark up (19.3%)	$	5,790	
Total for Brine system	$	35,790	
Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (19.3%)	$	8,106	
Total for Loading Ramp	$	50,106

2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 6' tall pressure treated heavy duty timber framed salt shed side walls.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed will occupy the footprint of the existing salt shed, and will be a gable end structure, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. Assumes no additional measures are required to protect salt shed from 100 year flood

Melrose Salt Shed Conceptual Total Project Cost Estimate
5/7/2021
New High Arch Gambrel - 12ft Tall Wood Walls
(40' x 72' / 2880 SF , Stores Approx. 1,300 Tons of Salt)

CONSTRUCTION			
Item		**Cost**	**Source**
SALT SHED BUILDING COSTS			
Concrete Foundations	$	30,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Wall Panel & Bracing	$	116,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Updated siding	$	20,000	Estimate from salt shed developer
Electrical panel roof	$	3,000	Allowance
Trusses	$	105,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Plywood Roof	$	19,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Trim	$	9,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Paint	$	12,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Metal Roof (FSB)	$	77,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Salt Shed Building Sub Total	$	391,000	
ADDITIONAL CONSTRUCTION COSTS			
Demo Existing Salt Shed	$	23,000	Based on quote provided by RSG Contracting on 1/6/21
Soil Disposal Allowance	$	141,000	Assumes contaminated soil disposed at out of state landfill
Dewatering	$	15,000	Allowance, groundwater contaminated
Additional site development/grading allowance	$	25,000	Allowance
Excavation and backfill of foundations	$	30,000	From Raynham
Subbase preparation	$	15,000	From Raynham
Pavement	$	27,000	Assumes 7,900 sqft of paving, 5-inches thick (3" base, 2" top), $110 per ton
Dust Monitoring	$	45,000	Allowance
Dense grade crushed stone base material	$	18,000	Assumes 12-inches beneath pavement at 50$ CY
Ground Improvements	$	161,000	Budgetary estimate from ground improvement contractor
Floodgate at Salt shed Entrance	$	20,000	Includes material, freight, concrete strip and installation
Electrical Work (FSB)	$	28,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	548,000	
Subtotal Construction Cost	$	939,000	
MARK UPS			
Bonds & Insurance	$	25,071	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	55,048	Assume 5.71% (based from Raynham)
Contractor Overhead and Profit	$	112,103	Assume 11% (based from Raynham)
ENR Adjusted 1.51% (October 2020 - May 2021)	$	17,081	One year of inflation estimate
Subtotal of Mark Ups	$	209,304	
Subtotal Construction Cost with Mark Ups	$	1,148,304	Excludes Construction Contingency
10% Construction Contingency	$	114,830	Allowance for unexpected items that may come up during construction
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**1,263,135**	**Includes Contingency**

Add Lean-to off Rear of Canopy			
Rear canopy	$	72,000	Base on Raynham Bid results (includes GC mark up, metal roof, inflation and electrical)
Total for Canopy	$	72,000	
Add Brine System			
Brine System	$	30,000	Allowance based on quoted from GVM Calcote
Project mark up (19.3%)	$	5,790	
Total for Brine System	$	35,790	
Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (19.3%)	$	8,106	
Total for Loading Ramp	$	50,106	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Additional Design Fees #1	$	15,300	Amendment #1 (2/6/21)
Additional Environmental Scope	$	30,750	Amendment #2 (3/15/21)
Construction Administration	$	36,000	Part of Amendment #3
Environmental Construction Services	$	40,000	Part of Amendment #3
Geotechnical Ground Improvements Construction Services	$	23,100	Part of Amendment #3
Total Design, Permitting, Special Services, Const. Admin.	$	145,150	

Total Project Cost	**$**	**1,408,285**	**Includes total Construction & Design Costs and Owners Contingency (excludes Brine system, loading ramp and canopy)**
Add Brine System	$	1,444,075	
Add Brine Spray System & Loading Ramp	$	1,494,181	
Add Brine System, Loading Ramp and Canopy	**$**	**1,566,181**	

Construction Market Uncertainties Due to Covid (15%)	$	172,246	
TOTAL ADJUSTED PROJECT COST	**$**	**1,738,427**	**Includes all bid alternates and market adjustment due to covid**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 12' tall pressure treated heavy duty timber framed salt shed side walls , approx. 30' clearance at end entrance to allow salt trailers to exit with trailer in up position and allows dumping of salt deliveries inside the salt shed.
5. New salt shed will occupy the footprint of the existing salt shed, and will be high arch gambrel style, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. excluded $98,918 orginal contract

MEMORANDUM

Date: June 2, 2021

To: Melrose City Council

From: Elena Proakis Ellis, P.E., Director of Public Works
Patrick Dello Russo, CFO/Auditor

Subject: Updated Salt Shed Funding Request

In May of 2020, the Melrose City Council approved a $100,000 loan order for the design of a replacement salt shed at the City Yard. Over the past several months, the City has worked with Weston and Sampson and has moved forward with an approved design and has received bids for the replacement building. As part of the design process, soil samples revealed additional work required to be added to the scope of the replacement. We have also experienced skyrocketing costs that have been associated with the COVID pandemic, limited supply, and increased demand. None of these factors have lessened the need to replace the salt shed as a top priority for the DPW or the City. After another difficult winter, the condition of the salt shed has deteriorated, which compromises our ability to deliver snow emergency operations and to make our streets safe for travel during winter storms.

Weston and Sampson provided cost estimates that included a "COVID factor" and a reasonable contingency for the approved high arch gambrel style building. The low bidder, Construction Dynamics, Inc., submitted a bid of $1,436,000, which is in line with the most recent construction cost estimate provided by the engineers. When adding construction administration services, along with a construction contingency to the bid, the bonding request of $1.65M is reasonable to cover the cost of the project and any unanticipated costs that may arise as the project unfolds. This is in addition to the already approved $100,000 design cost, for a total bond of $1.75M.

Understanding the magnitude of this project, we have worked with Weston and Sampson on alternatives that would minimize the effect of all factors that have contributed to the additional costs and scope. We are confident that this design and decision offers the most value to the DPW, to the City, and most importantly to the residents. There is an aggressive construction schedule that allows for this to be completed before the beginning of the 2021-2022 winter season and will allow us to continue to deliver the same level of services during the winter months.

Please feel welcome to contact me with any questions you may have on this matter. Thank you for your consideration and continued support.

The new fabric building in Lake County, Ohio is 73 feet by 120 feet with a 4,000-ton salt storage capacity. (Photo provided)

Insights into a successful salt storage project

James Gills P.E., P.S., Lake County Engineer and Traci Salkiewicz, P.E., Chief Deputy Engineer (Photo provided)

Article submitted by Greystone Construction

Lake County, Ohio, engineer James Gills needed to replace an old, deteriorating salt dome.

"We had a teepee-shaped structure built in the mid-70s, and it only had a 900-ton road salt storage capacity. Lake County is in the strongest part of Ohio's snowbelt, and we experience significant snowfalls leading to a high demand for salt, so much so that we were having trouble obtaining salt throughout the winter season. We needed to build something new with a much higher salt storage capacity."

Gills had another challenge — poor soil conditions.

"We had soils borings done and it was determined that our soils were so bad it was recommended we dig out 8 to 10 feet of material and backfill with stone to accommodate a heavy structure similar to the teepee we were replacing. A fix like that is very, very expensive."

Gills researched all the options and noticed construction of fabric buildings in the region consisting of steel trusses covered in a tensioned membrane cover. Gills was attracted to fabric structures for several reasons.

"With the teepee structure, Lake County paid extra to have salt blown into the teepee. A large fabric structure not only costs less per square foot allowing for a much larger storage capacity on a budget, but would allow us to safely back in a truck, dump, and stack the salt."

Gills analyzed fabric building designs and layout to determine which would work best given his poor soil conditions.

"Greystone Construction had a solution for our poor soils. Greystone's method of installing the structure on independent concrete pads and piers provided an engineered solution which minimized the amount of expensive soil corrections required."

Gills purchased the Britespan fabric building materials from Greystone Construction and Britespan Building Systems through Sourcewell, a cooperative service purchasing program used by government entities across the country.

"Time is money and we saved a lot of both using the Sourcewell process and avoided the lengthy public bidding process that could have added six weeks to our timeline."

The Greystone Construction crew completed the concrete piers in three days. After a concrete cure period, the Greystone crew returned and installed a 73-foot-by-120-foot facility on top of the piers in just five days. Eight-foot high panels were placed continuously along three sides of the building interior to contain the salt.

"Our new fabric building facility holds 4,000 tons of salt. Combine that with the storage available at other facilities in Lake County and we have enough salt stored to last an entire winter."

"The Greystone team was great and so quick that I would absolutely work with Greystone again and have recommended them to others."

Best practices for designing and building safe, efficient and long lasting salt and sand storage buildings

Greystone has built thousands of fabric buildings across the U.S. and is an industry expert having built more than 1.5 million square feet of salt storage. Greystone Vice President Colin O'Brien shares best practices to ensure a successful project.

Building design to meet local load requirements

Any building needs to be designed to meet local wind, snow, seismic and unbalanced snow loads. Fabric buildings are no different. A structurally sound building must follow current International Building Codes (IBC) for safety and insurability.

"Greystone engineers its buildings to meet current local IBC load requirements. However, whatever manufacturer or general contractor you work with, make sure they are engineering your building properly for your site specific location."

Capacity Requirements

Greystone knows the density and angle of repose of deicing salt — factoring this in with a customer's storage capacity requirements and available footprint, their estimating team calculates the most economical building width and length.

"Fabric buildings can easily be expanded so in the future, when a customer requires greater storage capacity, Greystone can easily add additional building length."

Independent Foundations and Panels

"The Lake County building uses this design combining independent foundations engineered to carry building loads and pre-cast walls designed to carry commodity loads. This is often times more economical than cast-in-place poured walls designed to carry both building and commodity loads."

"This building design is also excellent to reduce corrosion because it keeps salt away from the steel trusses and base plates. It also creates the greatest possible air movement throughout the building."

Reducing Risk of Corrosive Damage

Salt is a highly corrosive material and storing it properly is critical to maintain the integrity of a fabric building's steel frames and components.

"We recommend any time building steel is cut or welded it be hot-dip galvanized after production. This treatment achieves a much thicker and harder protective surface than in-line galvanizing. It also ensures that the steel trusses are coated both inside and outside after welding is completed. We also recommend a corrosion inhibitor in any concrete containment panels."

Ventilation

Proper ventilation is key in reducing corrosion. "In the absence of moisture, corrosive materials would have little to no corrosive effect. You want air movement in your salt storage building to greatly reduce any condensation — this helps to prevent corrosion on everything in and around the building."

Sufficient Clearance

Adequate clear height is a critical factor to ensure maximum storage capacity. More importantly, sufficient clearance is necessary for safe maneuverability of trucks and dumping equipment.

"Proper building clearance is important to reduce the possibility of costly damages to the building from equipment use."

Greystone Construction's experts are ready to assist with your salt, sand and equipment storage needs. Call 1 (888) 742-6837 for a free consultation and quote. Visit www.GreystoneConstruction.com to learn more.

SALT & SAND STORAGE EXPERTS

We've erected 1300+ fabric buildings across the United States and are trusted by DOT, municipalities and private firms.

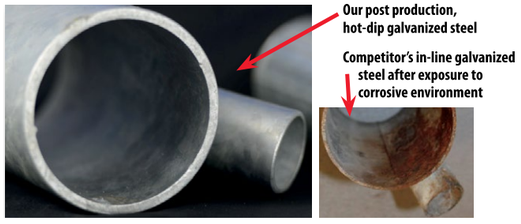
Need to write bid specifications? Call 1-888-742-6837 and a salt storage expert will assist you.



Greystone Construction is a general contractor delivering high quality construction since 1987.

We serve customers across the United States. In addition to the salt and sand storage market, other markets we serve include retail, commercial, office, financial, health care, senior housing, hospitality, industrial, warehousing, manufacturing, and more.

The Greystone Advantage

- Turnkey solution – we have 32 years of design-build and general construction experience
- Engineered to meet your site specificl wind, snow and unbalanced snow loads
- Customizable features including end walls, doors, foundations, etc.
- Quick installation saves you time and money
- Storage from 100 tons to 100,000+ tons – a variety of heights and widths available
- Superior corrosion resistance with post production, hot-dip galvanization

Superior corrosion resistance with post production, hot-dip galvanization

Salt is highly corrosivie and can compromise the integrity of steel components. Our frames and welded components receive a hot-dipped galvanized finish *after* fabrication to ensure a complete zinc coating both inside and out. No welding is done after zinc coating is applied. Some competitors cut corners and do not hot-dip galvanized welded components.

> "Why would we recommend Greystone? From initial project development through construction, Greystone was excellent to work with. They delivered a top notch facility that will serve Nicollet County for many years."
>

Re: Budget Proposal – Melrose, MA Storage Building

Ms. Proakis,

Thank you for the opportunity to provide a budget proposal to furnish and install a salt storage building in Melrose, MA. A few of the advantages the Greystone team brings to the project include:

- **Design-Build Experience** – Greystone has offered design-build and general construction services for 35 years.
- **Fabric Building Expertise** – Greystone has sold and installed fabric buildings for over 20 years. We've successfully completed thousands of fabric building projects.
- **Engineered Fabric Building** – Fabric building will be designed to meet site-specific load requirements including wind, snow and unbalanced loads.
- **Hot Dipped Galvanized Steel** – Fabric building frames are hot dip galvanized post production, after all cutting and welding complete
- **Self-Performed Work** – Greystone has the capability to self-perform the concrete and building installation with our own crews. Often times this allows us to provide the most competitive pricing, maintain quality and hold schedule.

Let us know if you have any questions. We look forward to discussing our next steps.

Sincerely,

Colin R. OBrien

Colin O'Brien
VP of Business Development / Principal

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GREYSTONE
CONSTRUCTION

Scope of Work & Pricing

to be performed by Greystone Construction

Furnish & Install Budget Price:

- 65’ x 64’ Britespan Apex L14 Series Building
- Truss spacing 16’ on center
- 12.5 ounce, 23 mil polyethylene Non-FR fabric
  - Single piece cover design
- Building designed per ASCE7-10 (IBC 2015)
  - Fabric type: ASTM E-84 (NON-FR)
  - Occupancy category: CAT 1 (LOW HAZARD)
  - Ground snow load: 40 lbs.
  - Wind Load: 117 MPH wind
  - Wind Exposure: C
  - Site conditions: Ce = 0.9 Exposed
  - Collateral Load: 0
  - No sprinklers
  - No conveyor loads
  - Seismic Design Category: B
  - Stamped engineered building drawings included
- (2) Fabric end walls with steel framing with two 3’x3’ mesh vent in back end
- (1) 16’ wide x 30’ tall framed opening
- Hot dipped galvanized bolt and purlin upgrades
- Building to be installed on concrete pad and pier foundations. Piers to extend 2’ above grade on three sides.
  - Engineered foundation drawings
  - Assumes existing soils has minimum bearing capacity of 2,500 PSF
- Approximately 192 lineal feet of 8’ tall pre-cast concrete bunker “L” panels with corrosion inhibiter
- Hot dipped galvanized anchor bolts
- Freight allowance of $2,540 included
  - Contract will be updated to reflect actual freight amount at time of shipment
- Provide all necessary labor and equipment to complete items noted above
- **Approx. 1,385 tons of salt storage capacity**
  - **32 degree angle of repose**
  - **80 lbs/cubic foot product weight**

Furnish & Install Budget Price: $229,750

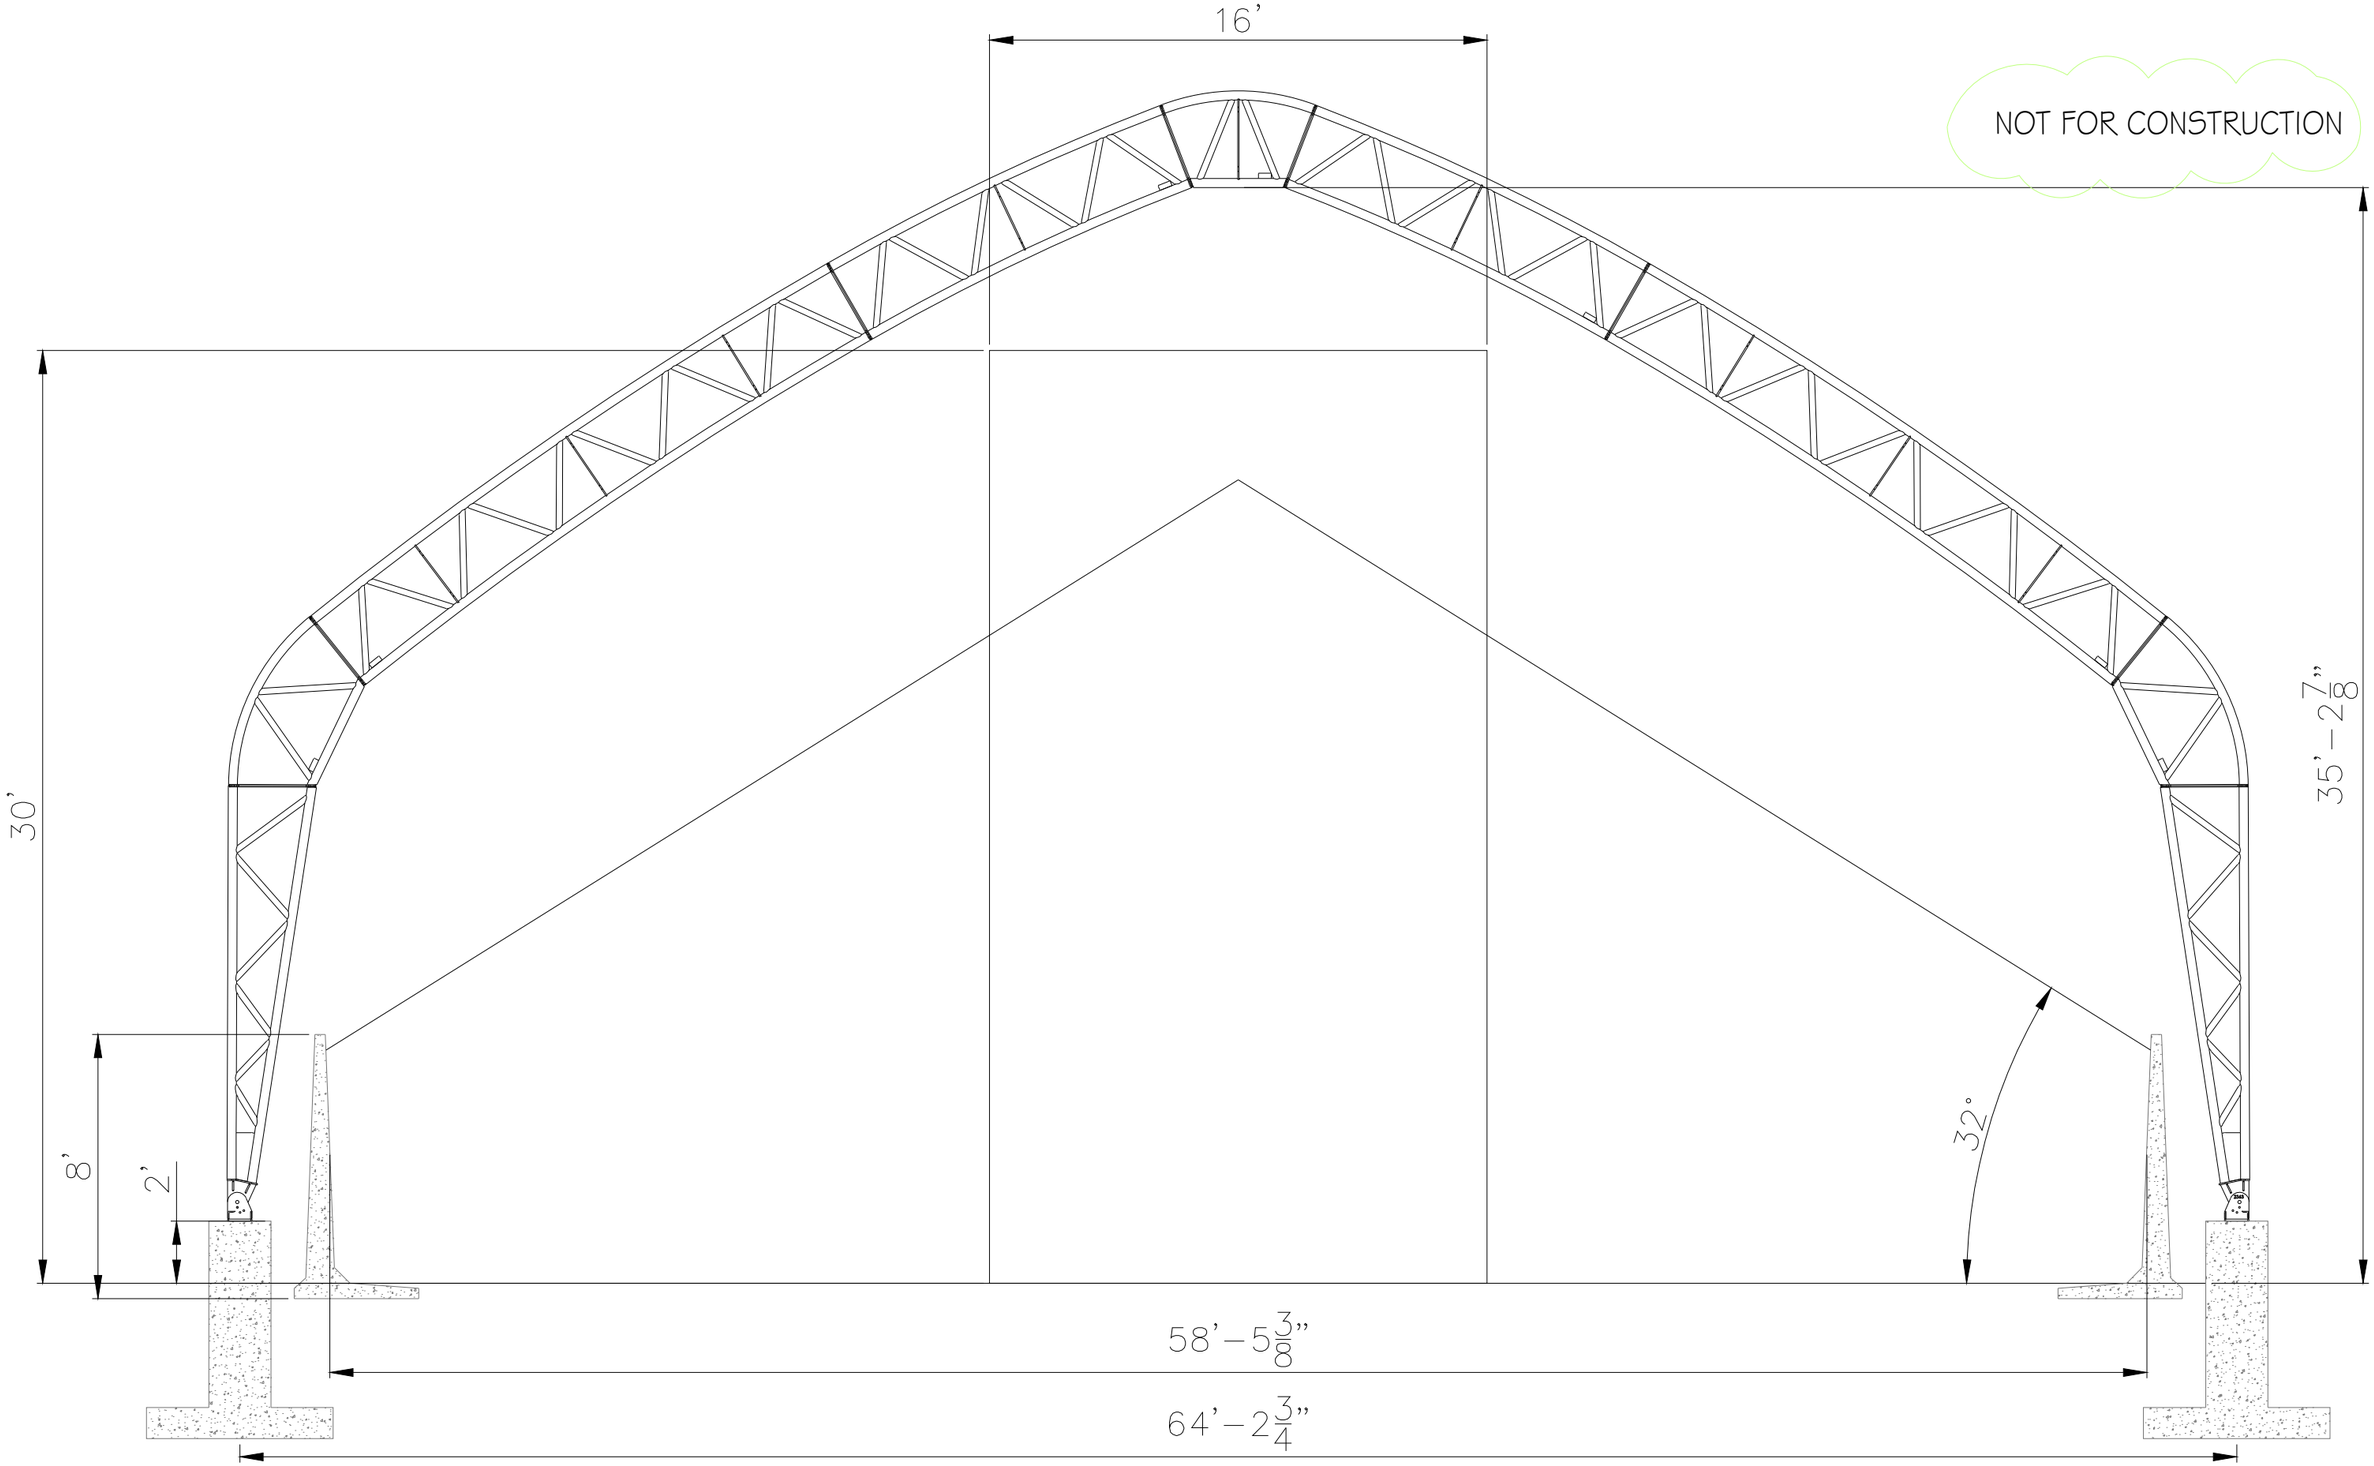
See exclusions on last page

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GREYSTONE
CONSTRUCTION

Market Provisions:

- Greystone is committed to being your trusted team partner on your project. We are asking all of our clients recognize the volatility of our markets and understand we are providing current pricing for budgeting purposes with the need to adjust final project pricing based on the markets at the actual time of the order. It's important to provide you with the best value for your project, and we do not want to speculate where the actual market rates will be at the time of procurement and/or delivery.
- Pricing is based on current market conditions and does not include future tariffs, surcharges, price escalation, or fees. (i.e., many wholesalers and manufacturers are not committing to pre-determined pricing for pre-ordered materials. These materials are priced at the time of the delivery.) Due to extremely volatile markets, pricing shall be re-evaluated at time of procurement and/or delivery. Any savings or additional cost would be communicated with Owner prior to procurement and/or delivery.
- Price increases will be assigned as contingency. Unless Greystone specifically outlines a contingency value in our proposal or scope of work, it is recommended that the Owner carry a contingency.
- Construction schedule may be affected by material shortages or lead times beyond our control. Any shortages or lead time issues will be communicated with the owner. Evaluation of alternatives will be reviewed, and the contract schedule or costs may be adjusted accordingly.
- Pandemic protocols enacted by the owner's requirements or federal/state/local jurisdictions following the execution of the construction contract may result in additional costs and schedule extensions to the contract. These may include but not limited to: employee testing, travel time for testing, temporary enclosures/facilities to isolate work forces, staffing shortages and subcontractor reselection if the current subcontractor cannot staff the project due to labor shortages as a result of newly enacted protocols.
- Unless noted otherwise proposal pricing is valid for 15 days



Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GREYSTONE
CONSTRUCTION

Exclusions – Items not included, but may apply to overall project:

- Architectural and Civil Engineering
- Permits & Fees
- Prevailing wage rates and Union labor
- Payment and performance bonds
- Cat II occupancy and FR Fabric
- Sales tax on materials
- Alternate foundation design if proposed design isn't suitable for existing site
- Testing & special inspections by owner – Soil borings, soils testing, concrete testing, bolt inspection, etc
- Site work including, but not limited to: soil corrections, granular base material under floor and bunker panels, excavation and backfill, site prep, import or export of materials, dewatering, etc
- Assumed building has 50' clear on all four sides for staging/erection and building engineering requirements
- Site specific safety requirements
- Bituminous paving or concrete – interior and exterior slabs and aprons
- Exterior aprons & stoops at doors
- Geotextile liner under building
- Doors – Overhead & personnel
- Insulation, interior liner panel or stainless steel cables
- All electrical & mechanical systems
- All winter conditions

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GENERAL NOTES

1. TOPOGRAPHICAL INFORMATION BASED UPON SURVEY PERFORMED BY WESTON & SAMPSON IN OCTOBER 2020.
2. REFER TO EXISTING CONDITIONS FOR SURVEY LEGEND. ALL BIDDERS ARE REQUIRED TO INSPECT THE PROJECT SITE IN ITS ENTIRETY PRIOR TO SUBMITTING THEIR BID, AND BECOME FAMILIAR WITH ALL CONDITIONS AS THEY MAY AFFECT THEIR BID. CONTRACTOR AND SUB-CONTRACTORS SHALL BE FAMILIAR WITH ALL DRAWINGS AND SPECIFICATIONS PRIOR TO COMMENCING THE CONSTRUCTION.
3. LOCATIONS OF ANY UTILITIES SHOWN ON THESE PLANS ARE APPROXIMATE ONLY. CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE LOCATION OF SUCH UTILITIES, PROTECTING ALL EXISTING UTILITIES AND REPAIRING ANY DAMAGE DONE DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL ON-SITE COORDINATION WITH UTILITY COMPANIES AND PUBLIC AGENCIES AND FOR OBTAINING ALL REQUIRED PERMITS AND PAYING ALL REQUIRED FEES. IN ACCORDANCE WITH M.G.L. CHAPTER 82, SECTION 40, INCLUDING AMENDMENTS, CONTRACTORS SHALL NOTIFY ALL UTILITY COMPANIES AND OWNER IN WRITING PRIOR TO EXCAVATION.
4. WHERE AN EXISTING UTILITY IS FOUND TO CONFLICT WITH THE PROPOSED WORK, THE LOCATION, ELEVATION AND SIZE OF THE UTILITY SHALL BE ACCURATELY DETERMINED WITHOUT DELAY BY THE CONTRACTOR AND THE INFORMATION FURNISHED TO THE ENGINEER FOR RESOLUTION OF THE CONFLICT.
5. CONTRACTOR SHALL BE RESPONSIBLE FOR REVIEWING ALL DRAWINGS AND SPECIFICATIONS TO DETERMINE THE EXTENT OF EXCAVATION AND DEMOLITION REQUIRED TO RECEIVE SITE IMPROVEMENTS.
6. ANY DISCREPANCIES OR CONFLICTS BETWEEN THE DRAWINGS AND EXISTING CONDITIONS, EXISTING CONDITIONS TO REMAIN, TEMPORARY CONSTRUCTION, PERMANENT CONSTRUCTION AND WORK OF ADJACENT CONTRACTS SHALL BE BROUGHT TO THE ATTENTION OF THE OWNER BEFORE PROCEEDING. ITEMS ENCOUNTERED IN AREAS OF EXCAVATION THAT ARE NOT INDICATED ON THE DRAWINGS, BUT ARE VISIBLE ON SURFACE, SHALL BE THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE REMOVED AT NO ADDITIONAL COST TO THE OWNER.
7. ANY ALTERATIONS TO THESE DRAWINGS MADE IN THE FIELD DURING CONSTRUCTION SHALL BE RECORDED BY THE GENERAL CONTRACTOR ON "AS-BUILT" DRAWINGS. THE CONTRACTOR SHALL PROVIDE A FINAL AS-BUILT SURVEY PLAN PREPARED BY A MASS. LICENSED SURVEYOR SHOWING PROPOSED UTILITIES AND FINAL GRADES.
8. ALL AREAS DISTURBED BY THE CONTRACTOR'S OPERATIONS OUTSIDE THE PROJECT LIMITS, SHALL BE RESTORED TO THE ORIGINAL CONDITION BY THE CONTRACTOR AT NO ADDITIONAL COST AND TO THE SATISFACTION OF THE OWNER.
9. ALL WORK SHOWN ON THE PLANS AS BOLD SHALL REPRESENT PROPOSED WORK. THE TERM "PROPOSED (PROP)" INDICATES WORK TO BE CONSTRUCTED USING NEW MATERIALS OR, WHERE APPLICABLE, RE-USING EXISTING MATERIALS IDENTIFIED AS "REMOVE AND RESET (R&R)", OR REMOVE, RELOCATE, RESET, (R,R&R).
10. ALL KNOWN EXISTING STATE, COUNTY AND OWNER LOCATION LINES AND PRIVATE PROPERTY LINES HAVE BEEN ESTABLISHED FROM AVAILABLE INFORMATION AND ARE INDICATED ON THE PLANS.
11. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO PROTECT HIS EMPLOYEES, AS WELL AS PUBLIC USERS FROM INJURY DURING THE ENTIRE CONSTRUCTION PERIOD USING ALL NECESSARY SAFEGUARDS, INCLUDING BUT NOT LIMITED TO, THE ERECTION OF TEMPORARY WALKS, STRUCTURES, PROTECTIVE BARRIERS, COVERING, FENCES AS NEEDED AND ALL NECESARY PRECAUTIONS TO PREVENT THE SPREAD OF COVID 19. SEE SPECIFICATION SECTION 00 73 73 STATE REGULATIONS ATTACHMENT G "MASSACHUSETTS COVID CONSTRUCTION GUIDELINES".
12. THE CONTRACTOR SHALL SUPPLY THE OWNER WITH THE NAME OF THE OSHA "COMPETENT PERSON" PRIOR TO CONSTRUCTION.
13. FILLING OF EXCAVATED AREAS SHALL NOT TAKE PLACE WITHOUT THE PRESENCE OR PERMISSION OF THE OWNER.
14. THE CONTRACTOR SHALL CALL DIGSAFE AT 1-888-344-7233 AT LEAST 72 HOURS, SATURDAYS, AND HOLIDAYS EXCLUDED, PRIOR TO EXCAVATING AT ANY LOCATION. A COPY OF THE DIGSAFE PROJECT REFERENCE NUMBER(S) SHALL BE GIVEN TO THE OWNER PRIOR TO EXCAVATION.
15. ALL EXCESS SOIL FROM BRINGING GRADES DOWN TO BOTTOM OF PAVEMENT SUBGRADE SHALL BE STOCKPILED OFF SITE AT THE OWNERS ROUTE 99 PROPERTY LOCATED ADJACENT TO 732 NEWBURYPORT TURNPIKE, MELROSE, MA AT NO ADDITIONAL COST TO THE OWNER. ALL EXCESS SOIL GENERATED FROM THE EXCAVATION OF THE FOUNDATIONS AND GROUND IMPROVEMENTS SHALL BE STOCKPILED ON SITE IN THE OWNERS MATERIAL STORAGE BINS LOCATED IN THE FRONT OF THE SITE, AT NO ADDITIONAL COST TO THE OWNER. REFER TO SPECIFICATION SECTION 02 61 00.16 HANDLING, TRANSPORTATION, REUSE AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL. FOR ADDITIONAL SOIL MANAGEMENT DETAILS. SUITABLE SOIL EXCAVATED AS PART OF THE PROJECT MUST MEET ONE OR MORE OF THE MATERIAL REQUIREMENTS SPECIFIED IN 312300-EARTHWORK. ON-SITE FILL MATERIALS, WHICH DO NOT CONFORM TO SPEC 312300, SHALL NOT BE USED BELOW ANY STRUCTURES. IF THE CONTRACTOR PROPOSES TO USE THE EXISTING FILL ON SITE BELOW PAVEMENT AREAS, HE MUST DEMONSTRATE THAT THE FILL MEETS THE REQUIREMENTS PER SECTION 312300 OF THE SPECIFICATIONS.
16. CONTRACTOR IS RESPONSIBLE FOR STAKING CONSTRUCTION BASELINES IN FIELD. NO CONSTRUCTION WILL BE PERFORMED WITHOUT THE PROPOSED BASELINES AND LAYOUTS APPROVED BY THE ENGINEER.
17. NO FILL SHALL CONTAIN HAZARDOUS MATERIALS.
18. ANY QUANTITIES SHOWN ON PLANS ARE FOR COMPARATIVE BIDDING PURPOSES ONLY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VISIT THE PROJECT SITE TO VERIFY ALL QUANTITIES AND CONDITIONS PRIOR TO SUBMITTING BID.
19. ALL EXISTING DRAINAGE FACILITIES TO REMAIN SHALL BE MAINTAINED FREE OF DEBRIS, SOIL, SEDIMENT, AND FOREIGN MATERIAL AND OPERATIONAL THROUGHOUT THE LIFE OF THE CONTRACT. REMOVE ALL SOIL, SEDIMENT, DEBRIS AND FOREIGN MATERIAL FROM ALL DRAINAGE STRUCTURES, INCLUDING BUT NOT LIMITED TO, DRAINAGE INLETS, MANHOLES AND CATCH BASINS WITHIN THE LIMIT OF WORK AND DRAINAGE STRUCTURES OUTSIDE THE LIMIT OF WORK THAT ARE IMPACTED BY THE WORK FOR THE ENTIRE DURATION OF CONSTRUCTION.
20. CONTRACTOR'S STAGING AREA MUST BE WITHIN THE CONTRACT LIMIT LINE AND IN AREAS APPROVED BY OWNER. ANY OTHER AREAS THAT THE CONTRACTOR MAY WISH TO USE FOR STAGING MUST BE COORDINATED WITH THE OWNER.
21. THE CONTRACTOR SHALL KEEP ALL STREETS, PARKING LOTS AND WALKS THAT ARE NOT RESTRICTED FROM PUBLIC USE DURING CONSTRUCTION BROOM CLEAN AT ALL TIMES. THE CONTRACTOR SHALL USE ACCEPTABLE METHODS AND MATERIALS TO MAINTAIN ADEQUATE DUST CONTROL THROUGHOUT CONSTRUCTION.
22. CONTRACTOR SHALL COORDINATE ALL WORK WITH THE OWNER.
23. CONTRACTOR SHALL DEWATER AS NECESSARY TO PERFORM THE PROPOSED WORK.
24. THE LIMIT OF WORK SHALL BE DELINEATED IN THE FIELD PRIOR TO THE START OF SITE CLEARING OR CONSTRUCTION.
25. DEEP SUMP CATCH BASINS AND STORMWATER BASIN SHALL BE CLEANED FOLLOWING CONSTRUCTION.
26. HAULING OF EARTH MATERIALS TO AND FROM THE SITE SHALL BE RESTRICTED TO THE HOURS OF 7:00 AM TO 5:00 PM MONDAY THROUGH FRIDAY, EXCLUDING HOLIDAYS.
27. WORK ON SATURDAYS SHALL ONLY BE CONDUCTED IF PRIOR WRITTEN PERMISSION IS PROVIDED BY THE OWNER.
28. THE TERM "AS DIRECTED" AS USED IN THE CONTRACT DRAWINGS SHALL BE REPLACED WITH "AS REQUIRED".
29. THIS PROJECT IS ADJACENT TO PROPERTY OWNED BY THE MASSACHUSETTS BAY TRANSPORTATION AUTHORITY (MBTA). IF THE CONTRACTOR IS PROPOSING TO UTILIZE ANY LARGE BOOM EQUIPMENT (CRANES, LARGE EXCAVATORS, ETC) THAT HAVE THE POTENTIAL TO FOUL THE ADJACENT MBTA RIGHT-OF-WAY (ROW) EITHER BY PICKING CONSTRUCTION MATERIALS OVER THE MBTA ROW OR BY THE POSSIBILITY OF A LARGE BOOM FALLING INTO THE MBTA ROW IN AN EMERGENCY SITUATION, THE CONTRACTOR MUST CONTACT THE MBTA DIRECTOR OF SAFETY ENGINEERING AND ADHERE TO THE MBTA RULES AND REGULATIONS REGARDING CRANE USE IN THEIR ROW. THE MBTA TRACK FOULING ZONE IS A DISTANCE OF 10-FEET FROM THE CENTERLINE OF THE NEAREST TRACK.
30. THE CONTRACTOR SHALL ALSO SECURE INSURANCE FOR WORKING ADJACENT TO A RAILROAD AS SPECIFIED IN SECTION 00 73 00 SUPPLEMENTARY CONDITIONS.

EROSION AND SEDIMENT CONTROL NOTES

1. ALL SEDIMENT AND EROSION CONTROL DEVICES SHALL BE PUT INTO PLACE PRIOR TO BEGINNING ANY CONSTRUCTION OR DEMOLITION. REFER TO PLAN FOR APPROXIMATE LOCATION OF EROSION AND SEDIMENT CONTROL. REFER TO SPECS AND DETAILS FOR TYPE OF EROSION AND SEDIMENT CONTROL.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE CONTINUAL MAINTENANCE OF ALL CONTROL DEVICES THROUGHOUT THE DURATION OF THE PROJECT.
3. CONTRACTOR SHALL MEET ALL OF THE STATE OF MASSACHUSETTS D.E.P. AND THE CITY OF MELROSE WETLAND ORDINANCE REGULATIONS FOR SEDIMENT AND EROSION CONTROL.
4. EXCAVATED MATERIAL STOCKPILED ON THE SITE SHALL BE SURROUNDED BY A RING OF UNBROKEN SEDIMENT AND EROSION CONTROL COMPOST FILTER TUBES. THE LIMITS OF ALL GRADING AND DISTURBANCE SHALL BE KEPT TO A MINIMUM WITHIN THE APPROVED AREA OF CONSTRUCTION. ALL AREAS OUTSIDE OF THE LIMIT OF CONTRACT SHALL REMAIN TOTALLY UNDISTURBED UNLESS OTHERWISE APPROVED BY OWNER'S REPRESENTATIVE.
5. ALL CATCH BASINS AND DRAIN GRATES WITHIN LIMIT OF CONTRACT SHALL BE PROTECTED WITH FILTER FABRIC DURING THE ENTIRE DURATION OF CONSTRUCTION.
6. ANY AREA OUTSIDE THE PROJECT LIMIT THAT IS DISTURBED SHALL BE RESTORED TO ITS ORIGINAL CONDITION AT NO COST TO THE OWNER.
7. DUE TO CONTAMINATED SOIL THE CONTRACTOR SHALL STRICTLY FOLLOW DUST CONTROL AND MONITORING MEASURES AS SPECIFIED IN 01 14 19.16 DUST CONTROL.
8. ALL POINTS OF CONSTRUCTION EGRESS OR INGRESS SHALL BE MAINTAINED TO PREVENT TRACKING OR FLOWING OF SEDIMENT ON TO PUBLIC/PRIVATE ROADS.

FOUNDATION NOTES

1. NO RESPONSIBILITY IS ASSUMED BY THE ENGINEER FOR THE VALIDITY OF THE SUBSURFACE CONDITIONS DESCRIBED ON THE DRAWINGS OR IN THE SPECIFICATIONS. THIS DATA IS INCLUDED ONLY TO ASSIST THE CONTRACTOR DURING BIDDING AND SUBSEQUENT CONSTRUCTION.
2. THE CONTRACTOR SHALL DESIGN AND PROVIDE ALL TEMPORARY EARTH SUPPORT, SHORING AND BRACING REQUIRED TO COMPLETE THE WORK IN ACCORDANCE WITH OSHA, STATE AND LOCAL REQUIREMENTS.
3. THE CONTRACTOR SHALL DESIGN AND PROVIDE SHEETING, SHORING, BRACING, AND/OR UNDERPINNING IN ORDER TO PROTECT EXISTING UTILITIES AND STRUCTURES FROM EXCESSIVE MOVEMENT DURING THE CONSTRUCTION PERIOD, IN ACCORDANCE WITH OSHA, STATE AND LOCAL REQUIREMENTS.
4. THE CONTRACTOR SHALL CARRY OUT CONTINUOUS CONTROL OF SURFACE AND SUBSURFACE WATER, DEWATER ANY AREAS REQUIRING EXCAVATION IN ADVANCE OF PERFORMING EXCAVATION, AND MAINTAIN GROUNDWATER LEVELS BELOW PLANNED SUB-GRADES.
5. FOUNDATIONS SHALL BE INSTALLED IN THE GEOMETRY SHOWN ON THE PLANS.
6. GROUND IMPROVEMENTS SHALL BE COORDINATED WITH THE LOCATION OF THE FOUNDATIONS SHOWN ON THE ARCHITECTURAL FOUNDATION PLAN.
7. GEOTECHNICAL ENGINEERING REPORT PREPARED BY WESTON & SAMPSON DATED FEBRUARY 17, 2021 AND A GEOTECHNICAL ENGINEERING REPORT ADDENDUM DATED APRIL 13, 2021.

DEMOLITION & SITE PREPARATION NOTES

1. THE CONTRACTOR SHALL INCLUDE IN THE BID THE COST OF REMOVING ANY EXISTING SITE FEATURES AND APPURTENANCES NECESSARY TO ACCOMPLISH THE CONSTRUCTION OF THE PROPOSED SITE IMPROVEMENTS. THE CONTRACTOR SHALL ALSO INCLUDE IN THE BID THE COST NECESSARY TO RESTORE SUCH ITEMS IF THEY ARE SCHEDULED TO REMAIN AS PART OF THE FINAL SITE IMPROVEMENTS. REFER TO PLANS TO DETERMINE EXCAVATION, DEMOLITION AND TO DETERMINE THE LOCATION OF THE PROPOSED SITE IMPROVEMENTS.
2. THE OWNER RESERVES THE RIGHT TO REVIEW ALL MATERIALS DESIGNATED FOR REMOVAL AND TO RETAIN OWNERSHIP OF SUCH MATERIALS. IF THE OWNER RETAINS ANY MATERIAL THE CONTRACTOR SHALL ALLOW ARRANGEMENTS WITH THE OWNER TO HAVE THOSE MATERIALS REMOVED OFF SITE AT NO ADDITIONAL COST.
3. UNLESS SPECIFICALLY NOTED TO BE SAVED / STOCKPILED (R&S) OR REUSED / RELOCATED (R&R), ALL SITE FEATURES CALLED FOR REMOVAL (REM) SHALL BE REMOVED WITH THEIR FOOTINGS, ATTACHMENTS, BASE MATERIAL, ETC, TRANSPORTED FROM THE SITE TO BE DISPOSED OF IN A LAWFUL MANNER AT AN ACCEPTABLE DISPOSAL SITE AND AT NO COST TO THE OWNER.
4. ALL EXISTING SITE FEATURES TO REMAIN SHALL BE PROTECTED THROUGHOUT THE CONSTRUCTION PERIOD. ANY FEATURES DAMAGED DURING CONSTRUCTION OPERATIONS SHALL BE REPAIRED OR REPLACED TO THE SATISFACTION OF THE OWNER'S REPRESENTATIVE AT NO ADDITIONAL COST.
5. DURING EARTHWORK OPERATIONS, CONTRACTOR SHALL TAKE CARE TO NOT DISTURB EXISTING MATERIALS TO REMAIN, OUTSIDE THE LIMITS OF EXCAVATION AND BACKFILL AND SHALL TAKE WHATEVER MEASURES NECESSARY, AT THE CONTRACTOR'S EXPENSE, TO PREVENT ANY EXCAVATED MATERIAL FROM COLLAPSING. ALL BACKFILL MATERIALS SHALL BE PLACED AND COMPACTED AS SPECIFIED TO THE SUBGRADE REQUIRED FOR THE INSTALLATION OF THE REMAINDER OF THE CONTRACT WORK.
6. IT SHALL BE THE CONTRACTOR'S OPTION, WITH CONCURRENCE OF THE OWNER, TO REUSE EXISTING GRAVEL IF IT MEETS THE REQUIREMENTS OF THE SPECIFICATIONS FOR GRAVEL BORROW.
7. ALL ITEMS CALLED FOR REMOVAL SHALL BE REMOVED TO FULL DEPTH INCLUDING ALL FOOTINGS, FOUNDATIONS, AND OTHER APPURTENANCES, EXCEPT AS SPECIFICALLY NOTED OTHERWISE.
8. "CLEAR AND GRUB VEGETATION' SHALL INCLUDE REMOVAL OF GRASS, SHRUBS, AND UNDERBRUSH, REMOVAL OF ROOTS, ROUGH GRADING, INSTALLATION OF LOAM (IF APPLICABLE), FINE GRADING, SEEDING AND TURF ESTABLISHMENT BY THE CONTRACTOR.
9. THE STORAGE OF MATERIALS AND EQUIPMENT WILL BE PERMITTED AT LOCATIONS DESIGNATED BY OWNER OR OWNER'S REPRESENTATIVE. PROTECTION OF STORED MATERIALS AND EQUIPMENT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

LAYOUT & MATERIALS NOTES

1. REFER TO EXISTING CONDITIONS PLANS FOR SURVEY INFORMATION (SHEET C-1).
2. ALL WORK SHALL BE PERFORMED BY CONTRACTOR UNLESS SPECIFICALLY INDICATED THAT THE WORK WILL BE PERFORMED "BY OWNER".
3. THE LAYOUT OF SITE AMENITIES AND FENCES MUST BE APPROVED BY THE OWNER'S REPRESENTATIVE PRIOR TO INSTALLATION.
4. ALL LAYOUT LINES, OFFSETS, OR REFERENCES TO LOCATING OBJECTS ARE EITHER PARALLEL OR PERPENDICULAR UNLESS OTHERWISE DESIGNATED WITH ANGLE OFFSETS NOTED.
5. ALL PROPOSED SITE FEATURES SHALL BE LAID OUT AND STAKED FOR REVIEW AND APPROVAL BY THE OWNER'S REPRESENTATIVE PRIOR TO COMMENCEMENT OF INSTALLATION. ANY REQUIRED ADJUSTMENTS TO THE LAYOUT SHALL BE UNDERTAKEN AS REQUIRED, AT NO ADDITIONAL COST TO THE OWNER.
6. ALL PROPOSED PAVEMENTS SHALL MEET THE LINE AND GRADE OF EXISTING ADJACENT PAVEMENT SURFACES AND SHALL BE TREATED WITH AN RS-1 TACK COAT AT POINT OF CONNECTION. ALL PATHWAY WIDTHS SHALL BE AS NOTED ON THE LAYOUT AND MATERIALS PLAN.
7. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND GRADES ON THE GROUND AND REPORT ANY DISCREPANCIES IMMEDIATELY TO THE OWNER.
8. REFER TO DETAIL DRAWINGS FOR CONSTRUCTION DETAILS.

GRADING, UTILITIES & DRAINAGE NOTES

1. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND GRADES ON THE GROUND AND REPORT ANY DISCREPANCIES IMMEDIATELY TO THE OWNER.
2. ALL GRADING IS TO BE SMOOTH AND CONTINUOUS WHERE PROPOSED PAVEMENT SURFACE MEETS EXISTING SURFACE, BLEND THE TWO PAVEMENTS AND ELIMINATE ROUGH SPOTS AND ABRUPT GRADE CHANGES AND MEET LINE AND GRADE OF EXISTING CONDITIONS WITH NEW IMPROVEMENTS.
3. CONTRACTOR SHALL MAINTAIN POSITIVE DRAINAGE (1% MINIMUM) AWAY FROM ALL BUILDING FOUNDATIONS AND STRUCTURES.
4. CONTRACTOR SHALL ENSURE ALL AREAS ARE PROPERLY PITCHED TO DRAIN, WITH NO SURFACE WATER PONDING OR PUDDLING. THE PAVEMENT REPLACEMENT LIMITS SHALL BE VERIFIED IN THE FIELD BY THE CONTRACTOR BY DOING A DETAILED SITE SURVEY TO ENSURE POSITIVE DRAINAGE IS PROVIDED, WITH NO LOW POINTS WHERE THE PUDDLING MAY OCCUR. THE RESULTS OF THIS SURVEY SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW.
5. ALL UTILITY GRATES, COVERS OR OTHER SURFACE ELEMENTS INTENDED TO BE EXPOSED AT GRADE SHALL BE FLUSH WITH THE ADJACENT FINISHED GRADE AND ADJUSTED TO PROVIDE A SMOOTH TRANSITION AT ALL EDGES.
6. THE CONTRACTOR SHALL SET SUBGRADE ELEVATIONS TO ALLOW FOR POSITIVE DRAINAGE AND PROVIDE EROSION CONTROL DEVICES, STRUCTURES, MATERIALS AND CONSTRUCTION METHODS TO DIRECT SILT MIGRATION AWAY FROM DRAINAGE AND OTHER UTILITY SYSTEMS, AND WORK AREAS. CLEAN BASINS REGULARLY AND AT THE END OF THE PROJECT.
7. EXCAVATION REQUIRED WITHIN PROXIMITY OF KNOWN EXISTING UTILITY LINES SHALL BE DONE BY HAND. CONTRACTOR SHALL REPAIR ANY DAMAGE TO EXISTING UTILITY LINES OR STRUCTURES INCURRED DURING CONSTRUCTION OPERATIONS AT NO COST TO THE OWNER.
8. WHERE NEW EARTHWORK MEETS EXISTING EARTHWORK, CONTRACTOR SHALL BLEND NEW EARTHWORK SMOOTHLY INTO EXISTING, PROVIDING VERTICAL CURVES OR ROUNDS AT ALL TOP AND BOTTOM OF SLOPES.
9. WHERE A SPECIFIC LIMIT OF WORK LINE IS NOT OBVIOUS OR IMPLIED, BLEND GRADES TO EXISTING CONDITIONS WITHIN 5 FEET OF PROPOSED CONTOURS.
10. SEE EARTHWORK SECTION OF SPECIFICATIONS FOR SPECIFIC EXCAVATION AND FILLING PROCEDURES.

CONSTRUCTION SEQUENCE NOTES

1. THE CONTRACTOR SHALL DISCONNECT POWER TO THE SALT SHED AND DEMOLISH AND REMOVE THE SALT SHED.
2. THE SITE IS LOCATED WITHIN AN ACTIVE HIGHWAY FACILITY YARD. THE CONTRACTOR SHALL COORDINATE WITH THE OWNER TO MINIMIZE DISTURBANCE TO FACILITY OPERATIONS.
3. THE CONTRACTOR SHALL LIMIT HIS WORK TO THE AREA WITHIN THE LIMIT OF WORK SHOWN ON THE DRAWINGS. ADDITIONAL SPACE FOR EQUIPMENT/MATERIALS STAGING MAY BE PROVIDED WITH PRIOR APPROVAL BY THE OWNER.

- Guard Rail

SURVEY NOTES:

1. UNDERGROUND UTILITY LOCATIONS SHOWN HEREON ARE BASED ON UTILITY EVIDENCE VISIBLE AT GROUND SURFACE AND RECORD DRAWINGS AND ARE SUBJECT TO FIELD VERIFICATION BY EXCAVATION. UTILITIES SHOWN DO NOT PURPORT TO CONSTITUTE OR REPRESENT ALL UTILITIES LOCATED UPON OR ADJACENT TO THE SURVEYED PREMISES.
2. SURVEY PERFORMED BY WESTON & SAMPSON LAND SURVEYORS, INC. IN OCTOBER, 2020.
3. CONTOURS AND ELEVATIONS SHOWN BASED ON GPS OBSERVATIONS IN NAVD88.
4. NORTH ORIENTATION IS BASED ON GPS OBSERVATIONS TAKEN AT THE TIME OF THE FIELD SURVEY. MAPPING PREPARED ON NAD83 STATE PLANE COORDINATE SYSTEM (MASSACHUSETTS MAINLAND ZONE).
5. STREET AND PROPERTY LINES ARE COMPILED FROM MASSGIS DATA.

SALT SHED DEMOLITION NOTES:

1. DEMOLITION OF THE EXISTING APPROXIMATE 4,000 SF SALT SHED IN ITS ENTIRETY SHALL BE IN ACCORDANCE WITH SPECIFICATION SECTION 02 41 16 DEMOLITION.
2. CONTRACTOR SHALL NOTIFY MASSDEP (AQ 06 NOTIFICATION) 10 WORKING DAYS BEFORE DEMOLITION WORK BEGINS. A PRE DEMOLITION SURVEY REQUIRED OF THE SALT SHED HAS BEEN CONDUCTED BY WESTON AND SAMPSON'S LICENSED ASBESTOS INSPECTOR. THIS REPORT IS ATTACHED TO SECTION 02 41 16 DEMOLITION. THE CONTRACTOR SHALL PROVIDE MASSDEP WITH A COPY AS PART OF THE AQ 06 NOTIFICATION PROCESS.
3. FOUNDATION SPOILS SHALL BE STOCK PILED ON SITE IN MATERIAL STORAGE BINS. ASPHALT AND EXCESS SOIL GENERATED FROM BRINGING GRADES DOWN TO BOTTOM OF PAVEMENT SUBGRADE SHALL BE STOCKPILED SEPARATELY OFF SITE AT THE OWNERS ROUTE 99 PROPERTY LOCATED ADJACENT TO 732 NEWBURYPORT TURNPIKE, MELROSE MA. SEE SPECIFICATION SECTION 02 61 00.16 - HANDLING REUSE TRANSPORTATION AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL.
4. TEST PITS #4 & #5 ENCOUNTERED A BURIED LAYER OF ASPHALT. THE CONTRACTOR SHALL REMOVE THE TOP LAYER AND BURIED LAYER OF ASPHALT WITHIN THE LIMITS OF PAVEMENT REMOVAL SHOWN ABOVE. THE REMOVED ASPHALT SHALL BE STOCK PILED SEPARATELY FROM THE SURPLUS SOIL AND BROUGHT TO AN ASPHALT RECYCLING CENTER. REFER TO SECTION 02 61 00.16 - HANDLING REUSE TRANSPORTATION AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL AND SECTION 00 31 32 SUB SURFACE DATA FOR ADDITIONAL DETAILS.

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

NOTES:

1. SIDE WALL KICKER LOCATIONS ARE APPROXIMATE ONLY, SEE FLOOR FOUNDATION PLAN FOR EXACT LOCATIONS.
2. SEE FOUNDATION PLAN FOR FOUNDATION LAYOUT.
3. FLOOD GATE SYSTEM SHALL BE SECURELY MOUNTED TO THE FACE OF THE SALT SHED PRESSURE TREATED WOOD. CONTRACTOR SHALL PROVIDE SEALANT AS NEEDED TO PROVIDE A WATER TIGHT SYSTEM. SEE DETAIL ON SHEET C-6 FOR ADDITIONAL GATE DETAILS.
4. CONTRACTOR SHALL PROVIDE SIX (6) 2'X2' $\frac{1}{4}$" GALVANIZED STEEL PLATES TO BE PLACED BENEATH LOADING RAMP LEGS TO DISTRIBUTE THE WEIGHT OF THE RAMP ONTO THE PAVEMENT. CONTRACTOR ALL SHALL PROVIDE SHIMS AS NECESSARY TO PROVIDE LEVEL SURFACE FOR LOADING RAMP LEGS TO REST ON.
5. CONTRACTOR SHALL CONFIRM FINAL LOCATION OF LOADING RAMP WITH OWNER WITH A MOCK SALT DELIVERY TURNING TEST IN THE FIELD. SALT DELIVERY TRUCK SHALL BE PROVIDED BY THE CITY. SEE DETAIL 3 ON SHEET C-6, FOR ADDITIONAL LOADING RAMP DETAILS.

SCALE: 1" = 10'

NOTES:

1. SIDE WALL KICKER AND BUILDING FOUNDATION LOCATIONS ARE APPROXIMATE ONLY, SEE FLOOR /FOUNDATION PLAN FOR FINAL LOCATIONS.
2. CONTRACTOR SHALL PLATE ELECTRICAL TRENCHES AS NEEDED TO ALLOW DPW VEHICLES ACCESS THROUGH THIS AREA. SEE NOTE ON C-2.
3. ALL FINAL GRADES SHALL MATCH EXISTING GRADES AS THE PROJECT IS IN A FLOOD ZONE.
4. FINAL GROUND IMPROVEMENT LAYOUT SHALL BE COORDINATED WITH DRAWING A1 - FOUNDATION PLAN. FOUNDATIONS SHOWN ON THIS PLAN IS SCHEMATIC ONLY AND MAY VARY FROM FOUNDATION LAYOUT SHOWN ON SHEET A1.
5. GROUND IMPROVEMENT TO BE PROVIDED BELOW PROPOSED SHALLOW FOUNDATIONS OF THE SALT STORAGE STRUCTURE, CANOPY, BRINE TANK SLAB-ON-GRADE AND BELOW THE SALT STOCKPILE. GROUND IMPROVEMENT TYPE, QUANTITY AND LAYOUT TO BE DETERMINED BY THE CONTRACTOR'S GROUND IMPROVEMENT DESIGNER IN ACCORDANCE WITH SPEC SECTION 31 66 13.
6. AS TYPICALLY DONE, THE CONTRACTOR SHALL FORM THE FOUNDATION USING THE SOILS ONSITE FOR EACH INDIVIDUAL FOUNDATION TO MINIMIZE THE AMOUNT OF SOIL GENERATED ON SITE.

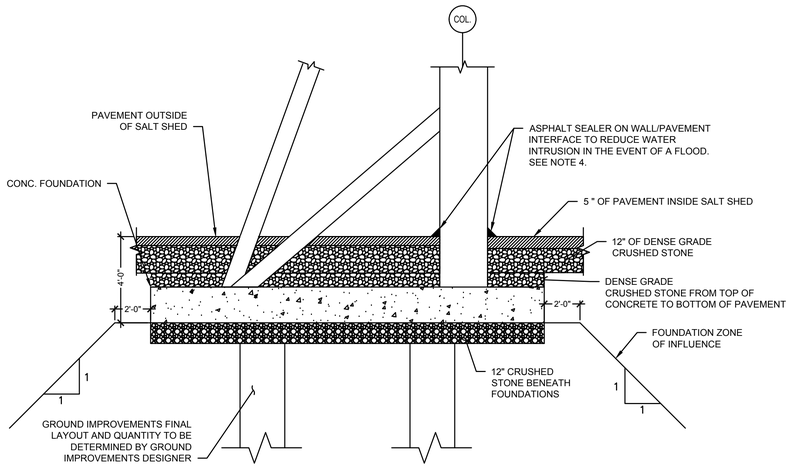
GRADING & UTILITY PLAN

Sheet Number:

C-4

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

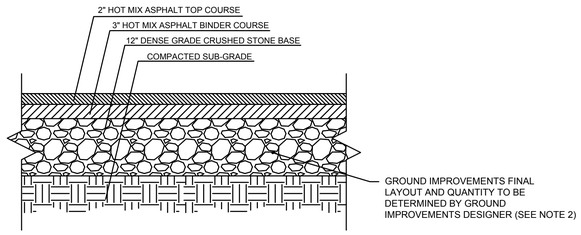


NOTE:

ALL EXISTING CATCH BASINS WITHIN THE LIMIT OF WORK SHALL HAVE INLET CONTROL PRIOR TO THE START OF CONSTRUCTION.

1 INLET SEDIMENT CONTROL

SCALE: N.T.S.

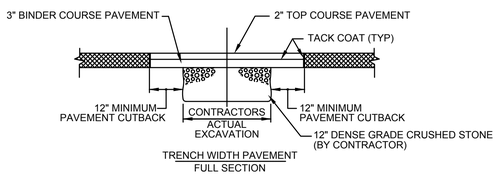


FOUNDATION NOTE(S):

1. PROPOSED SHALLOW FOUNDATIONS OF THE PROPOSED SALT SHED STRUCTURE AND BELOW THE SALT STOCKPILE TO BE SUPPORTED USING GROUND IMPROVEMENT ELEMENTS. THE TYPE, QUANTITY AND LAYOUT TO BE DETERMINED BY THE CONTRACTOR'S GROUND IMPROVEMENT DESIGNER IN ACCORDANCE WITH SECTION 31 66 13.
2. THE CONTRACTOR IS RESPONSIBLE FOR SUBGRADE PROTECTION.
3. SEE GEOTECHNICAL REPORT FOR UNDOCUMENTED FILL DEPTHS.
4. ASPHALT SEALER SHALL BE 9057R HOT ASPHALT CRACK FILLER AS MANUFACTURED BY FLEX-A-FILL.
5. DEWATERING SHALL BE IN ACCORDANCE WITH SPEC SECTION 31 23 19.

2 TYPICAL FOUNDATION SUBGRADE DETAIL

SCALE: N.T.S.

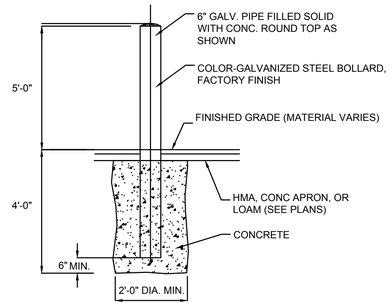


4 TYPICAL PAVING CROSS SECTION DETAIL

SCALE: N.T.S.

NOTES:

1. CONTRACTOR SHALL MAINTAIN POSITIVE SURFACE DRAINAGE (SEE GRADING PLANS).
2. GROUND IMPROVEMENTS SHALL BE PROVIDED BELOW THE SALT SHED STRUCTURE AND BELOW THE SALT SHED STOCKPILE IN ACCORDANCE WITH SPEC SECTION 31 66 13.

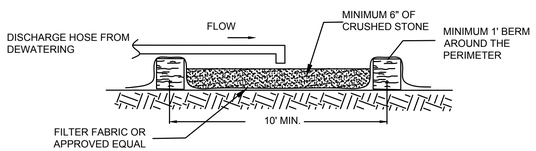


5 TRENCH REPAIR DETAIL

SCALE: N.T.S.

NOTES:

1. CONTRACTOR SHALL BACKFILL TRENCH, AND BED DUCT BANK, WITH COMPACTED GRAVEL BORROW.SEE TRENCH DETAIL ON ELECTRICAL DRAWINGS.

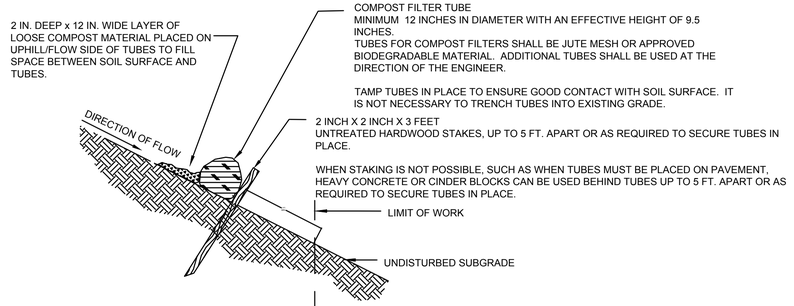


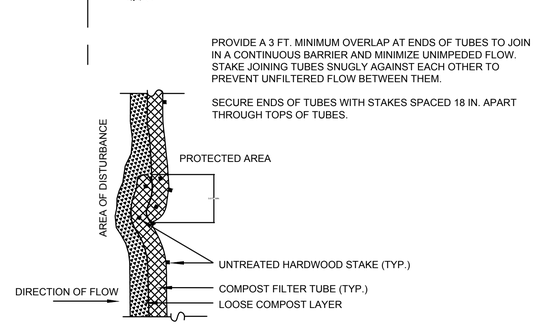
NOTES:

1. SEE SHEET C-3 FOR BOLLARD LOCATIONS.
2. BOLLARD FOUNDATION CONCRETE TO BE 3000 PSI MIN.
3. EXACT LOCATION TO BE DETERMINED IN THE FIELD AND APPROVED BY OWNER BEFORE INSTALLATION.

6 EXTERIOR STEEL PIPE BOLLARD

SCALE: N.T.S.



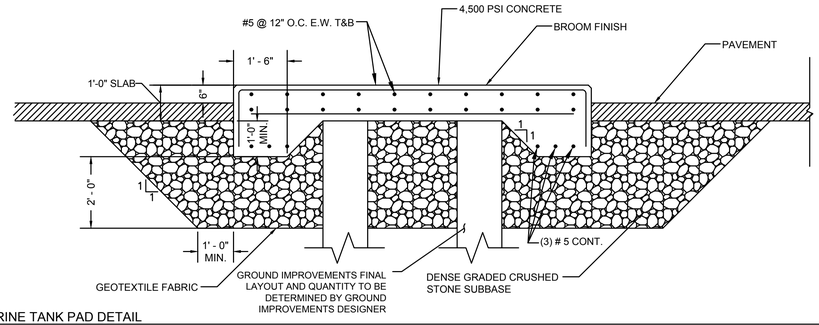


NOTES:

1. CONTRACTOR SHALL SIZE SEDIMENT DEWATERING PAD (10' X 10' MIN.) TO PREVENT OVERFLOW OF INSTALL MULTIPLE SEDIMENT DEWATERING PADS AT LOCATIONS APPROVED BY THE ENGINEER AT NO ADDITIONAL COST TO THE OWNER.
2. DEWATERING PAD SHALL BE FIELD LOCATED IN COORDINATION WITH THE ENGINEER AND SHALL NOT BE IN AN AREA WHERE IT WILL PERCOLATE WATER INTO THE FOUNDATION EXCAVATION. CONTRACTOR SHALL SAW-CUT AND REMOVE PAVEMENT AND SUB-GRADE GRAVEL FILL IF NEEDED AND RESTORE THE DISTURBED AREA IN ACCORDANCE WITH DETAIL 5 ON THIS SHEET.

8 SEDIMENT DEWATERING PAD - SECTION

SCALE: N.T.S.



PLAN VIEW - JOINING DETAIL

3 SINGLE COMPOST FILTER TUBE DETAIL

SCALE: N.T.S.

GENERAL NOTES:

1. PROVIDE A MINIMUM TUBE DIAMETER OF 12 INCHES FOR SLOPES UP TO 50 FEET IN LENGTH WITH A SLOPE RATIO OF 3H:1V OR STEEPER. LONGER SLOPES OF 3H:1V MAY REQUIRE LARGER TUBE DIAMETER OR ADDITIONAL COURSING OF FILTER TUBES TO CREATE A FILTER BERM. REFER TO MANUFACTURER'S RECOMMENDATIONS FOR SITUATIONS WITH LONGER OR STEEPER SLOPES.
2. INSTALL TUBES ALONG CONTOURS AND PERPENDICULAR TO SHEET OR CONCENTRATED FLOW.
3. DO NOT INSTALL IN PERENNIAL, EPHEMERAL OR INTERMITTENT STREAMS.
4. CONFIGURE TUBES AROUND EXISTING SITE FEATURES TO MINIMIZE SITE DISTURBANCE AND MAXIMIZE CAPTURE AREA OF STORMWATER RUN-OFF.
5. MULCH MATERIAL FOR THE FILTER TUBES SHALL BE WEED-FREE STRAW, WOOD EXCELSIOR, COMPOST, OR WOOD CHIPS, OR COIR. STRAW SHALL BE WEED FREE AND DERIVED FROM THRESHING OF GRAIN CROP.
6. CURVE ENDS UPHILL TO PREVENT DIVERSION OF UNFILTERED RUN-OFF.

7 BRINE TANK PAD DETAIL

SCALE: N.T.S.

NOTES:

1. GENERAL CONTRACTOR IS RESPONSIBLE FOR CONSTRUCTION OF ALL CONCRETE PADS.
2. SEE LAYOUT AND GRADING PLANS FOR FINISH GRADE
3. COORDINATE WITH ALL CONTRACTORS AND ADJUST PAD LOCATIONS AND DIMENSIONS IN FIELD
4. SLABS 8" OR LESS IN THICKNESS SHALL HAVE ONE LAYER OF REINFORCING PLACED IN THE TOP ONE THIRD OF THE SLAB.
5. THE EXACT SIZE, SHAPE AND LOCATION OF EQUIPMENT (HOUSEKEEPING) PAD(S) SHALL BE DETERMINED BY THE CONTRACTOR AFTER APPROVAL OF SHOP DRAWINGS FOR EQUIPMENT. ANCHOR BOLTS, WHERE REQUIRED, SHALL BE SIZED AND LOCATED ACCORDING TO THE MANUFACTURER'S REQUIREMENTS.
6. CONTRACTOR SHALL PROVIDE CAULK WITH POLYSULFIDE SEALANT AND PREFORMED JOINT FILLER WHERE EQUIPMENT PADS ADJOIN THE BUILDING.
7. THE ENTIRE EXPOSED SURFACE OF BRINE TANK PAD SHALL BE COATED WITH HYDROZO MASTERPROTECT H1000 PENETRATING SEALER OR EQUAL.

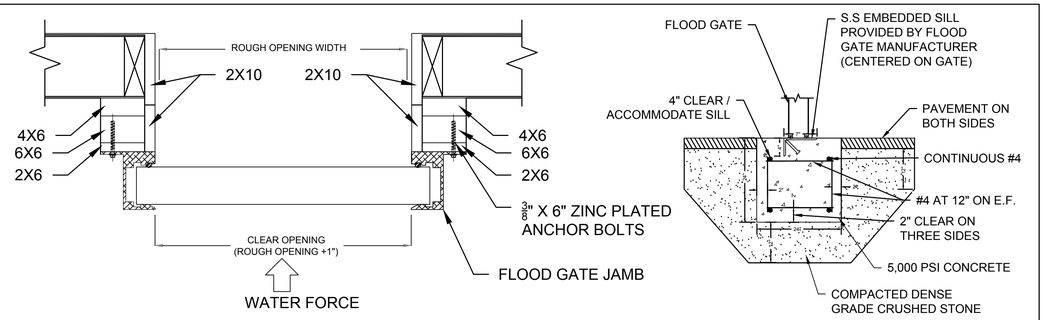
CIVIL DETAILS I

Sheet Number:

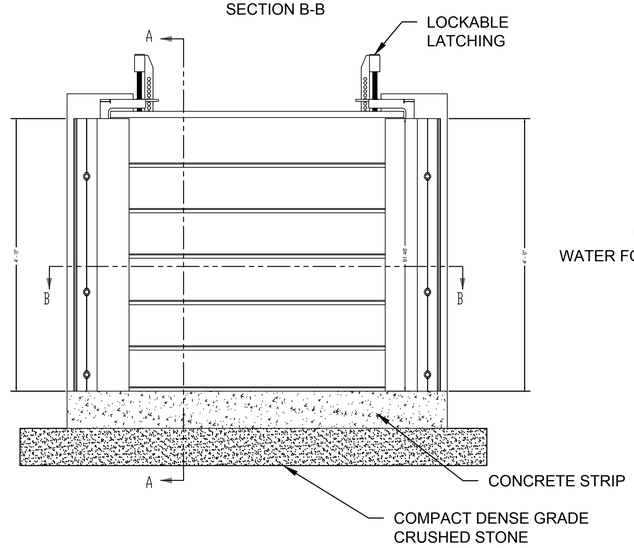
C-5

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

WESTON & SAMPSON COPYRIGHT 2019

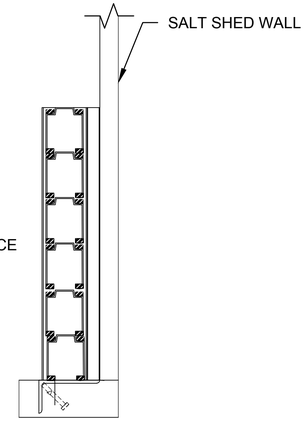


1 BRINE SYSTEM EQUIPMENT LAYOUT PLAN



SCALE: 1"=2'

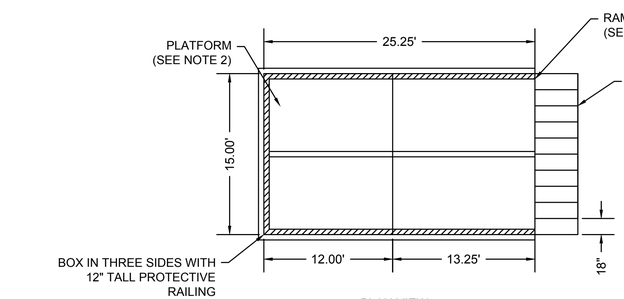
NOTES:



1. BRINE DISPENSE STATION SHALL BE CALCOTE FILL SYSTEM (CFS-1000) AS MANUFACTURED BY GVM OR EQUAL. THE DISPENSE STATION SHALL INCLUDE A STAND CONSTRUCTED FROM A 3'X3' STEEL BASE WITH A 3" SQUARE TUBE STEEL WITH HOSE RACK ATTACHED. ALL STEEL COMPONENTS SHALL BE HOT DIPPED GALVANIZED MEETING ASTM A-123.
2. THE BRINE PUMP SHALL BE MOUNTED TO THE HOT DIPPED GALVANIZED STEEL BASE AND SHALL BE EQUIPPED WITH A POLYETHYLENE UV STABILIZED, WEATHER TIGHT HOUSING. THE PUMP SHALL ALSO COME WITH ITS OWN THREE WAY VALVE IN ADDITION TO THE VALVE SHOWN IN THE DETAIL, TO ALLOW THE OWNER TO FILL AND EMPTY SADDLE TANKS.
3. THE BRINE DISPENSE STATION SHALL INCLUDE A HOSE RACK MOUNTED TO THE 3" TUBE STEEL, CAPABLE OF STORING 25FT X 1 INCH CHEMICAL RESISTANT RUBBER HOSE, USED TO FILL AND EMPTY SADDLE TANKS.
4. THE WALL MOUNTED HOSE REEL SHALL BE A STAINLESS STEEL MANUAL REWIND HOSE REEL CAPABLE OF STORING 50'X$\frac{3}{4}$" CHEMICAL RESISTANT HOSE. THE HOSE REEL SHALL BE MODEL SS4018-17-18 AS MANUFACTURED BY HANNAY REELS OR APPROVED EQUAL.
5. THIS DETAIL IS SCHEMATIC ONLY AND NOT ALL COMPONENTS ARE SHOWN. THE CONTRACTOR SHALL PROVIDE ALL EQUIPMENT, VALVES, FITTINGS, AND PIPING REQUIRED TO PROVIDE A COMPLETE AND OPERABLE SYSTEM THAT WILL ALLOW THE OWNER TO FILL AND EMPTY SADDLE TANKS FROM OUTSIDE THE SALT SHED USING THE 25'X1" HOSE AND TO PRE-TREAT THE SALT PILE INSIDE THE SALT SHED USING THE 50' X 3/4" HOSE MOUNTED ON THE HOSE REEL INSIDE THE SHED.
6. THE 2,000 GALLON BRINE TANK SHALL BE EQUIPPED WITH A FILL PORT CONNECTION LOCATED NEAR THE TOP OF THE TANK.
7. WALL PENETRATIONS FOR BRINE SYSTEM HOSE SHALL BE AT LEAST 4FT ABOVE FINISHED FLOOR AND SHALL BE SEALED WEATHER TIGHT.
8. CONTRACTOR SHALL PROVIDE TWO PRESSURE RELIEF VALVES TO PREVENT THE BRINE PUMP FROM OVER PRESSURING AND BURSTING THE SUPPLY LINES IF THE CONTROL VALVES AT THE END OF THE SUPPLY LINES ARE CLOSED WHILE THE PUMP IS RUNNING. RELIEF VALVE SHALL RELIEVE PRESSURE BY RETURNING THE FLUID BACK TO THE 2,000 GALLON BRINE TANK.

SECTION B-B

WATER FORCE



SECTION A-A

2 FLOOD GATE DETAIL

SCALE: N.T.S.

NOTES:

1. FLOOD GATE SYSTEM SHALL BE HYDRODEFENSE FLOOD PLAN XL (FP-535) AS MANUFACTURED BY PS FLOOD BARRIERS OR APPROVED EQUAL.
2. FLOOD GATE PLANKS AND FRAME SHALL BE CONSTRUCTED FROM 6000 SERIES ALUMINUM ALLOY. THE GATE SYSTEM SHALL BE SEALED USING UV RESISTANT EPDM.
3. GATE SYSTEM SHALL BE DESIGNED TO WITHSTAND HYDROSTATIC PRESSURES GENERATED FROM TWO FEET OF WATER, THAT WOULD OCCUR DURING A 100 YR FLOOD EVENT.

1. GENERAL CONTRACTOR TO COORDINATE WITH OWNER FOR FINAL LOCATION OF RAMP.
2. THE LOADING RAMP SHALL CONSIST OF FOUR SEPARATE PIECES TO ALLOW RAMP TO BE DISASSEMBLED AND STORED DURING NON SNOW FIGHTING SEASONS. THE FOUR PIECES SHALL INCLUDE TWO PLATFORM PIECES AND TWO RAMP PIECES THAT CAN ALL BE JOINED TOGETHER TO FORM THE COMPLETE RAMP ASSEMBLY.
3. LOADING RAMP SHALL HAVE A MINIMUM LOADING CAPACITY OF 50,000 LBS AND SHALL BE CONSTRUCTED FROM HOT DIPPED GALVANIZED STEEL AS MANUFACTURED BY NATION RAMPS OR APPROVED EQUAL.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

ELECTRICAL LEGEND

RACEWAY AND WIRING

LP4C1-1,3 — HOMERUN TO PANELBOARD, NUMBER OF TICKS INDICATES NUMBER OF #12 AWG CONDUCTORS CONTAINED IN RACEWAY. TWO (2) #12 AWG SHALL NOT BE INDICATED BY TICKS, NUMERALS 1 AND 3 INDICATE CIRCUITS IN PANELBOARD. RACEWAYS LARGER THAN 3/4" AND CONDUCTORS LARGER THAN #12 AWG SHALL BE INDICATED ON THE DRAWINGS. PROVIDE AN INSULATED GREEN GROUND WIRE IN ALL RACEWAYS MINIMUM SIZE TO BE #12AWG.

UNDERGROUND RACEWAY

SURFACE MOUNTED RACEWAY

LIGHTING FIXTURES

B 3b B 3b — SURFACE MOUNTED LED FIXTURE. "B" DENOTES FIXTURE TYPE, NUMERAL DENOTES CIRCUIT NUMBER, "b" SUBSCRIPT DENOTES SWITCH CONTROL WHERE SHOWN. FIXTURES THAT ARE FILLED IN HALF OF FULL SOLID DENOTE FIXTURES WITH BACKUP EMERGENCY BATTERY BALLAST.

LIGHTING CONTROL SWITCHES

MOUNT 4'-0" AFF UNLESS NOTED OTHERWISE.

S_{TMa} — SINGLE POLE 0-120 MINUTE TIMER SWITCH (120/277V). "a" SUBSCRIPT DENOTES CIRCUITS CONTROLLED.

S_{a} — SINGLE POLE SWITCH (120/277V). "a" SUBSCRIPT DENOTES CIRCUITS CONTROLLED.

RECEPTACLES

DUPLEX CONVENIENCE OUTLET RATED 20A, 125V. U-SLOT GROUNDED TYPE MOUNTED 18" ABOVE FINISHED FLOOR TO CENTER LINE. ALL OTHER MOUNTING HEIGHTS SHALL BE AS NOTED ADJACENT TO THE SYMBOL. REFER TO RECEPTACLE ABBREVIATIONS FOR SPECIAL PURPOSE RECEPTACLES.

SPECIAL PURPOSE RECEPTACLE. REFER TO PLANS FOR NEMA CONFIGURATIONS

POWER DISTRIBUTION EQUIPMENT

PANELBOARD. SURFACE MOUNTED

J — JUNCTION BOX WITH BLANK COVERPLATE, SIZE AS REQUIRED BY N.E.C.

S_{MS} — THERMAL MOTOR SWITCH

ABBREVIATIONS

AFF	ABOVE FINISHED FLOOR
AC	ALTERNATING CURRENT
A	AMPERE
AF	AMP FRAME
AT	AMP TRIP
ATC	AUTOMATIC TEMPERATURE CONTROLS
ATS	AUTOMATIC TRANSFER SWITCH
BKR	BREAKER
C	CONDUIT
CKT	CIRCUIT
CB	CIRCUIT BREAKER
EC	ELECTRICAL CONTRACTOR
EMT	ELECTRIC METALLIC TUBING
EWC	ELECTRIC WATER COOLER
EWH	ELECTRIC WATER HEATER
EF	EXHAUST FAN
FL	FLOOR
FLA	FULL LOAD AMPERE
GC	GENERAL CONTRACTOR
GFI	GROUND FAULT INTERRUPTER
GND	GROUND
HOA	HAND OFF AUTOMATIC
HP	HORSEPOWER
IG	ISOLATED GROUND
JB	JUNCTION BOX
KVA	KILOVOLT AMPERES
KW	KILOWATT
MCB	MAIN CIRCUIT BREAKER
MLO	MAIN LUGS ONLY
MC	MECHANICAL CONTRACTOR
MTD	MOUNTED
MTG	MOUNTING
NMC	NON-METALLIC CONDUIT
NC	NORMALLY CLOSED
NO	NORMALLY OPEN
NA	NOT APPLICABLE
NIC	NOT IN CONTRACT
NTS	NOT TO SCALE
PNL	PANELBOARD
PH	PHASE
PVC	POLYVINYL CHLORIDE CONDUIT
RSC	RIGID GALVANIZED STEEL CONDUIT
SF	SUPPLY FAN
SS	SAFETY SWITCH
TEL	TELEPHONE
TRF	TRANSFORMER
V	VOLTS
W	WATTS OR WIRE
WP	WEATHERPROOF
4WSN	4-WIRE SOLID NEUTRAL

RECEPTACLE ABBREVIATIONS

GFI	GROUND FAULT CIRCUIT INTERUPTER, PERSONAL PROTECTION
WP	WEATHERPROOF RECEPTACLE WITH COVERPLATE LISTED FOR WET LOCATION WITH AN ATTACHMENT PLUG INSERTED.

SITE INSPECTION AND VISITATION

THE ELECTRICAL CONTRACTOR SHALL VISIT THE SITE AND INSPECT EXISTING CONDITIONS, SERVICES, CONDUITS, SPATIAL CONSIDERATIONS AND ALL OTHER PERTINENT CONDITIONS TO FULLY FAMILIARIZE HIMSELF WITH CONDITIONS TO BE ENCOUNTERED IN THE PERFORMANCE OF THIS WORK. THE ELECTRICAL SUBCONTRACTOR SHALL ALSO COORDINATE WITH THE GENERAL CONTRACTOR THE INSTALLATION OF THE ELECTRICAL SYSTEMS. FAILURE TO DO SO SHALL NOT RELIEVE THE ELECTRICAL SUBCONTRACTOR OF THE RESPONSIBILITY FOR FULL COMPLETION OF THE WORK IN ACCORDANCE WITH THE DRAWINGS AND SPECIFICATIONS. VERIFY EXISTING SERVICES WHICH WILL BE UTILIZED FOR CONNECTION TO THE NEW SYSTEM. IF DISCREPANCIES EXIST BETWEEN THE CONTRACT DRAWINGS AND THE ACTUAL EXISTING CONDITIONS, THE ELECTRICAL SUBCONTRACTOR SHALL NOTIFY THE OWNER/ENGINEER PRIOR TO PROCEEDING WITH INSTALLATION.

GENERAL NOTES

1. DRAWINGS ARE DIAGRAMMATIC ONLY. THE EXACT LOCATION, MOUNTING HEIGHTS, SIZE OF EQUIPMENT AND ROUTING OF RACEWAYS SHALL BE COORDINATED AND DETERMINED IN THE FIELD.
2. ALL STRAIGHT FEEDER, BRANCH CIRCUIT AND AUXILIARY SYSTEM CONDUIT RUNS SHALL BE PROVIDED WITH SUFFICIENT PULL BOXES TO LIMIT THE MAXIMUM LENGTH OF ANY SINGLE CABLE PULL TO 150 FEET. EXACT SIZES OF PULL BOXES AND LOCATIONS TO BE DETERMINED IN THE FIELD BY THE ELECTRICAL CONTRACTOR.
3. SLEEVES ARE TO BE UTILIZED FOR PASSAGE OF CONDUITS THROUGH FLOORS OR WALLS.
4. ALL LIGHTING FIXTURES, ELECTRICAL DEVICES, CABLES AND RACEWAYS ARE TO BE INDEPENDENTLY SUPPORTED. FIXTURES ARE TO BE SUPPORTED FROM THE STRUCTURE.
5. COMBINED HOMERUNS OF TWO (2) OR THREE (3) CIRCUITS MAY BE UTILIZED. HOWEVER, THE NEUTRAL CONDUCTOR IS TO BE INCREASED TO #10AWG. COMBINED HOMERUNS ARE TO BE LIMITED TO 20A, LIGHTING AND POWER CIRCUITS.
6. WORK SHALL CONIFORM TO THE MASSACHUSETTS ELECTRICAL CODE, MASSACHUSETTS BUILDING CODE, NFPA AND REQUIREMENTS OF LOCAL AUTHORITIES HAVING JURISDICTION.
7. THE WORD "CONTRACTOR" AS USED IN THE "ELECTRICAL WORK" SHALL MEAN THE ELECTRICAL SUBCONTRACTOR.
8. CONTRACTOR SHALL PAY FOR ALL PERMITS, INSURANCE AND TESTS, AND SHALL PROVIDE LABOR AND MATERIAL TO COMPLETE THE ELECTRICAL WORK SHOWN.
9. EXCEPT AS OTHERWISE NOTED, THE ELECTRICAL WORK SHALL INCLUDE PANELBOARDS, CIRCUIT BREAKERS, FEEDERS, WIRING, RACEWAYS, LIGHTING FIXTURES AND CONNECTION NECESSARY TO OPERATE EQUIPMENT.
10. THE ELECTRICAL CONTRACTOR SHALL PROVIDE ALL TEMPORARY LIGHTING AND POWER AND THE GENERAL CONTRACTOR SHALL PAY ALL ENERGY CHARGES.
11. DURING CONSTRUCTION, THE ELECTRICAL CONTRACTOR SHALL KEEP HIS PORTION OF THE WORK NEAT, CLEAN AND ORDERLY.
12. ALL SYSTEMS SHALL BE TESTED FOR SHORT CIRCUIT AND GROUNDS PRIOR TO ENERGIZING AND ANY DEFECTS SHALL BE CORRECTED.
13. COMPLETE SHOP DRAWINGS SHALL BE SUBMITTED FOR ELECTRICAL EQUIPMENT. WHERE SPECIFIED, LIGHTING EQUIPMENT IS SUBSTITUTED. THE ELECTRICAL CONTRACTOR SHALL SUBMIT COMPLETE SPECIFICATIONS ON THE SUBSTITUTE AS WELL AS THE ITEM ORIGINALLY SPECIFIED.
14. MATERIALS SHALL BE SPECIFICATION GRADE AND UL LISTED.
15. WHERE MATERIAL IS CALLED OUT IN THE LEGEND BY MANUFACTURER, TYPE OR CATALOG NUMBER, SUCH DESIGNATIONS ARE TO ESTABLISH STANDARDS OR DESIRED QUALITY. ACCEPTANCE OR REJECTIONS OF PROPOSED SUBSTITUTIONS SHALL BE SUBJECT TO THE APPROVAL OF THE OWNER.
16. WORK SHALL BE COORDINATED WITH THAT OF OTHER TRADES TO ELIMINATE INTERFERENCES.
17. ELECTRICAL WORK SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FROM DATE OF WHICH SYSTEM IS PUT INTO SERVICE.
18. WORK SHALL BE GROUNDED IN ACCORDANCE WITH CODE REQUIREMENTS. COMPLETE EQUIPMENT (INSULATED GREEN WIRE) GROUNDING SYSTEM SHALL BE INSTALLED.
19. WIRE SHALL BE TYPE "THHN-THWN" INSULATED FOR 600 VOLTS, MINIMUM SIZE #12 AWG COPPER UNLESS SPECIFICALLY NOTED OTHERWISE.
20. WIRING METHODS:
    A. ALL INTERIOR CONDUITS AND BOXES WITH THE SALT SHED SHALL BE PVC COATED RSC CONDUIT.
    B. ALL CLIPS, HANGERS, SUPPORTS AND FASTENERS WITHIN THE NEW SALT SHED SHALL BE STAINLESS STEEL.
22. BOXES SHALL BE PVC COATED GALVANIZED STEEL AND SHALL BE SIZED TO ACCOMMODATE THE EQUIPMENT OR APPARATUS TO BE INSTALLED. WHERE BOXES OF A STANDARD MAKE ARE NOT AVAILABLE, SPECIAL BOXES SHALL BE MANUFACTURED. FIXTURES SUPPORTED ON THE CEILING OR ON THE WALL SHALL HAVE SUITABLE FIXTURE SUPPORT FOR THE SPECIFIC FIXTURE.
23. WALL PLATES SHALL BE PROVIDED FOR EACH SWITCH. PROVIDE WALL PLATES WITH STAINLESS STEEL FINISH FOR ALL DEVICES. SWITCHES SHALL BE WEATHER PROOF AND CORROSION PROOF.
24. FURNISH AND INSTALL SLEEVES IN FLOORS, BEAMS, WALLS, ETC. REQUIRED FOR INSTALLING THIS WORK.
25. LIGHTING FIXTURES SHALL BE INDIVIDUALLY SUPPORTED FROM THE STRUCTURAL BUILDING MEMBER.
26. CONDUIT RUNS AS SHOWN ON THE PLANS ARE DIAGRAMMATIC ONLY; EXACT LOCATION AND METHOD OF SUPPORT SHALL BE DETERMINED IN THE FIELD.
27. CONTRACTOR SHALL CHECK EXISTING CONDITIONS TO DETERMINE EXACT EXTENT OF WORK TO BE PERFORMED PRIOR TO BIDDING. DIMENSIONS RELEVANT TO EXISTING WORK SHALL BE VERIFIED IN THE FIELD.
28. PROVIDE AS-BUILT "CADD" DRAWINGS AT THE COMPLETION OF THE PROJECT.

DEMOLITION NOTES

1. THE ELECTRICAL CONTRACTOR WILL WORK IN CONJUNCTION WITH THE GENERAL CONTRACTOR TO DEMOLISH THE EXISTING ELECTRICAL SYSTEM. THE ELECTRICAL CONTRACTOR IS TO DEACTIVATE, DISCONNECT AND REMOVE THOSE SYSTEMS WHICH WILL BE DEMOLISHED. THE ELECTRICAL CONTRACTOR WILL REMOVE AND DISPOSE OF ALL ELECTRICAL SYSTEM MATERIALS INCLUDING DEVICES, FIXTURES, RACEWAYS, CABLE, MOTOR CONTROLS AND APPURTENANCES. SYSTEMS REQUIRING TOTAL AND/OR PARTIAL DEMOLITION SHALL CONSIST OF BUT NOT BE LIMITED TO THE FOLLOWING:
   A. NORMAL LIGHTING SYSTEM
2. EXISTING SYSTEMS THAT ARE TO REMAIN AND BE PROTECTED DURING DEMOLITION/CONSTRUCTION INCLUDE:
   A. POWER DISTRIBUTION SYSTEM
3. SYSTEMS WHICH PASS THROUGH THE AREA BEING DEMOLISHED BUT CONTINUE TO AREAS NOT WITHIN THE DEMOLITION SCOPE ARE TO REMAIN. THE ELECTRICAL CONTRACTOR IS TO IDENTIFY (SPRAY PAINT OR EQUIVALENT) AND PROTECT THOSE SYSTEMS WHICH ARE ACTIVE AND ARE TO REMAIN.
4. MAKE ANY NECESSARY RE-CIRCUITING, EXTENSIONS OF EXISTING CIRCUITS AND RELOCATIONS REQUIRED TO PROPERLY RE-ENERGIZE REMAINING EXISTING SERVICES OR EQUIPMENT THAT MAY BE INTERFERED WITH BY NEW CONSTRUCTION, REMOVALS OR RELOCATIONS. ALL SHUTDOWNS TO RELOCATE ACTIVE FEEDERS OR BRANCH CIRCUITS WILL BE PERFORMED ON OFF HOURS AS MUTUALLY AGREED TO WITH THE OWNER.
5. PRIOR TO REMOVAL OF EQUIPMENT, CONFIRM THAT FEEDER AND BRANCH CIRCUITS ARE NO LONGER ACTIVE. SHOULD IT BE DISCOVERED THE FEEDER OR BRANCH CIRCUITS ARE ACTIVE, NOTIFY THE ARCHITECT IMMEDIATELY FOR DIRECTION.
6. ELECTRICAL CONTRACTOR IS TO REMOVE ALL LAMPS, BALLASTS AND OTHER ELECTRICAL COMPONENTS CLASSIFIED AS HAZARDOUS MATERIALS. ELECTRICAL CONTRACTOR IS TO OBTAIN THE SERVICES OF A LICENSED HAZARDOUS MATERIALS CONTRACTOR TO DISPOSE OF THE MATERIALS. PROVIDE WRITTEN DOCUMENTATION TO THE OWNER'S REPRESENTATIVE FROM THE HAZARDOUS MATERIALS CONTRACTOR.
7. ELECTRICAL DEMOLITION ABBREVIATIONS:
   "EX" DENOTES EXISTING EQUIPMENT TO REMAIN
   "RE" DENOTES EXISTING EQUIPMENT TO BE DISCONNECTED AND REMOVED ALL EXISTING CONDUIT AND WIRE SHALL BE REMOVED BACK TO ITS SOURCE AND ALL DEVICES ASSOCIATED WITH THE EQUIPMENT SHALL BE REMOVED.

C	LED WALL PACK	COOPER LIGHTING	XTOR2B	1	LED 2135 LUMENS 5000K	WALL	120	18W	COORDINATE LOCATION WITH ARCHITECTURAL DRAWINGS

LIGHTING FIXTURE SCHEDULE REQUIREMENTS

1. FURNISH AND INSTALL ALL MATERIALS, ACCESSORIES AND OTHER EQUIPMENT NECESSARY FOR THE COMPLETE AND PROPER INSTALLATION OF ALL LIGHTING FIXTURES INCLUDED IN THIS CONTRACT. PROVIDE ALL NECESSARY ACCESSORIES AS NECESSARY TO PROVIDE A COMPLETE LIGHTING SYSTEM.
2. SPECIFICATIONS AND DRAWINGS ARE INTENDED TO CONVEY THE FEATURES, FUNCTION AND CHARACTER OF THE FIXTURES ONLY, AND DO NOT UNDERTAKE TO SPECIFY EVERY ITEM OR DETAIL NECESSARY. MINOR DETAILS NECESSARY FOR THE PROPER EXECUTION AND COMPLETION OF THE LIGHTING SYSTEM NOT INDICATED ON THE DRAWINGS NOR SPECIFIED SHALL BE PROVIDED AS IF THEY WERE SPECIFIED HERE OR INDICATED ON THE DRAWINGS.
3. FIXTURES SUBSTITUTIONS (FROM MANUFACTURERS OTHER THAN THOSE LISTED) SHALL BE EQUAL IN ALL RESPECTS OF PERFORMANCE, QUALITY OF CONSTRUCTION, SUITABILITY TO PROJECT CONDITIONS AND APPEARANCE OF THE SPECIFIED FIXTURE. SUBSTITUTIONS SHALL BE SUBMITTED FOR APPROVAL IN THE FORM OF CATALOG CUTS OR DETAIL DRAWINGS. UPON REQUEST SUBMIT SAMPLES OF SUBSTITUTE FIXTURES FOR APPROVAL.
4. THE ELECTRICAL CONTRACTOR SHALL COORDINATE THE LIGHTING FIXTURE INSTALLATION WITH THE DRAWINGS AND DETAIL OF THE ARCHITECTURAL, STRUCTURAL AND OTHER RELATED TRADES TO ASSURE A PERFECT AND EFFICIENT INSTALLATION.
5. INSTALL EACH FIXTURE PROPERLY AND SAFELY. PROVIDE NECESSARY STRUCTURAL SUPPORTS WHERE REQUIRED FOR THE SAFE ATTACHMENT OF ALL LIGHTING FIXTURES. FURNISH AND ERECT HANGERS, RODS, MOUNTING BRACKETS, SUPPORTS AND OTHER EQUIPMENT REQUIRED. COORDINATE CONDUIT ENTRY LOCATIONS WITH FIXTURE MANUFACTURERS PRIOR TO ROUGHING. ALL LIGHTING FIXTURES ARE TO BE INDEPENDENTLY SUPPORTED FROM THE STRUCTUR BY THREADED ROD OR OTHER ENGINEER APPROVED METHODS. CEILING TY-WIRE IS NOT TO BE USED FOR SUPPORT OF LIGHTING FIXTURES. SHOULD CEILING TY-WIRE BE USED IT WILL BE REMOVED AND REPLACED WITH AN APPROVED METHOD AT THE CONTRACTOR'S EXPENSE.
6. INSTALL PENDANT LIGHTING FIXTURES PLUMB AND TRUE, AT THE HEIGHT FROM THE FLOOR SPECIFIED ON THE DRAWINGS. IN CASES WHERE CONDITIONS MAKE THIS IMPRACTICAL, REFER TO THE ARCHITECT FOR A DECISION. USE BALL ALIGNERS AND CANOPIES ON PENDANT FIXTURES UNLESS NOTED OTHERWISE. RIGIDLY ALIGN CONTINUOUS ROWS OF LIGHTING FIXTURES FOR TRUE IN-LINE APPEARANCE. SUPPORT ALL LIGHTING FIXTURES INDEPENDENTLY OF DUCT WORK OR PIPING. WHENEVER A FIXTURE OR ITS HANGER CANOPY IS APPLIED TO A SURFACE MOUNTED OUTLET BOX, PROVIDE A FINISHING RING TO CONCEAL THE OUTLET BOX.
7. EFFECTIVELY PROTECT ALL LIGHTING EQUIPMENT AGAINST DAMAGE FROM THE TIME OF FABRICATION TO FINAL ACCEPTANCE OF THE WORK. INSTALL REFLECTOR CONES, BAFFLES, APERTURE PLATES, LIGHT CONTROLLING ELEMENT FOR AIR HANDLING FIXTURES, AND DECORATIVE ELEMENTS AFTER COMPLETION OF CEILING TILES, PAINTING AND GENERAL CLEANUP. REPLACE BLEMISHED, DAMAGED OR UNSATISFACTORY FIXTURES AS DIRECTED.
8. AT THE TIME OF FINAL ACCEPTANCE BY THE OWNER, ALL LIGHTING FIXTURES SHALL HAVE BEEN THOROUGHLY CLEANED WITH MATERIALS AND METHODS RECOMMENDED BY THE MANUFACTURERS, ALL BROKEN PARTS SHALL HAVE BEEN REPLACED, AND ALL LAMPS SHALL BE OPERATING.

DRAWING NOTES:

1. REFER TO DRAWING E001 FOR LEGEND, ABBREVIATIONS, GENERAL NOTES AND DEMO NOTES.
2. ALL ELECTRICAL EQUIPMENT WITHIN THE SALT SHED (INCLUDING BUT NOT LIMITED TO OUTLETS, SWITCHES, JUNCTION BOXES, PANELS, ETC) SHALL BE WEATHERPROOF/CORROSIVE RESISTANT RATED.

JAMES FAIR, PE

BACKGROUND

2020-Present
Senior Team Leader / Senior Associate
Weston & Sampson

2003-2020
Project Manager
Weston & Sampson

2001-2003
Senior Engineer
Weston & Sampson

2000-2001
Engineer
Lynnfield Engineering, Inc.

1998-2000
Engineer
Whitman, Requardt and Associates, LLP

1995-1998
U.S. Army Corps of Engineers
Aberdeen Proving Grounds, Maryland

EDUCATION

1994
Master of Science
Civil Engineering
Clarkson University

1992
Bachelor of Science
Civil/Environmental Engineering
Clarkson University

PROFESSIONAL REGISTRATION

Professional Engineer:
Massachusetts No. 46434
Maryland No. 23439

PROFESSIONAL TRAINING

CNG Fuel Facility Design Training
10-Hour OSHA Construction Safety Training
EPA Certified Third-Party Inspector

James has over 20 years of environmental engineering experience, including industrial design services for numerous public works facilities. He also has provided engineering services for environmental assessment and remediation projects, including system testing, repair, design, and construction for storage tank projects. In addition, James has worked on landfill, water, and wastewater projects.

SPECIFIC PROJECT EXPERIENCE

Salt Shed Design, Raynham, Massachusetts. Project manager for design, bidding, and construction administration services for a DPW salt shed for the Town of Raynham. The design included a 50' wide X 72' long building with 12' tall pressure treated wood side walls and architectural shingle roof. The scope included site surveys, geotechnical investigations, permitting services, electrical designs for the new salt shed, canopy lighting, and liquid de-icing chemical pumping systems, along with the relocation of the existing flare duct bank to make room for the new structure.

Design Services for Salt Storage Building, Shrewsbury, Massachusetts. Project manager for evaluation, design, and construction administration services for the development of a new salt storage building. Scope included an evaluation report of existing facility, planning level cost estimates, geotechnical and permitting services at the project site, construction administration, and field observation.

Design Services for Salt Storage Building, Burlington, Massachusetts. Project manager for salt shed design, bidding, and construction administration services to replace the town's existing salt shed with a new Hi-Arch Gambrel salt shed. Scope included zoning analysis, planning board and conservation commission permitting, site design, construction cost estimates, construction administration, and field observations.

Consolidated DPW and Natural Resources Facility, Orleans, Massachusetts. Industrial engineer responsible for the planning, design, and construction administration of vehicle maintenance, trade shops, and wash bay. Work included meeting with the end user to identify specific equipment needs, preparing shop layouts, preparing and designing industrial specialty equipment, and providing construction oversight for all equipment.

Industrial Engineering for New Department of Public Works Facility, Hopkinton, Massachusetts. Industrial engineer for design and construction administration services for fleet maintenance, wash bay, and trade shop equipment. Services included meeting with DPW staff to identify equipment options, review of contractor shop drawings during construction, and final inspection of installed equipment. Equipment included, but was not limited to, vehicle lifts, tailpipe exhaust removal systems, fluid storage and distribution systems, trade shop equipment (drill presses, grinder, table saws, etc.), vehicle wash system, vehicle fueling system, and overhead bridge cranes.

PROFESSIONAL CERTIFICATIONS

Engineer-in-Training (EIT): Massachusetts
OSHA 40-Hour Hazardous Waste Operations

PROFESSIONAL ASSOCIATIONS

American Society of Civil Engineers (ASCE)
Order of Engineers

Tyler is an engineer with experience in field and office duties related to facilities, wastewater, water, and environmental engineering projects, including data analysis, cost estimations, permitting, client interactions, and field work. His technical skills include AutoCAD, HyrdoCAD, MATLAB, ArcView, and Argus ONE.

SPECIFIC PROJECT EXPERIENCE

Design Services for Salt Storage Building, Burlington, Massachusetts. Assisted with project management and client communication tasks. Performed zoning analysis and compiled planning board and conservation commission permitting applications. Performed civil site design, which included grading and drainage, site layout, stormwater and cut and fill calculations. Was involved with planning level construction cost estimates, construction administration, and field observations. The project scope included the replacement of the town's existing salt shed with a new Hi-Arch Gambrel salt shed. The project also included site grading, providing new catch basins, new retaining walls, infiltration trenches and site paving.

Salt Shed Design, Raynham, Massachusetts. Performed the zoning analysis, prepared and submitted the site plan application, and appeared as the town's representative during the planning board hearing. Performed the civil site, grading, and drainage, cut and fill analysis, and the stormwater design for the project. Was involved with planning level construction cost estimates, construction administration and field observations. The project was to replace the town's existing salt shed with a new 50' wide X 72' long Hi-Arch Gambrel salt shed. The project included earthwork, updating grading and drainage patterns, paving and analysis for reuse of the existing catch basins and infiltration basin system.

Design Services for Salt Storage Building, Shrewsbury, Massachusetts. Responsible for the project design schedule and managing the design team, which included geotechnical engineers, architects, and electrical engineers, for the replacement of the town's existing salt shed with a new Hi-Arch Gambrel salt shed. Performed civil site design, which included grading and drainage, site layout, stormwater, and cut and fill calculations. Was involved with planning level construction cost estimates, construction administration, and field observations. The project included earthwork, updating grading and drainage patterns, paving, and providing new stormwater management features, including infiltration trenches, deep sump hooded catch basins, oil water separators, and grass swales.

New Fueling Facility, Orleans, Massachusetts. Assisted with the design of a new vehicle fueling system for town, which included a 10,000-gallon double-walled above ground storage tank with interstitial monitoring. Designed the fueling facility to allow remote monitoring of the fuel management system and tank monitoring system from the town's Police Department at a separate site.

New DPW Facility, Mansfield, Massachusetts. Assisted with the DPW industrial equipment design for the new facility, which included a 5-ton capacity bridge crane, a new lubrication distribution system, and multiple vehicle lifting systems.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

DEPARTMENT OF PUBLIC WORKS
Administration & Engineering–Water–Sewer–Facilities
Park & Forestry–Highway–Sanitation–Cemetery–Fleet

CITY OF MELROSE

Elena Proakis Ellis, P.E., BCEE
Director of Public Works/City Engineer

City Hall, 562 Main Street
Melrose, Massachusetts 02176
Telephone - (781) 979-4172
E-mail: eproakis@cityofmelrose.org

MEMORANDUM

Date: **July 13, 2020**

To: **File**

From: **Elena Proakis Ellis, P.E.**

Subject: **Recommendation for Salt Shed Design Consultant**

The City put out a Request for Qualifications (RFQ) in spring 2020 to procure a design consultant for the City's salt shed project. Statements of Qualifications and fee proposals were due on June 3, 2020. Three consultants submitted their qualifications for consideration:

- Bayside Engineering (with Fitzemeyer & Tocci)
- DiGiorgio Associates
- Weston & Sampson Engineers

After reviewing the proposals individually, the selection committee met on Wednesday, July 8, 2020 in order to discuss the final selection. The selection committee consisted of myself along with Jim Troup, Jay McNeil, and Peter Pietrantonio. Three of the members of the selection committee assigned numerical rankings, as shown below, and the fourth provided general feedback.

SELECTION CRITERIA
The selection criteria as specified in the Request for Qualifications were as follows:

Threshold Criteria

1. *In order for proposals to be considered, they must comply with all submission requirements.*
2. *Proposals that lack experience working with municipalities or other government/public agencies will not be considered.*
3. *The proposal must clearly demonstrate that the consultant understands the required scope and schedule and is capable of providing all services described herein in a timely manner.*

Performance Criteria - Proposals will be preferred which give evidence of:

1. *Understanding of the goals of the City;*
2. *Quality of the project approach and its ability provide the maximum benefit to advance project objectives;*
3. *Experience with similar projects;*

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4. *Quality and experience of the consultant's core team;*
5. *History of completing projects on schedule and within budget;*
6. *Positive feedback from references provided; and*
7. *Capacity to complete the job on schedule, including: office location, appropriate and available staffing, computer equipment, financial stability of the firm, current projects, and other major project commitments.*

VI. AWARD

A. The Contract shall be awarded to the consultant that the City deems to be the best fit for the project, using the evaluation criteria noted above.

B. The City reserves the right to reject any and all proposals, in part or in whole, if it deems it to be in the best interest of the City.

RANKING OF PROPOSALS

The proposals received were reviewed in detail and were ranked according to the criteria listed above on a scale of 1 to 5, with 5 being "Highly Advantageous" and 1 being "Not Advantageous." The table below presents the results.

Selection Criteria	Bayside	DAI	Weston & Sampson
Compliance with Submission Requirements	✓	✓	✓
Municipal Experience	✓	✓	✓
Understanding of Scope/Ability to Perform	✓	✓	✓
Understanding of City's Goals	5+3+4 = 12	3+3+4 = 10	5+4+4 = 13
Project Approach – Quality	5+3+4 = 12	3+3+4 = 10	5+4+4 = 13
Experience with Similar Projects	5+3+4 = 12	4+2+4 = 10	4+4+4 = 12
Experience of Team	5+4+4 = 13	4+4+4 = 12	5+4+5 = 14
Project Completion History	4+3+4 = 11	5+3+4 = 12	5+4+5 = 14
Feedback from References	3+3+3 = 12	*	5+5+5 = 15
Capacity to Complete Project	4+3+5 = 12	5+3+4 = 12	4+4+5 = 13
TOTAL QUALIFICATIONS RANKING	**28**	**22**	**31.3**

* References for DAI were not called based on their aggregate ranking in other categories.

Based on the qualifications rankings, Weston and Sampson ranked the highest. The price proposals received were as follows:

- Bayside/Fitzemeyer & Tocci: $77,705 (an additional price was provided for construction administration, but that was not requested in the RFQ so is not included herein)
- DiGiorgio: $65,000 (survey services were not included)
- Weston & Sampson: $98,918

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

The selection committee recommends that the value-added for selection of the highest ranked firm is consistent with the price proposal. Advantages of the highest ranked firm include:

- Greater breadth of salt shed design types, with more flexibility
- The project team has extensive experience with the design of whole DPW complexes, including considerations for circulation, vehicle storage needs, treatment of salt using pump systems to minimize salt usage, etc., which may be useful in making decisions about the salt shed and its interaction with the other site elements
- Exceptional references from other cities and towns
- Excellent quality proposal that met every request from the RFQ

The proposal from DiGiorgio Associates was lacking some of the requested information, such as the original and final design fees from past projects. It was also not well-organized, it exceeded the page limit, and the fee proposal excluded items specifically requested in the RFQ scope of work. The fee also excluded other elements that would be components of a complete engineering design project.

Bayside Engineers were a close second to Weston and Sampson and also submitted a well-organized and thorough proposal. Their project team was determined to be less versatile than Weston and Sampson's, although possessing many of the same skills. References, however, were challenging because two of the four references provided were not able to be reached due to an old phone number and another employee no longer working for the town for which they were listed. The references who were reached gave good reviews of their work, but not nearly to the degree that Weston and Sampson's references spoke highly of their projects.

RECOMMENDATION

Based on the information included herein, the selection committee recommends awarding the design contract to Weston and Sampson Engineers.

RE: **Weston and Sampson Salt Shed Assessment Report**

For your information, the City of Melrose DPW has attached Weston and Sampson's Salt Shed Assessment Report to Order-2020-76 ID#7886 for the previously approved loan for the Department of Public Works' Salt Shed design. This order originally appeared in front of the Council and Appropriations Committee in the spring of 2020.

In summary, the report identifies the current conditions, proposes a variety structures for consideration, presents cost estimates for each of the replacement shed options, proposes value added features that maximize the efficiency of the winter operations, includes photographs of current conditions, provides site plan and zoning maps of the property and surrounding area, and offers recommendations.

The report reinforces the priority that the salt shed be fully replaced and is beyond repair. Weston and Sampson continues to work with the City and the DPW toward the final design in hopes that construction will be complete before the winter of 2021.

Please feel welcome to contact me with any questions you may have.

Thank you for your consideration and continued support.

Appendix D ..... Melrose Zoning Map

Appendix E ..... FEMA Flood Map

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

1.0 INTRODUCTION

Within the following report, Weston & Sampson provides an assessment of the City's existing salt shed located at 72 Tremont Street, and performs an alternatives analysis that describes and compares the benefits and disadvantages between three different salt shed designs. Weston & Sampson also investigates the possible addition of salt shed accessories that include a portable loading ramp, brine spray system, and lean-to canopy, which all provide potential benefits to the DPW snow fighting operations.

After observing the existing salt shed, it was determined the re-use or renovation of the existing salt shed is not recommended due to the amount and nature of the deficiencies needed to be addressed. Additional details on the Structural Engineer's existing salt shed assessment are provided in the existing conditions memo, found in Appendix A.

The DPW yard is located approximately 200 ft west of Ell Pond and falls within the 100-year flood plain as defined by the most recent FEMA Flood Insurance Rate Map. Since the City may construct a new salt shed to replace the existing salt shed, Weston & Sampson reviewed the applicable regulations regarding the construction of new structures within a flood hazard area, and provides a summary describing how these regulations may affect the replacement of the existing salt shed. The summary of Weston & Sampson's findings can be found in Section 2 of this report.

To date, Weston & Sampson has conducted multiple meetings and site visits with the City and has performed observations, wetland delineation, and site survey at the City Yard. The alternatives selected for analysis herein are based on the information gathered at the Melrose site, along with extensive experience by the Weston & Sampson project team with salt sheds, DPW operations and facility design.

The three salt shed replacement alternatives that were considered include a new gable salt shed, fabric salt shed, and a high arch gambrel style salt shed structure. Each option would meet the property line setbacks and height restrictions for the Rail Corridor Overlay District as described in the Melrose Zoning Ordinance, and as shown on the zoning map found in Appendix D. Summaries and estimated construction costs for each alternative are provided in Section 3 below. The costs that are provided in this report are preliminary concept level estimates and will need to be verified through the ongoing design process and geotechnical evaluation.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

2.0 FLOOD PLAIN ASSESSMENT

The Melrose DPW yard is located at 72 Tremont Street, which is approximately 200 ft West of Ell Pond. The land around Ell Pond is associated with a 100-year flood plain with an elevation of 49.9 ft according to the most recent FEMA Flood Insurance Rate Map dated 2018. A copy of the flood map can be found in Appendix E.

According to the current Massachusetts Building Code, 780 CMR 9th edition, the design and construction of buildings located within flood hazard areas shall be in accordance with ASCE 24-14. ASCE provides minimum elevations for the lowest floor of buildings relative to the base flood elevation corresponding to the flood class design of the building.

Flood Design Class 1 applies to buildings or structures that normally are unoccupied and pose minimal risk to the public or minimal disruption to the community should they be damaged or fail due to flooding. Examples include temporary structures, accessory storage buildings and minor storage facilities. It is Weston & Sampson's opinion that the Melrose salt shed falls under the above definition of a Flood Design Class 1, allowing the new salt shed to match the existing finished floor elevation of approximately 47.75 ft, which is below the 100 year flood elevation of 49.9 ft, provided that the salt shed is constructed from flood damage-resistant materials such as concrete or pressure treated wood. An existing conditions plan showing the location of the existing salt shed relative to the 49.9 ft flood plain elevation can be found in Appendix B.

All three of the following salt shed options are designed with flood damage-resistant materials that meet the requirement for new structures built within flood hazard zones. It is recommended that the city pursues additional measures to address a potential flood, such as the deployment of sandbags or a water-gate flood barrier to provide protection for the salt shed end entrance.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.0 SALT SHED REPLACEMENT COMPARISON

For the replacement of the existing salt shed, three distinctive design options were considered. Below are descriptions and summaries for each option.

3.1 Option 1 - Gable End Salt Shed

The gable end structure is a wood building with a metal roof similar in design to the existing salt shed. The structure would match the 100 ft by 40 ft footprint of the existing salt shed with an overall building height of approximately 30 ft. The front of the shed will have a 16 ft wide by 20 ft tall opening in the front of the shed matching the existing salt shed. The structure includes 6 ft tall pressure treated wood push walls and provides a storage capacity of approximately 1,200 tons of salt when fully loaded. The estimated initial capital costs for this structure is approximately $1,008,600 which includes construction contingency. For a detailed breakdown of the estimated concept level costs see Appendix C. The expected useful life span for this salt shed design is approximately 35 years based on information provided by the salt shed supplier and industry standards.

The gable end salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options, as described below:

Benefits

- Provides a solid wood structure with a metal roof which is more durable than the fabric structure.

Disadvantages

- Roof trusses are more prone to damage by loaders due to low height, which will lead to more maintenance costs associated with the ownership of this style of salt shed throughout the life of the shed. Similar damage can be seen in the existing salt shed.
- The 6 ft tall wood push walls require the building footprint to be larger than the high arch gambrel salt shed to achieve the minimum storage capacity of 1,200 tons of salt.
- Requires the highest initial capital cost.
- Requires salt deliveries to be dumped outside of the salt shed, which requires double handling of the product to load it into the salt shed. This also increases the possibility of residual salt being left behind outside the structure, which can enter the stormwater system.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.2 Option 2 - Fabric Structure

The fabric structure salt shed is made from a galvanized steel frame wrapped in a heavy-duty fabric that sits on top of a 6 ft tall concrete block wall. To provide additional protection from the salt environment, the entire steel framework is galvanized after fabrication, providing a stronger zinc coating that prevents the steel frame from rusting in the corrosive environment of the salt shed. The fabric salt shed would have a 16 ft wide by 20 ft tall opening in the front to match the existing shed. The fabric salt shed would match the 100 ft by 40 ft footprint of the existing shed with an overall height of approximately 31 ft. The fabric salt shed structure would hold approximately 1,200 tons of salt when fully loaded. The estimated initial capital cost for this structure is approximately $705,900. For a detailed breakdown of the estimated conceptual costs see Appendix C. The expected useful life span for steel frame and concrete block wall is approximately 35 years, with periodic replacement of the fabric cover, based on information provided by the salt shed supplier.

The fabric structure salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options:

Benefits

- Lowest initial capital cost.
- Requires less soil excavation because the concrete block walls do not require a full depth foundation.
- The sidewalls are constructed with concrete block walls which are very durable.

Disadvantages

- The steel superstructure is more prone to damage from equipment due to the low height, which will lead to more maintenance costs associated with the ownership of this style of salt shed. Small rips in the salt shed fabric, if gone unnoticed, can lead to extensive damage causing the need for the replacement of the entire fabric cover.
- The fabric cover of the salt shed will need periodic replacement. The manufacturer states that the cover may need to be replaced every 15-20 years if it is not accidentally damaged earlier from DPW operations. The manufacturer estimates that the replacement of the fabric cover would cost around $10,000 which includes materials and labor.
- The 6 ft tall concrete block push walls require the building footprint to be larger than the high arch gambrel salt shed to achieve the minimum storage capacity of 1,200 tons of salt.
- The fabric salt shed could be designed to accommodate solar panels in the future, however every time the fabric cover needs to be replaced the solar panels would need to be taken down to allow the cover to be removed and replaced, which would add additional costs above the $10,000 replacement cost for the fabric cover.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

3.3 Option 3 - High Arch Gambrel Salt Shed

A high-arch gambrel salt shed is a wood structure with a metal roof provided with 12 ft tall pressure treated wood push walls with an overall building height of approximately 40 ft. The high arch gambrel salt shed would have a footprint of 72 ft by 40 ft, which is approximately 28 ft shorter than the existing salt shed building, with a salt storage capacity of approximately 1,300 tons when fully loaded. The high arch gambrel would provide an interior vertical clearance of 30 ft including a 16 ft wide and 30 ft tall entrance way. The estimated initial capital cost for this structure is approximately $911,800. For a detailed breakdown of the estimated conceptual costs see Appendix C. The expected useful life span for this salt shed design is greater than 35 years, based on information from the salt shed supplier and industry standards.

The high arch gambrel salt shed design would provide the following benefits and disadvantages, compared to the other two salt shed options:

Benefits

- The 30 ft interior clearance provided by the high arch gambrel greatly reduces the risk of damage to interior roof trusses, which minimizes the potential for future maintenance due to damage throughout the life span of the structure.
- The 30 ft interior clearance allows salt deliveries to be dumped directly into the salt shed, which would lead to annual savings by eliminating the need for double handling of product, and reduces the potential for salt run-off leaving the site.
- The 12 ft tall push walls allow the structure to store the required 1,200 tons of salt within a much smaller building footprint. The reduced footprint would provide approximately 1,100 square feet of additional yard area that the DPW could allocate for another purpose, which would help alleviate some of the operational constraints that are associated with having a crowded yard area.
- The reduced footprint would allow for the possible addition of a lean-to canopy off the rear of the salt shed, which would provide an additional covered storage area to be utilized by the DPW. The addition of the rear lean-to is estimated to cost approximately $65,000.

Disadvantages

- The high arch gambrel salt shed would require a more expensive initial capital cost compared to the fabric structure.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

4.0 SALT SHED ASSESSORIES

4.1 Brine Spray System - $50,200

In discussions with the DPW, a product called Magic Minus Zero is used to treat the salt stored in the salt shed. Treating the salt with this product allows the DPW to reduce the amount of salt applied to the roads during a snow storm, as this product allows the salt to stay on the road better by reducing bounce and scatter. The product also helps to melt the ice at lower temperatures. The addition of a brine spray system would reduce the amount of time it takes to treat the salt with the Magic Minus product.

4.2 Portable Loading Ramp - $52,700

Loading ramps allow operators to see into the back of plow trucks, allowing them to load salt more accurately into the sander bodies, reducing the potential for losing salt during the loading process.

Currently the Melrose DPW yard does not have a loading ramp. Due to the tight working areas on the site, it does not make sense to install a permanent loading ramp, as it would not be used during the non-snow fighting season and would take up valuable space. Weston & Sampson investigated the possibility of providing a portable loading ramp that could be installed at the beginning of the snow fighting season and taken down during the rest of the year. A possible solution was found in a product sold by Nation Ramps, as shown in the picture to the right. The addition of this ramp would be beneficial to the salt loading operations performed by the DPW.

4.3 Lean-to Canopy - $65,100

With the high arch gambrel option there is the possibility to install a rear facing lean-to canopy like what is shown in the picture on the right. The addition of the canopy would allow the additional space, provided by the reduced footprint of the high arch gambrel, to be under a roof that would provide protection from the elements for equipment or materials.

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

5.0 CONCLUSION

After analyzing and discussing the various salt shed replacement options with the DPW, it is recommended that the City replace the existing salt shed with a high-arch gambrel style salt shed, as this design provides the most benefits for the City and DPW operations. This design requires the least amount of maintenance, reduces operational costs, and provides additional yard space which allows flexibility for the use and operation of the DPW yard. The estimated total base project cost for the high arch gambrel salt shed is approximately $986,800, excluding the addition of a portable loading ramp, brine spray system, and a rear canopy lean-too. This cost includes the approximate $911,800 construction cost mentioned above, along with additional design, construction administration services, and contingency as detailed in Appendix C. The additional design costs would only apply if ground improvements are required on the site. During our site walk it was mentioned that the facility was built over a buried peat layer associated with former wetlands in the area, which would require the design and installation of ground improvements, such as rammed aggregate piers. This will be verified during the geotechnical investigation. For early planning purposes, an allowance for a ground improvement program is included in the concept level cost estimates for all structures.

In addition to the salt shed structure itself, the additional options discussed above should be considered to optimize operations. The loading ramp would provide better visibility to the loader operator, minimizing the potential for losing salt while transferring into the back of plow trucks. The brine spray system would allow the City to mix the Magic Minus Plus product with the salt more efficiently, saving on operational costs. The lean-to canopy would allow the DPW to store additional equipment under cover, which provides protection from the weather for equipment currently stored outdoors. With the addition of these recommended accessories, the total estimated project cost would be approximately $1,154,700, which is in addition to the design cost already allocated. (see Appendix C for more details).

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

APPENDIX A

Existing Salt Shed Assessment Memo

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

November 13, 2020

Jamie Fair, P.E.
Facilities Senior Team Leader
55 Walker Brook Drive, Reading, MA

Dear Jamie,

The Melrose DPW Salt Shed is a timber framed structure with timber columns, walls, and prefabricated trusses. The building is approximately 40ft Wide by 100ft Long and approximately 30ft High. The structure was built in 1974 and is used is to store and treat salt. The structure appears to have gone through a number of repairs throughout its lifetime. The following structural deficiencies were identified.

1. Damaged Metal Roofing (A number of holes leading to water intrusion)
2. Damaged Louvers at front and rear of the building
3. Checking/splitting in timber siding, holes in siding
4. Painted timber siding is peeling/chipping
5. Bowing of timber siding at base of walls
6. Trim at roof level is deteriorating or missing (Some trim has been replaced)
7. Corrosion in steel connections at that joining the timber columns to the foundation
8. Minor spalling in concrete foundations
9. Damaged prefabricated timber trusses (Some chords of the trusses have been sistered)
10. Damaged/missing truss bracing
11. Timber push wall are significantly deteriorated
12. Rotting/abrasion damage to interior wall panels
13. Abrasion damage to exterior kickers
14. Entire backwall of building is bowing and/or had completely failed.
15. Damaged exterior lights
16. Damaged Lintel at front of building

The list above outlines structural items that should be addressed as soon as practical and the trusses and bracing shall be investigated further as this is potentially a hazardous condition. Note that the evaluation is based on visual observation from the ground level. No structural calculations were performed. Photos outlining some of these deficiencies are attached below. Considering the amount and nature of the deficiencies, it is our recommendation to completely replace the structure in lieu of trying to repair/address all these issues. We recommend follow-up site visits by a design professional every three to six months to monitor deterioration.

Please reach out with any questions, westernc@wseinc.com, 508-698-3034 x7427.

Thanks,

Connor Western, P.E.
Senior Project Engineer

Owners Contingency	$	10,000	Additional funding for testing/engineering/permitting services, if needed

Total Project Cost	**$**	**1,083,578**	**See assumptions below**

Including Brine Spray System	**$**	**1,133,778**
Including loading ramp	**$**	**1,136,288**
Including both Spray System and Loading Ramp	**$**	**1,186,488**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 6' tall pressure treated heavy duty timber framed salt shed side walls.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed will occupy the footprint of the existing salt shed, and will be a gable end structure, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. Assumes no additional measures are required to protect salt shed from 100 year flood

Additional site development/grading allowance	$	20,000	Allowance
Subbase Preparation	$	10,000	From Raynham
Pavement	$	30,000	Assumes 9,000 sqft of paving, 5-inches thick (3" base, 2" top), $110 per tor
Gravel Borrow	$	14,000	Assumes 14-inches beneath pavement at 35$ CY
Ground Improvements	$	120,000	Shrewsbury Bid results
Electrical Work (FSB)	$	24,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	293,100	
Subtotal Construction Cost	$	483,100	
MARK UPS			
Bonds & Insurance	$	12,899	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	27,585	Assume 5.71% (based from Raynham
Contractor Overhead and Profit	$	53,141	Assume 11% (based from Raynham)
Design and Estimating Contingency 10%	$	48,310	Allowance to account for items that may come up during design
ENR Adjusted 1.51% (October 2020 - April 2021)	$	9,438	One year of inflation estimate
Subtotal of Mark Ups	$	151,373	
Subtotal Construction Cost with Mark Ups	$	634,473	Excludes Construction Contingency
10% Construction Contingency	$	63,447	Allowance for unexpected items that may come up during construction
Electrical Back Charge By Power Company	$	8,000	(if needed)
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**705,920**	**Includes Contingency and Back Charge**

Add Brine Spray System			
Ceiling Mounted Brine Spray System	$	40,000	Allowance based on quoted from GVM Calcote
Project mark up (25.5%)	$	10,200	
Total for Brine system	$	50,200	

Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (25.5%)	$	10,710	
Total for Loading Ramp	$	52,710	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Construction Admin	$	36,000	Allowance (excludes ground improvements and soil contamination issues)
Geotechnical Ground Improvements Design and Construction Services	$	24,000	Allowance
Brine System Ceiling Spray Design	$	5,000	Allowance
Total Design, Permitting, Special Services, Const. Admin.	$	65,000	

Owners Contingency	$	10,000	Additional funding for testing/engineering/permitting services, if needed

Total Project Cost	**$**	**780,920**	**See assumptions below**

Including the Brine Spray System	**$**	**831,120**
Including the loading Ramp	**$**	**833,630**
Including both the Brine Spray System and Loading ramp	**$**	**883,830**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, lights and electrical FSB work (filed sub bid contractor)
4. Assumes 12' tall pressure treated heavy duty timber framed salt shed side walls and cast in-place concrete front wall; approx. 30' clearance at end entrance to allow salt trailers to exit with trailer in and allows dumping of salt deliveries inside the salt shed.
5. Costs are conceptual for initial planning purposes and will be verified during design.
6. New salt shed be located in same location as the existing salt shed, and will be a fabric style salt shed, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
11. Assumes no additional measures are required to protect salt shed from 100 year flooc

Notes:
1. One side only for side-by-side two-family dwelling units; outside only for semi-detached row unit.
2. Where off-street parking spaces required by Article VIII of this ordinance are located underground and under the building served by the parking, the maximum building coverage may be increased above the percentage limit set forth in this table. This increase shall represent an increase in building area up to the area of the parking spaces which are put underground.
3. For mixed uses, the minimum lot area shall be increased by 1,000 sq.ft. for each dwelling unit.
4. The maximum front yard shall be 5 feet.

Overlay Districts

Rail Corridor Overlay District

Smart Growth Overlay District

Excerpt from Melrose Zoning Ordinance

(7) Building and structure height.

(a) The maximum permitted height for buildings and structures in an RCOD project shall be four stories and 50 feet, except as follows:

[1] Buildings may be permitted up to five stories and 62 feet in height at the Planning Board's discretion, when appropriate, given site constraints and/or unusual site characteristics and provided that all portions of the building above 50 feet are set back at least 20 feet from all property boundaries and shall be stepped back a minimum of 10 feet from each facade of the floor below, except for those facades which face the commuter rail right-of-way where no upper level step back is required.

[2] Rail Corridor Overlay District projects that exceed four stories and 50 feet in height shall provide additional public amenities in excess of the minimum 10% open space requirement for the RCOD. In the additional public amenity area, projects shall incorporate a courtyard or sitting area that adjoins and is open on one or more sides to the public sidewalk; is open to the public; contains pedestrian amenities such as seating; and is landscaped/ hardscaped to create a separation from the street, to provide shade, to reduce noise, and to mitigate fumes.

Melrose Salt Shed Conceptual Total Project Cost Estimate
5/7/2021
New Fabric Salt Shed - 6' Tall Concrete Block Push Walls
(40' x 100' / 4000 SF , Stores Approx. 1,200 Tons of Salt Completely Full)

CONSTRUCTION			
Item		**Cost**	**Source**
SALT SHED BUILDING COSTS			
Salt Shed Structure	$	209,000	Estimate provided by Iron Horse Structure
Salt Shed Building Sub Total	$	209,000	
ADDITIONAL CONSTRUCTION COSTS			
Demo Existing Salt Shed	$	23,000	Based on quote provided by RSG Contracting on 1/6/21
Soil Disposal Allowance	$	130,000	Assumes contaminated soil disposed at out of state landfill
Dewatering	$	-	Not required based on not having to dig foundations
Additional site development/grading allowance	$	25,000	Allowance
Excavation and Backfill Foundations	$	-	Foundations not required
Subbase Preparation	$	15,000	From Raynham
Pavement	$	27,000	Assumes 7,900 sqft of paving, 5-inches thick (3" base, 2" top), $110 per ton
Dust Monitoring	$	45,000	Allowance
Dense Grade Crushed Stone	$	18,000	Assumes 12-inches beneath pavement at 50$ CY
Ground Improvements	$	161,000	Budgetary estimate from ground improvement contractor
Floodgate at Salt Shed Entrance	$	20,000	Includes material, freight, concrete strip and installation
Electrical Work (FSB)	$	28,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	492,000	
Subtotal Construction Cost	$	701,000	
MARK UPS			
Bonds & Insurance	$	18,717	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	41,096	Assume 5.71% (based from Raynham)
Contractor Overhead and Profit	$	83,689	Assume 11% (based from Raynham)
ENR Adjusted 1.51% (October 2020 - May 2021)	$	12,752	One year of inflation estimate
Subtotal of Mark Ups	$	156,254	
Subtotal Construction Cost with Mark Ups	$	857,254	Excludes Construction Contingency
10% Construction Contingency	$	85,725	Allowance for unexpected items that may come up during construction
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**942,979**	**Includes Contingency**

Add Brine System			
Brine System	$	30,000	Allowance based on quoted from GVM Calcote
Project mark up (19.3%)	$	5,790	
Total for Brine system	$	35,790	
Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (19.3%)	$	8,106	
Total for Loading Ramp	$	50,106	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Additional Design Fees #1	$	15,300	Amendment #1 (2/6/21)

Melrose Salt Shed Conceptual Total Project Cost Estimate
5/7/2021
New High Arch Gambrel - 12ft Tall Wood Walls
(40' x 72' / 2880 SF , Stores Approx. 1,300 Tons of Salt)

CONSTRUCTION			
Item		**Cost**	**Source**
SALT SHED BUILDING COSTS			
Concrete Foundations	$	30,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Wall Panel & Bracing	$	116,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Updated siding	$	20,000	Estimate from salt shed developer
Electrical panel roof	$	3,000	Allowance
Trusses	$	105,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Plywood Roof	$	19,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Trim	$	9,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Paint	$	12,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Metal Roof (FSB)	$	77,000	Raynham Salt Shed Bid Results - Adjusted for Current Market Conditions
Salt Shed Building Sub Total	$	391,000	
ADDITIONAL CONSTRUCTION COSTS			
Demo Existing Salt Shed	$	23,000	Based on quote provided by RSG Contracting on 1/6/21
Soil Disposal Allowance	$	141,000	Assumes contaminated soil disposed at out of state landfill
Dewatering	$	15,000	Allowance, groundwater contaminated
Additional site development/grading allowance	$	25,000	Allowance
Excavation and backfill of foundations	$	30,000	From Raynham
Subbase preparation	$	15,000	From Raynham
Pavement	$	27,000	Assumes 7,900 sqft of paving, 5-inches thick (3" base, 2" top), $110 per ton
Dust Monitoring	$	45,000	Allowance
Dense grade crushed stone base material	$	18,000	Assumes 12-inches beneath pavement at 50$ CY
Ground Improvements	$	161,000	Budgetary estimate from ground improvement contractor
Floodgate at Salt shed Entrance	$	20,000	Includes material, freight, concrete strip and installation
Electrical Work (FSB)	$	28,000	Shrewsbury Bid results
Additional Construction Cost Sub Total	$	548,000	
Subtotal Construction Cost	$	939,000	
MARK UPS			
Bonds & Insurance	$	25,071	Assume 2.67% (based from Raynham)
General Conditions/Supervision	$	55,048	Assume 5.71% (based from Raynham)
Contractor Overhead and Profit	$	112,103	Assume 11% (based from Raynham)
ENR Adjusted 1.51% (October 2020 - May 2021)	$	17,081	One year of inflation estimate
Subtotal of Mark Ups	$	209,304	
Subtotal Construction Cost with Mark Ups	$	1,148,304	Excludes Construction Contingency
10% Construction Contingency	$	114,830	Allowance for unexpected items that may come up during construction
TOTAL CONSTRUCTION COST ESTIMATE	**$**	**1,263,135**	**Includes Contingency**

Add Lean-to off Rear of Canopy			
Rear canopy	$	72,000	Base on Raynham Bid results (includes GC mark up, metal roof, inflation and electrical)
Total for Canopy	$	72,000	
Add Brine System			
Brine System	$	30,000	Allowance based on quoted from GVM Calcote
Project mark up (19.3%)	$	5,790	
Total for Brine System	$	35,790	
Add Loading Ramp			
Galvanized steel Loading Ramp	$	42,000	Base on quote from Nation Ramps
Project mark up (19.3%)	$	8,106	
Total for Loading Ramp	$	50,106	

DESIGN, PERMITTING, SPECIAL SERVICES, AND CONSTRUCTION ADMINISTRATION			
Item		**Cost**	**Source**
Additional Design Fees #1	$	15,300	Amendment #1 (2/6/21)
Additional Environmental Scope	$	30,750	Amendment #2 (3/15/21)
Construction Administration	$	36,000	Part of Amendment #3
Environmental Construction Services	$	40,000	Part of Amendment #3
Geotechnical Ground Improvements Construction Services	$	23,100	Part of Amendment #3
Total Design, Permitting, Special Services, Const. Admin.	$	145,150	

Total Project Cost	**$**	**1,408,285**	**Includes total Construction & Design Costs and Owners Contingency (excludes Brine system, loading ramp and canopy)**
Add Brine System	$	1,444,075	
Add Brine Spray System & Loading Ramp	$	1,494,181	
Add Brine System, Loading Ramp and Canopy	**$**	**1,566,181**	

Construction Market Uncertainties Due to Covid (15%)	$	172,246	
TOTAL ADJUSTED PROJECT COST	**$**	**1,738,427**	**Includes all bid alternates and market adjustment due to covid**

Notes/Assumptions:

1. Impervious area of the site does not increase and stormwater infiltration is not required.
2. Costs assume there are no WBE/MBE requirements.
3. Includes entire structure, MA DCAM Certified GC costs, foundation, metal roof (filed sub bid contractor), lights and electrical work (filed sub bid contractor)
4. Assumes 12' tall pressure treated heavy duty timber framed salt shed side walls , approx. 30' clearance at end entrance to allow salt trailers to exit with trailer in up position and allows dumping of salt deliveries inside the salt shed.
5. New salt shed will occupy the footprint of the existing salt shed, and will be high arch gambrel style, with power source from panel in existing DPW building.
7. Assumes ground improvements are needed
8. Assumes there are no MBTA permits or restrictions.
9. Assumes asphalt floor inside the salt shed, which is the standard .
10. Assumes competitive bid market with at least 3 separate bids submitted.
11. excluded $98,918 orginal contract

MEMORANDUM

Date: June 2, 2021

To: Melrose City Council

From: Elena Proakis Ellis, P.E., Director of Public Works
Patrick Dello Russo, CFO/Auditor

Subject: Updated Salt Shed Funding Request

In May of 2020, the Melrose City Council approved a $100,000 loan order for the design of a replacement salt shed at the City Yard. Over the past several months, the City has worked with Weston and Sampson and has moved forward with an approved design and has received bids for the replacement building. As part of the design process, soil samples revealed additional work required to be added to the scope of the replacement. We have also experienced skyrocketing costs that have been associated with the COVID pandemic, limited supply, and increased demand. None of these factors have lessened the need to replace the salt shed as a top priority for the DPW or the City. After another difficult winter, the condition of the salt shed has deteriorated, which compromises our ability to deliver snow emergency operations and to make our streets safe for travel during winter storms.

Weston and Sampson provided cost estimates that included a "COVID factor" and a reasonable contingency for the approved high arch gambrel style building. The low bidder, Construction Dynamics, Inc., submitted a bid of $1,436,000, which is in line with the most recent construction cost estimate provided by the engineers. When adding construction administration services, along with a construction contingency to the bid, the bonding request of $1.65M is reasonable to cover the cost of the project and any unanticipated costs that may arise as the project unfolds. This is in addition to the already approved $100,000 design cost, for a total bond of $1.75M.

Understanding the magnitude of this project, we have worked with Weston and Sampson on alternatives that would minimize the effect of all factors that have contributed to the additional costs and scope. We are confident that this design and decision offers the most value to the DPW, to the City, and most importantly to the residents. There is an aggressive construction schedule that allows for this to be completed before the beginning of the 2021-2022 winter season and will allow us to continue to deliver the same level of services during the winter months.

Please feel welcome to contact me with any questions you may have on this matter. Thank you for your consideration and continued support.

The new fabric building in Lake County, Ohio is 73 feet by 120 feet with a 4,000-ton salt storage capacity. (Photo provided)

Insights into a successful salt storage project

James Gills P.E., P.S., Lake County Engineer and Traci Salkiewicz, P.E., Chief Deputy Engineer (Photo provided)

Article submitted by Greystone Construction

Lake County, Ohio, engineer James Gills needed to replace an old, deteriorating salt dome.

"We had a teepee-shaped structure built in the mid-70s, and it only had a 900-ton road salt storage capacity. Lake County is in the strongest part of Ohio's snowbelt, and we experience significant snowfalls leading to a high demand for salt, so much so that we were having trouble obtaining salt throughout the winter season. We needed to build something new with a much higher salt storage capacity."

Gills had another challenge — poor soil conditions.

"We had soils borings done and it was determined that our soils were so bad it was recommended we dig out 8 to 10 feet of material and backfill with stone to accommodate a heavy structure similar to the teepee we were replacing. A fix like that is very, very expensive."

Gills researched all the options and noticed construction of fabric buildings in the region consisting of steel trusses covered in a tensioned membrane cover. Gills was attracted to fabric structures for several reasons.

"With the teepee structure, Lake County paid extra to have salt blown into the teepee. A large fabric structure not only costs less per square foot allowing for a much larger storage capacity on a budget, but would allow us to safely back in a truck, dump, and stack the salt."

Gills analyzed fabric building designs and layout to determine which would work best given his poor soil conditions.

"Greystone Construction had a solution for our poor soils. Greystone's method of installing the structure on independent concrete pads and piers provided an engineered solution which minimized the amount of expensive soil corrections required."

Gills purchased the Britespan fabric building materials from Greystone Construction and Britespan Building Systems through Sourcewell, a cooperative service purchasing program used by government entities across the country.

"Time is money and we saved a lot of both using the Sourcewell process and avoided the lengthy public bidding process that could have added six weeks to our timeline."

The Greystone Construction crew completed the concrete piers in three days. After a concrete cure period, the Greystone crew returned and installed a 73-foot-by-120-foot facility on top of the piers in just five days. Eight-foot high panels were placed continuously along three sides of the building interior to contain the salt.

"Our new fabric building facility holds 4,000 tons of salt. Combine that with the storage available at other facilities in Lake County and we have enough salt stored to last an entire winter."

"The Greystone team was great and so quick that I would absolutely work with Greystone again and have recommended them to others."

Best practices for designing and building safe, efficient and long lasting salt and sand storage buildings

Greystone has built thousands of fabric buildings across the U.S. and is an industry expert having built more than 1.5 million square feet of salt storage. Greystone Vice President Colin O'Brien shares best practices to ensure a successful project.

Building design to meet local load requirements

Any building needs to be designed to meet local wind, snow, seismic and unbalanced snow loads. Fabric buildings are no different. A structurally sound building must follow current International Building Codes (IBC) for safety and insurability.

"Greystone engineers its buildings to meet current local IBC load requirements. However, whatever manufacturer or general contractor you work with, make sure they are engineering your building properly for your site specific location."

Capacity Requirements

Greystone knows the density and angle of repose of deicing salt — factoring this in with a customer's storage capacity requirements and available footprint, their estimating team calculates the most economical building width and length.

"Fabric buildings can easily be expanded so in the future, when a customer requires greater storage capacity, Greystone can easily add additional building length."

Independent Foundations and Panels

"The Lake County building uses this design combining independent foundations engineered to carry building loads and pre-cast walls designed to carry commodity loads. This is often times more economical than cast-in-place poured walls designed to carry both building and commodity loads."

"This building design is also excellent to reduce corrosion because it keeps salt away from the steel trusses and base plates. It also creates the greatest possible air movement throughout the building."

Reducing Risk of Corrosive Damage

Salt is a highly corrosive material and storing it properly is critical to maintain the integrity of a fabric building's steel frames and components.

"We recommend any time building steel is cut or welded it be hot-dip galvanized after production. This treatment achieves a much thicker and harder protective surface than in-line galvanizing. It also ensures that the steel trusses are coated both inside and outside after welding is completed. We also recommend a corrosion inhibitor in any concrete containment panels."

Ventilation

Proper ventilation is key in reducing corrosion. "In the absence of moisture, corrosive materials would have little to no corrosive effect. You want air movement in your salt storage building to greatly reduce any condensation — this helps to prevent corrosion on everything in and around the building."

Sufficient Clearance

Adequate clear height is a critical factor to ensure maximum storage capacity. More importantly, sufficient clearance is necessary for safe maneuverability of trucks and dumping equipment.

"Proper building clearance is important to reduce the possibility of costly damages to the building from equipment use."

Greystone Construction's experts are ready to assist with your salt, sand and equipment storage needs. Call 1 (888) 742-6837 for a free consultation and quote. Visit www.GreystoneConstruction.com to learn more.

SALT & SAND STORAGE EXPERTS

We've erected 1300+ fabric buildings across the United States and are trusted by DOT, municipalities and private firms.

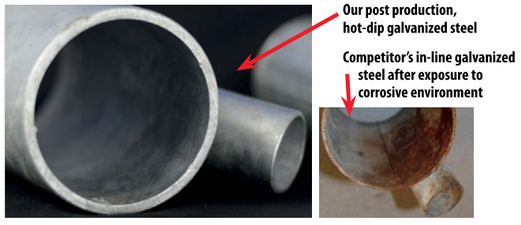
Need to write bid specifications? Call 1-888-742-6837 and a salt storage expert will assist you.



Greystone Construction is a general contractor delivering high quality construction since 1987.

We serve customers across the United States. In addition to the salt and sand storage market, other markets we serve include retail, commercial, office, financial, health care, senior housing, hospitality, industrial, warehousing, manufacturing, and more.

The Greystone Advantage

- Turnkey solution – we have 32 years of design-build and general construction experience
- Engineered to meet your site specificl wind, snow and unbalanced snow loads
- Customizable features including end walls, doors, foundations, etc.
- Quick installation saves you time and money
- Storage from 100 tons to 100,000+ tons – a variety of heights and widths available
- Superior corrosion resistance with post production, hot-dip galvanization

Superior corrosion resistance with post production, hot-dip galvanization

Salt is highly corrosivie and can compromise the integrity of steel components. Our frames and welded components receive a hot-dipped galvanized finish *after* fabrication to ensure a complete zinc coating both inside and out. No welding is done after zinc coating is applied. Some competitors cut corners and do not hot-dip galvanized welded components.

"Why would we recommend Greystone? From initial project development through construction, Greystone was excellent to work with. They delivered a top notch facility that will serve Nicollet County for many years."

Seth Greenwood, Public Works Director/County Engineer, Nicollet County

Re: Budget Proposal – Melrose, MA Storage Building

Ms. Proakis,

Thank you for the opportunity to provide a budget proposal to furnish and install a salt storage building in Melrose, MA. A few of the advantages the Greystone team brings to the project include:

- **Design-Build Experience** – Greystone has offered design-build and general construction services for 35 years.
- **Fabric Building Expertise** – Greystone has sold and installed fabric buildings for over 20 years. We've successfully completed thousands of fabric building projects.
- **Engineered Fabric Building** – Fabric building will be designed to meet site-specific load requirements including wind, snow and unbalanced loads.
- **Hot Dipped Galvanized Steel** – Fabric building frames are hot dip galvanized post production, after all cutting and welding complete
- **Self-Performed Work** – Greystone has the capability to self-perform the concrete and building installation with our own crews. Often times this allows us to provide the most competitive pricing, maintain quality and hold schedule.

Let us know if you have any questions. We look forward to discussing our next steps.

Sincerely,

Colin R. OBrien

GREYSTONE
CONSTRUCTION

Scope of Work & Pricing

to be performed by Greystone Construction

Furnish & Install Budget Price:

- 65’ x 64’ Britespan Apex L14 Series Building
- Truss spacing 16’ on center
- 12.5 ounce, 23 mil polyethylene Non-FR fabric
  - Single piece cover design
- Building designed per ASCE7-10 (IBC 2015)
  - Fabric type: ASTM E-84 (NON-FR)
  - Occupancy category: CAT 1 (LOW HAZARD)
  - Ground snow load: 40 lbs.
  - Wind Load: 117 MPH wind
  - Wind Exposure: C
  - Site conditions: Ce = 0.9 Exposed
  - Collateral Load: 0
  - No sprinklers
  - No conveyor loads
  - Seismic Design Category: B
  - Stamped engineered building drawings included
- (2) Fabric end walls with steel framing with two 3’x3’ mesh vent in back end
- (1) 16’ wide x 30’ tall framed opening
- Hot dipped galvanized bolt and purlin upgrades
- Building to be installed on concrete pad and pier foundations. Piers to extend 2’ above grade on three sides.
  - Engineered foundation drawings
  - Assumes existing soils has minimum bearing capacity of 2,500 PSF
- Approximately 192 lineal feet of 8’ tall pre-cast concrete bunker “L” panels with corrosion inhibiter
- Hot dipped galvanized anchor bolts
- Freight allowance of $2,540 included
  - Contract will be updated to reflect actual freight amount at time of shipment
- Provide all necessary labor and equipment to complete items noted above
- **Approx. 1,385 tons of salt storage capacity**
  - **32 degree angle of repose**
  - **80 lbs/cubic foot product weight**

Furnish & Install Budget Price: $229,750

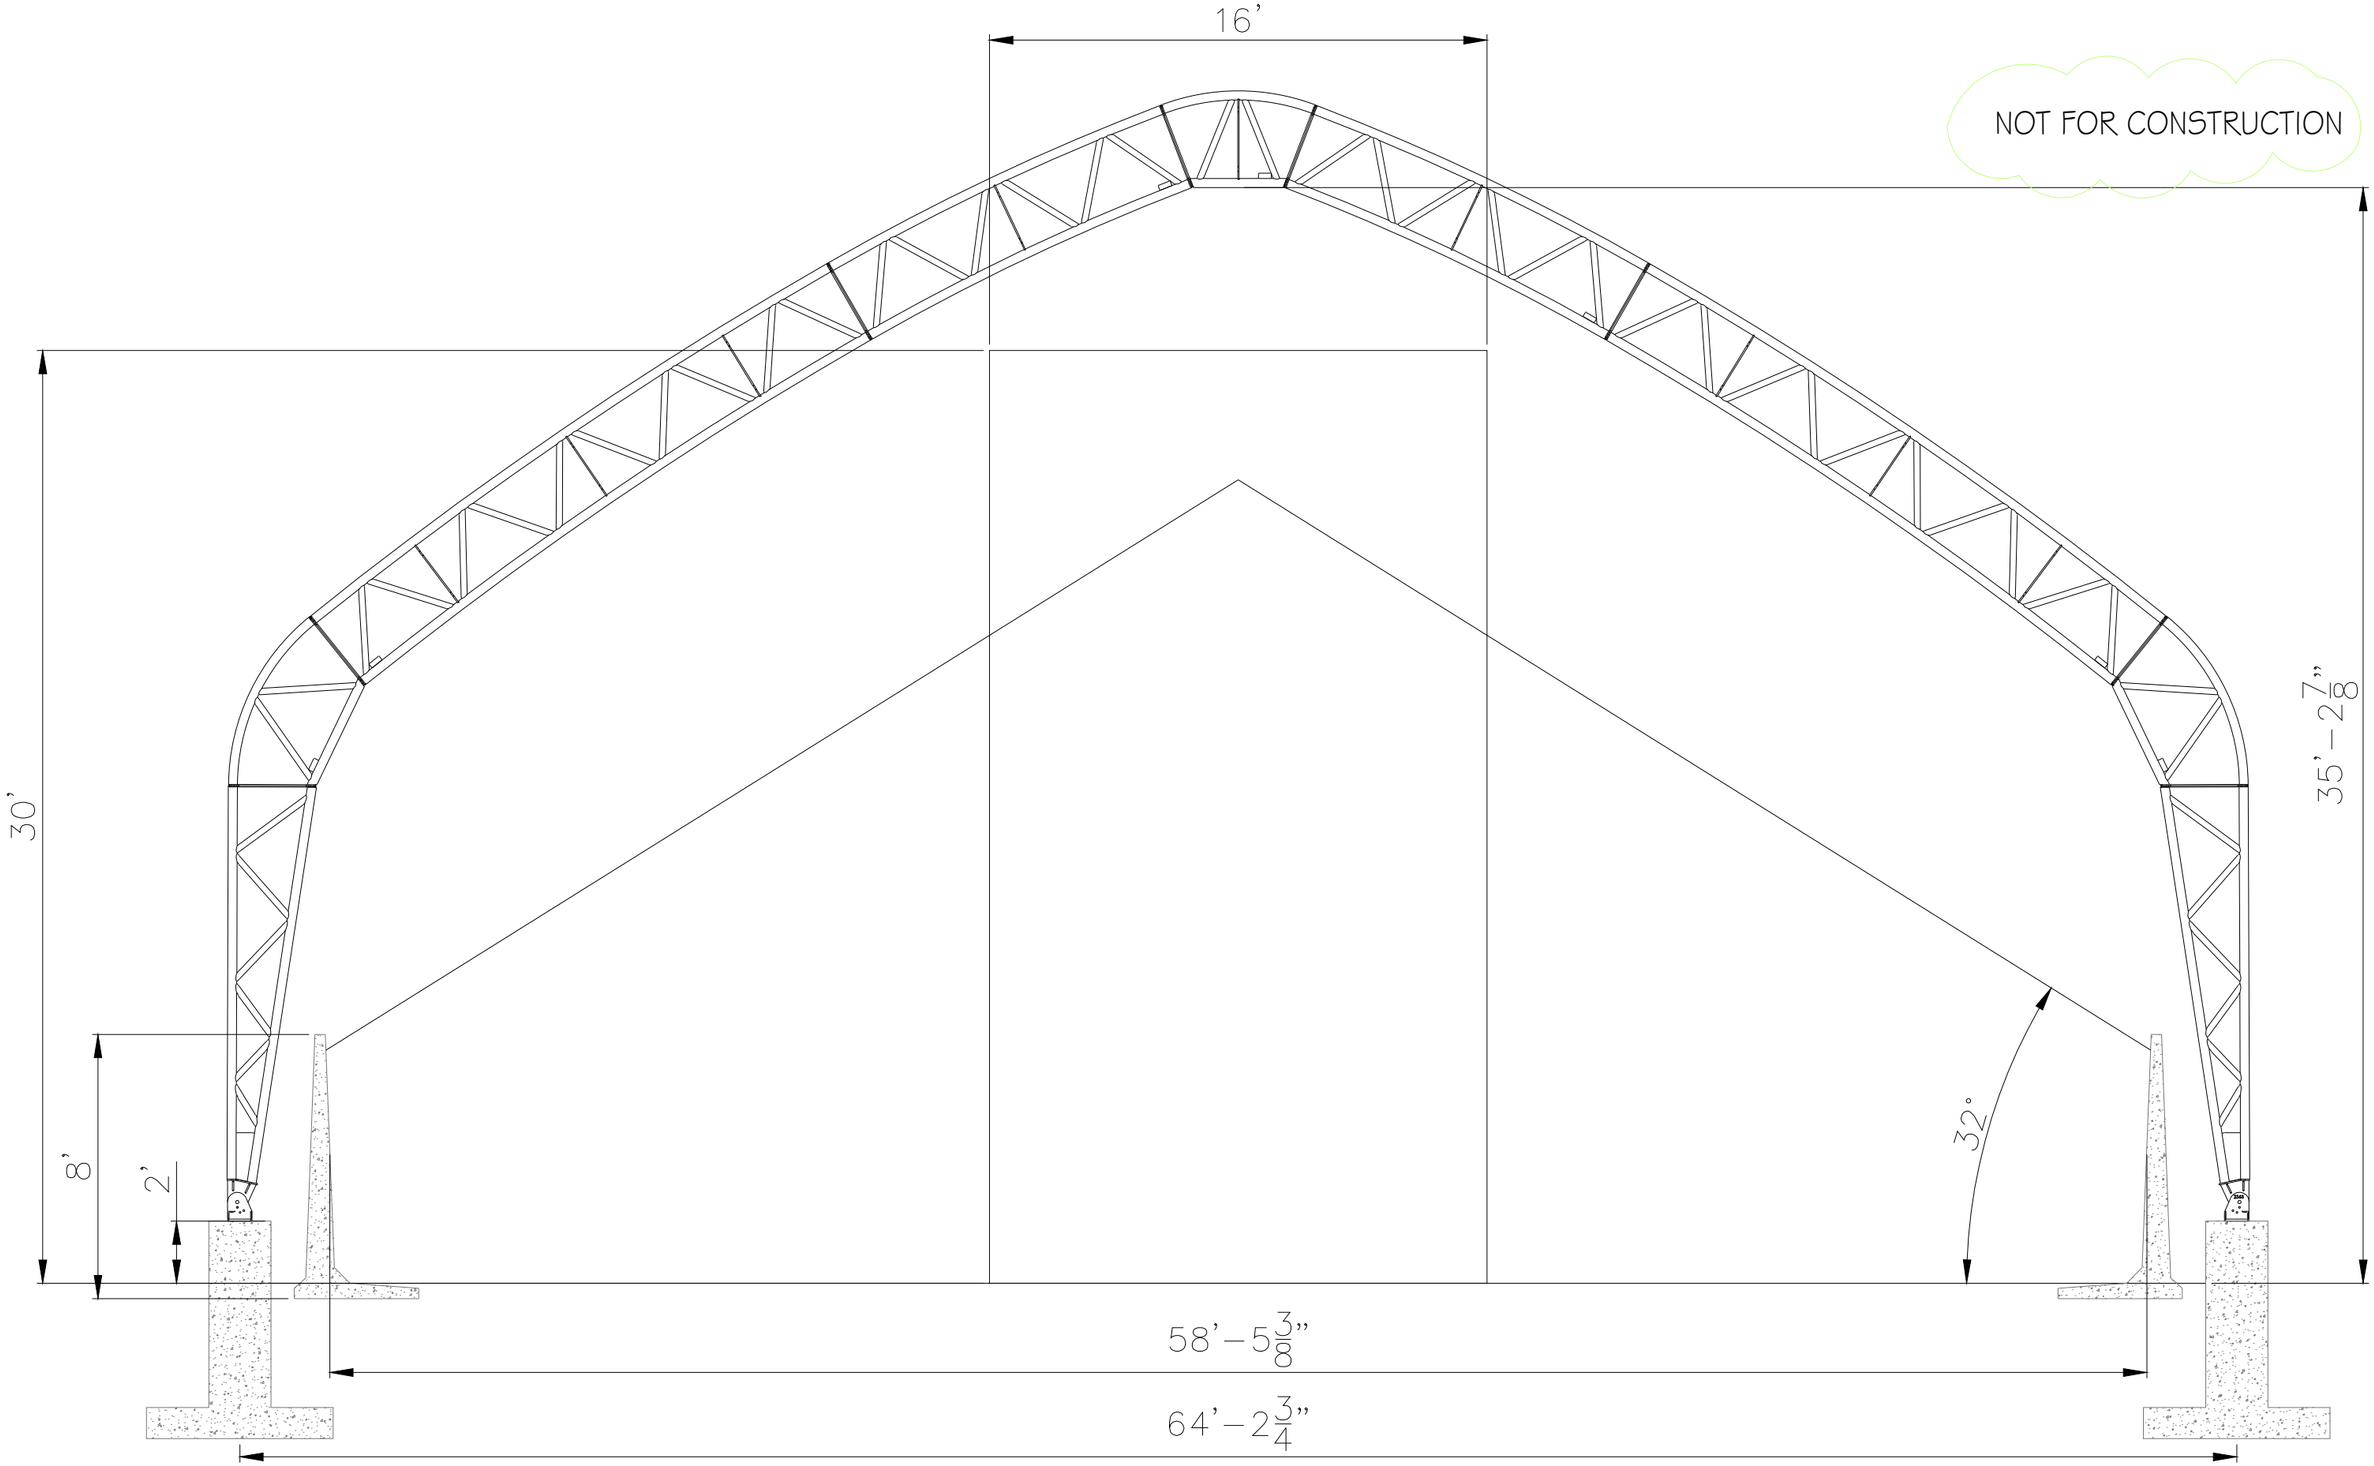
See exclusions on last page

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GREYSTONE
CONSTRUCTION

Market Provisions:

- Greystone is committed to being your trusted team partner on your project. We are asking all of our clients recognize the volatility of our markets and understand we are providing current pricing for budgeting purposes with the need to adjust final project pricing based on the markets at the actual time of the order. It's important to provide you with the best value for your project, and we do not want to speculate where the actual market rates will be at the time of procurement and/or delivery.
- Pricing is based on current market conditions and does not include future tariffs, surcharges, price escalation, or fees. (i.e., many wholesalers and manufacturers are not committing to pre-determined pricing for pre-ordered materials. These materials are priced at the time of the delivery.) Due to extremely volatile markets, pricing shall be re-evaluated at time of procurement and/or delivery. Any savings or additional cost would be communicated with Owner prior to procurement and/or delivery.
- Price increases will be assigned as contingency. Unless Greystone specifically outlines a contingency value in our proposal or scope of work, it is recommended that the Owner carry a contingency.
- Construction schedule may be affected by material shortages or lead times beyond our control. Any shortages or lead time issues will be communicated with the owner. Evaluation of alternatives will be reviewed, and the contract schedule or costs may be adjusted accordingly.
- Pandemic protocols enacted by the owner's requirements or federal/state/local jurisdictions following the execution of the construction contract may result in additional costs and schedule extensions to the contract. These may include but not limited to: employee testing, travel time for testing, temporary enclosures/facilities to isolate work forces, staffing shortages and subcontractor reselection if the current subcontractor cannot staff the project due to labor shortages as a result of newly enacted protocols.
- Unless noted otherwise proposal pricing is valid for 15 days



Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GREYSTONE
CONSTRUCTION

Exclusions – Items not included, but may apply to overall project:

- Architectural and Civil Engineering
- Permits & Fees
- Prevailing wage rates and Union labor
- Payment and performance bonds
- Cat II occupancy and FR Fabric
- Sales tax on materials
- Alternate foundation design if proposed design isn't suitable for existing site
- Testing & special inspections by owner – Soil borings, soils testing, concrete testing, bolt inspection, etc
- Site work including, but not limited to: soil corrections, granular base material under floor and bunker panels, excavation and backfill, site prep, import or export of materials, dewatering, etc
- Assumed building has 50' clear on all four sides for staging/erection and building engineering requirements
- Site specific safety requirements
- Bituminous paving or concrete – interior and exterior slabs and aprons
- Exterior aprons & stoops at doors
- Geotextile liner under building
- Doors – Overhead & personnel
- Insulation, interior liner panel or stainless steel cables
- All electrical & mechanical systems
- All winter conditions

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

GENERAL NOTES

1. TOPOGRAPHICAL INFORMATION BASED UPON SURVEY PERFORMED BY WESTON & SAMPSON IN OCTOBER 2020.
2. REFER TO EXISTING CONDITIONS FOR SURVEY LEGEND. ALL BIDDERS ARE REQUIRED TO INSPECT THE PROJECT SITE IN ITS ENTIRETY PRIOR TO SUBMITTING THEIR BID, AND BECOME FAMILIAR WITH ALL CONDITIONS AS THEY MAY AFFECT THEIR BID. CONTRACTOR AND SUB-CONTRACTORS SHALL BE FAMILIAR WITH ALL DRAWINGS AND SPECIFICATIONS PRIOR TO COMMENCING THE CONSTRUCTION.
3. LOCATIONS OF ANY UTILITIES SHOWN ON THESE PLANS ARE APPROXIMATE ONLY. CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE LOCATION OF SUCH UTILITIES, PROTECTING ALL EXISTING UTILITIES AND REPAIRING ANY DAMAGE DONE DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL ON-SITE COORDINATION WITH UTILITY COMPANIES AND PUBLIC AGENCIES AND FOR OBTAINING ALL REQUIRED PERMITS AND PAYING ALL REQUIRED FEES. IN ACCORDANCE WITH M.G.L. CHAPTER 82, SECTION 40, INCLUDING AMENDMENTS, CONTRACTORS SHALL NOTIFY ALL UTILITY COMPANIES AND OWNER IN WRITING PRIOR TO EXCAVATION.
4. WHERE AN EXISTING UTILITY IS FOUND TO CONFLICT WITH THE PROPOSED WORK, THE LOCATION, ELEVATION AND SIZE OF THE UTILITY SHALL BE ACCURATELY DETERMINED WITHOUT DELAY BY THE CONTRACTOR AND THE INFORMATION FURNISHED TO THE ENGINEER FOR RESOLUTION OF THE CONFLICT.
5. CONTRACTOR SHALL BE RESPONSIBLE FOR REVIEWING ALL DRAWINGS AND SPECIFICATIONS TO DETERMINE THE EXTENT OF EXCAVATION AND DEMOLITION REQUIRED TO RECEIVE SITE IMPROVEMENTS.
6. ANY DISCREPANCIES OR CONFLICTS BETWEEN THE DRAWINGS AND EXISTING CONDITIONS, EXISTING CONDITIONS TO REMAIN, TEMPORARY CONSTRUCTION, PERMANENT CONSTRUCTION AND WORK OF ADJACENT CONTRACTS SHALL BE BROUGHT TO THE ATTENTION OF THE OWNER BEFORE PROCEEDING. ITEMS ENCOUNTERED IN AREAS OF EXCAVATION THAT ARE NOT INDICATED ON THE DRAWINGS, BUT ARE VISIBLE ON SURFACE, SHALL BE THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE REMOVED AT NO ADDITIONAL COST TO THE OWNER.
7. ANY ALTERATIONS TO THESE DRAWINGS MADE IN THE FIELD DURING CONSTRUCTION SHALL BE RECORDED BY THE GENERAL CONTRACTOR ON "AS-BUILT" DRAWINGS. THE CONTRACTOR SHALL PROVIDE A FINAL AS-BUILT SURVEY PLAN PREPARED BY A MASS. LICENSED SURVEYOR SHOWING PROPOSED UTILITIES AND FINAL GRADES.
8. ALL AREAS DISTURBED BY THE CONTRACTOR'S OPERATIONS OUTSIDE THE PROJECT LIMITS, SHALL BE RESTORED TO THE ORIGINAL CONDITION BY THE CONTRACTOR AT NO ADDITIONAL COST AND TO THE SATISFACTION OF THE OWNER.
9. ALL WORK SHOWN ON THE PLANS AS BOLD SHALL REPRESENT PROPOSED WORK. THE TERM "PROPOSED (PROP)" INDICATES WORK TO BE CONSTRUCTED USING NEW MATERIALS OR, WHERE APPLICABLE, RE-USING EXISTING MATERIALS IDENTIFIED AS "REMOVE AND RESET (R&R)", OR REMOVE, RELOCATE, RESET, (R,R&R).
10. ALL KNOWN EXISTING STATE, COUNTY AND OWNER LOCATION LINES AND PRIVATE PROPERTY LINES HAVE BEEN ESTABLISHED FROM AVAILABLE INFORMATION AND ARE INDICATED ON THE PLANS.
11. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO PROTECT HIS EMPLOYEES, AS WELL AS PUBLIC USERS FROM INJURY DURING THE ENTIRE CONSTRUCTION PERIOD USING ALL NECESSARY SAFEGUARDS, INCLUDING BUT NOT LIMITED TO, THE ERECTION OF TEMPORARY WALKS, STRUCTURES, PROTECTIVE BARRIERS, COVERING, FENCES AS NEEDED AND ALL NECESARY PRECAUTIONS TO PREVENT THE SPREAD OF COVID 19. SEE SPECIFICATION SECTION 00 73 73 STATE REGULATIONS ATTACHMENT G "MASSACHUSETTS COVID CONSTRUCTION GUIDELINES".
12. THE CONTRACTOR SHALL SUPPLY THE OWNER WITH THE NAME OF THE OSHA "COMPETENT PERSON" PRIOR TO CONSTRUCTION.
13. FILLING OF EXCAVATED AREAS SHALL NOT TAKE PLACE WITHOUT THE PRESENCE OR PERMISSION OF THE OWNER.
14. THE CONTRACTOR SHALL CALL DIGSAFE AT 1-888-344-7233 AT LEAST 72 HOURS, SATURDAYS, AND HOLIDAYS EXCLUDED, PRIOR TO EXCAVATING AT ANY LOCATION. A COPY OF THE DIGSAFE PROJECT REFERENCE NUMBER(S) SHALL BE GIVEN TO THE OWNER PRIOR TO EXCAVATION.
15. ALL EXCESS SOIL FROM BRINGING GRADES DOWN TO BOTTOM OF PAVEMENT SUBGRADE SHALL BE STOCKPILED OFF SITE AT THE OWNERS ROUTE 99 PROPERTY LOCATED ADJACENT TO 732 NEWBURYPORT TURNPIKE, MELROSE, MA AT NO ADDITIONAL COST TO THE OWNER. ALL EXCESS SOIL GENERATED FROM THE EXCAVATION OF THE FOUNDATIONS AND GROUND IMPROVEMENTS SHALL BE STOCKPILED ON SITE IN THE OWNERS MATERIAL STORAGE BINS LOCATED IN THE FRONT OF THE SITE, AT NO ADDITIONAL COST TO THE OWNER. REFER TO SPECIFICATION SECTION 02 61 00.16 HANDLING, TRANSPORTATION, REUSE AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL. FOR ADDITIONAL SOIL MANAGEMENT DETAILS. SUITABLE SOIL EXCAVATED AS PART OF THE PROJECT MUST MEET ONE OR MORE OF THE MATERIAL REQUIREMENTS SPECIFIED IN 312300-EARTHWORK. ON-SITE FILL MATERIALS, WHICH DO NOT CONFORM TO SPEC 312300, SHALL NOT BE USED BELOW ANY STRUCTURES. IF THE CONTRACTOR PROPOSES TO USE THE EXISTING FILL ON SITE BELOW PAVEMENT AREAS, HE MUST DEMONSTRATE THAT THE FILL MEETS THE REQUIREMENTS PER SECTION 312300 OF THE SPECIFICATIONS.
16. CONTRACTOR IS RESPONSIBLE FOR STAKING CONSTRUCTION BASELINES IN FIELD. NO CONSTRUCTION WILL BE PERFORMED WITHOUT THE PROPOSED BASELINES AND LAYOUTS APPROVED BY THE ENGINEER.
17. NO FILL SHALL CONTAIN HAZARDOUS MATERIALS.
18. ANY QUANTITIES SHOWN ON PLANS ARE FOR COMPARATIVE BIDDING PURPOSES ONLY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VISIT THE PROJECT SITE TO VERIFY ALL QUANTITIES AND CONDITIONS PRIOR TO SUBMITTING BID.
19. ALL EXISTING DRAINAGE FACILITIES TO REMAIN SHALL BE MAINTAINED FREE OF DEBRIS, SOIL, SEDIMENT, AND FOREIGN MATERIAL AND OPERATIONAL THROUGHOUT THE LIFE OF THE CONTRACT. REMOVE ALL SOIL, SEDIMENT, DEBRIS AND FOREIGN MATERIAL FROM ALL DRAINAGE STRUCTURES, INCLUDING BUT NOT LIMITED TO, DRAINAGE INLETS, MANHOLES AND CATCH BASINS WITHIN THE LIMIT OF WORK AND DRAINAGE STRUCTURES OUTSIDE THE LIMIT OF WORK THAT ARE IMPACTED BY THE WORK FOR THE ENTIRE DURATION OF CONSTRUCTION.
20. CONTRACTOR'S STAGING AREA MUST BE WITHIN THE CONTRACT LIMIT LINE AND IN AREAS APPROVED BY OWNER. ANY OTHER AREAS THAT THE CONTRACTOR MAY WISH TO USE FOR STAGING MUST BE COORDINATED WITH THE OWNER.
21. THE CONTRACTOR SHALL KEEP ALL STREETS, PARKING LOTS AND WALKS THAT ARE NOT RESTRICTED FROM PUBLIC USE DURING CONSTRUCTION BROOM CLEAN AT ALL TIMES. THE CONTRACTOR SHALL USE ACCEPTABLE METHODS AND MATERIALS TO MAINTAIN ADEQUATE DUST CONTROL THROUGHOUT CONSTRUCTION.
22. CONTRACTOR SHALL COORDINATE ALL WORK WITH THE OWNER.
23. CONTRACTOR SHALL DEWATER AS NECESSARY TO PERFORM THE PROPOSED WORK.
24. THE LIMIT OF WORK SHALL BE DELINEATED IN THE FIELD PRIOR TO THE START OF SITE CLEARING OR CONSTRUCTION.
25. DEEP SUMP CATCH BASINS AND STORMWATER BASIN SHALL BE CLEANED FOLLOWING CONSTRUCTION.
26. HAULING OF EARTH MATERIALS TO AND FROM THE SITE SHALL BE RESTRICTED TO THE HOURS OF 7:00 AM TO 5:00 PM MONDAY THROUGH FRIDAY, EXCLUDING HOLIDAYS.
27. WORK ON SATURDAYS SHALL ONLY BE CONDUCTED IF PRIOR WRITTEN PERMISSION IS PROVIDED BY THE OWNER.
28. THE TERM "AS DIRECTED" AS USED IN THE CONTRACT DRAWINGS SHALL BE REPLACED WITH "AS REQUIRED".
29. THIS PROJECT IS ADJACENT TO PROPERTY OWNED BY THE MASSACHUSETTS BAY TRANSPORTATION AUTHORITY (MBTA). IF THE CONTRACTOR IS PROPOSING TO UTILIZE ANY LARGE BOOM EQUIPMENT (CRANES, LARGE EXCAVATORS, ETC) THAT HAVE THE POTENTIAL TO FOUL THE ADJACENT MBTA RIGHT-OF-WAY (ROW) EITHER BY PICKING CONSTRUCTION MATERIALS OVER THE MBTA ROW OR BY THE POSSIBILITY OF A LARGE BOOM FALLING INTO THE MBTA ROW IN AN EMERGENCY SITUATION, THE CONTRACTOR MUST CONTACT THE MBTA DIRECTOR OF SAFETY ENGINEERING AND ADHERE TO THE MBTA RULES AND REGULATIONS REGARDING CRANE USE IN THEIR ROW. THE MBTA TRACK FOULING ZONE IS A DISTANCE OF 10-FEET FROM THE CENTERLINE OF THE NEAREST TRACK.
30. THE CONTRACTOR SHALL ALSO SECURE INSURANCE FOR WORKING ADJACENT TO A RAILROAD AS SPECIFIED IN SECTION 00 73 00 SUPPLEMENTARY CONDITIONS.

EROSION AND SEDIMENT CONTROL NOTES

1. ALL SEDIMENT AND EROSION CONTROL DEVICES SHALL BE PUT INTO PLACE PRIOR TO BEGINNING ANY CONSTRUCTION OR DEMOLITION. REFER TO PLAN FOR APPROXIMATE LOCATION OF EROSION AND SEDIMENT CONTROL. REFER TO SPECS AND DETAILS FOR TYPE OF EROSION AND SEDIMENT CONTROL.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE CONTINUAL MAINTENANCE OF ALL CONTROL DEVICES THROUGHOUT THE DURATION OF THE PROJECT.
3. CONTRACTOR SHALL MEET ALL OF THE STATE OF MASSACHUSETTS D.E.P. AND THE CITY OF MELROSE WETLAND ORDINANCE REGULATIONS FOR SEDIMENT AND EROSION CONTROL.
4. EXCAVATED MATERIAL STOCKPILED ON THE SITE SHALL BE SURROUNDED BY A RING OF UNBROKEN SEDIMENT AND EROSION CONTROL COMPOST FILTER TUBES. THE LIMITS OF ALL GRADING AND DISTURBANCE SHALL BE KEPT TO A MINIMUM WITHIN THE APPROVED AREA OF CONSTRUCTION. ALL AREAS OUTSIDE OF THE LIMIT OF CONTRACT SHALL REMAIN TOTALLY UNDISTURBED UNLESS OTHERWISE APPROVED BY OWNER'S REPRESENTATIVE.
5. ALL CATCH BASINS AND DRAIN GRATES WITHIN LIMIT OF CONTRACT SHALL BE PROTECTED WITH FILTER FABRIC DURING THE ENTIRE DURATION OF CONSTRUCTION.
6. ANY AREA OUTSIDE THE PROJECT LIMIT THAT IS DISTURBED SHALL BE RESTORED TO ITS ORIGINAL CONDITION AT NO COST TO THE OWNER.
7. DUE TO CONTAMINATED SOIL THE CONTRACTOR SHALL STRICTLY FOLLOW DUST CONTROL AND MONITORING MEASURES AS SPECIFIED IN 01 14 19.16 DUST CONTROL.
8. ALL POINTS OF CONSTRUCTION EGRESS OR INGRESS SHALL BE MAINTAINED TO PREVENT TRACKING OR FLOWING OF SEDIMENT ON TO PUBLIC/PRIVATE ROADS.

FOUNDATION NOTES

1. NO RESPONSIBILITY IS ASSUMED BY THE ENGINEER FOR THE VALIDITY OF THE SUBSURFACE CONDITIONS DESCRIBED ON THE DRAWINGS OR IN THE SPECIFICATIONS. THIS DATA IS INCLUDED ONLY TO ASSIST THE CONTRACTOR DURING BIDDING AND SUBSEQUENT CONSTRUCTION.
2. THE CONTRACTOR SHALL DESIGN AND PROVIDE ALL TEMPORARY EARTH SUPPORT, SHORING AND BRACING REQUIRED TO COMPLETE THE WORK IN ACCORDANCE WITH OSHA, STATE AND LOCAL REQUIREMENTS.
3. THE CONTRACTOR SHALL DESIGN AND PROVIDE SHEETING, SHORING, BRACING, AND/OR UNDERPINNING IN ORDER TO PROTECT EXISTING UTILITIES AND STRUCTURES FROM EXCESSIVE MOVEMENT DURING THE CONSTRUCTION PERIOD, IN ACCORDANCE WITH OSHA, STATE AND LOCAL REQUIREMENTS.
4. THE CONTRACTOR SHALL CARRY OUT CONTINUOUS CONTROL OF SURFACE AND SUBSURFACE WATER, DEWATER ANY AREAS REQUIRING EXCAVATION IN ADVANCE OF PERFORMING EXCAVATION, AND MAINTAIN GROUNDWATER LEVELS BELOW PLANNED SUB-GRADES.
5. FOUNDATIONS SHALL BE INSTALLED IN THE GEOMETRY SHOWN ON THE PLANS.
6. GROUND IMPROVEMENTS SHALL BE COORDINATED WITH THE LOCATION OF THE FOUNDATIONS SHOWN ON THE ARCHITECTURAL FOUNDATION PLAN.
7. GEOTECHNICAL ENGINEERING REPORT PREPARED BY WESTON & SAMPSON DATED FEBRUARY 17, 2021 AND A GEOTECHNICAL ENGINEERING REPORT ADDENDUM DATED APRIL 13, 2021.

DEMOLITION & SITE PREPARATION NOTES

1. THE CONTRACTOR SHALL INCLUDE IN THE BID THE COST OF REMOVING ANY EXISTING SITE FEATURES AND APPURTENANCES NECESSARY TO ACCOMPLISH THE CONSTRUCTION OF THE PROPOSED SITE IMPROVEMENTS. THE CONTRACTOR SHALL ALSO INCLUDE IN THE BID THE COST NECESSARY TO RESTORE SUCH ITEMS IF THEY ARE SCHEDULED TO REMAIN AS PART OF THE FINAL SITE IMPROVEMENTS. REFER TO PLANS TO DETERMINE EXCAVATION, DEMOLITION AND TO DETERMINE THE LOCATION OF THE PROPOSED SITE IMPROVEMENTS.
2. THE OWNER RESERVES THE RIGHT TO REVIEW ALL MATERIALS DESIGNATED FOR REMOVAL AND TO RETAIN OWNERSHIP OF SUCH MATERIALS. IF THE OWNER RETAINS ANY MATERIAL THE CONTRACTOR SHALL ALLOW ARRANGEMENTS WITH THE OWNER TO HAVE THOSE MATERIALS REMOVED OFF SITE AT NO ADDITIONAL COST.
3. UNLESS SPECIFICALLY NOTED TO BE SAVED / STOCKPILED (R&S) OR REUSED / RELOCATED (R&R), ALL SITE FEATURES CALLED FOR REMOVAL (REM) SHALL BE REMOVED WITH THEIR FOOTINGS, ATTACHMENTS, BASE MATERIAL, ETC, TRANSPORTED FROM THE SITE TO BE DISPOSED OF IN A LAWFUL MANNER AT AN ACCEPTABLE DISPOSAL SITE AND AT NO COST TO THE OWNER.
4. ALL EXISTING SITE FEATURES TO REMAIN SHALL BE PROTECTED THROUGHOUT THE CONSTRUCTION PERIOD. ANY FEATURES DAMAGED DURING CONSTRUCTION OPERATIONS SHALL BE REPAIRED OR REPLACED TO THE SATISFACTION OF THE OWNER'S REPRESENTATIVE AT NO ADDITIONAL COST.
5. DURING EARTHWORK OPERATIONS, CONTRACTOR SHALL TAKE CARE TO NOT DISTURB EXISTING MATERIALS TO REMAIN, OUTSIDE THE LIMITS OF EXCAVATION AND BACKFILL AND SHALL TAKE WHATEVER MEASURES NECESSARY, AT THE CONTRACTOR'S EXPENSE, TO PREVENT ANY EXCAVATED MATERIAL FROM COLLAPSING. ALL BACKFILL MATERIALS SHALL BE PLACED AND COMPACTED AS SPECIFIED TO THE SUBGRADE REQUIRED FOR THE INSTALLATION OF THE REMAINDER OF THE CONTRACT WORK.
6. IT SHALL BE THE CONTRACTOR'S OPTION, WITH CONCURRENCE OF THE OWNER, TO REUSE EXISTING GRAVEL IF IT MEETS THE REQUIREMENTS OF THE SPECIFICATIONS FOR GRAVEL BORROW.
7. ALL ITEMS CALLED FOR REMOVAL SHALL BE REMOVED TO FULL DEPTH INCLUDING ALL FOOTINGS, FOUNDATIONS, AND OTHER APPURTENANCES, EXCEPT AS SPECIFICALLY NOTED OTHERWISE.
8. "CLEAR AND GRUB VEGETATION' SHALL INCLUDE REMOVAL OF GRASS, SHRUBS, AND UNDERBRUSH, REMOVAL OF ROOTS, ROUGH GRADING, INSTALLATION OF LOAM (IF APPLICABLE), FINE GRADING, SEEDING AND TURF ESTABLISHMENT BY THE CONTRACTOR.
9. THE STORAGE OF MATERIALS AND EQUIPMENT WILL BE PERMITTED AT LOCATIONS DESIGNATED BY OWNER OR OWNER'S REPRESENTATIVE. PROTECTION OF STORED MATERIALS AND EQUIPMENT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

LAYOUT & MATERIALS NOTES

1. REFER TO EXISTING CONDITIONS PLANS FOR SURVEY INFORMATION (SHEET C-1).
2. ALL WORK SHALL BE PERFORMED BY CONTRACTOR UNLESS SPECIFICALLY INDICATED THAT THE WORK WILL BE PERFORMED "BY OWNER".
3. THE LAYOUT OF SITE AMENITIES AND FENCES MUST BE APPROVED BY THE OWNER'S REPRESENTATIVE PRIOR TO INSTALLATION.
4. ALL LAYOUT LINES, OFFSETS, OR REFERENCES TO LOCATING OBJECTS ARE EITHER PARALLEL OR PERPENDICULAR UNLESS OTHERWISE DESIGNATED WITH ANGLE OFFSETS NOTED.
5. ALL PROPOSED SITE FEATURES SHALL BE LAID OUT AND STAKED FOR REVIEW AND APPROVAL BY THE OWNER'S REPRESENTATIVE PRIOR TO COMMENCEMENT OF INSTALLATION. ANY REQUIRED ADJUSTMENTS TO THE LAYOUT SHALL BE UNDERTAKEN AS REQUIRED, AT NO ADDITIONAL COST TO THE OWNER.
6. ALL PROPOSED PAVEMENTS SHALL MEET THE LINE AND GRADE OF EXISTING ADJACENT PAVEMENT SURFACES AND SHALL BE TREATED WITH AN RS-1 TACK COAT AT POINT OF CONNECTION. ALL PATHWAY WIDTHS SHALL BE AS NOTED ON THE LAYOUT AND MATERIALS PLAN.
7. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND GRADES ON THE GROUND AND REPORT ANY DISCREPANCIES IMMEDIATELY TO THE OWNER.
8. REFER TO DETAIL DRAWINGS FOR CONSTRUCTION DETAILS.

GRADING, UTILITIES & DRAINAGE NOTES

1. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND GRADES ON THE GROUND AND REPORT ANY DISCREPANCIES IMMEDIATELY TO THE OWNER.
2. ALL GRADING IS TO BE SMOOTH AND CONTINUOUS WHERE PROPOSED PAVEMENT SURFACE MEETS EXISTING SURFACE, BLEND THE TWO PAVEMENTS AND ELIMINATE ROUGH SPOTS AND ABRUPT GRADE CHANGES AND MEET LINE AND GRADE OF EXISTING CONDITIONS WITH NEW IMPROVEMENTS.
3. CONTRACTOR SHALL MAINTAIN POSITIVE DRAINAGE (1% MINIMUM) AWAY FROM ALL BUILDING FOUNDATIONS AND STRUCTURES.
4. CONTRACTOR SHALL ENSURE ALL AREAS ARE PROPERLY PITCHED TO DRAIN, WITH NO SURFACE WATER PONDING OR PUDDLING. THE PAVEMENT REPLACEMENT LIMITS SHALL BE VERIFIED IN THE FIELD BY THE CONTRACTOR BY DOING A DETAILED SITE SURVEY TO ENSURE POSITIVE DRAINAGE IS PROVIDED, WITH NO LOW POINTS WHERE THE PUDDLING MAY OCCUR. THE RESULTS OF THIS SURVEY SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW.
5. ALL UTILITY GRATES, COVERS OR OTHER SURFACE ELEMENTS INTENDED TO BE EXPOSED AT GRADE SHALL BE FLUSH WITH THE ADJACENT FINISHED GRADE AND ADJUSTED TO PROVIDE A SMOOTH TRANSITION AT ALL EDGES.
6. THE CONTRACTOR SHALL SET SUBGRADE ELEVATIONS TO ALLOW FOR POSITIVE DRAINAGE AND PROVIDE EROSION CONTROL DEVICES, STRUCTURES, MATERIALS AND CONSTRUCTION METHODS TO DIRECT SILT MIGRATION AWAY FROM DRAINAGE AND OTHER UTILITY SYSTEMS, AND WORK AREAS. CLEAN BASINS REGULARLY AND AT THE END OF THE PROJECT.
7. EXCAVATION REQUIRED WITHIN PROXIMITY OF KNOWN EXISTING UTILITY LINES SHALL BE DONE BY HAND. CONTRACTOR SHALL REPAIR ANY DAMAGE TO EXISTING UTILITY LINES OR STRUCTURES INCURRED DURING CONSTRUCTION OPERATIONS AT NO COST TO THE OWNER.
8. WHERE NEW EARTHWORK MEETS EXISTING EARTHWORK, CONTRACTOR SHALL BLEND NEW EARTHWORK SMOOTHLY INTO EXISTING, PROVIDING VERTICAL CURVES OR ROUNDS AT ALL TOP AND BOTTOM OF SLOPES.
9. WHERE A SPECIFIC LIMIT OF WORK LINE IS NOT OBVIOUS OR IMPLIED, BLEND GRADES TO EXISTING CONDITIONS WITHIN 5 FEET OF PROPOSED CONTOURS.
10. SEE EARTHWORK SECTION OF SPECIFICATIONS FOR SPECIFIC EXCAVATION AND FILLING PROCEDURES.

CONSTRUCTION SEQUENCE NOTES

1. THE CONTRACTOR SHALL DISCONNECT POWER TO THE SALT SHED AND DEMOLISH AND REMOVE THE SALT SHED.
2. THE SITE IS LOCATED WITHIN AN ACTIVE HIGHWAY FACILITY YARD. THE CONTRACTOR SHALL COORDINATE WITH THE OWNER TO MINIMIZE DISTURBANCE TO FACILITY OPERATIONS.
3. THE CONTRACTOR SHALL LIMIT HIS WORK TO THE AREA WITHIN THE LIMIT OF WORK SHOWN ON THE DRAWINGS. ADDITIONAL SPACE FOR EQUIPMENT/MATERIALS STAGING MAY BE PROVIDED WITH PRIOR APPROVAL BY THE OWNER.

SURVEY NOTES:

1. UNDERGROUND UTILITY LOCATIONS SHOWN HEREON ARE BASED ON UTILITY EVIDENCE VISIBLE AT GROUND SURFACE AND RECORD DRAWINGS AND ARE SUBJECT TO FIELD VERIFICATION BY EXCAVATION. UTILITIES SHOWN DO NOT PURPORT TO CONSTITUTE OR REPRESENT ALL UTILITIES LOCATED UPON OR ADJACENT TO THE SURVEYED PREMISES.
2. SURVEY PERFORMED BY WESTON & SAMPSON LAND SURVEYORS, INC. IN OCTOBER, 2020.
3. CONTOURS AND ELEVATIONS SHOWN BASED ON GPS OBSERVATIONS IN NAVD88.
4. NORTH ORIENTATION IS BASED ON GPS OBSERVATIONS TAKEN AT THE TIME OF THE FIELD SURVEY. MAPPING PREPARED ON NAD83 STATE PLANE COORDINATE SYSTEM (MASSACHUSETTS MAINLAND ZONE).
5. STREET AND PROPERTY LINES ARE COMPILED FROM MASSGIS DATA.

C-1

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

SIDE VIEW OF SALT SHED

EXISTING SALT SHED TO BE DEMOLISHED SEE SPECIFICATION SECTION 02 41 16 DEMOLITION AND NOTES BELOW

LIMIT OF WORK

THE DPW SHALL BE ALLOWED VEHICLE ACCESS TO THIS AREA FOR SITE CIRCULATION. THE CONTRACTOR WILL BE ALLOWED TO SHUT DOWN TRAFFIC IN THIS AREA PERIODICALLY AS NEEDED TO FACILITATE CONSTRUCTION IN COORDINATION WITH THE DPW IN ADVANCE.

PROTECT MONITORING WELL

REMOVAL OF EXISTING GRANITE CURBING

PROTECT MONITORING WELL (REPLACE EXISTING ROAD BOX WITH NEW ROAD BOX)

RETAINING WALL TO REMAIN

COMPOST FILTER TUBES

EXISTING SALT SHED TO BE DEMOLISHED, SEE PHOTO AND DEMOLITION NOTES

INLET SEDIMENT CONTROL (TYPICAL FOR ALL CATCH BASINS)

PROTECT MONITORING WELL

LIMITS OF PAVEMENT TO BE REMOVED INSIDE AND OUT OF SALT SHED (SEE NOTE 4)

CONCRETE MATERIAL STORAGE BINS TO REMAIN

FOUNDATION SPOILS STOCK PILED IN MATERIAL STORAGE BINS (SEE NOTE 3)

SALT SHED DEMOLITION NOTES:

1. DEMOLITION OF THE EXISTING APPROXIMATE 4,000 SF SALT SHED IN ITS ENTIRETY SHALL BE IN ACCORDANCE WITH SPECIFICATION SECTION 02 41 16 DEMOLITION.
2. CONTRACTOR SHALL NOTIFY MASSDEP (AQ 06 NOTIFICATION) 10 WORKING DAYS BEFORE DEMOLITION WORK BEGINS. A PRE DEMOLITION SURVEY REQUIRED OF THE SALT SHED HAS BEEN CONDUCTED BY WESTON AND SAMPSON'S LICENSED ASBESTOS INSPECTOR. THIS REPORT IS ATTACHED TO SECTION 02 41 16 DEMOLITION. THE CONTRACTOR SHALL PROVIDE MASSDEP WITH A COPY AS PART OF THE AQ 06 NOTIFICATION PROCESS.
3. FOUNDATION SPOILS SHALL BE STOCK PILED ON SITE IN MATERIAL STORAGE BINS. ASPHALT AND EXCESS SOIL GENERATED FROM BRINGING GRADES DOWN TO BOTTOM OF PAVEMENT SUBGRADE SHALL BE STOCKPILED SEPARATELY OFF SITE AT THE OWNERS ROUTE 99 PROPERTY LOCATED ADJACENT TO 732 NEWBURYPORT TURNPIKE, MELROSE MA. SEE SPECIFICATION SECTION 02 61 00.16 - HANDLING REUSE TRANSPORTATION AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL.
4. TEST PITS #4 & #5 ENCOUNTERED A BURIED LAYER OF ASPHALT. THE CONTRACTOR SHALL REMOVE THE TOP LAYER AND BURIED LAYER OF ASPHALT WITHIN THE LIMITS OF PAVEMENT REMOVAL SHOWN ABOVE. THE REMOVED ASPHALT SHALL BE STOCK PILED SEPARATELY FROM THE SURPLUS SOIL AND BROUGHT TO AN ASPHALT RECYCLING CENTER. REFER TO SECTION 02 61 00.16 - HANDLING REUSE TRANSPORTATION AND OFFSITE DISPOSAL OF EXCAVATED MATERIAL AND SECTION 00 31 32 SUB SURFACE DATA FOR ADDITIONAL DETAILS.

SITE PREPARATION AND EROSION CONTROL PLAN

Sheet Number:

C-2

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

NOTES:

1. SIDE WALL KICKER LOCATIONS ARE APPROXIMATE ONLY, SEE FLOOR FOUNDATION PLAN FOR EXACT LOCATIONS.
2. SEE FOUNDATION PLAN FOR FOUNDATION LAYOUT.
3. FLOOD GATE SYSTEM SHALL BE SECURELY MOUNTED TO THE FACE OF THE SALT SHED PRESSURE TREATED WOOD. CONTRACTOR SHALL PROVIDE SEALANT AS NEEDED TO PROVIDE A WATER TIGHT SYSTEM. SEE DETAIL ON SHEET C-6 FOR ADDITIONAL GATE DETAILS.
4. CONTRACTOR SHALL PROVIDE SIX (6) 2'X2' $\frac{1}{4}$" GALVANIZED STEEL PLATES TO BE PLACED BENEATH LOADING RAMP LEGS TO DISTRIBUTE THE WEIGHT OF THE RAMP ONTO THE PAVEMENT. CONTRACTOR ALL SHALL PROVIDE SHIMS AS NECESSARY TO PROVIDE LEVEL SURFACE FOR LOADING RAMP LEGS TO REST ON.
5. CONTRACTOR SHALL CONFIRM FINAL LOCATION OF LOADING RAMP WITH OWNER WITH A MOCK SALT DELIVERY TURNING TEST IN THE FIELD. SALT DELIVERY TRUCK SHALL BE PROVIDED BY THE CITY. SEE DETAIL 3 ON SHEET C-6, FOR ADDITIONAL LOADING RAMP DETAILS.

LAYOUT AND MATERIALS PLAN

Sheet Number:

C-3

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

NOTES:

1. SIDE WALL KICKER AND BUILDING FOUNDATION LOCATIONS ARE APPROXIMATE ONLY, SEE FLOOR /FOUNDATION PLAN FOR FINAL LOCATIONS.
2. CONTRACTOR SHALL PLATE ELECTRICAL TRENCHES AS NEEDED TO ALLOW DPW VEHICLES ACCESS THROUGH THIS AREA. SEE NOTE ON C-2.
3. ALL FINAL GRADES SHALL MATCH EXISTING GRADES AS THE PROJECT IS IN A FLOOD ZONE.
4. FINAL GROUND IMPROVEMENT LAYOUT SHALL BE COORDINATED WITH DRAWING A1 - FOUNDATION PLAN. FOUNDATIONS SHOWN ON THIS PLAN IS SCHEMATIC ONLY AND MAY VARY FROM FOUNDATION LAYOUT SHOWN ON SHEET A1.
5. GROUND IMPROVEMENT TO BE PROVIDED BELOW PROPOSED SHALLOW FOUNDATIONS OF THE SALT STORAGE STRUCTURE, CANOPY, BRINE TANK SLAB-ON-GRADE AND BELOW THE SALT STOCKPILE. GROUND IMPROVEMENT TYPE, QUANTITY AND LAYOUT TO BE DETERMINED BY THE CONTRACTOR'S GROUND IMPROVEMENT DESIGNER IN ACCORDANCE WITH SPEC SECTION 31 66 13.
6. AS TYPICALLY DONE, THE CONTRACTOR SHALL FORM THE FOUNDATION USING THE SOILS ONSITE FOR EACH INDIVIDUAL FOUNDATION TO MINIMIZE THE AMOUNT OF SOIL GENERATED ON SITE.

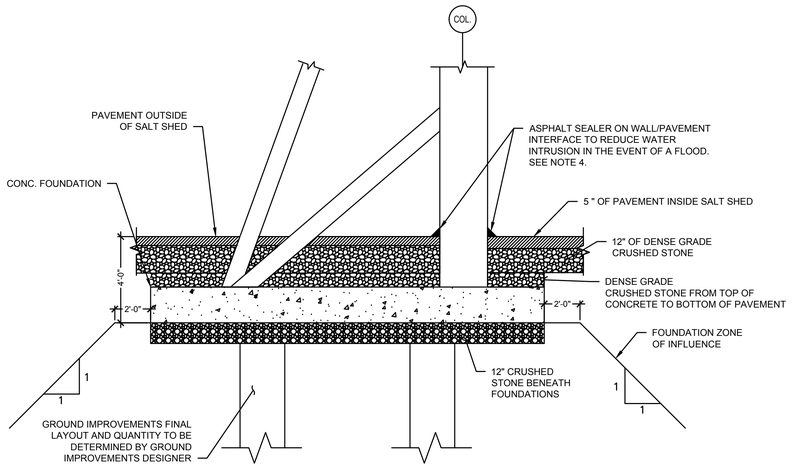
GRADING & UTILITY PLAN

Sheet Number:

C-4

WESTON & SAMPSON COPYRIGHT 2019

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

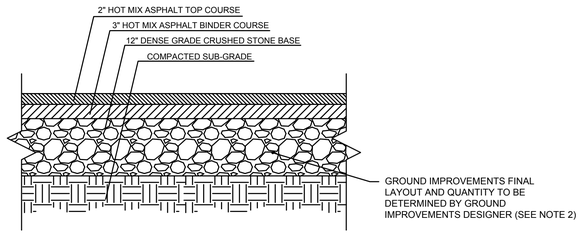


NOTE:

ALL EXISTING CATCH BASINS WITHIN THE LIMIT OF WORK SHALL HAVE INLET CONTROL PRIOR TO THE START OF CONSTRUCTION.

1 INLET SEDIMENT CONTROL

SCALE: N.T.S.

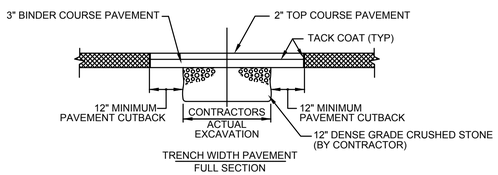


FOUNDATION NOTE(S):

1. PROPOSED SHALLOW FOUNDATIONS OF THE PROPOSED SALT SHED STRUCTURE AND BELOW THE SALT STOCKPILE TO BE SUPPORTED USING GROUND IMPROVEMENT ELEMENTS. THE TYPE, QUANTITY AND LAYOUT TO BE DETERMINED BY THE CONTRACTOR'S GROUND IMPROVEMENT DESIGNER IN ACCORDANCE WITH SECTION 31 66 13.
2. THE CONTRACTOR IS RESPONSIBLE FOR SUBGRADE PROTECTION.
3. SEE GEOTECHNICAL REPORT FOR UNDOCUMENTED FILL DEPTHS.
4. ASPHALT SEALER SHALL BE 9057R HOT ASPHALT CRACK FILLER AS MANUFACTURED BY FLEX-A-FILL.
5. DEWATERING SHALL BE IN ACCORDANCE WITH SPEC SECTION 31 23 19.

2 TYPICAL FOUNDATION SUBGRADE DETAIL

SCALE: N.T.S.

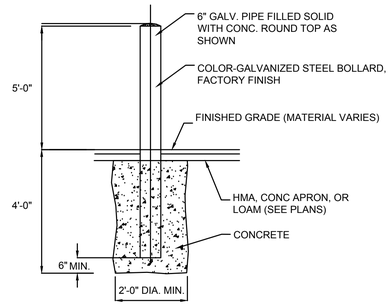


4 TYPICAL PAVING CROSS SECTION DETAIL

SCALE: N.T.S.

NOTES:

1. CONTRACTOR SHALL MAINTAIN POSITIVE SURFACE DRAINAGE (SEE GRADING PLANS).
2. GROUND IMPROVEMENTS SHALL BE PROVIDED BELOW THE SALT SHED STRUCTURE AND BELOW THE SALT SHED STOCKPILE IN ACCORDANCE WITH SPEC SECTION 31 66 13.

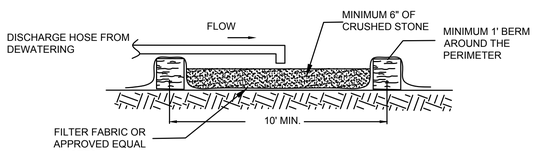


5 TRENCH REPAIR DETAIL

SCALE: N.T.S.

NOTES:

1. CONTRACTOR SHALL BACKFILL TRENCH, AND BED DUCT BANK, WITH COMPACTED GRAVEL BORROW.SEE TRENCH DETAIL ON ELECTRICAL DRAWINGS.

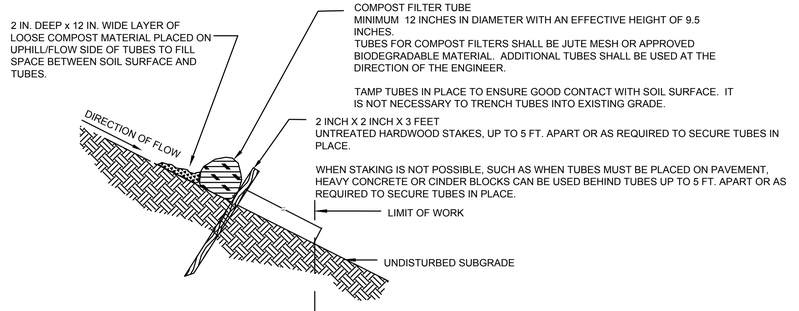


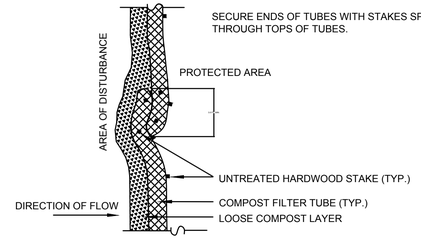
NOTES:

1. SEE SHEET C-3 FOR BOLLARD LOCATIONS.
2. BOLLARD FOUNDATION CONCRETE TO BE 3000 PSI MIN.
3. EXACT LOCATION TO BE DETERMINED IN THE FIELD AND APPROVED BY OWNER BEFORE INSTALLATION.

6 EXTERIOR STEEL PIPE BOLLARD

SCALE: N.T.S.



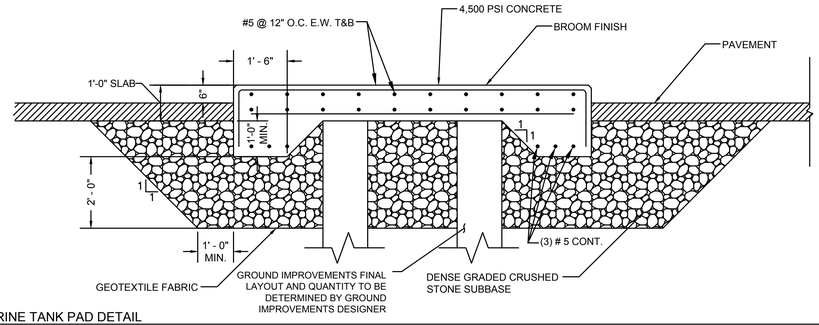


NOTES:

1. CONTRACTOR SHALL SIZE SEDIMENT DEWATERING PAD (10' X 10' MIN.) TO PREVENT OVERFLOW OF INSTALL MULTIPLE SEDIMENT DEWATERING PADS AT LOCATIONS APPROVED BY THE ENGINEER AT NO ADDITIONAL COST TO THE OWNER.
2. DEWATERING PAD SHALL BE FIELD LOCATED IN COORDINATION WITH THE ENGINEER AND SHALL NOT BE IN AN AREA WHERE IT WILL PERCOLATE WATER INTO THE FOUNDATION EXCAVATION. CONTRACTOR SHALL SAW-CUT AND REMOVE PAVEMENT AND SUB-GRADE GRAVEL FILL IF NEEDED AND RESTORE THE DISTURBED AREA IN ACCORDANCE WITH DETAIL 5 ON THIS SHEET.

8 SEDIMENT DEWATERING PAD - SECTION

SCALE: N.T.S.



PLAN VIEW - JOINING DETAIL

3 SINGLE COMPOST FILTER TUBE DETAIL

SCALE: N.T.S.

GENERAL NOTES:

1. PROVIDE A MINIMUM TUBE DIAMETER OF 12 INCHES FOR SLOPES UP TO 50 FEET IN LENGTH WITH A SLOPE RATIO OF 3H:1V OR STEEPER. LONGER SLOPES OF 3H:1V MAY REQUIRE LARGER TUBE DIAMETER OR ADDITIONAL COURSING OF FILTER TUBES TO CREATE A FILTER BERM. REFER TO MANUFACTURER'S RECOMMENDATIONS FOR SITUATIONS WITH LONGER OR STEEPER SLOPES.
2. INSTALL TUBES ALONG CONTOURS AND PERPENDICULAR TO SHEET OR CONCENTRATED FLOW.
3. DO NOT INSTALL IN PERENNIAL, EPHEMERAL OR INTERMITTENT STREAMS.
4. CONFIGURE TUBES AROUND EXISTING SITE FEATURES TO MINIMIZE SITE DISTURBANCE AND MAXIMIZE CAPTURE AREA OF STORMWATER RUN-OFF.
5. MULCH MATERIAL FOR THE FILTER TUBES SHALL BE WEED-FREE STRAW, WOOD EXCELSIOR, COMPOST, OR WOOD CHIPS, OR COIR. STRAW SHALL BE WEED FREE AND DERIVED FROM THRESHING OF GRAIN CROP.
6. CURVE ENDS UPHILL TO PREVENT DIVERSION OF UNFILTERED RUN-OFF.

7 BRINE TANK PAD DETAIL

SCALE: N.T.S.

NOTES:

1. GENERAL CONTRACTOR IS RESPONSIBLE FOR CONSTRUCTION OF ALL CONCRETE PADS.
2. SEE LAYOUT AND GRADING PLANS FOR FINISH GRADE
3. COORDINATE WITH ALL CONTRACTORS AND ADJUST PAD LOCATIONS AND DIMENSIONS IN FIELD
4. SLABS 8" OR LESS IN THICKNESS SHALL HAVE ONE LAYER OF REINFORCING PLACED IN THE TOP ONE THIRD OF THE SLAB.
5. THE EXACT SIZE, SHAPE AND LOCATION OF EQUIPMENT (HOUSEKEEPING) PAD(S) SHALL BE DETERMINED BY THE CONTRACTOR AFTER APPROVAL OF SHOP DRAWINGS FOR EQUIPMENT. ANCHOR BOLTS, WHERE REQUIRED, SHALL BE SIZED AND LOCATED ACCORDING TO THE MANUFACTURER'S REQUIREMENTS.
6. CONTRACTOR SHALL PROVIDE CAULK WITH POLYSULFIDE SEALANT AND PREFORMED JOINT FILLER WHERE EQUIPMENT PADS ADJOIN THE BUILDING.
7. THE ENTIRE EXPOSED SURFACE OF BRINE TANK PAD SHALL BE COATED WITH HYDROZO MASTERPROTECT H1000 PENETRATING SEALER OR EQUAL.

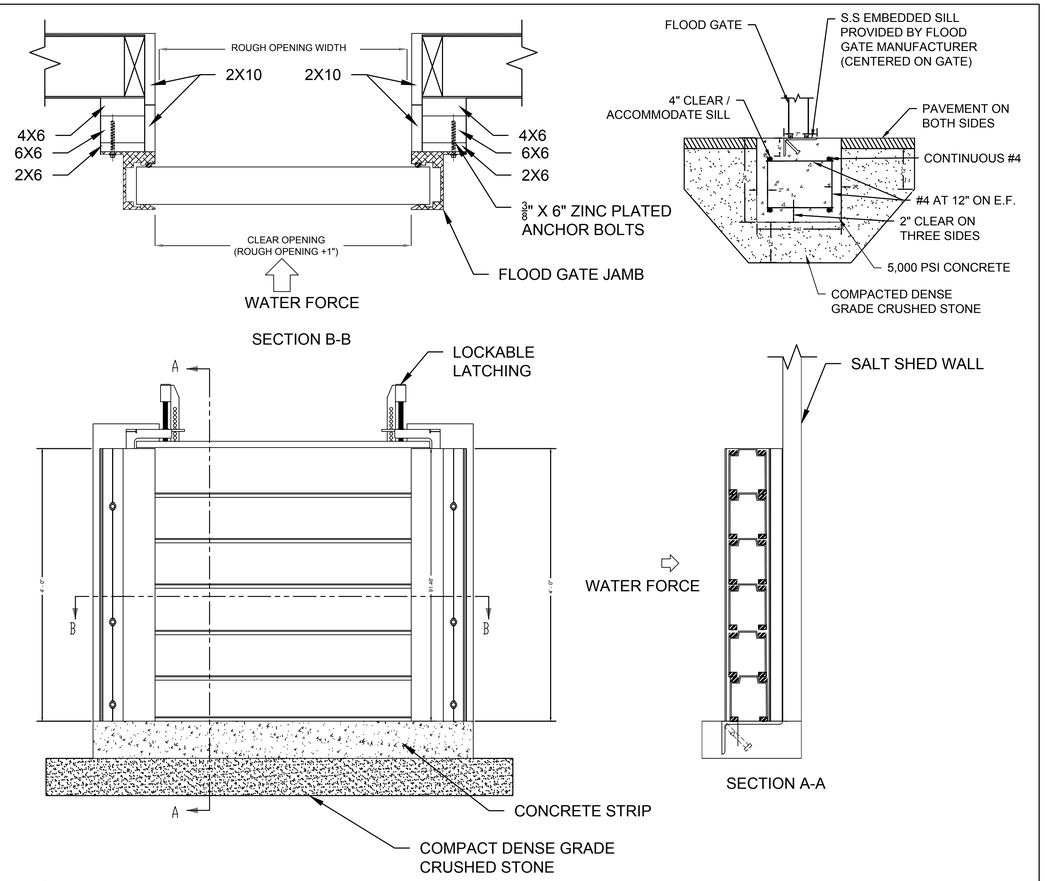
CIVIL DETAILS I

Sheet Number:

C-5

Minutes Acceptance: Minutes of Jul 18, 2022 7:45 PM (Reading of the Minutes)

WESTON & SAMPSON COPYRIGHT 2019

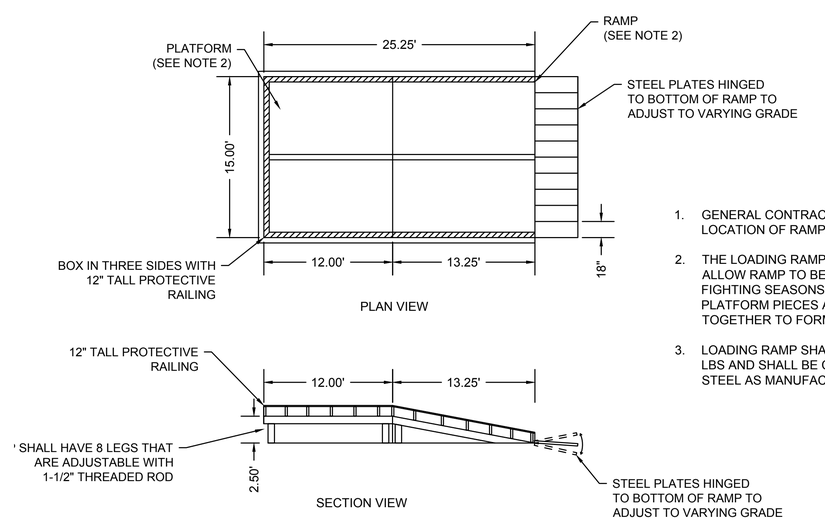


1 BRINE SYSTEM EQUIPMENT LAYOUT PLAN

SCALE: 1"=2'

NOTES:

1. BRINE DISPENSE STATION SHALL BE CALCOTE FILL SYSTEM (CFS-1000) AS MANUFACTURED BY GVM OR EQUAL. THE DISPENSE STATION SHALL INCLUDE A STAND CONSTRUCTED FROM A 3'X3' STEEL BASE WITH A 3" SQUARE TUBE STEEL WITH HOSE RACK ATTACHED. ALL STEEL COMPONENTS SHALL BE HOT DIPPED GALVANIZED MEETING ASTM A-123.
2. THE BRINE PUMP SHALL BE MOUNTED TO THE HOT DIPPED GALVANIZED STEEL BASE AND SHALL BE EQUIPPED WITH A POLYETHYLENE UV STABILIZED, WEATHER TIGHT HOUSING. THE PUMP SHALL ALSO COME WITH ITS OWN THREE WAY VALVE IN ADDITION TO THE VALVE SHOWN IN THE DETAIL, TO ALLOW THE OWNER TO FILL AND EMPTY SADDLE TANKS.
3. THE BRINE DISPENSE STATION SHALL INCLUDE A HOSE RACK MOUNTED TO THE 3" TUBE STEEL, CAPABLE OF STORING 25FT X 1 INCH CHEMICAL RESISTANT RUBBER HOSE, USED TO FILL AND EMPTY SADDLE TANKS.
4. THE WALL MOUNTED HOSE REEL SHALL BE A STAINLESS STEEL MANUAL REWIND HOSE REEL CAPABLE OF STORING 50'X$\frac{3}{4}$" CHEMICAL RESISTANT HOSE. THE HOSE REEL SHALL BE MODEL SS4018-17-18 AS MANUFACTURED BY HANNAY REELS OR APPROVED EQUAL.
5. THIS DETAIL IS SCHEMATIC ONLY AND NOT ALL COMPONENTS ARE SHOWN. THE CONTRACTOR SHALL PROVIDE ALL EQUIPMENT, VALVES, FITTINGS, AND PIPING REQUIRED TO PROVIDE A COMPLETE AND OPERABLE SYSTEM THAT WILL ALLOW THE OWNER TO FILL AND EMPTY SADDLE TANKS FROM OUTSIDE THE SALT SHED USING THE 25'X1" HOSE AND TO PRE-TREAT THE SALT PILE INSIDE THE SALT SHED USING THE 50' X 3/4" HOSE MOUNTED ON THE HOSE REEL INSIDE THE SHED.
6. THE 2,000 GALLON BRINE TANK SHALL BE EQUIPPED WITH A FILL PORT CONNECTION LOCATED NEAR THE TOP OF THE TANK.
7. WALL PENETRATIONS FOR BRINE SYSTEM HOSE SHALL BE AT LEAST 4FT ABOVE FINISHED FLOOR AND SHALL BE SEALED WEATHER TIGHT.
8. CONTRACTOR SHALL PROVIDE TWO PRESSURE RELIEF VALVES TO PREVENT THE BRINE PUMP FROM OVER PRESSURING AND BURSTING THE SUPPLY LINES IF THE CONTROL VALVES AT THE END OF THE SUPPLY LINES ARE CLOSED WHILE THE PUMP IS RUNNING. RELIEF VALVE SHALL RELIEVE PRESSURE BY RETURNING THE FLUID BACK TO THE 2,000 GALLON BRINE TANK.



2 FLOOD GATE DETAIL

SCALE: N.T.S.

NOTES:

1. FLOOD GATE SYSTEM SHALL BE HYDRODEFENSE FLOOD PLAN XL (FP-535) AS MANUFACTURED BY PS FLOOD BARRIERS OR APPROVED EQUAL.
2. FLOOD GATE PLANKS AND FRAME SHALL BE CONSTRUCTED FROM 6000 SERIES ALUMINUM ALLOY. THE GATE SYSTEM SHALL BE SEALED USING UV RESISTANT EPDM.
3. GATE SYSTEM SHALL BE DESIGNED TO WITHSTAND HYDROSTATIC PRESSURES GENERATED FROM TWO FEET OF WATER, THAT WOULD OCCUR DURING A 100 YR FLOOD EVENT.

1. GENERAL CONTRACTOR TO COORDINATE WITH OWNER FOR FINAL LOCATION OF RAMP.
2. THE LOADING RAMP SHALL CONSIST OF FOUR SEPARATE PIECES TO ALLOW RAMP TO BE DISASSEMBLED AND STORED DURING NON SNOW FIGHTING SEASONS. THE FOUR PIECES SHALL INCLUDE TWO PLATFORM PIECES AND TWO RAMP PIECES THAT CAN ALL BE JOINED TOGETHER TO FORM THE COMPLETE RAMP ASSEMBLY.
3. LOADING RAMP SHALL HAVE A MINIMUM LOADING CAPACITY OF 50,000 LBS AND SHALL BE CONSTRUCTED FROM HOT DIPPED GALVANIZED STEEL AS MANUFACTURED BY NATION RAMPS OR APPROVED EQUAL.

SURFACE MOUNTED RACEWAY

LIGHTING FIXTURES

B 3b B 3b — SURFACE MOUNTED LED FIXTURE. "B" DENOTES FIXTURE TYPE, NUMERAL DENOTES CIRCUIT NUMBER, "b" SUBSCRIPT DENOTES SWITCH CONTROL WHERE SHOWN. FIXTURES THAT ARE FILLED IN HALF OF FULL SOLID DENOTE FIXTURES WITH BACKUP EMERGENCY BATTERY BALLAST.

LIGHTING CONTROL SWITCHES

MOUNT 4'-0" AFF UNLESS NOTED OTHERWISE.

S_{TMa} — SINGLE POLE 0-120 MINUTE TIMER SWITCH (120/277V). "a" SUBSCRIPT DENOTES CIRCUITS CONTROLLED.

S_{a} — SINGLE POLE SWITCH (120/277V). "a" SUBSCRIPT DENOTES CIRCUITS CONTROLLED.

RECEPTACLES

DUPLEX CONVENIENCE OUTLET RATED 20A, 125V. U-SLOT GROUNDED TYPE MOUNTED 18" ABOVE FINISHED FLOOR TO CENTER LINE. ALL OTHER MOUNTING HEIGHTS SHALL BE AS NOTED ADJACENT TO THE SYMBOL. REFER TO RECEPTACLE ABBREVIATIONS FOR SPECIAL PURPOSE RECEPTACLES.

SPECIAL PURPOSE RECEPTACLE. REFER TO PLANS FOR NEMA CONFIGURATIONS

POWER DISTRIBUTION EQUIPMENT

PANELBOARD. SURFACE MOUNTED

J — JUNCTION BOX WITH BLANK COVERPLATE, SIZE AS REQUIRED BY N.E.C.

S_{MS} — THERMAL MOTOR SWITCH

ABBREVIATIONS

AFF	ABOVE FINISHED FLOOR
AC	ALTERNATING CURRENT
A	AMPERE
AF	AMP FRAME
AT	AMP TRIP
ATC	AUTOMATIC TEMPERATURE CONTROLS
ATS	AUTOMATIC TRANSFER SWITCH
BKR	BREAKER
C	CONDUIT
CKT	CIRCUIT
CB	CIRCUIT BREAKER
EC	ELECTRICAL CONTRACTOR
EMT	ELECTRIC METALLIC TUBING
EWC	ELECTRIC WATER COOLER
EWH	ELECTRIC WATER HEATER
EF	EXHAUST FAN
FL	FLOOR
FLA	FULL LOAD AMPERE
GC	GENERAL CONTRACTOR
GFI	GROUND FAULT INTERRUPTER
GND	GROUND
HOA	HAND OFF AUTOMATIC
HP	HORSEPOWER
IG	ISOLATED GROUND
JB	JUNCTION BOX
KVA	KILOVOLT AMPERES
KW	KILOWATT
MCB	MAIN CIRCUIT BREAKER
MLO	MAIN LUGS ONLY
MC	MECHANICAL CONTRACTOR
MTD	MOUNTED
MTG	MOUNTING
NMC	NON-METALLIC CONDUIT
NC	NORMALLY CLOSED
NO	NORMALLY OPEN
NA	NOT APPLICABLE
NIC	NOT IN CONTRACT
NTS	NOT TO SCALE
PNL	PANELBOARD
PH	PHASE
PVC	POLYVINYL CHLORIDE CONDUIT
RSC	RIGID GALVANIZED STEEL CONDUIT
SF	SUPPLY FAN
SS	SAFETY SWITCH
TEL	TELEPHONE
TRF	TRANSFORMER
V	VOLTS
W	WATTS OR WIRE
WP	WEATHERPROOF
4WSN	4-WIRE SOLID NEUTRAL

RECEPTACLE ABBREVIATIONS

GFI	GROUND FAULT CIRCUIT INTERUPTER, PERSONAL PROTECTION
WP	WEATHERPROOF RECEPTACLE WITH COVERPLATE LISTED FOR WET LOCATION WITH AN ATTACHMENT PLUG INSERTED.

SITE INSPECTION AND VISITATION

THE ELECTRICAL CONTRACTOR SHALL VISIT THE SITE AND INSPECT EXISTING CONDITIONS, SERVICES, CONDUITS, SPATIAL CONSIDERATIONS AND ALL OTHER PERTINENT CONDITIONS TO FULLY FAMILIARIZE HIMSELF WITH CONDITIONS TO BE ENCOUNTERED IN THE PERFORMANCE OF THIS WORK. THE ELECTRICAL SUBCONTRACTOR SHALL ALSO COORDINATE WITH THE GENERAL CONTRACTOR THE INSTALLATION OF THE ELECTRICAL SYSTEMS. FAILURE TO DO SO SHALL NOT RELIEVE THE ELECTRICAL SUBCONTRACTOR OF THE RESPONSIBILITY FOR FULL COMPLETION OF THE WORK IN ACCORDANCE WITH THE DRAWINGS AND SPECIFICATIONS. VERIFY EXISTING SERVICES WHICH WILL BE UTILIZED FOR CONNECTION TO THE NEW SYSTEM. IF DISCREPANCIES EXIST BETWEEN THE CONTRACT DRAWINGS AND THE ACTUAL EXISTING CONDITIONS, THE ELECTRICAL SUBCONTRACTOR SHALL NOTIFY THE OWNER/ENGINEER PRIOR TO PROCEEDING WITH INSTALLATION.

GENERAL NOTES

1. DRAWINGS ARE DIAGRAMMATIC ONLY. THE EXACT LOCATION, MOUNTING HEIGHTS, SIZE OF EQUIPMENT AND ROUTING OF RACEWAYS SHALL BE COORDINATED AND DETERMINED IN THE FIELD.
2. ALL STRAIGHT FEEDER, BRANCH CIRCUIT AND AUXILIARY SYSTEM CONDUIT RUNS SHALL BE PROVIDED WITH SUFFICIENT PULL BOXES TO LIMIT THE MAXIMUM LENGTH OF ANY SINGLE CABLE PULL TO 150 FEET. EXACT SIZES OF PULL BOXES AND LOCATIONS TO BE DETERMINED IN THE FIELD BY THE ELECTRICAL CONTRACTOR.
3. SLEEVES ARE TO BE UTILIZED FOR PASSAGE OF CONDUITS THROUGH FLOORS OR WALLS.
4. ALL LIGHTING FIXTURES, ELECTRICAL DEVICES, CABLES AND RACEWAYS ARE TO BE INDEPENDENTLY SUPPORTED. FIXTURES ARE TO BE SUPPORTED FROM THE STRUCTURE.
5. COMBINED HOMERUNS OF TWO (2) OR THREE (3) CIRCUITS MAY BE UTILIZED. HOWEVER, THE NEUTRAL CONDUCTOR IS TO BE INCREASED TO #10AWG. COMBINED HOMERUNS ARE TO BE LIMITED TO 20A, LIGHTING AND POWER CIRCUITS.
6. WORK SHALL CONIFORM TO THE MASSACHUSETTS ELECTRICAL CODE, MASSACHUSETTS BUILDING CODE, NFPA AND REQUIREMENTS OF LOCAL AUTHORITIES HAVING JURISDICTION.
7. THE WORD "CONTRACTOR" AS USED IN THE "ELECTRICAL WORK" SHALL MEAN THE ELECTRICAL SUBCONTRACTOR.
8. CONTRACTOR SHALL PAY FOR ALL PERMITS, INSURANCE AND TESTS, AND SHALL PROVIDE LABOR AND MATERIAL TO COMPLETE THE ELECTRICAL WORK SHOWN.
